We will take Japan first, as there is less ambiguity with regard to land forces of this Power than exists in respect to Russia. In Japan military service is obligatory, and the male population is liable for service between the ages of 17 and 40. It would be difficult to pin down the Japanese military system to any one European model. It has been evolved after most careful study from the best of the various systems existing in Europe, and adapted to the requirements of the country and constitution. In the matter of military instruction Germany would appear to be the model of which the Japanese have made most use. The army is divided in three groupings, viz.—The permanent establishment, the reserve, and the territorial army. The period of service is just over 12 years, of which period three years are passed in the Regular Aimy, four years and four months in the Reserve, and five years in the territorial army. This gives the little Asiatic State the following national strength available upon an emergency:—Permanent Army, 7,500, officers and 190,000 men. The detail of this force is 53 three battalion regiments of infantry, 55 squadrons of cavalry, 19 regiments of six-gun batteries of field artillery, 20 battalions of fortress artillery, 13 battalions.

The Reserve furnishes 35,000 officers and men of all arms, with over 100 guns, while the terri

The Reserve furnishes 35,000 officers and men of all arms, with over 100 guns, while the territorial army would bring another 200,000 men of all arms with 312 guns into line with the first and second lines. Thus, with the militia, the land strength of the Japanese nation may be reckoned in round numbers as consisting of over 430,000 officers and men, 1,200 guns, and 90,000 horses. The infantry is armed with the Midji magazine rife throughout. The armament of the other two groups is not quite so satisfactory, as it is believed to be made up of three less serviceable patterns of rifle, of which only one pattern, a third of the total, has magazine attachment. The cavalry, which carry a sword but no lance, are armed with the Midji carbine. The field artillery is armed with the Arisaka 75mm. q.f. gun, 1808 model. The fighting quality of the Japanese army is not altogether an unknown quantity, since it was tested recently in their own campaign in Korea and in conjunction with the allies in the advance to Peking and subsequent operations. In the latter campaign the opinion formed by both the American and our own experts was that the discipline and equipment of the Japanese troops was everything that could be desired. But, of course, it should be remembered that up to date the Japanese have not met a European enemy. Opinions differ as to the discount, if any, which should be allowed on this head. Exception, however, has been taken by European experts as to the formation used in the infantry attack. This, however, if a defect, will doubtless be remedied by a little experience. To taken an independent view, we may quote from the American official report on the Japanese troops during the Peking operations. "If Japan can keep the armament and equipment on a par with her soldiers, she is a most valuable ally and a mos formidable enemy."

formidable enemy."

The estimate of the Japanese land forces is comparatively plain sailing, as that country's resources, are not dispersed and are within easy distance of the sphere in which any military operations are likely to take place. But with regard to the Russian forces available for the same sphere considerable ambiguity exists. Owing to the exclusive policy which Russia enforces throughout her territories it is practically impossible, at this distance, to form any but an approximate estimate of the military strength of her land forces in Far Eastern Asia and Manchuria. But we do know that before the Chinese trouble in 1900 the Russian force in Eastern Siberia was about 35,000 men. During the campaign this was increased threefold, and at the close of the principal military operations which followed upon the Boxer outbreak the distribution of the two Siberian army

seas, will not much exceed 200,000 men.

How far thesetroops are prepared to take the field it is difficult to say. In the best of circumstances their treatment is of the poorest; consequently they are inured to hardship, and possibly would not feel the change to rough campaigning, as do other troops, when the change from peace surroundings is more severe. Any way, the Americans, who made a careful study of all troops engaged in the Boxer operations, formed a very low estimate of both Russian officers and men. In short, the best they could say for them was that they were "industrious foragers" and possessed an asset in the Russian "kitchen wagon."

Professional opinion at the present moment anticipates that Japan would be able to dominate the sea, if war should result before Russia can bring further naval reinforcements into Chinese waters. In this case it is generally surmised that Japan would throw a land force into Manchuria. When once the sea is clear, she has exceptional facilities by which she can rapidly embark a large expeditionary force. She has three harbours well connected with the interior by railway; and, if she has selected harbours or disembarcation in either the Yellow or Japan Seas, and can maintain her sea communication, she should be able to land an expeditionary force superior to any force that Russia by means of her land communications can concentrate against her in four months. It must be remembered that not only will Russia be operating in a country the friendliness of which is doubtful and will have to be maintained by the presence of garrison troops, but her land communication, upon study, does not seem to be the same military asset that so many would have us believe. It can in no wise compare with the short sea transport of the Japanese, provided the latter can keep the sea way open. The Trans-Siberian Railway is but a single line, and the best single line, with enlarged and constant sidings, under the most skilful manipulation, would not serve for the maintenance of more than 100,000 men. The Siberian Railway has stations and sidings about 25 miles apart, is very flimsy in structure, and Russian railway management is notoriously inefficient. Over and above this, the railway is extremely vulnerable. To protect it adequately would eat up almost as many men as it could at a European computation, in the present irdequately would eat up almost as many men as it could at a European computation, in the present incremistance, supply. It cannot be supposed that this has escaped the perspicacity of the Japanese, and their agents may be expected to find ample means of constantly wrecking the most vulnerable portions of the railway. But, ev

A resolution declaring "the consolidation of friendship between the United States and Great Britain and Ireland" a necessity for commercial prosperity, and favouring a permanent treaty of arbitration between the countries, was adopted at the annual meeting of the Massachusetts State Board of Trade on Jan. 20th.

THE STOCK MARKET.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

DESTRUCTIVE TIDAL WAVE.

London, February 5.

A tidal wave accompanied by a gale has swept both coasts of the English Channel, causing enormous damage at Plymouth Portsmouth, and Hastings. London adjacent to the Thames were flooded.

EARTHQUAKE IN JERSEY.

An earthquake has taken place in Jersey. GREAT FLOODING IN ENGLAND.

In consequence of the incessant rains, large tracts of England have been submerged especially in the Thames valley.

THE RUSSIAN WARSHIPS.

London, February 5 The Russian battleship Osliabya, the Volunteer steamer Saratoff, and three destroyers have left Suez on their way to the Far East.

THE EVACUATION OF MANCHURIA.

In the House of Commons, Earl Percy. Under Secretary of State for Foreign Affairs stated that frequent representations had been made to Russia regarding the delay in the evacuation of Manchuria, and also regarding the substitution of a Russian nominee for a member of the Chinese Imperial Maritime Customs at Newchwang.

MR. CHAMBERLAIN GOING TO EGYPT.

London, Feb. 6. Mr. Chamberlain is going away for two months. It is believed that he is going to Egypt.

RUSSIA MAKES NO CONCESSIONS.

Russia's reply was forwarded yesterday to Viceroy Alexieff, and if he approves, it will be despatched to Tokyo, where it will arrive on Monday at latest. The belief prevails in St. Petersburg that Russia will not consider Japan's demand regarding Manchuria.
The Times' St. Petersburg correspondent

reports that the Tsar's hesitation has been overcome, and Russia makes no concessions.

RUSSIA MAKES NO CHANGES.

London, February 7.

The Daily Graphic says that no essential change has been made in the tenour of Russia's Note since that of the 29th of Though conciliatory in tone, it firmly declines to accede to the wishes of interests in the Far East. Japan regarding the integrity of China. It makes concessions on other points but this vital issue, and Japan's resolution to reject the terms is unaltered.

RUSSIA'S REPLY REACHES TOKYO

Petersburg says that Baron Rosen has the world of affairs and in the city, that the the colonial officials Gansborn and Loutsch.

handed Russia's reply to the authorities in Tokyo.

as far as it possibly can go to meet Japan's wishes. If Japan is animated with the same peaceful sentiments as Russia it will receive the fresh proposals in a manner paving the way for eventual accord.

Baron Rosen has been furnished with full instructions for the fresh phase of the nego-

tiations.

THE BRITISH CHINA SQUADRON.

The P. & O. steamer Palawan has sailed from London with a large quantity of ammunition for China; 110 naval ratings for the British China squadron, and a few infantry. RUSSIA THROWS RESPONSIBILITY ON JAPAN.

London, February 8.

A Russian circular, dated the 6th inst. states that the recall of the Japanese Minister and the whole of the Legation staff at St. anglish Channel, Petersburg, led to the recall of the Russian at Plymouth, Minister at Tokyo. It adds that such pro-Quarters of cedure on the part of the Tokyo Government, which did not even await the arrival of the Russian reply, throws on Japan the whole responsibility which can arise from the rupture of diplomatic relations.

RAILS TO BE LAID ACROSS LAKE BAIKAL

Orders have been issued at St. Petersburg to lay rails immediately over the ice at Lake Baikal in order to save the present delays. THE TSAR APPEALS TO HEAVEN

The Tsar is about to proceed to Moscow to submit his case and the Empire's fate to the Almighty before the altar of the Troitzko monastery, as his forefathers have done before drawing the sword.

UNREST IN THE BALKANS.

London, February 9

The unrest in the Balkans is markedly increasing. The Turkish Government is commandeering all rolling stock, as it did before the Greek War.

JAPANESE IN RUSSIA.

The British Embassy in St. Petersburg takes charge of Japan's interests.

FALL OF STOCKS

London, February 10. Russian stocks have fallen four points and Japanese 41/2 per cent. Consols a half.

TERRIBLE FIRE IN BALTIMORE

An appalling fire is raging in Baltimore. It began at eleven o'clock on Sunday morning and is still burning fiercely. Fire brigades in New York, Philadelphia and other cities sent contingents, but they are all powerless to stay the progress of the flames. The losses hitherto are roughly estimated at ten million pounds sterling.

TO SUPPORT THE GOVERNMENT.

The Duke of Devonshire, speaking at a fiscal meeting in the Guildhall, said that whatever were their political differences all must unite in an endeavour to prevent embarrassment to the Government in their anxious task of safeguarding the empire's

(RECEIVED AT THE LEGATION OF FRANCE.) PUBLIC OPINION IN ENGLAND AND FRANCE.

Saigon, February 10. Later. A semi-official statement published in St. all classes of the population, particularly in

Russo-Japanese conflict should be localised and limited to the two adversaries.

It is affirmed from authoritative sources that the same desire exists without any divergence in political circles.

French journals express sympathy at the same time for both Russia and Japan. They express a belief that the war will be localized.

English journals express much sympathy for Japan and throw the responsibility upon

DECLARATION OF WAR.

It is telegraphed from Tokyo that the declaration of war will be issued immediately.

ADMIRAL ALEXIEFF'S REPORT.

Saigon, February 10.

The Messager du Gouvernement publishes the following despatch from Admiral Alexieff to the Emperor of Russia:—"I have the honour to respectfully inform Your Majesty that towards midnight eight or nine Japanese torpedo-boats attempted suddenly to blow up with mines (?) the ships of the Russian Squadron which were in the out roadstead at Port Arthur. The iron-clads Retvisan and Csarewitch and the cruiser Pallada were injured. These ships are about to be examined in order to ascertain the amount of the injury."

(FROM THE " DEUTSCHE JAPAN-POST.") GERMAN SOUTHWEST AFRICA.

Berlin, February 5.
The reports coming from German Southwest
Africa are favourable. Windlusk and Okahandja
have been relieved. The Hereros are fleeing. The
English neighbours have behaved very obligingly
during all the troubles.

THE KAISER

Kaiser Wilhelm intends to made a sea trip through the Mediterranean during March or April

THE FAR EAST.

The Washington despatch of the Agence Havas reporting a moral isolation of Japan is apocryphal. Even in Paris people are afraid that the Russian concessions already known in Paris may be insufficient to satisfy Japan. America and Germany declined in Eastern Asia every cooperation with any Power for or against Japan or Russia.

THE REICHSTAG'S VETO.

Berlin, February, 6.
The budget committee of the German Reichstag has declined to increase the number of corporals in the German army as proposed by the

GERMAN SOUTH-WEST AFRICA.

From German South-west Africa the following reports come :- On January the 14th at Waterreports come:—On January the 14th at Waterburg Mr. Hoepner, an official of the Berlin colonial office, and the colonial expert Watermeyer were murdered by the Hereros. Windhuk was not attacked by the negroes. The railway and telegraph were rebuilt. Otjimbingwe and Gobabis are still besieged. All cattle in the environs were stolen. To-day a reinforcement of troops will leave Germany for Africa. The Kaiser will bid them farewell himself.

THE SITUATION.

Berlin, February 7.

The Russian commercial telegraphic office reports from St. Petersburg: To-day Baron Rosen in Tokyo received from Admiral Alexieff the Russian note, in order to deliver it to the Japanese Government, and all instructions. The note is very peaceful. It is expected that Baron Rosen will hand it over to-day, and it is hoped in St. Petersburg that Japan will accept it without conditions. ditions.

GERMAN AFRICA.

The Hereros in German Africa have murdered

COUNT LAMSDORFF'S NOTE

Berlin, February 8.

From St. Petersburg it is reported: Count Lamsdorff, Minister of Foreign Affairs, sent a circular note to the Powers by which he communicated that Japan had broken off diplomatic relations with Russia.

A SURPRISE TO BERLIN.

Berlin, February o.

The rupture of the Russo-Japanese relations has come as a surprise to Berlin. Nevertheless the patience shown by Japan is universally acknow-ledged. By Germany strict neutrality is proledged. By Germany strict neutrality is pro-claimed according to the good mutual relations existing. In military and other circles every sympathy is felt for Japan. A declaration of war is not absolutely necessary. It is mentioned that the Tsar will to-morrow address from Moscow a manifesto to the Russian people. Up till now nothing is known about England's alleged attempts to intermediate; France will do nothing without England.

GERMAN COLONIAL AFFAIRS

In German Southwest Africa heavy fighting has taken place. Lieutenant Franke, of the colonial troops, entered Omaruru with a company of soldiers and inflicted severe losses on the of soldiers and inflicted severe losses on the enemy. Most likely the Herero chief, named Michael, was killed. The enemy still surrounds Omaruru. A landing party from the German cruiser Habicht, under command of Lieutenant von Winkler, of the colonial troops was ordered to proceed from Haribib to Omaruru. The losses show to-day 137 persons, of which 32 fell in action and 47 were murdered.

(FROM THE " JUL SHIMPO.")

NAVAL ENGAGEMENT

Chemulpo, Feb. 9, 4.30 p.m. A Japanese squadron, under the command of Admiral Uryu, consisting of a certain number of warships and torpedo destroyers, arrived yesterday at 9 a.m. in Chemulpo, where the British cruiser Talbot, the U. S. gunboat Vicksburg, the French cruiser Pascol, the Italian cruiser Elba, and the Russian cruiser Varyag and gunboa Koreets were lying. Salutes were exchanged between the Japanese flag-ship and the foreign ships. The Russian warships were in a confused state and attempted to get away from the port, but could not (owing to the presence of the Japanese ships). The night passed without incident

This morning at 9 o'clock, firing began be-tween the Koreets and the Japanese squadron outside the port. In a short time the Koreets was badly damaged. The Vuryag then appeared on the scene and engaged the Japanese warships. In a very short time one of her masts was shot away with the result that many of her crew were killed or injured. killed or injured.

The Koreetz was in such a state that she could hardly float and it is understood that many on board were killed or wounded. Many others who got to land were captured by the Japanese

The Varyag continued firing for many hours, in the course of which she sustained great damage to her hull. She then ran on the point near Yuen Island, where she took fire and was soon in a very serious state.

This engagement commenced about 9 a.m. and ended about 2 p.m. The Japanese warships sustained no damage but inflicted on their foes dreadful injuries.

It is semi-officially reported in Tokyo that the Russian transports Rossia and Orelihe (? Orel) have been captured by Japanese warships. The former was convoyed by the Osaka Shosen Kaisha's Taichu Muru and Tainan Maru to Saseho.

THE FIGHT OFF CHEMULPO.

Chemulpo, Feb. 9, 6 p.m It is presumed that the Korcelz sank after the engagement, in which she sustained severe GREAT COTTON CONSIGNMENT FOR JAPAN damage

The Varyag took fire and destroyed a great part of her hull.

TWO RUSSIANS SUNK.

Chefoo, Feb. 9, 11.23 p.m.
Fighting between Japanese and Russian warships took place on the 8th at 11 p.m. at Port Arthur. The Japanese attacked the Russians lying outside the port. Two of the latter (battleships) were sunk by torpedoes while trying to enter the port. One Russian cruiser was also attacked by torpedoes and went ashore while endeavouring to avoid sinking.

All the Russian warships are outside the port and in such a position as not to be able to get

and in such a position as not to be able to get

A general attack against the Russian squadron commenced this morning at 9 o'clock, the result being not yet ascertained.

THE "MANDJUR."

Shanghai, Feb. 8, 3.50 p.m.
The Russian gun-boat Mandjur (1,224 tons displacement and 13 knots,) left here to-day having taken in 80 tons of Cardiff coal.

(From the "Chuo Shimbun.")

THE ACTION OFF PORT ARTHUR

Chefoo, February 9.

A rumour was received here at t p.m. to the effect that a second engagement took place at Port Arthur on the 9th commencing at one in the morning and concluding in the evening. Many Russian warships were sunk or damaged. The Japanese fleet sustained more or less damage of which the details are yet unknown.

CAPTURED RUSSIAN SHIPS.

Saseho, February 9

The Russian Volunteer ships and whaling steamers which have been captured by the Japanese off Takeshiki and in Korean waters number six in all. They are expected to be brought

PUBLIC OPINION IN GREAT BRITAIN.

The papers throughout Great Britain generally approve the action of Japan. The Times and the Morning Post controvert the arguments of Russian papers which condemn Japan.

The Russian cruiser Varyag which is referred to in the above telegrams, is a fine ship of 6,500 tons, built at Philadelphia four years ago, and now on her first commission in the Far East. Like the Rossia she has four funnels but has only two Rossia she has four funnels but has only two masts. Her main battery consists of twelve 6-in. guns and her speed is put at 23 knots. Her complement of men would be about 450. As for the Korceta, she is an obsolete gunboat built in Stockholm, and carried as her chief weapons two 8-in. and one 6-in. guns, her speed being about 13 knots. She would carry about 180 men.—ED. f. M.]

(FROM THE " MANILA CABLENEWS.") AMERICAN POLITICS.

AMERICAN POLITICS.

Washington, January 19.

The Republican National Committee has announced that all State delegates to the presidential nomination convention who hold government offices will not be seated. This stand has created an immense sensation in political circles and it is said by the newspapers that President Roosevelt is the originator of the plan.

The Socialist Party has decided to hold its regular convention to nominate a candidate for the presidency in Chicago on the first of May next.

(FROM THE "HONGKONG TRIEGRAPH.") BRITISH INFLUENCE PREDOMINANT AT

PEKING. London, January 27 The Birmingham Post has excellent authority for stating that Sir Sir Ernest Satow, the British Minister at the Chinese capital, has forwarded to the Foreign

Office the text of an agreement concluded with China which is to be given publicity in the event of war.

The conclusion of the new compact with China shows that, whereas public opinion had regarded British influence with the Court at Peking as on the wane, in reality it has never been more dominant.

(FROM THE "HONGKONG DAILY PRESS."

London, January 29. 3,600 bales of cotton left Houston, Texas, yesterday for Japan. This is the record consignment for

YOKOHANA: SATURDAY, FEBRUARY 20TH, 1904.

SUMMARY OF NEWS.

THE German cruiser Tiger arrived at Chemulpo

TEN lighters carrying coal were sunk on the night of Feb. roth in Moji Straits.

A TELEGRAM from Taipeli, Formosa, reports that the silver yen advanced on Feb. 15th from sen 93

M. Sanada, a robber and murderer, was sentenced to death on Feb. 15th in the Tsu District

THREE foreign steamers purchased by the Osaka Shosen Kaisha at Hongkong arrived at Osaka on

THE Governor of Hyogo reports that the Kobe branch of the Russo-Chinese Bank closed its office on Feb. 15th.

Mr. Kawakami, Japanese Commercial Agent, left Vladivostock on Feb. 13th by the German

According to a telegram from Nagasaki, there are still eighty-five Russians there. They all service of Russia as a spy. keep low class restaurants.

Peter, brother of Mr. J. C. Peter, of the Hong-kong and Shanghai Bank, is said to be his pro-bable successor at Foochow.

THE most sensational news of the week has been the plucky torpedo attack upon the Russian fleet at Port Arthur.

THE Seventeenth Bank, Fukuoka, was destroyed by fire on Feb. 11th. The cause of the accident is not reported.

THE Nippon Yusen Kaisha has chartered the British steamer Lennox (3,677 tons) and took delivery on Feb. 17th at Kobe.

A JUNK capsized on the night of Feb. 12th off the district of Miura, near Kamakura, with the result that two sendo were drowned.

A TELEGRAM dated Feb. 14th from Shanghai states that Mr. George MacBain, former owner of the MacBain Line of steamers, is dead.

THE Toyo Kisen Kaisha's steamer Maru went ashore on Feb. 16th outside Shimonoseki Strait while on her way to Nagasaki.

A coolie employed by the Akibano-hara station, Tokyo, was crushed to death on Feb. 15th by two trains while working on the railway.

According to a telegram from Fukuoka, explosion occurred at the Kanaya Coal Mine, the result being that two men were killed.

Owned to damage, the telegraph cable between Fusan and Shimonoseki is interrupted. Communication is maintained by steamers.

Emperor has sent a telegram to President of the United States conveying condolences with regard to the fire in Baltimore.

Some Tokyo papers believe that an extraordin-ary session of the Imperial Diet will be convened on April 3rd at the Principal Headquarters.

T. Tanaka (57) an employee of the Mitsu-Bishi Bank, has been arrested on a charge of having embezzled yen 25,000 belonging to the

MR. HAVASHI, Japanese Minister at Seoul, tele-graphed on Feb. 13th that the Emperor of Korea had made to the Japanese troops gifts of cigarettes and provisions.

S. Horiuchi, 21) was arrested on Feb. 4th by the Isezaki-cho police, Yokohama, on a charge of having attempted to steal yen 250 from the First Bank by means of a forged cheque.

Over twenty British war correspondents, some fifteen Americans, and two Germans have applied to the Government, through the Legations con-cerned, for permission to go to the front.

The trial of M. Takahashi, who was arrested at Yokosuka on suspicion of having been in the Russian service as a military spy, will be opened in the Yokohama District Court on Feb. 20th.

PROPLE living at Itsugahara, Tsushima, have organized a society under the name of Choson Gidan. They aim to relieve the families of poor soldiers.

R. TAKAHASHI, a salt refiner living at Kanda, Tokyo, was arrested on the night of Feb. 10th at Tsukiji. He is charged with being in the

MR. W. G. Macvicar, the sub-agent of the Russo-Chinese Bank, who recently seized five Chartered Bank at Foochow, is about to take iron safes of the Yokohama branch, in security smaller sums, amount charge of the Hankow agency. Mr. W. G. for his counter-claim of yen 350,000, seized on stipulated institutions. YUEN SIH SONG, former compradore of the

Feb. 15th five iron safes in the Kobe branch of the bank.

The two Korean assassins who were recently sentenced by the Hiroshima Court for the murder of a Korean refugee were removed on Feb. 13th to Miike jail.

Owing to a sudden gale, four fishing boats capsized on Feb. 16th off Ainoshima, Fukushima prefecture, with the result that fifteen fishermen vere drowned.

THE German steamer Enima, which was temporarily seized at Yokohama on the ground that she had military stores for Port Arthur, was released on Feb. 13th on a pledge that she would change her destination.

A WORKMAN employed by the Nippon Railway Company was arrested on Feb. 15th. He had injured the railway between Furuma and Kopiri by throwing off the sleepers. The purpose of his offence is not yet known.

The Yokohama Specie Bank will hold on March 10th an ordinary meeting of the share-holders, when the accounts for the last half year will be submitted. The interim dividend is believed to be at the rate of 6 per cent.

KIYO HOSOVA, the wife of a Russian living at Hakodate, was ordered on Feb. 8th by the police to leave within twenty-four hours. She is suspected of having been assisting Japanese who were in the service of Russia as military spies.

UNLESS the U.S. Congress enacts legislation removing the export duty on Manila hemp shipped from the Philippines to countries other than the United States, France threatens to impose a countervailing duty on hemp products imported from the United States

THE Nisshin and Kasuga arrived at Yokosuka on Tuesday. On Thursday the commanding officers were received by the Emperor, while the crews were entertained at garden party in Yokohama. Entertainments in Tokyo followed on Friday.

WE are informed by the Post Office anthorities that a notification has been issued by the Department of Communications to the effect that for the present there is no means to forward postal parcels present there is no means to forward postal parcels destined for North China, viz., Tientsin, Paking, Chefoo, Shanhaikwan and Newchwang, etc., unless they, with exception of parcels for Newchwang, are subject to the Universal Parcel- Post Convention.

THE Danish engineering firm of Smidt and Company have received a large order for engines for cement manufactories, which are to be started for cement manufactories, which are to be started by the Russian Government in the vicinity of Port Arthur. The National Tidende states that these cement factories will be exclusively for the purpose of supplying material for Russian Go-vernment projects and fortifications in Manchuria. The engines are to be delivered early next year.

The will of the late Mr. J. J. Gurney, formerly of the engineering firm of Clark, Chapman, and Gurney, Gateshead, which has just been proved, contains the following bequests to charitable institutions:—£10,000 to the Baptist Missionary Society; £1000 each to the Baptist Zenana Mission, China Inland Mission, London City Mission, British and Foreign Bible Society, Church Missionary Society, London Missionary Society, Missionary Society, London Missionary Society Missionary Society, London Missionary Society, and Newcastle Hospital for Sick Children; £500 to the Christian Police Association; and smaller sums, amounting to £2500, to other significant control of the control of

THE FIGHT OFF PORT ARTHUR.

Monday, February 15. plugged. The repairs of the battleships, however, will be difficult, and it is impossible to tell when they will be completed. (We may remark in parenthesis that these are the being in Talien that the Fourth and Fifth ships which, according to His Excellency's Divisions were sent there. After the deprevious report "took part" in the battle parture of the torpedo-craft the fleet steered on the 9th instant!). The Pallada and the slowly westward in the direction of Wei-hai-Novik will be docked one after the other and wei, and then, bearing up, headed for Port Arthur. The Third Division of warshing their repairs will occupy about 15 days. The ships injured in the battle on the 9th The night of the 11th passed without incident.

Tokyo from the Japanese Legation in Paris. Its broad indication is that the Russian fleet has been effectually reduced to adopt a de-harbour, and the rest were scattered on Port Arthur; the two strongest iron-clads either side, apparently not in any order of fired four torpedoes, one of which missed. are hors de combat for an indefinite period battle. It is not stated exactly at what A British subject, apparently a nay two cruisers are to enter the dock turn and turn, and may be ready for sea again in 15

complete.

The wounded officers say that on the 6th instant, at I a.m., they received orders to prepare for commencing hostilities. All the commanders were at once assembled and ordered to take their ships to a rendesvous in Korean waters. At noon on the 7th this order had been obeyed, and over 50 vessels. were found at the appointed place. The Akashi (gun-boat) reported that the greater vessels, she quickly retired to her former resistion part of the Russian squadron was outside Fort Arthur, and that the Koreetz and the Varyag scouts, moved in the direction of Port Arthur. fighting force of the two fleets.

Port Arthur. wei, and then, bearing up, headed for Port Arthur. The Third Division of war-ships was sent ahead to reconnoitre. At dawn it got within 8,000 metres of the fortress, and and had cleared for action. Two or three ally hurt. There were apparently many of the enemy's vessels were seen to be in a disabled condition at the entrance of the ried away on stretchers. According to harbour, and the rest were scattered on Russian statements, the Japanese destroyers hour these observations were completed, but the time seems to have been just before The report of the Japanese casualties has not yet been officially published but a partial statement indicates that the Fifi suffered most. She had 2 (officers) killed, and to officers and men wounded. The Mikasa, the Shikishima and the Hatsue had to officers and men wounded. The Mikasa, the Shikishima and the Hatsue had to officers and men wounded. The Mikasa, the Shikishima and the Hatsue had to officers and men wounded. The Mikasa, the Shikishima and the Hatsue had to officers and men wounded. The Mikasa, the same cheered lustile to the forts the hands working at the dock, except the overseers, are Chinese, many of whom made their escape when the fighting commenced, operations must be greatly disorganized.

It is missabled. Dattle-ships. He further alleges that as all the hands working at the dock, except the overseers, are Chinese, many of whom made their escape when the fighting commenced, operations must be greatly disorganized. statement indicates that the right solution seen to burst over the enemy s single, and most. She had 2 (officers) killed, and 10 officers and men wounded. The Mikasa, the men cheered lustily. All fought as placidly as though they were at manœuvres. It shikishima and the Hatsuse had 4 casualties was observed that the Russian torpedo squadron had taken up a position which suggested an intention of attacking at a lavourable moment, but throughout the action it made no attempt to advance. The only one of the enemy's vessels that sought to shorten the range was the Novik (3,000 tons), or a ship like her, which steamed out to within 4,000 metres. Becoming immediately a target for several of the Japanese Becoming imposition.

Port Arthur. Thereupon the First, the ese and were therefore desirous of keeping Secondand the Third Divisions of Destroyers them at a distance. That object was Monday, February 15.

Admiral Alexieff, telegraphing to St.
Petersburg on the 11th instant, says that the Cesarevitch and the Pallada were brought into the harbour on the 9th instant, and that the hole in the hull of the Retvisan had been plugged. The repairs of the battleships, however, will be difficult, and it is impossible to the little vessels as they however, will be completed. (We may two Russian ships had been reported as essentification of the sheller from the shelter of the forts, but it is stated that not one of the shells fired from the shore batteries struck the Japanese ships. It is alleged that their lives or succeed. The crews of all the shells fired from the shore batteries the latter replied that they would sacrifice the latter replied that they would sacrifice the latter replied that they would sacrifice the Russian vessels did not use the best modern explosives. In fact, one of the waved farewell to the little vessels as they steamed off. It was because one or to be the forts, but it is stated that not one of the sheller fired from the shore batteries the Russian vessels did not use the best modern explosives. In fact, one of the ten-year-old type. The Japanese officers from whom the above particulars were obtained by the Acadic Stiendhow's particulars. were obtained by the Asahi Shimban's Saseho correspondent, allege that all the destroyers which had engaged in the night attack rejoined the fleet safely at the place appointed for ultimate rendezvous, none having received any serious injury.

There were three coal-carrying vessels in the eastern harbour at Port Arthur on the day of the attack. They left after the affair, were all brought into harbour on the 10th. The repairs of these vessels will have "progressed" in the course of three days. (What this last phrase means, exactly, we can not tell from the Japanese translation). The wounded men of the Pallada will probably all die, from the texplaintion). The wounded having been seriously injured by the gas of attack was then decided on. The First and the exploding torpedo. (That requires much explanation). A reconnaisance made of the the presence of making been seriously injured by the gas of attack was then decided on. The First and the tropedo enterprise. A general big enough for four men to walk in abreast. That was above the water-line, however: the promontory followed by the Third Divince in the presence of making lapanese ship. More within a distance of about 8,000 metres, it was above the water-line, however: among the Russian vessels in consequence and it appears that on two of them, a Nor-wegian and a British steamer, there were some casualties. They report—from Chefoo —that the Cesarculch had a hole in her side big enough for four men to walk in abreast. That was above the water-line, however: the promontory followed by the Third Divince guished. She had been brought into the harbour. A vessel like the Retrisan had also entered. Her crew were busily enamong the Russian vessels in consequence. means of torpedo-boats and gun-boats, among the Russian vessels in consequence gaged pumping. A cruiser, the Pallada of the right of the 1th passed without incident, of the torpedo attack, and that about one apparently, was aground on the Tiger's the largest to be mortally to find the second of the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had the squadron had their anchors up Tail Spit, but did not seem to be mortally to find the squadron had casualties: men were being constantly car-

A British subject, apparently a naval officer, who has returned to Japan having previous report of the Viceroy himself, they the final advance was made, fire was opened so much injured in the torpedo-attack on were all struck below the water-line, it is not from the enemy's side, seemingly from the struck below they can be restored to the ships in the centre of his line, that is fighting trim without the use of a dock, and to say, the vessels supposed to be disabled. This was followed immediately by the first. The head

> the two iron-clads torpedoed on the night of the 8th have been brought into the inner harbour, where they are hard aground; the *Poltava* is in the eastern harbour and the Diana, Askold and Novik are all in the western harbour. The impression conveyed by this news is that these 6 ships as well as the Pallada are quite unserviceable.

Tuesday, February 16. The master of the British steamer Fuhping, which arrived at Shanghai on the 13th from Port Arthur, bears out the statement that the Russian ships wounded in the attack by That appears to be the whole story of the the Japanese torpedo craft blocked the en were in Chemulpo. The Fourth Division was fight so far as it has now been published, trance to the harbour, but that, on the folthen directed to make for Chemulpo, under The range was 8,000 metres, with the one lowing day, they were towed into the harburenthe command of Rear-Admiral Uryu. It con-exception of the Novik. At such a range bour by seven steamers. This refers to the sisted of the Naniva, the Asama, the Taka- only guns of 8-inch calibre or upwards could ironclads Cesarevitch and Retvisan. As for chiho, the Akashi, the Nitakaand the Chiyoda, be of any service, and as the greater part of the Pallada, she had been run ashore on the with 5 torpedo-boats. The First, Second the Japanese Squadron's armament consists west of the harbour to prevent her from and Third Divisions, under Vice-Admiral of 6-inch quick-firers, the action can not sinking, and she was lying there at the time. Togo, having their torpedo-craft disposed as be regarded as a conclusive test of the of the British ship's departure. Thus the A passage to and from the harbour became urnscouts, moved in the direction of Port Arthur. Ingitting force of the two fleets. A passage to and from the harbour became unamely provided in the direction of Port Arthur. Ingitting force of the two fleets. A passage to and from the harbour became unamely provided from the evening of the obstructed from the evening of the obstru

the Japanese torpedo craft used Russian signals and obeyed the signals from the Russian ships, which completed the surprise. During the battle on the 9th great alarm prevailed in the town, several Japanese shells reached the streets, and one fell in the dock but did not explode. As to what the forts effected, this informant does not profess any knowledge, but he notes that the firing on the 9th was of short duration. As the Fuhping was leaving the harbour on the afternoon of the 10th she was fired at by a Russian guard-ship. The shell hit her on the port bow and made a hole 4 inches in diameter, passing thence through the Chinese passengers' saloon, where it wounded 5 passengers, 2 mortally. The bursting of the shell set the ship on fire but the flames were speedily extinguished. No explana-tion is forthcoming of this extraordinary act on the part of the Russians. The Fuhping was flying the British flag, and the outrage of firing on her without a summons of any kind is inexcusable. The only supposition possible is that the Russians were thoroughly demoralized. It appears that at the time of the Full-ping's departure defensive pre-parations were being vigorously pushed. Viceroy Alexieff himself handed 10 roubles each to the gunners in the forts who had distinguished themselves by the accuracy of their fire. The master says that in the forts and the town 13 persons were killed and 57 wounded by Japanese shells. The jiji Shim-po publishes the above details.

Feb. 20, 1904.]

The names of the Russian steamers captured by the Japanese en route for Port Arthur are the Rossia and the Arjin. The former was taken just as the squadron came abreast of the south-western promontory of Korea, the latter in the vicinity of Mokpo. During the night of the 7th great precautions were taken against a torpedo attack by the enemy, but the night passed quietly, the wind, however, being very high, the waves rough and the rain incessant. The 8th dawned fine. The Squadron advanced with the Third Division in front, next the Second and then the First, the torpedo-craft being on either flank. The Admiral's signal to the torpedo-craft when they separated from the squadron at 6 p.m. on the 8th was, Kore you teki no kwantai wo uchishizume yo ichido no seiko wo inoru (Sink the enemy's squadron success to you all!). The officer in command of the torpedo flotilla warned his men of the difficulties attending the attack of ships lying under the guns of forts, but he declared that if they were determined to succeed or perish, the result was certain. At midnight the enemy's squadron was discernible, but it was not until half an hour later that the final advance was made. No moon was visible. One Russian ship was met considerably in advance of the main body of the squadron and there was a disposition to torpedo her, but the officer in command of the flotilla restrained his men, and the Russians seems to have suspected nothing. Thus the little craft got to a distance of only 600 metres they discharged their projectiles. The Russians were taken by surprise. They quickly turned on their electric lights but did not get the Japanese into their field of vision, and they fired wildly in various directions but never hit the mark once. The ten torpedo-craft discharged 18 torpedoes. Twelve shots were fired from the forts, but the Russian torpedo destroyers

torpedo attack. So, at least, the Asahi Shimbun says, but it seems strange that if Mr. Mizuno was at Port Arthur during the night of the 8th, some statement from him has not been officially published.

Of course the Japanese were under no illusion as to the difficulty of attacking a squadron lying under the protection of shore batteries, but Admiral Togo had made up his mind that the assault must be delivered. He is said to have signalled that the fate of the war virtually depended on the result of this attempt. Just as the crews were exchanging a cup of congratulation or farewell, the enemy's squadron was signalled as in sight. It proved to be one of his ships, apparently the *Bayan*, and after firing one or two shots she retired at full speed in the direction of Port Arthur At noon the Japanese came into full sight of Port Arthur. The officers from whom the Nichi Nichi Shimbun received these details say that had the Russians fought stoutly and in intelligent cooperation with the forts, they would probably have made things exceed-ingly difficult for the Japanese. But their ships showed a disposition rather to get under cover of the wounded iron-clads than to come out boldly and take part in the action. Mikasa (flag-ship) commenced firing on the Japanese side, using her 12-inch guns. Apparently every shell took effect. The smoke of the explosions could be seen rising from the Russian vessels. Most of the Russian shot fell short with the exception of those from the forts. This last item of intelligence is not confirmed from other quarters, but it appears to be generally agreed that the Russian projectiles were bad, and that they broke up without penetrating. The Ivate was struck by several shells, but they did not injure her. In fact the explosives used by the Russians did not compare in efficiency with those of the Japanese, namely, the Shimose Kwayaku, which, as its name shows, is the invention of Mr. Shimose. The Asahi, the Azuma and the Yashima came out of the fight absolutely unscathed. Prince Yamashina was in charge of one of the 10-inch guns, and the Admiral thanked him subsequently for his good service. The Mikasa had her main-mast struck by a 12-inch shell—from the forts, it is said. Some of the ships had narrow escapes, the enemy's shells passing very close to them. It appears that the weather was beautiful throughout, whereas the day before the fight and the day after were very tempestuous.

It seems that Admiral Togo's great source of anxiety was lest the main body of the Russian Squadron should have started for Chemulpo before his ships reached Port Arthur, in which event Rear-Admiral Uryu's division would probably be annihilated. The first re-assuring indication was a wireless telegraphic message sent by the Russians and felt by the Japanese receivers. Only one word of it could be read, namely, Askold, but no doubt was felt that it had come from the Russian squadron and that the latter lay at Port Arthur. This incident must have preceded the meeting with the Foochow.

Mr. Odagiri, Japanese Consul-General in

morning of the 9th, it met the Foochow, in to the port, with a heavy list and with her which steamer Mr. Mizuno, Japanese Consul, fore-part aground. The Cesarevitch and the at Chefoo, was returning from Port Arthur Pallada had been towed into the inner har-whither he had gone to arrange for the bour where they were both in a sunken conwithdrawal of the Japanese. Mr. Mizuno dition. Several Japanese shells had fallen gave information of the success of the in the town during the fight on the 9th, but had not inflicted any special damage. Pro-visions were very scarce in Port Arthur, one egg costing 20 cents and one pound of beef a dollar. It was expected that from the afternoon of the 13th the authorities would assume control of all the provisions. Several thousands of the Chinese inhabitants had fled from the town during the bombardment. The Consul-General's informant declared it to be very doubtful whether mechanics to effect the repair of the damaged ships could be obtained.

> Wednesday, February 17. London telegraphs that according to Viceroy Alexieff's report the ship just blown up accidentally at Port Arthur was not a transport, as previously stated, by a torpedo depot-ship, the Yenissei. She passed by mistake within the zone where torpedoes are laid, and she seems to have been completely shattered. The London telegram puts her killed at 100. It is a shocking occurrence, the first of the kind on record.

> Thursday, February 18. A telegram from Chefoo to Chemulpo, dated the 16th instant and published by the Nichi Nichi Shimbun, says that the Retvisan, the Petropavlovsk, the Pallada and the Novik are all lying aground still at the mouth of the harbour, and that the Retvisan is a partial obstruction to the fair way. Since the fight the Russian ships have all been in port, and they show no sign what-ever of going out. Extreme vigilance has been exercised ever since the attack. No lights are allowed that can be seen from the sea except the search-lights constantly turned from the forts on every suspicious object, and every night several shots are discharged from the batteries. What may be the object of this last manœuvre we are not told, but presumably it is to maintain a state of alarm.

> From an independent source, stated to be ship which has just reached Takeshiki in Tsushima, we learn that the injuries suffered on the Russian squadron have not been exaggerated in Japanese accounts. Retvisan, the Cesarcvitch, the Pallada, the Petropaclovsk, the Diana, the Askold, and the Novik are all hors de combat and must remain so for a considerable time. Moreover, three torpedo-boats have disappeared and are supposed to have been accidentally sunk by shells from the batteries. This authority puts the Russian casualties at 30 killed and 120 wounded. The details of the damage done to the ships tally accurately with Viceroy Alexieff's report, but it is noticeable that the Petropavlovsk is substituted for the Poltava in the Chefoo account as well as in that from Takeshiki.

Friday, February 19 The Saseho correspondent of the Chuo Shimbun says that the flotilla of destroyers which started for Port Arthur on the night of the 8th instant consisted of 18 vessels. They steamed in single file, preserving a distance of 200 metres, and extinguishing all lights except one carried by the last boat. On arriving in the vicinity of the Liantung promontory two divisions, the Fourth and the Fifth, numbering 8 deswhich were lying near the mouth of the harbour took no part whatever in the fight.

As the Third Division of the Squadron was steaming towards Port Arthur on the Retrison was then lying at the entrance.

Alt. Odagin, japanese Consult-General in Fourth and the Fifth, numbering 8 designs of the harbour took no part whatever in the fight.

Shanghai, reports that according to the statement of the master of a steamer which left Port Arthur on the forenoon of the 10th. Arthur. When they arrived within about the Pourth and the Fifth, numbering 8 designs of the harbour took no part whatever in the fight.

As the Third Division of the Squadron the statement of the statement of the forenoon of the 10th. Arthur. When they arrived within about the Pourth and the Fifth, numbering 8 designs of the harbour took no part whatever in the fight.

As the Third Division of the Squadron the statement of the numbering 10 held on their course to Port Arthur on the forenoon of the 10th. Arthur. When they arrived within about the Pourth and the Fifth, numbering 8 designs of the part of the statement of the number of the statement of the number of the statement of the part of the part of the part of the part of the statement of the state

sighted one of the enemy's guard ships, but they succeeded in passing it unobserved. The Russian vessels were all in lines, east and west, before the harbour, and every vessels had her lights out. At a distance of 500 metres the destroyers discharged their projectiles—18-inch fish torpedoes, 20 in all, namely, 2 per destroyer. The officers are said to report that the projectiles held their intended course, without deviation, and they declare that Viceroy Alexieff's statement of the injury suffered by the Russian squadron must be far below the truth. On their way back, they fell in with some Russian torpedocraft, but the latter at once extinguished their lights and made no attempt to molest the Japanese.

The eight destroyers sent to Talien on the night of the 8th are said to have entered the harbour and spent no less than 2 hours searching for a Russian warship. They penetrated right up to the wharf, but saw nothing. A merchant steamer lay in the Bay, but of course they refrained from

torpedoing her. Russia had two torpedo transports a few days ago. Now she has only one, the Yenisei having been blown up at Port Arthur by accident. They were sister-ships, the Amur and the Yenisei, the former built in 1895, the latter in 1899; of steel; displacement 2,500 tons; speed 17½ knots, and armanent five 12-pr. quick-firers and six 3-pr. quick-firers. Such vessels have an overhanging counter in which ports are cut for lowering mines. We are not aware whther the Amur is in the Far East.

THE CHEMULPHO ENGAGEMENT.

The Nichi Nichi's Saseho correspondent wires that, according to the statements of the wounded, the Fourth Squadron under Rear-Admiral Uryu escorted 3 transports to Chemulpo. The Chiyoda, which was in advance, signalled that the Koreels was about to leave the harbour, and two Japan-ese torpedo-boats, the Kiji and the Hato, steamed to the front, followed closely by the Asama, a first-class armoured cruiser It may be remarked in parenthesis that Asama, a first-class armoured cruiser It may be remarked in parenthesis that the Squadron was accompanied by two detachments of torpedo-boats. Observing the torpedo-craft, the Koreetz opened fire, and they replied by discharging two fish-head torpedoes which, however, failed to effect anything. The Koreetz then returned and occupied her former berth. Thereafter the Chiyoda, the Takachiho and the Akashi entered the harbour, escorting the transports and accompanied by the torpedo-boats all Saturday, February 13. divostock on the 6th instant and made its and accompanied by the torpedo-boats, all anchoring in the vicinity of the Russian Squadron at Vladivostock on the sea off Mutsu on the 11th. seems to have left that harbour. Its movelenged to the Kokura (12th) Division and seem to have numbered some 4,000—was effected without incident and the night passed tranquilly. The Asama, the Namua and the Nitaka lay outside. It was certified and the Nitaka lay outside. It was certified and the night passed tranquilly. passed tranquilly. The Asama, the Namea and the Niitaka lay outside. It was certainly an unprecedented situation—two of the enemy's war-ships peacefully anchored among four war-ships of neutral Powers and and a number of Japanese war-ships and a number of Japanese torpedo-craft all was independent of the making for daylight to see the work of Japanese merchant steamer of 710 tons destruction commence. A great part of the night was occupied landing the troops and their equipment, which operation had been entirely completed by 6 a.m. on the 8th. At 11 a.m. the Koreetz steamed out of ships were accompanied by a transport.

The Shogyo Shimpo says that the Nagono-

butive justice in this accident of locality, for seems to be Port Arthur. Wolmi Island was once the object of a conthe Koreets, and the Asama signalled crime of savagery must be laid to the charge that the Russian ship was sinking. After the Koreets went down nothing of her remained above water except the top of her smoke-stack and part of a mast. The Varyag remained with such a heavy neighbourhood of Ominato. The Takao, a list to port that only a part of her deck, was list to port that only a part of her deck was small cruiser of 1,778 tons is in that neigh-above water. Meanwhile the transport bourhood, and she seems to have sighted above water. Meanwhile the transport bourhood, and she seems to have sighted Sungari was set on fire by her crew, who the Russians, who were last seen near the proceeded to the French frigate Pascal, western entrance to the Strait. There are The Varyag had 40 killed and 64 wounded. The Varyag had 40 killed and 64 wounded. rumours that the squadron tried to get Nothing is said as to the losses on board through eastward, and had three ships torthe Koreetz. On the morning of the roth the squadron returned to its base.

THE RUSSIAN SQUADRON IN VLADI-VOSTOCK.

Saturday, February 13. entirely completed by 6 a.m. on the 8th, but escaped. It is stated that the Russian At II a.m. the Koreetz steamed out of ships were accompanied by a transport. The Shogyo Shimpo says that the Nagonothe harbour, without apparently clearing This Vladivostock squadron consists of the for action. That mode of procedure, in Gromoboi, (12,336 tons), the Rossia (12,200 ed by the Russian Vladivostock squadron fact, was her only hope of escape, a very tons), the Rurik (10,940 tons), all armoured faint hope. The Asama, however, received cruisers, and the Bogatyr, a protected cruiser that morning with 700 fishermen for Otaru, her with an 8-inch shell as she rounded of 6,750 tons. As the squadron is accom-

Wolmi Island. There was a kind of retri- panied by a transport, its intended destination

Later news indicates that the Vladivosiderable dispute, its Japanese purchaser stock squadron has not made its way having been dispossessed by the Russians through the Tsugaru Strait. It is still who had a coal depot there at the time of cruising, or was cruising on the 12th instant, the events we are describing. The Korett of the south-western coast of Ezo. The immediately returned the fire, and the Niiname of the steamer sunk by this squadron is taka now joined the firing. The range was Nago-no-ura Maru. She and a smaller vessel from 6,000 to 7,000 metres. It was against called the Zensho Maru, were on their way the Asama that the Koreetz chiefly directed from Sakata to Otaru when they fell in with her fire, but her gunnery seems to have the squadron. What then happened is not exbeen of the worst, for she did not get actly clear. The official report says that the one shell home. After an hour she resquadron surrounded the two little steamers treated to the harbour and the Varyag and deliberately undertook to sink them, came out to fight, only to retire after. They succeeded with the Nago-no-ura Maria 40 minutes, the flames bursting from her (710 tons), but the other vessel (170 tons) have. What testing the Russian surrounded to exceed the receive he bows. What tactics the Russians pursued managed to escape. It need scarcely be it is hard to divine unless we suppose said that this incident has caused profound that they entertained an idea of being indignation in Japan. The impression allowed to depart unmolested. Their best prevails that the war-ships never had plan, in that case, was to steam out separany intention except to destroy the two ately without clearing for action. But had vessels with all on board, and of course they emerged together in fighting trim and such treatment of private merchant ships made a rush for it, there is a possibility is not merely contrary to international that the *Varyag*, with her fine speed law but also opposed to the commonest —23 knots—might have escaped. Still principles of humanity. Before pronounthe Russians were caught in a terrible cing the conduct of the Russians to trap, and it is almost cruel to talk now of be brutal, however, it becomes necessary to trap, and it is almost cruel to talk now of what they might have done. The Japanese did not pursue the Russians into the port, being unwilling to violate its neutrality. They believe that the two ships were struck ten times, twice by 8-inch shells. The talk ten times, twice by 8-inch shells. The had a list to port, was down by the head, and had lost a funnel. It had been the intention of the Japanese to complete the work with a torpedo attack that night, but at 4.30 p.m. smoke was seen rising from aspect of things it looks as though another the Koreetz, and the Asama signalled

pedoed in the attempt, but the story comes from a very questionable source.

Monday, February 15. The Nichi Nichi Shimbun's correspondent at Takeshiki in Tsushima, reports that the Russian Vladivostock Squadron left Vla-divostock on the 6th instant and made its

With reference to the fact that the Russianauthorities at Port Arthur have placed obstructions in the way of Japanese endeavouring to withdraw by British and Ameried to leave Dalny with instructions not to can steamers, the Japanese Government has return. They were escorted from the bay formally requested the American Government by a Russian man-of-war, presumably on ment to approach the Russian Government on the matter.

It is stated in Tokyo that a Russian steamer with 1300 soldiers left Hongkong on Jan. 28th and has not yet reached Port Arthur.

The Jiji Shimpo says that there are now in Tokyo 37 foreign war correspondents, namely, 20 British, 15 American and m Germans. It is a striking indication as to the degree of journalistic enterprise in the various countries. In America's case the habit of combination tends to reduce the total number of correspondents, but the broad fact is that Anglo-Saxondom sends 35, the rest of the world 2.

The Japanese subject recently arrested on a charge of acting as spy for a Russian Naval Attaché in Yokohama, has been remanded for trial, a primà facie case having been made out against him. It appears that the information furnished by him related chiefly to Yokosuka and Maizuru.

It was recently rumoured that the Imperial Headquarters would be moved to bye, for the present Tokyo is to be the site.

Tuesday, February 16.

Mr. Motono, Japanese representative in Paris, telegraphs under date Feb. 15th that in consequence of the receipt of news that indulged in by the victims of any hardship, three Russian men-of-war and a number of torpedo-boats had obtained a large quantity of coal at Jibutil, he addressed the French Government unofficially on the subject, and was answered that this coal had been supplied prior to the declaration of war.

A telegram has been received by the Naval Department in Tokyo from Berlin dated the 14th, stating that the Alexander III. and Borodino are being pushed forward towards completion with all celerity for the purpose

of being sent to the Far East.

A telegram from Port Said says that 19 steamers laden with Cardiff coal are on the way for Port Arthur and Vladivostock. Some of them have passed the Canal already but one which has just reached Port Said was ordered by the British Government to return' at once to Sevastopol.

It appears that the Russian fleet has not left Port Arthur.

Wednesday, February 17 The s.s. Batavia arrived in Nagasaki on the 15th instant carrying some 1,500 Japanese fugitives from Vladivostock, Nikolaisk and Blagovetchensk. She left Vladivostock on the 9th instant and reports that the Russian Authorities gave every facility and treated the Japanese kindly, so that all escaped unscathed. Among her passengers were the staff of the Nippon Yusen Kaisha. It was by the Nippon Yusen Kaisha, Indeed, that the steamer was chartered primarily for the purpose of carrying away the Company's staff, but with instructions at the same time to give passage to all fugitives. From intelligence carried by the Batavia, it appears that the Vladivostock Squadron left that place on the 8th. The fact is of some importance, for if the squadron left Vladivo-stock on the 8th, it had no news of the Port Arthur affair, which commenced with the torpedo attack on the night of the 8th, neither had it any news of the Chemul-

po affair, which took place on the 9th.

It is stated that 200 Japanese fugitives from Mukden and other parts of Manchuria, who reached Tashikiao, were there arrested by the Russians and carried to Port Arthur where they are still detained. Some 40 or ese subject would be allowed to leave. On 50 others managed to elude arrest and the 9th in the afternoon a mounted effected their escape to Shanhaikwan. That orderly arrived bearing directions from Viceis one story. On the other hand we have roy Alexieff that the fugitives might embark. another account, sent by Mr. Mizuno, Japanese Consul in Chefoo, to the effect that a British steamer carrying about 340 Japanese fugitives from Port Arthur, reached Chefoo on the 15th instant. Among the fugitives were over a hundred females, who appear to have belonged to the Tashikiao company, for it is alleged that they were there separated from their male companions, the latter being allowed to proceed to Shanhaikwan and the former being sent to Port Arthur and News former being sent to Port Arthur viá Newchwang. Practically the whole of the Japanese have now been removed from chwang. Manchuria, the exceptions being two criminals undergoing sentence and certain females who enjoy special protection.

It is difficult to ascertain the truth about

soldiers are under no sort of control, or that eastern harbour inside which were some of It is officially stated that according to information obtained from Korea several thousands of Russian troops reached Antung on the 14th bound for Feng-wang-teng.

Mr. Motono, Japanese representative in Paris, telegraphs under date Feb. 15th that Russian soldiers concerned. They, tunately, have an evil record already.

It is stated that a Russian war-ship in the Gulf of Pechili has fired upon two British steamers carrying coal from Kaiping to Shanghai. The British residents of Tientsin are presented to be very indigant and the Consul has made an official protest.

The American citizens at Nagasaki are said to be behaving with the greatest kindness in all matters relating to the situation. They are even placing buildings gratis at the disposal of the Japanese naval authorities.

Mr. Inouye, Japanese Representative in Berlin, reports officially that the Red Cross Society in Germany has offered to render every assistance to the Japanese Society, and that it is prepared to send surgeons, instruments and materials to any place indicated by Japan.

Fifty-eight Japanese from Sonchin arrived

at Yuensan on the 15th instant

The steamer Manchuria, which the Japanese squadron captured when en route for Port Arthur on the 8th, belonged to the East China Railway Company. She is a vessel of China Railway Company. She is a vessel of about 4,000 tons, and her cargo consisted chiefly of ammunition—866 boxes. A manof-war towed her into Saseho on the morning of the 13th.

We learn from the Asahi's special issue of the 16th that the Japanese—numbering 250, inclusive of 6 children—who assembled at Port Arthur on the 8th instant when the intention of taking passage in the S.S. Lasbera(?), were prevented from embarking by the Russian Authorities and the greater part of them, having no houses to repair to, passed the night on the beach. On the 9th they ascertained that the vessel would not sail. About one half of the party then found shelter in a brothel and the remainder took refuge in the house of a Mr. Kawakami. In the afternoon they sent a deputa-tion to the Authorities, but the latter declared that Japan having committed an act of war without declaring war, no Japan-They again repaired to the beach and found the steamer Wanchow waiting. Many of the Japanese had had no food since the 8th, and as the Wanchow, being a boat that plied merely between Chefoo, and that Port Arthur, had no stock of provisions she was unable to help the famished people. They accordingly sent a petition to the police and the harbour master's office, whence six bags of rice and 50 lbs of biscuit were provided. The steamer, however, did not start, and on the 11th the Japanese found then selves short of water. With difficulty they obtained a supply. The Russian authorities told them daily that the

came much excited at the notion of standing and we should be disposed to make such in the way of their country's efforts, and some allowances on a much larger scale were not of them proposed to take the weapons carRussian soldiers concerned. They, unfortunately, have an evil record already.

on the Viceroy. But after considerable discussion they decided to address a letter to the Viceroy, reminding him of his promise to protect Japanese life and property, and begging him to come himself to see how they were suffering. On the morning of that day a hundred fugitives had arrived from Harbin and had been kept waiting for two hours on the shore in a snow storm. these people came on board, six bags of rice and some tubs of water were sent down by the agents of the steamer. At last on the 14th the ship was allowed to leave. Her detention was subsequently explained to have been caused by the necessity of awaiting the arrival of various refugees who were expected from Harbin and elsewhere. Japanese themselves believe, however, that the delay was due to the results of the fight on the 8th and the 9th, but the theory that they were kept in the harbour for the purpose of averting merepetition of the Japanese attack is, of course, untenable. The people say that on the night of the 10th three shots were fired from the forts, and twenty more between the hours of 2 p.m. and 4 p.m. on the 14th. They also allege that the injuries to the Cesarevitch were very extensive, one third of her bulwarks on one side seeming to be completely stove in. The Retrisan's chief hurt being below the water line, great labour was employed at first to pump her out, but it was subsequently abandonner out, but it was subsequently abandon-ed, and she is now lying near the entrance of the port with a heavy list. The Pallada is in the harbour. The Petropardovsk had a big hole near her prow, and one of her masts was broken. The whole squadron was at Port Arthur when the Hanchow sailed. From the same source we learn that three Russian torpedo-boats were sunk durthree Russian torpedo-boats were sunk dur-ing the attack of the 8th, not by the Japanese but by firing into each other. Out of 14 vessels constituting the strength of the Port Arthur Squadron, a Russian is quoted as saying that only 10 are now affoat. How many casualties there were on the Russian side these refugees do not undertake to say, but they allege that the funeral of some evidently very high officer or officers took place on the 14th. They think that the Petropav-lovsk, the Askold and the Diana suffered most in the fight on the 9th instant.

Thursday, February 18. Mr. Kawakami, Japanese Commercial Agent at Vladivostock, who landed at Shi-monoseki on the 15th instant, quotes the officer commanding at Vladivostock as say-ing that it might be difficult for the Russians to beat Japan at sea, and that the latter might have some successes on shore at first, but that in the end she would be crushed by Russia as Napoleon had been. And the vessel's departure would be sanctioned in-mediately, but it was not sanctioned, and Kawakami confirms the previous statements after a time provisions again failed. The that no submarine mines are laid at Vladi-Arthur were used very cruelly. If even a small part of the stories told be trust-been the time of greatest distress. The Russian commandant ordered the British worthy, it is evident either that the Russian Wanchow was lying near the entrance of the residents of the place to clear out within

three days, but in consequence of represen-{initial advantage. It is scarcely credible Shanhaikwan, number 270, it is said. tations made to London by the English commercial agent the order was withdrawn. It served to show the feeling with which the Russians regard the British, a not altogether unnatural feeling, one must confess.

Among the Japanese refugees that reached Shimonoseki in the *Batavia*, there were over 800 women, and there were 5 men supposed to have acted as Russian spies. There is rather a mania for talking about Russian spies, now-a-days. A new word has been introduced into the language, rotan, an abbreviatien of Rokoku no tantei

There were a good many Russians who desired to leave Vladivostock by the Batavia, but they were unable to do so, apparently, and she carried the Chinese and

Korean fugitives.

Many rumours are in circulation about the bad treatment of Japanese fugitives from Harbin and Mukden. Some authorities allege that the men were most cruelly used and that the women were outraged in the most public manner. But on the whole the evidence seems to show that what these fugitives have chiefly to complain of was the loss of their belongings-such few things as they had been able to carry away from their homes-, and much hardship in being unable to procure provisions. There may have been, indeed there probably were, some isolated cases of brutality on the part of Russian soldiers, but on the whole privation and robbery seem to have been the chief sources of suffering. During 5 days of detention at Port Arthur, nothing like an adequate attempt was made by the Authorities to supply proper shelter and provisions, but, as to that, much allowance must be made for the fact that Port Arthur was perturbed by the Japanese attacks and by the losses thus entailed. The place seems to have been thrown into great confusion. Something like a reign of licence was established. Not only Chinese bandits but also Russian soldiers seized the occasion to thieve on a wholesale scale. The Japanese fugitives stored what baggage remained to them in the warehouse of Messrs. Clarkson & Co., but the whole were purloined. Of course the Viceroy should have been able to prevent or check these excesses, but that is an easy

The Nichi Nichi Shimbun remarks that nearly all the officers commanding Japanese ships have the advantage of actual experience in sea-fighting. Vice-Admiral Togo com-manded the Naniva in the war of 1894-5; Vice-Admiral Murakami, who is second in command of the Standing Squadron, was captain of the Akitsushima in that war; Rear-Admiral Nashiba was commander of the Akitsushima; and, in a word, all those now holding the rank of commander or upwards were in positions of active responsibility at that time.

published on the 16th instant, that thirty thousand Russian troops had reached Anju, The Niroku cuts the number down to fifteen thousand, and treats the whole business in a light-hearted manner, observing that should these reports prove correct, an interesting drama is about to be acted. Even the pose. Kokumin gives some currency to tales that a Russian advance guard has reached Anju. In the eyes of military men, however, such intelligence would have a very

There is no definite news as to the rumour

that any considerable Russian force can of the steamers connected with the Kaiping have penetrated as far as Anju, however, mine is to carry them home to Japan Feng-hwang-ting or Antung would be the base of such a force, and at neither of these places has Russia hitherto had more than a few regiments, unprovided, so far as we know, with extensive transport facilities such as would be required for a march southward haikwan on the 17th. through Korea, the sea not being available for supply purposes. Assuming a Russian advance overland in any force, it is plain that the Japanese, with the command of the sea-partial at any rate-could quickly land a corps d'armée at the mouth of the Yalu, and the line of communications of the Russian ment attributed to Mr. Consul Segawa that column would thus be fatally severed. If, after the departure of the Japanese fugitives indeed, the Russians be following the profrom Port Arthur by the Wan-chow, one gramme assigned to them by these rumours, or two were left in Manchuria. Apparently they are showing extraordinary activity and enterprise, but they are also courting disaster unless their forces available in the districts immediately beyond the Korean frontier of her Japanese passengers. are very much larger than the least circumspect rumour estimates

The Niroku says that General Kuropat kin has reached Port Arthur at the head of ten thousand picked troops. Some newspapers are quite delightful in their method of spiriting big bodies of troops about through space. The magician's magic carpet be-

comes a reality in their creed

It is stated on good authority that orders for mobilization have been issued to the Siberian army, and that Lieut-General Stessel will command the third army corps.

The newly organized Russian Rifle Brigade

20th instant.

Hongkong states that the East-Chinese Railway has now been appropriated solely for military purposes.

The Russians are unquestionably moving

forces from Liaoyang to Fen-hwan-ching.

The Russian man-of-war lying at Newchwang has made several attempts to break the ice and emerge from port, but she has not succeeded.

The Russian forts on the left bank of the Liao are said to be garrisoned with half a company of artillery.

The Russian troops from Tehling have been moved to the right bank of the Liao.

Japanese securities continue to rise ever since the news of the first naval successes. The four-per cents, which stood at £67.10s, on the 8th, reached £69,10s. on the \$2th; the five-per-cents, rose from £79,10s. to £82.3s. 61/4d. on the same dates and the endorsed war-bonds from £70 to £82.13s.9d. On the other hand, Russian securities (fourper-cents) fell from 97 1/2 on the 7th to 90 on the 11th. They had stood at 101.40 on the 17th of December. These figures would seem to show that European opinion has undergone, or is undergoing, a radical change. Should Russia suffer some reverses on land, the effect upon her financial credit will be signal.

It is alleged that the Chinese inhabitants of Vladivostock, to the number of over 30,000, are preparing to take their departure and have hired a steamer for the purpose. A great many steamers would be needed for such an exodus.

It is stated that all the Russian troops have moved from Mukden with the excep-

CONFIRMATIONS AND -

It is interesting to put the following items of intelligence side by side :-

Official from St. Petersburg, Feb. 11th:—The Cesarevitch, the Retvisan and the Pullada continue affoat. Measures are being taken to get them into the inner roadstead.

st. Petersburg Feb. 11th (later):—The injuries suffered by the *Crearevitch* and the *Retrison* are not grave. Both vessels took part in the defence of Port Arthur on the following day.

If the Viceroy's allegations in these two The newly organized Russian Rifle Brigade tolegrams—supposing that he is in any way consists of 35 or 36 regiments.

The news is confirmed that the rails will be laid on the ice across Lake Baikal by the If they be untruthful, they are curiously clumsy

The first message was despatched after the fight on the 9th; that is to say, on the afternoon of the day subsequent to the tor-pedoing of the two iron-clads. At that time according to the Viceroy's official report, the two ships were still affoat and measures were being taken to get them into the inner roadstead. In fact they were so disabled as to be incapable of moving without aid. But happily they had not sunk. They were still afloat.

The second message, despatched a few hours later, alleges that the iron-clads were so little injured as to be able to take part in a battle subsequent to receiving their injuries. They were torpedoed at about midnight on Monday. They took part in a battle at noon Tuesday. And immediately after the battle they were found to have suffered so much from the torpedoes on the previous night as to be unable to move though still, happily, afloat. In short, they made a miraculous recovery between midnight on Monday and mid-day on Tuesday; and then on Tuesday afternoon they had a dreadful relapse, becoming so sick that they could not move; and then suddenly on Tuesday evening they are almost quite well again. Evidently it was a gross misconception to predict that the Russians would be

Governor Sufu decided on Feb. 10th to cap-In the eyes of military men, however, such intelligence would have a very grave meaning. The northern half of Korea lends itself readily to defensive operations, and whichever side anticipates the garrison with troops now en route from Russia.

The Japanese subjects who have made second of the Kannon Maru left for Yokosuka.

THE WAR SPIRIT.

(CONTRIBUTED.)

On the afternoon of the 5th the big garrison town of---was thrown suddenly into a fever of excitement by the arrival of mobilisation orders. For 5 or 6 days subsequent to that the troops came pouring into the town from all quarters by every train Hardly standing room was to be found in the carriages during those days. Freight cars were in many cases loaded with men. The enthusiasm was tremendous. The troops were greeted at every station with loud bansais and on their arrival at their destination received a perfect ovaion. The whole city has been a scene of busy activity ever since. Hundreds of temporary buildings have been run up; every available stopping-place has been requisitioned. All the school grounds in the large town have been made use of by the military for the collection of carts and other military equipments, the training of horses, or what not. Day and night the horses, or what not. Day and night the work of preparation has been going on. At the first station on the road a large number. Seoul was by his own desire. He expressed of extra rails have been laid, and to-morrow and next day (the 17th and 18th) will the French frigate Pascal at Chemulpo in witness a great exit of men all equipped order to leave Korea, and the Japanese for war. On the afternoon of the 16th the Authorities agreed to facilitate his departure citizens, including many foreign residents, M. Pavlov left Seoul on the morning of the invited the officers in command of the 11th. Guards were supplied by the Japaninvited the officers in command of the Division and certain officers belonging to the Reserve, numbering in all over 500 to a farewell entertainment. The grounds were prettily decorated with flags. Fireworks were let off and the departing soldiers were addressed in a calm, hai, they might be put ashore at Chefoo. simple and most impressive manner by the Governor of the Ken and by one or two other representative men. The Comtwo other representative men. mander of the Division, replied in a few well chosen words. There was no boasting and no clap-trap of any kind. The tone was one of quiet assurance. The citizens were told that they could entrust their interests to the Japanese army, which would not fail to defend them to the best. The quiet determination displayed by the officers was proposes to take steps to restrain her. regarded by all present as one of the happiest of omens. "We shall come back the French Legation or running away someconquerors or not at all," was what more where is said to have been abandoned. We then confirmed of the present writers said believe that Scoul is now in withtal occur. on this memorable occasion. At the re-tion by a Japanese military force, so His quest of one of the leading citizens, a re-Majesty's mood has an element of inevitable presentive of the American and English resignation. Of course in saying that the citizens of Sendai wished the commander city is militarily occupied we do not and his fellow-officers good luck in the mean that the administration of the coming struggle and expressed the hope Korean authorities has been interfered. than one friend of the present writer said coming struggle and expressed the hope that they might come back unscathed. The General replied that the large attendance of foreigners at the farewell entertainment was source of great satisfaction to him as it showed that those who were present thoroughly sympathized with the Japan is not fighting to appropriate Korea. Japanese nation in the great war on which Even the Spectator can not pretend that she they had now entered. The foreigners would have extended a hand towards it had present then led hearty cheers for the three not its independence been menaced by Ruschief officers of the garrison. It was estimated that not less than 1,500 persons. A telegram from Chin-nam-po says that were present. After a standing meal the since the departure of the Japanese from company dispersed at about half-past Wiju, the Russians have been behaving with five. The same evening a huge lantern great lawlessness in that town.

that the Minister has no objection to a was attended by the Russian Legation

Sunday, February 14. Mr. Hayashi reports, under date of the 13th instant from Seoul, that the Emperor of Korea has sent a quantity of sake and tobacco for the Japanese troops.

Tuesday, February 16. The Official Gazette of the 15th instant states that on the 10th instant M. Pavlow signified, through the French Representative in Seoul, his desire to leave the Korean capital, and his wish that the Japanese Minister should be consulted on the subject. The French Minister, in carrying this message to Mr. Hayashi, added that after M. Pavlow's departure, his Legation should be taken charge of by the French who would place a small guard there. Mr. Hayashi, on receiving this intimation, offered to entrust to Japanese troops the duty of escorting M. Pavlow safely to Chemulpo, where he might embark on the Pascal, and further undertook to provide every facility, subject to instructions from Tokyo. The Minister of Foreign Affairs in Tokyo, however, telegraphed that M. Pavlow should be escorted by his own Legation Ultimately the Guards, arms in hand. Japanese Authorities employed Japanese troops and gendarmes to ensure M. Pavlow's safety in Seoul and Chemulpo, for which office they were duly thanked by the departing Minister and by his French colleague.

It is officially announced that the Emperor of Korea sent his Minister of Foreign Affairs to the Japanese Legation on the 13th instant to offer congratulations on the Japanese naval victory. His Majesty added that in view of Korea's position her gratification at the success was equal to that of Japan. Minister also said that he had received his Sovereign's orders to instruct the local authorities throughout the country to place at the disposal of the Japanese troops all inns necessaries at far as possible, and to afford

every facility.

Mr. Miyasu, Japanese Consul in Seoul, telegraphs that at 3 a.m. on the 15th instant fire broke out in the Japanese quarter of the city and destroyed some 200 houses. The

Korean authorities has been interfered with more than is inevitable in the circumstances. The London Spectator makes the allegation that if Russia is fighting to purloin Seoul. We regard this rumour as altogether untrustworthy. Thirty thousand men are not moved about like a small pic-nic party, and even supposing that Russia's operations in the direction of the Yalu had all the alacrity attributed to them, it is virtually impossible that such a force could not have a protected into Yang and the contract of the country of the coun yet have penetrated into Korea. A rush for A telegram from Chin-nam-po says that Pyong-yang would certainly be at once picturesque and daring. Could the Russian troops occupy that place in force before the Japanese were in a disposition to dispute their action, an exceedingly critical situation would be created, for Pyong-yang has great natural facilities for defence.

Thursday, February 18. Messrs. Hyon Sang-kon and Li Yong-ik

ese to trumpet abroad their successes and Russian authorities, but the latter replied conceal their defeats. Hence the silence that Russia would look after the Japanese that has prevailed since the 9th instant may subjects in Manchuria and that orders had perhaps mean that the Russians have turned the tables. His Majesty is recommended, in short, to sit on the fence, if possible

Meanwhile the poor Emperor is said to be anxious to manufacture a cabinet that shall consist of persone gratissime in Japanese eyes, but being unable to obtain any clear indications as to Japan's likes and dislikes, His Majesty is in a quandary of the proverbial kind:—" If I stop I shall be frozen; if I go on, I shall fall."

The Kokumin says that Mr. Hyon Sang-ton's deprivation of office has

been the outcome of his recommendation that Russian troops should be employed for the protection of Korea. On the whole we think that Mr. Hyon is to be pitied. A visit to Russia is enough to turn the head of any unsophisticated subject of the Hermit King-

Friday, February 19.
Our readers will not be surprised to learn that the alleged arrival of some twenty thousand Russian troops at Anju in Korea, is now regarded as an apocryphal event. But rumour persists that some Cossack cavalry, apparently the advance guard of a larger force, have penetrated from Wiju towards Seoul. It would be a bold enterprise for the Russians to invade Korea from the direction of the Yalu, but that they could preserve their communications with Manchuria having lost the command of the sea and being exposed to attack from the mouth of the Yalu is not credible.

It is stated on good authority that with the exception of a few scouts, no Russian soldiers are south of the Yalu.

CHINA.

Sunday, February 14. On receipt of intelligence of the doings of the Japanese ships at Chemulpo and Port Arthur, the Peking Times published the news and called it a Japanese victory, to the great exultation of both Chinese and Japanese in that city. Thereupon—we are quoting from the Jiji's correspondence—the Russian Legation took steps to contradict the news, by declaring that, as matter of fact, the Japanese navy had suffered a defeat. Naturally credit was placed in this official statement, but presently Reuter's telegrams arrived quoting the report of Viceroy Alexieff himself, and it became apparent that the original intelligence had been substan-There resulted strong tially correct. revulsion of feeling. The Japanese residents assembled at their Legation and made the welkin ring with shouts of banzai and the Chinese were scarcely less enthusiastic. In fact the latter showed some symptoms of including the demolition of the Russian Legation in the incidents of their demonstration, and the authorities accordingly decided to suppress the *Peking Times*.

Tuesday, February 16.
Mr. Ijuin, Japanese Consul at Tientsin, reports the receipt of intelligence from Mr. Segawa, formerly Japanese Consul at New-chwang, that a party of 250 Japanese retir-ing from Harbin and other places in Manchuria, experienced very cruel treatment at the hands of the Russians in Mukden and Tashikiao, and were finally sent to Port Arthur. Mr. Segawa, who had reached Arthur. Mr. Segawa, who had reached Chefoo before this news came to him, applied taken over the business of the Guaranty Trust Those who attended to say good-bye numtor the United States Consul in New-Company of New York at Hongkong, Shanghai bered about a hundred and fifty, prominent chwang to make representations to the and Manila.

been issued for them all to be sent to Port Arthur. The United States Consul had no to his Government vià the Legation in Peking.

Wednesday, February 1; Tientsin reports that on the night of the toth the Kaiping-Tashikiao and the New-chwang-Tashikiao lines of telegraph were again cut by mounted bandits. It is further stated that 800 bandits have made their appearance at Haicheng and killed or wounded some 50 of the Chinese regulars. On the other hand, the Chinese telegraph from Kanfongtsz to Newchwang is said to have been cut by Russians.

Thursday, February 18. The Asahi has a telegram from Peking saying that the Court has abandoned its

idea of returing to Hsian. Rumours indicate that the Russians are not disposed to acknowledge China's ability or right to include in her sphere of strict neutrality the region westward of the Liao River. This region is certainly part of Manchuria, but it is the part supposed to have been handed back by Russia to China. The supposition is not satisfactory to Russia at the present moment, and she is inclined to dispute its validity. So rumour says, at any rate, but it seems to us that Russia can not be very desirous of having China on her shoulders as well as Japan. If she compel China to enter the field, can she reckon on French aid?

News from China says that 20 battalions (10,000) Chinese troops were to leave Pao-

guarded by Chinese troops. The Governor-General replied that he had not troops phal, enough. Have the Russians?

THE SULTAN OF JOHORE.

The Sultan of Johore arrived in Colombo on the M.M. steamer Salasie on the 8th January and continued his journey to Europe the same afternoon. The Sultan is accompanied by his mother-in-law and a large suite. He is taking all his furniture to Europe with him, and had on board a 38 horse-power French motor-car, on which he intended to travel through France from Marseilles. After a tour through that country, he will go straight to England and afterwards travel through Norway. The Sultan is about to sell a large number of his race-horses, preparatory, it is rumoured, to breaking up his establishment altogether. It is indeed stated, on what authority the Hongkong Daily Press is not certain; that the Sultan is in negotiation with the British Government with a view to placing his dominions under their control; receiving in seat in England, where he may settle down.

THE " MANJOHR."

The presence of the Russian gun-boat Manjour in Shanghai is evidently creating Arthur. The United States Consul had no an interesting complication. According to recourse except to convey this information international law a belligerent's public vessel can not remain in a neutral port for more than 24 hours during a state of war. On behalf of the *Manjour* it might perhaps be claimed that although hostilities between Japan and Russia actually commenced on the 8th instant, war was not openly declared until the 10th by Japan and until the 12th by Russia, and that, consequently, the vessel had a right to remain in Shanghai until the 11th at any rate. But after that her presence there became palpably illegal, and as Japanese merchantmen plying to Shanghai lie under a constant menace so long as a Russian gunboat is in the Yangtze, it becomes China's imperative duty to see that the Manjour leaves without an hour's delay. Mr. Odagiri, Consul General of Japan in Shanghai, has brought this matter to the notice of the Chinese Authorities. Meanwhile the Manjour is said to be loading munitions of war from the storehouse of the East Chinese Railway Company and to have taken on board a considerable quantity of coal over and above her bunker capacity. Where she is to go to, however, when she emerges from the Yangtze is a curious question. Port Arthur is her nearest place of refuge, but that would be a hazardous voyage. Her better chance would be to head southward in the hope of making Saigou, where she could get coal for the homeward voyage.

The Chuo has a somewhat incredible telegram from Shanghai saying that the captain of the *Manjour*, being pressed by the Chinese ting for Shanhaikwan on the 17th instant, or the zerangon, and that the railway guards were to be reinforced by over a thousand men from Peking.

A telegram from Tientsin to the Asahi Shimbin says that the Russians made application to the Governor-General of Manclever incident. One almost hopes that it may prove true, but the source is apocry-

> It has proved to be untrue that the Russian gunboat Manjour has landed her armament and dispersed her crew at Shanghai. She has been lying in the river ap-parently undecided which course to pursue. Our readers may remember that the Manjour was spoken of as being in dock at Nagasaki. It turns out that the ship in dock there was the Manchuria.

BARON ROSEN.

Baron Rosen, Baroness Rosen, Prince and Princess Kudacheff and the staff of the Russian Legation, left Tokyo by 9.70 p.m. train on the 11th instant. The road from the Legation to Shimbashi station was lined with police, and at the station there was a large guard of gendarnes. A guard also accompanied the train. In the carriage were placed three large bouquets of flowers, souvenirs from the ladies of the Corps Diplomatique, all the members of which assembled at the station to say farewell, except the Chinese and Korean Ministers. The railway officials sent vehicles specially to the Legation to transport the baggage, and the Chief of the Railway Bureau himself attended on the platform to afford facilities. among the Japanese being Viscount and Viscountess Tanaka, Viscount Enomoto, Mr. Chinda, Marquis and Marchioness Nabeshima, Count and Countess Toda, almost all the high officials of the Household Department and the Foreign Office and many other notables. The Baron and his party other notables. embarked on the Yarra on the evening of

The Yarra, which carried 28 Russian subjects from Yokohama, including Baron Rosen and the Tokyo Legation Staff, received another contingent of 97 at Nagasaki, 92 of whom were for Shanghai. Included in the Nagasaki contingent were the staff of the Russian hospital. There are still over 30 Russians who have decided to remain in Nagasaki, where they will doubtless live very placidly and happily.

It appears from a telegram sent by Mr. Hayashi, that the Yarra, having on board Baron Rosen and the Legation staff as well as the Russians leaving Nagasaki, called at Chemulpo en route for Shanghai.

RUSSIA'S DECLARATION OF WAR.

The text of the Emperor of Russia's declaration of war has been received in Tokyo and published in Japanese. follows:

I inform my loyal people that with the object of maintaining the peace which I always have at heart, I have done everything in my power to promote tranquillity in the Far East. In pursuance of that object I consented, at the request of the Government of Japan, to revise the conventions between the two Empires, but without awaiting the conclusion of the negotiations undertaken for that purpose, and without waiting to receive my answer to her last note, Japan informed me that she abandoned the negotiations and severed diplomatic relations with my Empire. Thereafter, without any warning that this severance of diplowithout any warning that this severance of diplo-matic relations meant war, the Japanese Govern-ment sent its torpedo vessels to attack my ships lying outside Port Arthur. Immediately on receiving this report from my General, I gave orders that arms should be taken up in answer to

Japan's challenge.

In adopting this decision I pray for the aid of Providence, and I doubt not that my loyal subjects will all come forward for the defence of their Almighty God's ancestral country. I entreat Almighty God's protection for my illustrious Army and Navy.

ARRIVAL OF THE NEW CRUISERS.

The Nisshin reached Yokosuka yesterday (16th) at 8 a.m. and the Kasuga a few hours afterwards. A certain measure of anxiety has been felt about the ships during the latter part of their voyage. It seemed at one time as though they were to be unfortunate, for they arrived at Singapore just after a strike of coal-heavers had commenced, and a few days' delay might then (3rd February) have

The officers and crews of the Nisshin and the Kasuga had a great reception at Yokosuka on the 17th instant, and at Yokohama and Tokyo the experience is to be repeated on the 18th and 19th respectively. The ships left Singapore on the 6th instant, having spent 4 days there. They came on straight to Japan not calling anywhere en route. The Wissim had 4 Japanese officers on board. The rest of her complement consisted of 112 British subjects 20 Italians 40. and Tokyo the experience is to be repeated on the 18th and 19th respectively. The ships left Singapore on the 6th instant, having spent 4 days there. They came on straight to Japan not calling anywhere ensured to Japan not

The Chinese were employed en route. details of the Kasuga's crew are not stated, but her total complement was 214, among them being 7 Japanese.

The Nisshin was commanded on her voyage out by Captain Lee and the Kasuga by Captain Poynter.

These officers, who commanded the Nisshin and the Kasuga on the voyage out, were yesterday received in audience by the Emperor.

A Garden party was held on the afternoon of Feb. 18th at the Recreation Grounds for welcoming the officers who brought out the warships Nisshin and Kasuga. Governor Sufu, Mayor Ichihara, and other prominent merchants in Yokohama were the committee for the purpose. At 2.20 p.m. the foreign crew of the warships

At 2.20 p.m. the foreign crew of the warships arrived at the garden accompanied by the officials of the Kencho and the City office.

For the Karnga: Lieut. Boyle, representative of Arnstrong & Co., Commander H. H. Poynter, Mr. T. C. Nichols, Mr. D. E. Freemantle, Mr. J. White, Mr. W. G. Missen, Gunner C. H. Painter, Chief Engineer B. Guiseppe, 2nd Engineers R. Roberts, A. Oresti, and F. Michele, paymaster P. Moscatelli, and for the Nisshin, Capt. J. F. Lea, Mr. W. Hell, Mr. M. Shield, Mr. Arthur Mead, Mr. F. Eck, Dr. B. A. S. Aylward, Gunner F. H. Paster, Purser A Comilie, Chief Engineer E. D. Pecci, 2nd engineers A. Scoutarini, R. E. D. Pecci, 2nd engineers A. Scoutarini, R. Pontremoli, and L. Vattino, and electric engineer M. Michili were present at the cerewony.

Mayor Ichihara delivered a brief address:

GENTLEMEN,—We are assembled here to welcome you to the city of Yokohama and to tender you our hearty thanks for the gallant service you have just rendered our country in safely navigating to our shores the new cruisers, the Nisshin and the Kasuga. As our good friends who have arrived here from the distant shores of the West you would be our welcome guests even in ordinary times. But you have come at this critical period of our country's history some of you as citizens of Great Britain, our esteemed and faithful ally, and some of you as citizens of Italy, our honoured and sympathetic friend, in one of whose noted cities these cruisers were constructed. Late officers of the Nisshin and the Kasugat, in slight recognition of the mission you have so faithfully and promptly executed, I take great pleasure in extending to you in the GENTLEMEN,-We are assembled here to welcome mission you have so fathrillify and promptly executed, I take great pleasure in extending to you in the name of my country, a most royal and hearty welcome to Japan. Is it not natural and appropriate that the whole nation should have been waiting for your arrival and preparing to welcome you to our shores? Gentlemen, as the foremost sea port of this country and at this front gate of our Imperial Capital, we have the honour and satisfaction at this early date to extend to you our most hearty greetings. It is with extreme sorrow that I must say greetings. It is with extreme sorrow that I must say to you that this country is now on the verge of what may become a most destructive and momentous war, and it is with an aching heart that Japan has been forced to arms in order to preserve her own integrity. It has been declared that the Japanese are warlike; this contention we emphatically deny, we do not like war. But when the independence of our nation \(\mathbb{ have impelled Japan to this conflict are known to the civilized world, and require no apology from me. To this world jury, whose verdict has already been days' delay might then (3rd February) have been fatal. However, to the great relief of foreshadowed by many expressions of sympathy and the Japanese the two fine vessels are now safe. Their armament, however, is not yet in position, and it is probable that some three weeks must elapse before they are quite ready for sea.

To this world jury, whose verdict has already been foreshadowed by many expressions of sympathy and cause. Now at such a juncture as this, the timely arrival of the Australia addition to the naval power of this country. And now, Gentlemen, we owe it to your gallant assistance and skilful navigation that here two armoured cruisers are able to join our your galain assistance and skilled havingation that these two armoured cruisers are able to join our squadron so early in the contest. We therefore have the honour to tender you our profound thanks for the very timely service you have thus rendered to our country at this critical moment of its history.

riendly relations and in the cause of peaceful progress and enlightenment of the world? Centlemen, consider Japan as your country while in the East; the whole land with its variety of natural scenery and monuments of art as well as the hearts of the people are open to welcome and entertain you. May you feel perfectly at home and may your stay in this country be long and pleasant. I now have the honour to present you with a slight token of our regard and esteem, which I trust will be a pleasant souvenir reminded of this happy occasion. souvenir reminded of this happy occasion.

Mr Saito, an interpreter of the Yokohama Municipal Office then presented to the foreigners a silk *Habutai Fukusa* of 2 feet square lined with silk shiuse on which was embroidered a looking glass of the Japanese olden time with gold yard and displaying the words Nisshin and

Kasuga.

Mr. Boyle, representing Messrs. Armstrong,
Whitworth & Co., who undertook to deliver the vessels to Japan, replied on behalf of the firm he represented and Captains Lea and Paynter, and the other officers. He thanked those assembled for the kind reception given them, and said they little expected such a function when they left Genoa The arrival of cruisers of such power as the Nisshin In a arrival of cruisers of such power as the Massum and Kasuga was at the present juncture of great importance to Japan. The contract for the delivery of the vessels was signed on December 31st last, and on the 9th of January, at 4 o'clock in the morning, they started for Japan. As six days had been spent in harbour en route it would be seen they had not lost time in getting the vessels out. At Port Said they had come across the Russian fleet on the way out to the East, and it was an anxious moment for them to come in contact with possible enemies. He was glad to say they had left them far behind, and as far as he knew the Russian fleet was still where they left them. (Applause.) That was the most anxious moment, with the exception of the last few days between Singapore and Japan. They were hurried tway from Singapore, and knew something had occurred as they neared the coast of Japan. He was glad to say, however, that they arrived in safety on the 16th, as they all knew. Japan was now passing through what was probably the most critical period in her history. War had been forced on Japan by the necessity of upholding her prestige, but there was no doubt that she would emerge from the struggle with added lustre to her name. That was the wish of the officers and crews of the Nisshin and Kasuga, and in their name he begged to present his thanks for the splendid welcome accorded them.

The entertainment was concluded about o'clock. During the proceedings a hundred and two fireworks were displayed and the two bands of the navy, the masked daucers, acrohatic feats, spinning tops contaming datasets. spinning tops, pantomine dances, etc. were much applauded.

" THE DARLING OF THE GODS."

This, as our readers doubtless know, is the title of a play originally written by Mr. David Belasco and Mr. John Luther Long for production in a Washington theatre: it proved so popular in the U.S., that Mr. Beerbohm Tree took it across the water and has put it on at His Majesty's Theatre in London. It is described by the English papers as being beautifully, nay gorgeously, staged, but as one critic—writing in the Academy—says, the theme of the play is not essentially Japanese. It reminded him at times of such different works as "Romeo and Juliet" and "La Tosca.

Kara is an outlawed prince and the leader of the ten remaining Samuraz who refuse to give up their swords in obedience to the edict of the emperor; the

their way out, with the exception of Kara and two followers, who commit the "happy despatch," Yo-San also dying by her own hand. Then in a final tableau Yo-San aud Kara meet 1,000 years hence in the First Celestial Heaven.

A Mr. Yoshio Markino-so he spells his name in the Academy-seems to have been engaged in the production of the play, and we give below an extract from his critique:-

I gave a few hints to the chief artistes as to gestures and manner and these were enough, they have put them all through the play very naturally, although it must be very difficult when all comes only from memory. A Japanese who did not know English could follow the story. The gesture of Princess Yo San when she is bidden to kneel by her rincess to san when she is bluden to kneer by her father is quite Japaness—so much so, that seeing it the old proverb came into my mind, "The grass is blue but this is bluer." Then when Prince Kara spills the hot tea on his hand Princess Yo San wipes his hand with her sleeve, this is very Japanese. And when she could not please the Prince with her song than she facther his sword in silence and says. "Go

his hand with her sleeve, this is very Japanese. And when she could not please the Prince with her song then she fetches his sword in silence and says, "Go to-night;" it is a very simple act, but very feeling. It is not a Japanese play, but it has much like the play "Soga Brothers' Vengeance," in which Danjuro acted as "Kudo." Mr. Tree as "Zakkuri" is very much like Danjuro as "Kudo," and Mr. Gill's martyrdom is like "Kodanjis" in the same play while Mr. Cookson resembles Vennosuke when he played in that play. Miss Ashwell's snakey movement, which is very Japanese, is like the movement of Kikugoro, a famous actor who played so well woman part, for in Japan we have not women actors, but men who are trained from the years old. In Japanese comedy people always find a character like Mr. Rose's "Tanda-Tanji."

One word of love-making: the English love-making on stage is to my mind like "toffy"—too sticky. In Japan it is more delicate, more like "whisky-and-soda," but the love scene in the third act of this play is now perfect. Japanese have a heart like Englishmen, but religion prohibited love and that made us hypocrites.

Another critic, a member of the staff of the London Globe says :-

"The Darling of Gods" furnishes opportunity for wonderful pictures and for superb acting, and is exactly the work to commend it elf to a management exactly the work to commend it ent to a management so enterprising as that of Mr. Tree, one of whose characteristic and most assured triumphs it is. Quite impossible it is to convey in description an idea of the wonderful atmosphere that is obtained. It is, of course, as melodrama, lightened and enlivened with pictures of Japanese manners and customs that the whole is most noteworthy. It is, however, full of humans the quaint specials of Japanese ed with pictures of Japanese manners and customs that the whole is most noteworthy. It is, however, full of humour, the quaint spectale of Japanese courtesy and genuflection creates much amusement, and the stately politeness and formality with which the victims of Japanese injustice are invited to come and be killed is side-splitting. The dances and other entertainments are vastly pretty, the scenery is lovely, and the dramatic opportunities that are afforded are considerable. Nothing could be grimmer than the view of Zakkuri's swordroom, in which the weapons of deceased Samurai are offered at the shrine of the stern and many armed God of War, nothing lovelier than the views of the flowery land of the almond, nothing more wonderful than the sight of the chility paradise, we watch through the misty gloom of the nether world. The characters are finely conceived. Kara and Yo-San constitute a pair of deathless lovers. The former, in the hands of Mr. Basil Gill, is one of the most resolute land chivalrous heroes we can recall, while Miss Ashwell as the latter blends juvenile innocence and charm with tragic intensity and passion. In the hands of Mr. Tree, Zakkuri constitutes a marvellous creation. Bland and benign in exterior, he covers with a mask of courtesy Scarpia-like passions, and is perhape the deadliest and most fateful being we can recall.

read his part wrongly. Granted that his conception of the character of the forbidding sensualist Zakkuri was right, he achieved all that an actor could hope to do, but surely his conception was wrong. Acted as Mr. Tree acted the part, Zakkuri had about him an air fatally reminiscent of the "Mikado."

JAPANESE ANIMALS.

An interesting small-type article on the fauna of Japan appears in the Spectator. After commenting on the wide difference to be noted between New Zealand and Japan in the matter of indigeneous animal and bird life, and the poorness of the domestic animals of Japan as compared with the wild species, the writer goes on to say :

animals of Japan as compared with the wild species, the writer goes on to say:

In Japan, equally with Northern China, the quadrumana are found further north than in other parts of the globe. The sight of humming-birds in the more or less temperate regions of the Pacific coast of North America is not so surprising as the presence of an active and prolific race of monkeys among the pine groves of Japan. They are rather large apes, with speckled red faces and a most unpleasant cast of countenance, and, to judge from the behaviour of those kept in captivity, have considerably more than the average degree of monkey intelligence. They seem quite indifferent to cold, though the forests which they inhabit are frequently visited by deep falls of snow. They are largely herbivorous creatures, devouring tree shoots, leaves, and other vegatables, and do not appear to invade the cultivated ground, as do the baboons of South Africa. They are adepts at throwing sticks and stones in self-defence, a trick which is well known to the natives in the forests which they frequent.

The red-deer and its varieties, such as the splendid stag known as the "maral" in Manchuria and Siberia, are not found beyond the limits of the continent. But in the Japanese or sika deer our Far Eastern allies possess an animal so handsome, hardy, and excellent as venison that its highly successful introduction into English parks is matter for congratulation. It is a short, sturdy, strong-looking edeer, and the stags carry handsome horns, though by no means so large in proportion as are those of the Indian axis stag. In winter the fur is thick and of a dark brown, in summer it is of a bright fawn colour, dappled with white spots. The race is prolific, and the stags are so courageous that they have been known to fight and kill red-deer of far greater size when confined in the same park with our native stags. The fure company of the small silands belonging to Japan in the

to high and latt red-deer of tar greater size when con-fined in the same park with our native stags. The fur seals still come to their old "rookeries" on one or more of the small islands belonging to Japan in the Behring Sea, but their number is rapidly dwincling there as elsewhere.

But it is in bird life that the natural history of the islands is most remarkable, and the list of interesting

islands is most remarkable, and the list of interesting species is by no means confined to the wild ducks and cranes which are such a favourite subject in the national art. Antong what may be called the "popular" birds of the country are the cuckoo and the "jenny wren," and it is somewhat curious that public fancy has always preferred to delineate the storks, cranes, ducks, and geese of the rice marshes and rivers rather than the birds of the garden and the field. If the cranes have a religious association. of the almond, nothing more wonderful than the sight of the chilly paradise we watch through the misty gloom of the nether world. The characters are finely conceived. Kara and Yo-San constitute a pair of deathless lovers. The former, in the hands of Mr. Basil Gill, is one of the most resolute and chivalrous heroes we can recall, while Miss Ashwell as the latter blends juvenile innocence and charm with tragic intensity and passion. In the hands of Mr. Tree. Zakkuri constitutes a marvellous creation. Bland and benign in exterior, he covers with a mask of courtesy Scarpia-like passions, and is perhaps the deadliest and most fateful being we can recall.

Finally we quote another observer. He writes:—The play does not grip hold of one's heart; there is a vague sense of evil fate hanging over the lovers; there is a thrilling murder of a spy; torture is talked of until it becomes commonplace. Yet the story is at bottom strong, the plot well put together, and the characters distinct. What then is lacking? Partly, I fancy, it was that the actors were over-anxious as to their behaviour in novel surroundings and under unusual conditions, which were overcomenticly only by Mr. Basil Gill who acted quite greatly as Kar, and Miss Lena Asshwell who was excellent as Juliet—If mean, Yo-San; partly, I believe, it was that Mr. Tree

species, is carried down over the whole breast. It is also larger than either the common or Chinese pheasant, and when crossed with these greatly improves the size of its progeny.

NOTES ON CURRENT EVENTS.

Railway Authorities announce that for the present there will be only 8 trains daily between Yokohama and Tokyo, the last train in the evening being at 7.40 o'clock. One effect of this is that we shall be unable to send the Japan Mail to Tokyo on the evening of its publica-tion. It will have to leave Yokohama at 6.10 a.m. on the following morning, and its delivery to our Tokyo subscribers will consequently be later than has hitherto been the case.

Viscount Hayashi reports by telegraph that the British press and the British people have evinced the greatest enthusiasm over Japan's initial successes; that public opinion unanimously recognises the justice of her cause, and that demonstrations have occurred in her favour in London.

Russia, a Foreign Office telegram from Paris on Feb. 12th stated, is about to raise in Paris a loan of one thousand million francs at 5 per cent, the price of issue

Mr. Uchida, Japanese Consul in New York, telegraphs that his nationals have held a meeting, when they decided to subscribe as largely as possible for Japanese war bonds and for the Red Cross Society.

A state of siege has been proclaimed in the case of Nagasaki, Saseho, Tsushima and its neighbouring seas, and Hakodate.

Mr. Motono telegraphs from Paris that the Franco-Siamese treaty was signed there on the 13th instant.

The parliament of British Columbia has passed a law which went into operation on the 16th instant, requiring that every foreign immigrant must be able to read a sentence containing at least 50 English words, and that immigrants failing to satisfy that test must be carried back by the vessel in which

The period of grace having expired on the 16th two Russian sailing rhips were seized on the 17th in Hakodate-the Botik and Nazeshita.

THE PORT ARTHUR FIGHT.

THE official account of the Port Arthur fight shows that all the stories previously received require to be greatly modified. Whence these stories emanated it is hard to say. Some of them lacked even the proverbial grain of truth, and others had an element of accuracy almost inexplicable when we consider that with the exception of Viceroy ALEXIEFF's telegrams and the vague reports carried by a passing merchant steamer, no communication took place between the scene of the attack and the outer world from the 8th until the afternoon of the 11th. The facts now seem pretty plain. Admiral Togo commenced operations by an attack with destroyers. He does not himself say how many of these craft were sent in, but it is probable that Viceroy ALEXIEFF is pretty near the mark when he speaks of eight or nine. It is known that on the night of this attack the time when he wrote his report on the 11th lay under the shelter of the forts, and the Admiral of the Russian Squadron and many of his officers were on shore, attending a theatrical performance-some accounts say a circus. Whether their absence impaired the vigilance of the fleet we can only conjecture, but at any rate the destroyers got within range and succeeded in torpedoing the two finest of the Russian iron-clads and a cruiser-namely the Retvisan (12,700 tons), the Cesarevitch (13,100 tons) and the Pallada (6,630 tons). Togo, in his official account, which is studiously sober and carefully worded, does not according to the present aspect of things, The cannonade lasted about an hour. As one or two other vessels were injured, but he there is as yet no information. describes the injury as "great." And in On the forenoon of the 9th, Admiral French telegram. But if there were any were not actually sunk, nor did they thus extraneous aid, and probably of resum-

gallant men that took them into action. It one was an armoured cruiser, the Bayan is probable that the Japanese sailor is (7,800 tons), and two were protected cruisers, eminently qualified to use a torpedo effect the Askold (6,500 tons), the Diana (6,630 tively. RUSSIA'S DECLARATION OF WAR.

T is a common saying that the Russians are clever diplomatists. If cleverness is to be judged by its fruits, that is a doubtful appreciation. What has Russian diplomacy accomplished in recent times? It has dragged the Empire's fair fame in the dust. That is its principal achievement. There is no country more thoroughly distrusted. Probably there never was a country more thoroughly distrusted. Wasteful promises wantonly broken have been the staple of Russia's State record all through the latest phase of her aggressions. She might have stood territorially just where she stands without having wrecked her moral reputation in getting there. If it be clever diplomacy to purchase small advantages at an immense price, then Russian diplomatists are clever. The TSAR'S declaration of War is consistent with the doings that preceded His Majesty describes the negotiations which have ended in war as an attempt to revise the conventions between Russia and Tapan with regard to Korea; an attempt made at Japan's request. The TSAR did not compose the Declaration. He has the reputation of being a sincere and upright man, and persons of that disposition do not behave with ridiculous insincerity. It is ridiculously insincere to say that Japan asked to have the conventions about Korea altered, that Russia consented, in the interests of peace, and that Japan, without awaiting the conclusion of the negotiations, appealed to the That version ignores, and deliberately ignores, the whole origin and cause of the complication, namely, Russia's aggressions and flagrantly violated promises in Marichuria. But for those aggressions and those violated promises there had been no complication nor any rupture of good relations. Manchuria was the prime subject of discussion. If Russia had observed her written pledges to restore Manchuria to its rightful owner, the Korean problem might have remained as it was for a century. The Palace Hotel. There was a large attendance.

TSAR'S ministers labour under no delusion Mr. N. F. Surir said that as a preliminary step towards the formation of a proposed association be did not think be could offer a more whatever as to that. They know, mone better, that when they attribute the trouble popular or desirable name than that of Mr. J. P. to Japan's desire to revise the Korean con- Mollison, whom he moved to the chair. better, that when they attribute the trouble

ventions, they are deliberately throwing palpable dust too! It seems that Russia had not emerged from mediæval convictions him in voting him to the chair on such an important occasion. Feeling as he did very strongly on this relief question he gladly accepted the office and could only hope that he would be able to fill it to their satisfaction (applause). He The net result is that within 3 days of dispensed with, and mediæval conceptions that East and West are as far removed as they ever were; that they are still separated by an impenetrable cloud of mutual ignorance, and that Europe, being without means to decipher the truth about Asia, will swallow any falsehood. Hardly can one believe that they do imagine such things, and yet what other hypothesis will explain the glaring deception practised in this Declaration? Whatever be the explanation the thing is vastly clumsy. For every nation understands, and has shown plainly that it understands, the real source of the complication. A dignified declaration of war stating simply the inability of the two ed as they ever were; that they are still and went on to say:that it understands, the real source of the complication. A dignified declaration of war stating simply the inability of the two empires to arrive at an understanding with regard to questions of imperial importance, might have won some sympathy. But the poor trickery of the Declaration as it stands is contemptible and will be universally contemned outside Russia. The chicanery is thrown into stronger relief by comparison with Japan's Declaration, where the facts of the negotiations are plainly and simply stated and the judgment of the world is invited. However strongly Russian statesmen may have been tempted by habit to have recourse to guile in a diplomatic document, they might at least have remembered that public opinion had long suspected them of an intention to employ this very ruse—the ruse of baiting Japan beyond endurance and then laying on her the responsibility of the rupture—, and they might have understood that in comfirming the suspicion they would put illuminating touches to a poor, thoroughly paltry, record. Not picion they would put illuminating touches to a poor, thoroughly paltry, record. Not the last touches, however. It was left to His Majesty the TSAR to complete the farce in his address to his officers, where he accused the Japanese of treachery because they attacked his fleet and his fortress in the night two and a half days after the officially announced rupture and two and a half days after Japan's officially announced resolve to take independently whatever measures her interests might seem to dictate. HIS MAJESTY'S plaint irresistibly recalls the Chinese generals at the Tientsin forts when they appealed to Heaven to punish the French and British tricksters who had stormed the forts from behind, as they were never intended to be stormed.

THE RELIEF MEETING.

The meeting called by notice to consider the matter of contributing to the support of sufferers by the war was held on Tuesday in the Oriental-Palace Hotel. There was a large attendance.

Mr. WILLIAMSON JONES seconded and Mr. Mollison took the chair,

The CHAIRMAN asked the meeting in the first place to let him thank them for the honour done read the newspaper notice calling the meeting

ceived as all foreigners are received by the Governor in the kindliest and most sympathetic manner. The various channels of relief were considered in turn and the following conclusion arrived at. That the Red Cross Society to which already considerable sums have been subscribed by foreigners is a large and wealthy body, never likely to be in want of funds, inasmuch as contributions will be forthcoming from all parts of the World in addition to those from lanances sympathers; and besides if those from Japanese sympathisers; and besides, if I understand the objects of the Red Cross Society rightly, they are to aid the wounded among the Military and Naval Men during the war, and Ingary, they are to Mu the wounded among the Military and Naval Men during the war, and them only. Governor Sufu strongly recommended to our consideration the Japan Ladies Patriotic Association, the object of which is to give assistance to the bereaved families of Military and Naval Men killed or who die of sickness, or of the Soldiers and Sailors who are crippled and unable to work for their wives and children. That, it seems to me, is an association eminently deserving of our support, in fact it just points to the cases that I said at the opening of my remarks it should be our object to assist. In support of this opinion, I may adduce one I have received from a well-informed source in Tokyo, which reads as follows:

"Nothing better can be done than to hand all subscriptions to the Japan Ladies' Patriotic Association. These ladies reach the cases of really distressed and bereaved folks, who though deprived of their bread-winners, are not sufficiently relieved by the ordinary routine of official aid. I entirely agree with you that the Red Cross will be amply supplied with money."

with money."

with money."

The foregoing sets forth in a few words my own ideas exactly, except that I would not wish to see all the money subscribed handed over to any one Association. That would simply mean one subscription list, as meaning the beginning and end of our efforts. What I would rather see would be an Association formed with a permanent fund, always open, that could be drawn upon as required, to meet any cases of distress that came

under its notice, and that it should be the special business of the Committee of such an Association to make the fullest enquiries with a view to affording help where most needed. We shall hope that the war just begun may be a short-lived one, but no one can tell, and if unfortunately it extends over a year or more the suffering will become wider and more accentuated, so much so that it might be necessary to repeat subscriptions to which end I think you will agree with me that a permanent fund in the hands of a permanent Association is absolutely necessary. This brings me up to the first resolution to be laid before this meeting, but before putting it forward I would like to add that another Society that Governor Sufu recommeuded to our consideration is one that was formed only a few years ago will the object of providing comfort and assistance to the families of the soldiers of the Kanagawa Prefecture during a time of war. Governor Sufu is President of the Association and naturally takes a keen interest in it. He would be pleased if we would take it into our consideration, and thankful for any contributions that might be made to it from our General Funds. There appears to be one admirable provision in connection with this Society and that is if funds contributed are in excess of these wants the surplus will be devoted to the relief of suffering families in other prefectures. Reverting to the Japan Ladies' Patriotic Association it will interest you to know that whilst His Imperial Highness Princes Kanin is Patron of the Red Cross Society, Her Imperial Highness Princes Kanin is Patron of the Red Cross Society and Princess Hisako Iwakura. President of the Japan Ladies' Patriotic Association. Count Masayoshi Matsukata is President of the Red Cross Society and Princess Hisako Iwakura. President of the Japan Ladies' Hairotic Association. business of the Committee of such an Associa the fullest enquiries with a view to affording Princess Kanin is Patron of the Japan Ladies , Patriotic Association. Count Masayoshi Matsukata is President of the Red Cross Society and Princess Hisako Iwakura, President of the Japan Ladies' Patriotic Association. Its Head Office is of course in Tokyo, but there are Branch Offices in many provinces, one at Yokohama under the able presidency of Madame Sadako Sufu, wife of our esteem-

In addition he read a copy of a letter from Bishop Awdry to whom he had written, being anxious to obtain the co-operation of Tokyo:

On Tuesday I have Committee meetings in Tokyo at 2 and 3 p.m. which I cannot miss. If they should be put off I would come to Yokohama but there is little chance of it. I hope, however, Mrs. Awdry will be at the meeting. be at the meeting.

Meanwhile I cannot help thinking that for most of the foreigners with whom I have most influence personal work in conjunction with Japanese committees for the wives and families of poor soldiers in the district where they live is likely to be the most fruitful thing. Of course such work must be cooperative with what others are doing, to prevent experiencing.

overlapping.

This suggestion may perhaps be useful for your meeting, and in any case we should wish to know what other schemes are on foot and to work fully in

what other schemes are on foot and to work they in harmony.

We are already in communication with the "Aikoku Fujin Kwai" and some other organizations. Missionaries rarely have much money, but they know the Japanese poor better than other classes do and can give service and learn the detail and needs of these they save.

those they serve.

I certainly wish to be in your movement, bût I cannot help thinking that when personal work is involved, and not merely subscription lists. Tokyo and Yokohama will have to be dealt with separately.

Mr. Mollison's speech was received with frequent bursts of applause. He closed by pro-posing: "That this meeting resolves itself into an association to be called the Yokohama and Tokyo Foreign Residents Association for the relief of sufferers by the War."

Mr. W. T. PAYNE seconded this and the motion was carried by acclamation.

THE CHAIRMAN said that in order to carry out the work of the Association it was necessary to have a strong and representative committee, probably about 15, representing all nationalities. Perhaps some gentleman might have thought of some names beforehand.

Mr. FRAZAR proposed a number of names, after

The CHAIRMAN invited nominations from Tokyo.

Norwegian-J. M. Jensen. Austro-Hungarian -J. Kuhn.

On the motion of Mr. E. Mendelson those

names were put to the meeting.

Mr. Hamilton seconded and the proposition was adopted, a further proposal by Mr. Mendelson that the Committee should have power to add to or otherwise modify their numbers being adopted.

The CHAIRMAN stated that Mr. Barclay had kindly undertaken to get a Committee together in Tokyo and it was moved and seconded "that Mr. Barclay be empowered to get together a Tokyo Committee to be accepted by the Yokohama Committee as representative of Tokyo."

Mr. MENDELSON moved that the Committee be empoweved to take such further steps as may n necessary without reference to the meeting

Messrs, McIvor and Thomas both seconded

this and it was adopted.

A motion proposed by Mr. Melvor and seconded by Mr. A. Bellamy Brown that the foreign heads of missions in Tokyo and Bishops Awdry and McKim should be invited to serve as an

advisory board was rejected. This closed the proceedings.

CHRIST CHURCH.

The annual meeting of members and seat-holders of Christ Church took place on Monday in the Masonic Hall, Mr. Jas. Dodds in the chair. The notice calling the meeting was read by the

Hon. Secretary and the Chairman then said he would take the minutes of last meeting as read.

The CHAIRMAN said as the report and accounts had been in the hands of seatholders they might be taken as read. They went so fully into the affairs of the church that he did not propose to amplify them by any lengthy remarks, and would leave any further information to be elicited by questions. The only thing calling for special remark was the resolution brought forward by the Committee as to the future management of the affairs of the church arising out of the legal opinion they had taken on the scope of the trust-deed, but with the meeting's permission he would allow this to stand over till the report and accounts were adopted-which of course would not involve

were adopted—which of course would not involve
the passing of the resolution.

Mr. E. W. Kilby, while thinking the report
and accounts very satisfactory, called attention to
the manner in which the offertories were given and pointed out that in reality there was an increase of 19 per cent.

The CHAIRMAN thought the accounts clearly showed that the offertories amounted to yen 3,101 that certain amounts were devoted to special purposes and there remained a balance of yen 2,530 available for the Church. He saw no

reason why that should be misunderstood.

REV. W. P. G. FIELD thought the accounts should have been put in a different form, the offertories Mr. E. C. Davis thought the committee have been put in a one-rent kinn, the outstances should be representative of all nationalities and in reply to Mr. A. G. M. Weale the Chairman detailed statement. He also pointed out that the said the preliminary committee had taken as offertories showed an increase of 19 per cent., and their guide the subscribers to the International contended that the way adopted in these accounts was not the usual method of dealing with offer-

MR. A. BELLAMY BROWN at this point seconded

present Tokyo. Messrs. R. S. Miller and Deguy the Chairman's proposal as to the adoption of the report and accounts, and

THE CHAIRMAN having expressed the conviction

The Chairman then brought up the question of to workable proportions.

Various names were suggested in addition to those already mentioned and eventually the sub-that connexion that in view of questions so fre-Committee returned with the following list of names:

British—Messrs. Hawkins, Mollison, William ment of church affairs the Trustees deemed it rust-deed on the general government and management of church affairs the Trustees deemed it is to the lead on the general government and management of church affairs the Trustees deemed it. desirable to take legal opinion in the matter and so put themselves in a position to answer all enquiries with due authority. With this view he formulated a number of enquiries for submission to counsel; these were supplemented by Mr. James and again by the late Mr. Kilby, and the reply was now before them in the form of an opinion from Mr. Litchfield who was placed in possession of all the church records and minute books and who had of the church from its first establishment. This opinion, together with a Supplement containing replies to points which were not quite clear he did not propose to read unless specially desired —they were there for reference in case of need, meanwhile he hoped the meeting might be satis-fied with the digest, which had been circulated with the notice calling the meeting. It would be observed that it would up with a practical suggestion as to the future government of the Church, which the Committee had adopted and now put before them in a special resolution. They did so in a formal way in order to bring on the question for discussion, but he might say that since the issue of the notice calling the meeting they had heard an expression of opinion that the appointment of four Trustees who were elected for life would give them too large a representation on the Committee and the present Committee would in no way feel hurt if their proposal were amended and the number of Committee be altered from 7 to 9. In bringing this proposal forward the Committee had behind them the opinion of Mr. Litchfield, who has seen the confusion that reigned in the past, and they supported it as being likely to promote smoother working in future, it being occasionally difficult to define where the duties of the trustees and those of the committee began. The question now before the meeting practically was whether they were in favour of a committee of 7, including the trustees, a committee of 9 including the trustees, or whether they preferred the old form of government, 4 trustees and a separate committee of 7.

The following was the digest of Mr. Litchfield's opinion :

1.—That there has in the past been a general mix up of the functions and powers of the Trustees and Committee arising out of misunderstanding.

2.- That when Government aid was withdrawn a 2.—I hat when Government atta was wandlawn a Trust Deed was executed vesting the property in four Trustees, who amongst other duties had to see that the services were conducted according to the Rites of the Church of England and as the trustees took up the functions formerly exercised by the British Consul, they also held the right of appointing the Chardein.

3.—The Trustees are appointed for life subject to the conditions of residence in Japan and ability and willingness to act.

4.—The Trustees are not responsible to any but Seatholders or their representatives nominated in General Meeting to confer with Trustees.

5.—The Trust deed did not appear to contemplate a Committee other than the Trustees, and they were invested with full powers, but prior to the date of the Trust Deed, a Committee, whose term of office was annual, came into existence and has since continued to act as the body superintending the temporal affairs of the Church; so that the Trustees have exercised the prowers formed wested in the Count and the the powers formerly vested in the Consul and the Committee have attended to the temporal or financial affairs of the Church,

affairs of the Church.
6.—The appointment of both Trustees and Committee lies with Seatholders duly qualified. Trustees for life. Committee annually.
7.—A general Meeting of Seatholders must be held in each year, early in the year, and at that meeting a Committee must be appointed to superintend the temporal affairs of the Church.
8.—Clurum at a Ceneral Meeting saven.

8.—Quorum at a General Meeting seven.
9.—The Chairman at all Meetings of Seatholder

shall be the Chairman of Committee for the time Decorations, Momban's expenses, &c., wherein

being.

10.—Qualifications to be present and vote. Any person who has resided in Yokohama 6 months and has actually paid yen 20 Annual Subscription for one sitting before notice summoning meeting has been issued. No other is entitled to be present unless he has easid a contribution of yen 20 for the year in has paid a contribution of jen 20 for the year in

has paid a contribution of 32n 20 for the year in question, i.e. current year.

11.—No provision in Trust deed for Poxies, therefore not admissible.

12.—Banks and Firms holding more than one sitting have only one vote, which can be vested in one representative.

13.—Trustees have no right to refuse to let a seat

one representative.

13.—Trustees have no right to refuse to let a seat to any person they may think undesirable.

14.—Seatholders can at any time call a general meeting under requisition signed by two Seatholders. Recommendation by Mr. Litchfield. That new Rules and Regulations for government of church affairs should be drawn up and suggests that the general management of affairs be vested in a Committee of seven, of whom the permanent Trustees should ex officio form part and the other three members be elected annually.

Mr. E. W. Khaw said: I beg to propose an amendment to item No. 14 of the Digest of Mr. Litchfield's opinion on the Trust Deed, to read: "That the general management of affairs be vested in a Committee, consisting of the Incumbent 'ex officio,' the Trustees 'ex officio,' and certain other members to be elected annually." And I would suggest that, besides the Trustees and Incumbent, 2 or 4 other members be elected so as to make an odd other members be elected so as to make an odd number. I should like to say a few words in support of this amendment. Last year a proposition of a like kind was put forward after the Committee had been elected, and so ruled out of order. This proposition was discountenanced for three other reasons. 1st: That the Incumbent, though seats were held in the name of the Parsonage, had not paid for a sitting and, therefore, was not legally a seatholder, and therefore neither legally present, nor eligible as a member of the Committee. and: That it would be injudicious and inconvenient to have the Incumbent on the Committee, lest questions of a personal character might have to be proposed or discussed in his presence. 3rdly: It was hinted that parsons were not as a rule what one could term "business men."

To deal with the first point as to his eligibility to be present, and to stand for election on the com-mittee. You must now all be aware that the Incumbent is present at this meeting by virtue of his own right, having himself subscribed to a sitting in Christ Church, and that, therefore, as a seat-holder is eligible for election on the Committee The incumbent, simply as the incumbent, would not be legally, by the ruling of the General Meetingheld last year, either eligible for a place on the Committee or allowed to be present at this General Meeting. As to the inconvenience of the parson on the committee. Were a question put to the parson asking him to withdraw he would almost certainly do so. If, however, the parson declined to withdraw as he would have a right to do, (and this would be very improbable)
what would there be to prevent any person, at
all hazards, being perfectly outspoken about his opinion, even though they reflected discreditably upon the Incumbent. Provided his statements were just what would be have to be afraid of? interest you to know that at a Church Committee meeting in Australia (and things are much the same there as they are here) it was moved and seconded, the Incumbent being a member of the committee and himself present at the time, that the Incumbent's stipend should be lessened. This the Incumbent's stipend should be lessened. motion was, moreover, seconded, put to the meeting, and successfully carried. As to the third point, with regard to the parson, as a general rule, not being a business man. Take the report before you and look at the disbursements for the year. Who than the parson is more able to inform the Who man me parson is more able to inform the Communities as to the value of an organist's services? or as to what should be paid the Choristers? or if the expenditure incurred by the use of Sacramental wine was justified? Who better than the dweller at the parsonage could state what improve-ment and repairs are required there? Who than the parson would have greater interest in the cost and erection of railings and walls round a church? Take any other items: Fuel, Light, Cleanchurch? Take any other items: Fuel, Light, Clean- On the motion of Mr. A. Bellamy Brown, bring in its train, for have we not ourselves just ing, Printing, Advertising, Stationery, Flowers, seconded by Dr. Tripler and Mr. Stone, a cordial emerged from a terrible conflict in which most

would the parson be unable to give advice on these subjects, and whose advice would be more valuable than his? In every Church in England, the United States and Australia, the parson is always not only a member, but also the Chairman, of his Committee. The Pastor of the Union Church in this town is in similar position. Why should we be in this respect different to every of the seatholders of Christ Church on other parish. Do not all these points contradict the following communication was read: the general opinion that the parson is not a business man? There is no doubt of it. You appreciate the incumbent. You have known him for two years. It is right for you to vote for him and I am sure you and your committee will find his advice and active interest in the affairs of the church of immense value.

Rev. Mr. FIELD, declaring that he had no share or part in bringing this matter forward, withdrew from the meeting while the discussion was going

The Chairman expressed himself as personally in favour of the chaplain being on the Committee. Mr. P. E. F. Stone seconded Mr. Kilby's

proposal.

After remarks from Messrs Bent, Stone and F. O. Stuart, Mr. Kilby said the incumbent should be on the Committee whether he was a seat-holder

Mr. Bent at length moved that the Committee consist of four trustees ex officio and five members, to be elected at the annual meeting.

In reply to the Chairman

Mr. H. C. LITCHFIELD said that in considering the scheme under which the affairs of Christ Church had been managed hitherto he had to take for his guidance the old rules framed and founded first on an Act of Parliament and secondly on instructions from the British Secretary of State for Foreign Affairs. The trust-deed under which the trustees held office referred to those rules and that Act and in absence of any scheme adopted by a general meeting they must take it that the old rules were their constitution and Under them he found that any government. person paying pew rent was eligible to be present at a general meeting, but the question had now arisen as to the eligibility of the parson to be present at such a meeting and to be a member of Committee. Under the rules he could, it was evident, having paid pew rent be present and vote at this meeting. As to the second point the old rules said that the incumbent should have no not eligible to be a member of the Committee. It was quite within the power of members of the church to frame a new scheme, but till they did so they must abide by the old rules.

Considerable discussion followed, in the course of which Mr. MacArthur asked what more the incumbent could do by being on the Committee. In reply to the Chairman,

Mr. LITCHFIELD said that even as a seat-holder the incumbent should not under the rules be a member of Committee.

The Chairman thought in view of the opinion they had received the matter should he deferred; to deal with it should be, he was going to suggest, the first duty of the new Committee.

Mr. Field had in the meantime been invited

to re-enter the room (on the suggestion of Mr. Stone) and on his taking exception to the legal opinion, the Chairman, who had said he supposed the discussion was closed, remarked regretfully that it seemed he (Mr. Field) had been recalled too soon. This put everyone in a good humour and the meeting adopted Mr. Bent's amendment which had been seconded by Mr. H. J. Sharp.

Mr. L. J. HEALING was then elected a Trustee of the Church in place of Mr. Dodds, retired, while the new committee elected were: Messrs, S. E. Unite (Hon. Treasurer and Secretary), P. E. Fred. Stone, P. S. Bent, W. F. Harley and C.

vote of thanks was passed to the Chairman particularly in his capacity as a retiring Trustee (in which post he had served the Church well and truly) and to the retiring members of the Com-

TO THE CONGREGATION OF CHRIST CHURCH, **УОКОНАМА.**

Respectfully we venture to address you, Herewith we desire to offer you our grateful thanks for your kindness and sympathy towards us, and especially for your generous help towards our proposed new Church.

Signed, on behalf the Congregation of St. Andrew's Mission Church, Hinode-cho, Yokohama; SASARI RYUTARO. NISHIMURA TSUNETARO. YOSHIDA HISATADA. Church Committee.

Yokohama, 8th Dec., 36th year of Meiji.

ST. GEORGE'S SOCIETY.

The annual general meeting of the St. George's Society of Yokohama and Tokyo, was held at the Masonic rooms, Yokohama, on Tuesday afternoon, with Mr. James Walter, the President, in the chair. There were also present Messrs.
L. J. Healing, A. G. Morey Weale, E. C. Davis,
H. M. Arnould, H. W. Kilby, F. L. Elliott,
F. T. Leak, A. C. Hutton Potts, W. H. Percival,
S. E. Unite, J. Cole Hartland, E. J. Moss, jun.,
J. Hellendaal, F. J. Hall, V. R. Bowden, H. J.
Sharp, R. Bowden, and A. Bellamy Brown, Honorary Secretary.

The notice convening the meeting having been read, and the minutes of the previous meeting taken as read.

THE CHAIRMAN submitted the annual report and accounts. He said: It is satisfactory to be able to announce that we start the new year with a credit balance of yen 34.75. The anniversary of our Patron Saint was celebrated on April 23 last year with a Ball at the Public Hall which was most successful and very largely attended. The object of our Society is, as you know, mainly to bring Englishmen and Colonials of Yokohama and Tokyo together at least once a year to maintain our old traditions unimpaired and to part in the management of the temporal affairs of get our friends together to rejoice with us on the church. He took it that the trustees and the that occasion. Sad it is to have to record that committee were empowered to manage the temwe have lost by death here in Yokohama during poral affairs—what powers they had as to the the past year six of the oldest members of spiritual affairs was not now being mooted. The this Society, and we must took forward to our minister of the church he therefore thought was countrymen to fill the gaps. If there are any countrymen to fill the gaps. If there are any questions you may like to put upon the accounts I shall be happy to answer them to the best of my ability.

On the motion of Mr. H. J. Sharp, seconded

by Mr. J. COLE HARTLAND, the report and

The election of office bearers followed—Mr.

Jas. Walter was reelected President by acclamation, on the motion of Mr. E. C. Davis seconded Mr. J. C. HARTLAND; Mr. A. G. Morey Weale, in view of his approaching departure for England did not offer himself for re-election England did not offer himself for re-election and Mr. L. J. Healing, on the motion of Mr. Sharp seconded by Mr. Hartland, was elected Vice-President; Mr. H. W. Kilby resigning the post of Treasurer, Mr. H. J. Sharp was elected to that position; Mr. A. Bellamy Brown being reelected Honorary Secretary. The Committee was then elected as follows:—Messrs. F. J. Hall, H. M. Arnould, C. Thwaites, A. J. Easton, and E. C. Davis.

The Charrman then said—Since our last committee meeting, held on the and of February.

mittee meeting, held on the 2nd of February, gentlemen, we have drifted into very troublous times. This Empire of Japan, in which we live, and the Japanese, our Allies, are to-day engaged in a life and death struggle with one of the greatest of Occidental Powers, and we Englishmen realize unhappily only too deeply the awful sacrifices in life and suffering which this war must inevitably

of us have lost relatives, friends, or acquaintances. Under the circumstances I think it would Meanwhile Felix Roach, the only villain in the be inappropriate to-day to take any measures for piece, tries first to oust Martha from the house; be inappropriate to-day to take any measures for the celebration of St. George's Day, and I beg to suggest for your consideration that all discussion on this subject be postponed for one month when we may have a better idea how to act.—

(Hear, hear.)
Mr. A. G. Morey Weale thought that it would be premature to say that day that a ball should, or should not, be held and he thought the Chair-

man's suggestion most advisable.

Mr. E. C. Davis concurred. To decide how St. George's Day should be celebrated could be brought up just as well a month hence. Had the Chairman heard if any Japanese entertainments had been given up?

The Chairman could not say with any certain-

ty that he had.

After a short discussion an amendment that St. George's Day be celebrated with a Ball as usual, subject to abandonment if circumstances should ao advise, was lost by a vote of 9 against to 4 in favour. The Chairman's suggestion was then carried, and the meeting stood adjourned for one

- THE NEW BOY."

Il is many years since the weary remnants of a travelling theatrical company, then touring the Far East, gave a colourless production of Mr. Arthur Law's farcical comedy "The New Boy" at the Yokohama Public Hall, so that, locally speaking, the play given here on Monday evening by the A.D.C. possessed all the elements of novelty. Originally produced at Terry's dainty little theatre in London, on February 21st, 1894, with Mr. Weedon Grossmith in the title 19de, "The New Boy" came into an immediate success and held the boards in London for a very long run indeed, the humour of its situations and the sparkle of its dialogue losing nothing in the competent hands that essayed it. The manthe competent hands that essayed it. The manner of its representation on Monday, too, left nothing to be desired, and a packed and enthusiastic house speedily testified to the successful weaving of one more wreath in the now heavy chaplet of laurels won by the Yokohama Amateur Dramatic Club.

The "inconvenience of having cousins" might be the sub-title of the play. Fifteen years before the curtain rises, Mrs. Martha Rennick (Mrs. E. C. Davis) is beloved by het cousin Dr. Candy, LL.D., but before the pedagogue declares his passion another steps in and wins the charming girl. Fourteen years speed away and she is left girl. Fourteen years speed away and she is left a widow, with an only son, and then, unknown to Dr. Candy, she marries again: this time to Archibatd Rennick (Mr. G. G. Brady), who is some ten years her junior. An unfortunate speculation in the shares of the Dry Champagne Company swallows up the whole fortune of the happy pair, and they are reduced to their last shilling when an invitation comes to Martha from Dr. Candy to spend a few days at his school. Martha accepts with alacrity, only to find on arrival that the worthy scholastic imagines her still to be a widow, and mistakes her youthful, rather weak-minded. worthy scholastic imagines her still to be a widow, and mistakes her youthful, rather weak-minded, husband for her little boy Frederick. Installed in Dr. Candy's house, too, she finds another cousin of her's and the doctor's, one Felix Roach, an unscrupulons rogue who lives upon his wits, an unscrupulons rogue who lives upon his wits. He too has been mixed up in the affairs of the Dry Champagne Company, having been one of the directors, but his principal hope at present is the reversion of Dr. Candy's good graces he resorts to all kinds of fawning tricks and also enlists the services of his daughter Nancy in the same direction. Under the impression that Martha is still a widow, Dr. Candy offers her the vacant post of matron of his school praise was that sustained by Mr. R. Jamin. He played it with a quiet humour that was irresistible offers to educate her supposed son. The situation is perilous, but Archibala Reunick is persuaded by his wife to keep the doctor in the dark and agrees to assume the character of her son for awhile and enter the school as the new boy. Twenty-four hours of the acutest misery results for him, culminating in his being detected stealing a farmer's apples, to which act

he is driven by the school bully, Bullock Major. Meanwhile Felix Roach, the only villain in the piece, tries first to oust Martha from the house; excellent was Mr. F. W. R. Ward as the bully next tries to obtain her hand by a declaration of marriage, the Doctor having altered his will in the left favour; then, owing to the Dry Champagne of action, and he carried it through it with the left of the state shares having had a miraculous recovery in the market, due to a boom in Central Africa, he market, due to a boom in Central Arica, he schemes to practically rob his benefactor, Dr. Candy, by persuading him to part, at the price of an old song, with the shares which the school-master holds in the concern; and failing him puts up a similar trick on Martha—but Rouch Cade all his schome foiled on war on a poster. finds all his schemes foiled, one way or another, by the irrepressible New Boy. The third act brings the inevitable explanations; Archibald Rennick is restored to the arms of his adoring wife; Felix Roach retires defeated; his daughter whie; Petr. Roden retires defeated; his daughter Nancy—a most outrageous first for one so young —is allowed to bestow her affections upon Theodore de Brisac, the French master; while dear old Dr. Candy resigns himself to ending his life, as he began, a bachelor. Such is the story in brief.

Place aux Dames! Mrs. E. C. Davis made a charming Mrs. Remick, acting superbly even in the most trying situations. To great natural charm she adds the powerful influence of a charm she adds the powerful influence of a captivating personality and when to these are united conscientious study and unflagging devotion to the calls of act, a picture is presented that compels admiration for its faithfulness and its fascination—the triumph of m consummate actress. As Nancy Roach, Miss Rogers was very bright, sauzy, nay impudent. No wonder in the multiplicity of her love-affairs, and with such a disreputable pattern as her father to follow, poor Nancy's outlook on life is rather queerly distorted. But in the end she wins the love of a good man and so comes to the happiness that all good little girls desire when their flirting all good little girls desire when their flirting days are done. Miss Cameron as Susan the housemaid, was good—self-contained, natural, unobtrusive. There can be little doubt that all three ladies richly earned the bouquets that came down upon them in a chouse at the close. down upon them in a shower at the close.

The male characters were also well-sustained, Mr. Brady had a part to his heart's content, and with hundreds of opportunities for "breaking away," never once committed the sin of over-emphasize. Besides, he for once divested of Dr. Francis W. Harrell, formerly a member himself of his very strenuous personality. His seene with the school-bully was truly immense, while the pathos of his voice as he told his devoted wife of the horrors undergone in Bullock Major's domitory would have turned a heart of stone. A fine character study was the unscrupulous adventurer to the life. Suave, when it suited; an unblushing har always; and a bully if he thought it paid, Mr. Aslet realized the part to a nicety. Hit after hit he made and the house freely acknowledged its satisfaction at the masterly pourtrayal of a vicious fix de The male characters were also well-sustained,

actor to the manner born.

activity required.

During the evening a very clever Bijou Amateur Orchestra contributed greatly to the enjoy-ment of the evening by playing the following selections :-

March—" Stars and Stripes For Ever "... Sonsa. Two Step—" Hiawatha" ... Moret. Waltz—" Tres-Jolie" ... Waldtenfel. March—" Manhattan Beach" Sonsa.

This orchestra is a great acquisition and we hope the A. D. C. will be able to always command its services. It was composed as follows: Mr. B. R. Berrick, piano: Mr. C. Bernard, banjonandoline; the Misses Page (3), Mr. H. Poole, Mr. C. H. Thorn, Mr. Herman, and Mr. M. Mendelson violins. Mendelson, violins.

A few words must be devoted to the lovely dresses worn by the ladies. In the first and second acts, Mrs. Davis wore a most becoming costume of grey crèpe and taffeta, trimmed with lace, and hat to match. But this creation was entirely eclipsed by the dress in the third act. This charming confection was a cream voile trimmed with broad bands of taffeta, and besides being particularly effective and charming, was in its fit most exquisite. Miss Zaidie Rogers wore in the first and second acts a simple white gown, which she changed in the A few words must be devoted to the lovely simple white gown, which she changed in the third act for a dress of pale blue crêpe trimmed with cream guipure, having a hat to match. Miss Cameron, as Susan, appeared in a black gown, severely plain, with a dainty white apron and cap.

As usual the stage was most artistically set by Mr. C. F. McWilliams, while the management, in the capable hands of Mr. E. Beart left nothing to be desired. It was methoughtful act to hang up the prominent placards "emergency exit" over the four side doors, though we trust they may never be called into use.

DEATH OF DR. F. W. HARRELL.

the house freely acknowledged its satisfaction at the house freely acknowledged its satisfaction at the masterly pourtrayal of a vicious fin de and notwithstanding the utmost medical attention siecle character. Mr. Aslet has made a decided advance in the craft of the wearers of the sock and buskin, and we look forward to seeing him again. The Dr. Candy of Mr. E. C. Davis would be difficult to improve upon. In get-up, slightly reminiscent of a late deeply lamented English historian, whose willowy form and Mexican tales, a son and daughter born in least the delicit of the caricaturist. Mr. Lavis Sendai, now in boarding schools at Annapolies Sendai, now in boarding schools at Annapolies and in Baltimore, Maryland. The sympathies of the very many friends of the deceased, and of his accomplished wife, will be extended to her and her children in this supreme trial of their lives.

FOOTBALL.

A game of Association football was played in Yokohama on Saturday afternoon between Whites and Colours, the latter being composed mostly of Interport players. A fairly good and very even game resulted in a draw, two goals being scored by either side.

DAY OF PRAYER FOR STUDENTS.

The Call of the General Committee of the World's Student Christian Confederation for the observance of the 14th of February, 1904, was very generally observed by the native and some foreign churches and schools in the city. The services at the Yokohama Union Church were largely occupied by an address by Mr. Galen M. Fisher, Secretary of the Y.M.C.A., Tokyo, in which he gave a most interesting and encouraging account of the history and growth of the Christian Student Confederation as it was now found in all parts of the world, Russia and some Roman Catholic countries excepted. They numbered some 1,600 organizations in colleges, with 89,000 members, an increase 4,000 in the past year. The speaker gave some interesting statistics of the growth of Christian students in the colleges of the United States till the ratio in 27 years had risen from ½ to 52 per cent., Yale and Harvard universities being no exceptions. He alked to to the sumbar of Christian He alluded too to the numbers of Christ ian knights and statesmen and distinguished educators, and administrators, General Gordon, educators, and administrators, General Gordon, McKinley, Gladstone, John R. Mott, Robt. E Speer. He further thought no age ever saw a fuller, juster conception of the commanding character of Christ. The 1st age of the Christian Church might be called that of personal loyalty to Christ. The 2nd age that of the Church Fathers, or metaphysical views of Christ. The 1st age of the Church—finding a false expression in the Papacy. 4th, The Reformation—or Christ for the individual man. 5th, Humanitarianism. 6th, The Social Christ, the Practical Christ, the Christ Papacy. 4th, The Reformation—or Christ for the individual man. 5th, Humanitarianism. 6th, The Social Christ, the Practical Christ, the Christ of Evolution. The two apparently opposing streams of Socialism and Evolution had flown together and bore richer freight than ever before. At the 6 p.m. meeting at Van Schaick Hall, the Rev. Dr. Dearing called on Mr. Frank Booth to give an account of the Toronto Convention of

1902. He said :-

I have been asked to present to you this evening some echoes from the fourth great quadrennial convention of the Student Volunteer Movement, which was held in the City of Toronto, Feb. 26th to March

For all who attended that gathering it was a neve

as need in the Chy of Toronto, 2, 1902.

For all who attended that gathering it was a never to be forgotten experience, an inspiration which will go with them through life. From the moment that the delegate stepped into the vast auditorium of Massey Hall, filled to overflowing with five thousand earnest volunteers in the Master's service, and caught sight of the watch-word of the movement written in great letters over the platform: "The Evangelization of the World in this Generation," a spell was over him; we were caught up into the mount of privilege, and for many life has had a very different meaning from that day forth.

"The Evangelization of the World in this Generation." For the centuries which have passed since Christ commissioned his disciples, other generations, not ours, have to answer, for the years which the future holds in store, another race may be called to give account; but for our day and generation, for the millions who are living and dying, without the blessed assurance of that so great salvation, which we might give to them, who else can be held responsible? And with that challenge before our eyes, you may be sure that there breathed through all the meetings such a sense of the squarity of the situation, and the personal responsibility of that army of students in carrying into effect that motto, that from day to day the spirit of the gathering grew more intense until it did not seem as if we could contain it. Students go wild over athletics and sports, and even many grow hysterical about them; but they do not do so with their religion, and under the sane guidance of those who had at the convention in charge, the proceedings moved on to a climax that was almost terrible in its who had the convention in charge, the proceedings moved on to a climax that was almost terrible in its intensity, the only tokens of the feelings that were being aroused was in the kindling eye, the breathless attention with which the convention, as one man, hung on the lips of some of the world's greatest pulpit

both opened and closed exactly at the scheduled hour, which showed the wisdom of those who had the gathering in charge, though all would have gladly staid on indefinitely. In the afternoon, the churches of the city were utilized to present to those who cared to attend, the different phases of missionary work in different lands as well as for denominational rallies, and informal nuecings of that character.

Each day had its topics, and the subject developed harmoniously and without a discordant note from

Each day had is topics, and the subject developed harmoniously and without a discordant note from the preparatory service, with memorable address by Robert E. Speer on Surrender, Indwelling, Freedom to the last word, "Oneness with the Triune God" from the lips of the same stirring speaker. Some of the topics which occupied the convention were why should the making of Christ Jesus known to all people be the commanding purpose in the life of every Christian? The qualifications and preparation of the volunteer. The unevangelized millions. The Mission education of the home church.

cation of the home church.
Financial aspects of the missionary enterprise; the wonderful challenge presented to this generation of Christians.

Prayer and the Missionary enterprise.
I wish I had the time to tell you how some of those

I was I had the time to ten you now some of those addresses, each seemingly more convincing and helpful than the preceeding, affected us; but I cannot do much more than just mention a few names. One of the most frequent speakers, and one whom we all came to love, was the Rev. Prebendary Fox, of the Church Missionary Society, London. I shall ever be grateful to him for his address on Scripture Principles of Giving Ulustrated.

Principles of Giving Illustrated,

Principles of Giving Illustrated.

He asked why the financial question which should be the easiest was the most difficult. He said in part:—1 believe that the answer will be found in the uneradicated selfishness of professing Christians. How many believers in the Lord Jesus Christ there are, who have joined the church and who are walking apparently fully with God, who have trusted him with the salvation of their imposed lesuls who will not take imposed lesuls who will not take imposed as the salvation of their imposed lesuls who will not take imposed as the salvation of their imposed lesuls who will not take imposed as the salvation of their imposed lesuls who will not take imposed as the salvation of their imposed as the salvation of their imposed lesuls who will not take imposed their salvations. joined the church and who are walking apparently fully with God, who have trusted him with the salvation of their immortal souls, who will not trust him with the key of their cash boxes or the button of their purse. We want reform in two respects, revolution if you will, in the matter of motive and in the matter of proportion. The present proportion is jutterly wrong. Now the old Jew, to whom we profess to be superior, had a motive and a principle, and had a proportion upon which he acted. The Jew was placed in a land which belongted to God, and he was God's tenant; he paid the Almighty a kind of quit-rent and the remaining nine-tenths, I suppose, he retained for himself. Argued, Christians ought to give more. This is very true; but weak in that it overlooks the fact that the Jew was under the law while the Christians are under grace. The Jew paid what he was bound to pay to Jehovah. We are heirs of God, joint heirs with Christ, and all things are ours—but on condition that all ours are God's. Those are the terms; you can claim the privileges of Christian if you give Christ all that you are and have. How often in the most sacred moments of our lives we present our lives a living sacrifice, acknowledging that all we have belongs to God,—so that when we have spent upon ourselves and the maintenance of our families according to the will to God, what becomes of the rest? Why it is God's. We have no private purse apart from him. Until the Christian church realises that this is the measure of giving and this the principle upon which we give, I don't think we shall have got to the root of the financial problem.

The veteran Bishop Thoburn, of India, was another whom we listened to with the greatest interest, while I may say that it has been given to few women to hold in such breathless attention 5,000 listeners.

I may say that it has been given to few women to hold in such breathless attention 5,000 listeners, as Mrs. F. Howard Taylor did the two times she addressed the Conventien.

Addressed the Conventien.

For powers of oratory, there were none who excelled Janvier of India; Underwood of Korea; and Hotchkiss of Africa. The latter some of us dubbed the Abe Lincoln of the Convention, both for the plainness of his personal appearance, and the simple magnetism of his style. He likened the Dark Continent to a gigantic interrogation point which faces westward. "Africa is asking the American student body why she still remains the dark continent. Why indeed? when at one time the strongest churches were there." And again he called attention to the fact that Africa on the map was like a gigantic ear. "That continental ear has been lying there these centuries waiting for a message—the only message which can bring hope into her the only message which can bring hope into her hopelessness, the only message which can lift her from the mire, the only message which can transform her desert wastes into a gaiden of the Lord."

R. Mott, and to that captain of twentieth century miliant Christianity, Robert F. Speer.

"How a thousand missionaries are supported" by L. D. Wishard, advocated the pretty thought of each church, having aside from its home pastor with his home parish. a foreign parish with its pastor, just as many churches support mission chapels in their own city.

In two different addresses a striking contrast was afforded, illustrative of the two extremes of spiritual condition in which a church may be. Rev. Millard, of Baltimore, spoke of a church in the South land whose annual report to its society has become a classic illustration. It reads like this

No. added to the church by baptism

last very

And then the report closes each year with this line of writing "Pray for us brethren that we may continue faithful to the end." A very personal prayer, for the end of that church is not far off.

Next day Rev. Bradt, of Wichita, Kan., told the experience of one church. Six years ago the Presbyterian church in Wichita at a financial crisis in the Next day Rev. Bradt, of Wichita, Kan., told the experience of one church. Six years ago the Presbyterian church in Wichita at a financial crisis in the community, was in a most precarious condition. It had a bonded debt of \$18,000 beside a large floating debt for which it had no assets to show, while its supporters had personal obligations which taxed them almost beyond the powers of endurance. The pastor was led to preach that Christ had conditioned his presence and his Almighty Power, the Holy Ghost, upon the practical willingness of his people to obey the great commission, Matt. 28, 19-20. That their salvation as a church financially and otherwise depended upon their taking the little meal they had in the barrel and the little oil in their cruse and undertaking to feed the sturving millions of headten lands. A crazy idea, you say, and some of those who were praying most earnestly for the church doubtless thought the same; but see how it worked out. That morning the Lord stood with him, and revealed himself to the people; and they saw the Lord Jesus. and that day they took for support a foreign missionary. They closed that year with the floating debt removed, and the current expenses met in full—a condition which the church had not enjoyed in ten years previous. The next year they took two foreign missionaries and one domestic missionary, and removed the bonded debt, closing the year with money in the treasury, for the past five years the missionary programme of that church has averaged \$4 per member. And this is not the most astonishing result of that church seeing Christ; in the past five years she had raised \$40,000 out of her seening poverty for the maintain nace of the Gospel in the city of Wichita. "She is supporting now one of the largest plants doing business for God anywhere in the U. S., with a pastor an assistant pastor, two office assistants, a city missionary, 1200 members, a mission chapel, three Bible schools, four C. E. societies, four ladies societies, a men's department, two boys clubs, a gi

One very telling illustration was made by one of the speakers, who said:—"Suppose a man owes a debt of £1,000, and after several years of close saving is able to pay back £5 of his indebtedness; he is not a subject for congratulation and his creditor would have a small idea of his ability to pay the balance, if he found him going round seeking congratulations from his friends over what great things he had done in the last several years. Christendom's delat to her great Lord and King, a century ago, was one thousand millions of immortal souls lost in the darkness, deadness of heathenism and sin. After 100 years of hard work we have paid to our King five millions of redeemed ones, leaving a debt of nine hundred and ninety five millions of immortal souls that we have not paid; and yet we seek to congratulate ourselves on what great things we have done in this last century."

A large and representative meeting of the

A large and representative meeting of the Japanese Churches and Schools was held in the evening at the Shiloh Church. Hymns, prayers The plan of the convention comprised a morning session of about three hours, especially for the delegates, and a popular evening session, to which our hosts, the warm-hearted people of Toronto, were invited. The evening meetings over-flowed into one or two of the largest churches, the speakers going from Massey Hall to repeat their addresses to the other audiences; the addresses were from fifteen to twenty minutes long and the speakers kept rigorously to time; and the meeting

THE BURNING OF FUH-LEE, SHANGHAI.

bells. Almost before it had ceased, the preliminary warning peal, the sky over the heart of the Settlement was lighted up with a great glare. The entire top story of the Fuh Lee building was seen to be flaming like mgigantic torch and already stray tongues were shooting out from the upper windows all round. So sudden was the outbreak that it appeared to be but a few seconds from the discovery till the top floor was burnt out. The rapidity with which the conflagration spread lent colour to a report that incendiaries had been at work. It was known that there had been some dispute with the Chinese staff but this was the only other foundation for the rumour. Last night the police had nothing to offer as to how the fire originated. It began in the millinery department where there was plenty of inflammable material to help it on its way of destruction.

The firemen were on the spot with customary alacrity but their task was hopeless, as far as the saving of the main block was concerned, from the beginning. At first a brave attempt was made by the Deluge and Mih-ho-loong Companies to play on the flames from the inside but the lift shaft on the flames from the inside but the lift shaft acted as a flue and it was soon found impossible to remain in the building. The lift weights came down with a run after a few moments and then cartridges began to fall down the shaft, exploding as they reached the burning débris below, and scattering sparks and stars of fire as they fell. Employés were rushing about the ground floor trying to gate what looks that could be troop the Employes were rushing about the ground noor trying to save what books they could, but soon the
falling plaster drove everyone outside. The
flames burnt with a fierce crackling sound, and
ever and anon a loud report would be heard as
some more cartridges took fire. The lift shaft
looked like a veritable inferno. The flames
caught the spaircages and spread round the whole caught the staircases and spread round the whole building.

One great difficulty at the outset was the getting of a sufficient pressure of water. The Fuh Lee lift was worked by hydraulic power and one of the first things that happened was the bursting of the ram. The whole pressure of a six-inch pipe was thus wasted while it flooded the lower teacher of the hylding. The bare called the lower pipe was thus wasted while it flooded the lower centre of the building. The hose reels attached to the street hydrauts would play no higher than the first floor windows and the fire was raging furiously and unchecked high above. In a quarter of an hour or so the engines began to arrive and at last it was possible to play actually on things burning. The Torrent engine was stationed in Szechuen Road just at the entrance from Kiukiang Road: the Honekew was in Nanking Road: the Road; the Hongkew was in Nanking Road; the Deluge also in Nanking Road but on Watson's side of the cross road; the Victoria engine in Szechuen Road beyond the Toilet Club. The Nanking Road and pumped from the river. The of judgment, began on Feb. 12th in the Yoko-beluge engine unfortunately broke down after a hand District Court before Judge Danno. time and the Mih-ho-loong escape was also damaged through the unskilful handling of civilians whose zeal to help outran their knowledge of fire matters.

Detachments of sailors were landed from the

The strong wind blowing first took the flames eastward toward the Bund, dooming Hung Chong & Co.'s jewellery stores, threatening Lane, Crawford's, and even causing some anxiety for Kelly & Walsh's godown on the other side of Nanking & Walsh's godown on the other side of Nanking Road. Then changing somewhat, as darkness plaintiffs were compelled to buy 411 pieces from jurious to his reputation, causing his customers fell, the wind shifted the danger to Messrs. Wat-another silk dealer whose price was higher than and bankers to entertain suspicious against on & Co.'s corner. Szechnen Road having become too hot to be occupied, the Mih-ho-loong and Deluge companies turned their attention to drenching the chemist's premises and so keeping supplied a certain quantity of the habitac, the walls as cool as possible. The water did a but did not make such a contract with the foreign good deal of damage but it saved the building.

So intense was the heat that the electric light tion as to limitation of jurisdiction on the ground So there was the near that the electric ignt too as to limitation of jurisdiction on the ground standards in the opposite corners of Nanking it that the case could not be defended in this Court Road caught fire and the live wires from which the insulating material was quickly burnt off, branch in Yokohama. Counsel further asked the hung within twelve feet of the road, just above Court for leave to adjourn further proceedings as the heads of those who were working to extinguish the flames. The current was cut off as soon as he was not sufficiently prepared with the case.

The court examined the evidence introduced As if the War were not enough to keep Shang-hai in a ferment,—says the N.-C. Daily News of the insulating material was quickly burnt off, Friday, February 12th,—Fuh Lee must needs be burnt out again, and take with it the Russian Consulate and Hung Chong's the Nanking Road leweller's, to say nothing of the damage inflicted not on other property in the vicinity. The destruction was swift and complete. A few minutes after five the central district. But until the current had o'clock yesterday aftermoon the alarm rang out, two bents. A hungst before it had ceased, the preliminmost demoralising effect on everyone.

most demoralising effect on everyone.

The streets, it need not be said, were thronged with crowds, who were drawn off from reading news of Japanese victories, and were to be observed also dotted all about the roofsand parapets of adjoining buildings. In some of these latter every preparation had been made by the inmates to fight the fire should it advance to meet them. When the falling cartridges began to explode, the throngs in Nanking Road beat a hasty retreat to the Bund. There was said to be a lot of gunpowder stored on the Russian Consulate buildings and although unfounded the statement caused alarm.

Nothing remains of Messrs. Hall & Holtz pre-mises or of the Consulate quarters, which were in the same building, except blackened walls and iron supports rising out of a mass of debris. One at least of the safes fell through when the floor on which it stood gave way. Mr. Kliemenow, the Consul-General for Russia, who has been ill for the past three weeks, was so pressed by the fire that he had to escape in his sleeping clothes. He is at present staying at the Astor House, where he is being attended by Dr. Krieg. All of Mr. Kliemenow's effects were destroyed but it was understood that the books and papers have been saved. Messrs. Hung Chong & Co.'s are equally burnt out as are also Messrs. Ellis Kadoories & Co.'s offices and a godown at the

The following is a fairly correct estimate of the total loss by the fire:—

Hall & Holtz, building	
contents	260,000
Hung Chong, building	15,000
contents	60,000
Russian Consulate-General con-	
tents	5,000
Damages to A. S. Watson & Co.,	-
Ld., Nabholz & Co., and Lane,	
Crawford & Co., Ld., by fire and	
water	15,000
	-

Total, Tls. 535,000 The Fuhlee block and Hung Chong's premises were owned by Messrs. David Sassoon & Co. and the buildings were insured in the South British Fire Company. Messrs. Hall & Holtz were insured as to their stock with a number of companies.

THE LAW COURTS.

A SILK CAIM.

The hearing of this case, filed by Messrs. W. M. Strachan & Company against Sarasawa, mhabutae silk trader, living at Fukui, Echizen, claiming yen 422.30, with interest at the rate of

Mr. R. Masujima was present for the foreign firm and Mr. Ohashi for defendant.

Plaintiffs' counsel stated that his clients on Aug. 11th last entered into a contract with de-British and French ships and later from the Italian fendant to purchase 1,110 pieces of habutae silk man-of-war, and rendered welcome assistance —220 pieces at yen 9.23 per 100 me; 100, yen 220 pieces at yen 9,23 per 100 me; 100, yen 8.80; position but the parties declined to show their 9.05; 80, yen 9.15; 280, yen 9; 130, yen 8.80; books to a third person. On Dec. 8th last, 150, yen 8.70; 100, yen 8.55; and 50, yen 8.75; counsel reappeared in Court and stated that peace—which were promised to be delivered not later was not possible. During the proceedings Mr. than Sept. 20th, the same year. On the due date, Max Isaacs and his counsel, Mr. Sawada, stated defendant delivered plaintiffs 699 pieces only and that Mr. S. Isaacs, who held the books, made a was unable to supply the remainder so that false entry in them. This statement was very includint fig were conveiled to but ALL nieces from privings to bis resultation causing his customer.

by plaintiffs.

Plaintiff's counsel asked the Court for leave to examine Y. Voshikawa and K. Uyeno, silk traders living in Yokohama as witnesses

After a few minutes consultation the request of plaintiffs was granted.

The case was adjourned sine die.

RUSSO-CHINESE BANK r. YUEN SIH-SONG.

This case, in which the plaintiff bank claims yen 171,000 and defendant, the former compradore of the Bank, counter-claims for yen \$30,000, came up in the Tokyo District Court on Feb. 12th, when permission for temporarily seizing the property of plaintiffs was given to the Chinaman.

Mr. R. Imamura, a lawyer, representative of defendent went to the Volcens have to the volce

defendant, went to the Yokohama branch of the bank on the 13th accompanied by two bailiffs and seized five iron safes.

The Asahi adds that the bank closed on Feb. roth in consequence of War and no cash was found in the safes

JOVANSEN v. CLUB HOTEL.

The hearing of this case, in which plaintiff claims yen 90.48, was resumed on Feb. 16th in

the Yokohama Local Court before Judge Yei-iri.

The hotel cash book was put in as evidence by counsel for plaintiff, and after argument the case was adjourned till the 20th inst., when judgment will be delivered.

SIG. IS VACS v. MAX ISAACS.

The hearing of this case, in which plaintiff claims yen 12,000 damages, caused by defamation on the part of the defendant, begun on Feb. 17th in the Yokohama District Court before Judge

Mr. R. Masujima was present for plaintiff and defendant was absent and not represented.

Plaintiff's counsel stated that Mr. S. Isaacs and R. Isaacs (now living in New York) established a firm on joint account, under the name of R. Isaacs and Bros. in which Mr. Marcus Isaacs was afterwards admitted a partie. afterwards admitted a partner. The firm was wound up after several years' existence when the business books were retained by plaintiff, Mr. S. Isaacs. Last year, Mr. R. Isaacs instituted a case in New York against Mr. Marcus Isaacs and the parties were ordered by the Court to produce parties were ordered by the Court to produce their business books as evidence. The parties separately asked Mr. S. Isaacs to deliver the books, Mr. Marcus Isaacs to deliver the books to him, but not to Mr. R. Isaacs and rice versa. As Mr. S. Isaacs did not deliver the books to Mr. Marcus Isaacs, the latter seized them through a hailiff belonging to the Yokohama Local Court and subsequently the former petitioned the District Court to cancel the seizure. The proceedings went on until Mr. petitioned the District Court to cancel the seizure. The proceedings went on until Mr. Max Isaacs came from New York and entered the case as an intervenor, petitioning that the books in dispute should be delivered to him. Having been advised by the Court to settle the dispute out of Court, counsel for both parties agreed that the books should be removed to the U.S. Consulate, and that the parties should inspect them before the that the parties should inspect them before the Consul. The Consul refused to enter the dispute and advised them to find a third person for this

been delivered to Mr. Max Isaacs at his house, and the Court therefore decided to summon Mr. Max Isaacs another day, meanwhile adjourning the case.

THE JAPANESE PRESS.

Of course Japanese journals ridicule the Tsar's complaints about a treacherous attack. They ask whether His Majesty expected the enemy to send word that they would strike at such and such an hour on such and such a day. The Jiji observes that His Majesty fails signally to offer any justification of his own acts. His mind appears to be overwhelmed with the thought that his sailors were caught napping.

Another topic of general journalistic com-ment is the good will of America in charg-ing herself with the care of Japanese interest

in Russia.

THE VOLUNIEER FLEET.

There are constant rumours of the seizure of Russian steamers Volunteer Fleet steamers and East Chinese Railway Company's steamers by Japanese cruisers The reports are very confusing, and it is to be hoped that some authoritative intelligence as to the actual number hitherto captured will soon be forthcoming.

YOKOHAMA LITERARY SOCIETY.

A tour in North Wales, as wittily described by Mrs, W. Kirkland Wilson, was the great Ar by Mrs. W. Kirkland Wilson, was the great drawing card at the usual fortnightly meeting of the Yokolama Literary Society, held in the Van Schaick Hall last evening. Mrs Wilson has a happy gift of expression combined with a subacid strain of humour that keeps her hearers ever on the alert, and so her paper held the house from start to finish. It was freely illustrated by some forty or more lantern slides showing nany beautiful spots in North Wales, inland as well as along the coast; Carnarvon castle, some of the famous slate quarries and their surroundings; Bangor Cathedral, etc. Among the pictures was a striking photograph of Billy, the notorious goat of the Welsh Fusiliers, and this drew forth many cheers. drew forth many cheers.

Mrs. Wilson having been warmly thanked, the musical portion of the programme was taken up. It was principally devoted to Welsh songs and melodies, and Mrs. Brockhurst, Mrs. Brewster, AT. Mr. Foster and Mr. Fred. Pollard, as well as the ladies and gentlemen who formed the chorus, are to be heartily congratulated on their efforts. The recitation in character by "Miss Jenny Jones"—(her identity was soon discovered)—was very dainty and the little maiden's next appearance will be eagerly looked-forward-too. Mrs. Dearing's readings AT were most acceptable, while Mr. Brady's song "The Wicked Welcher" was one of the funniest things he has given here. The accompanists were Miss E. Burdett Leach and Miss Mendelson. AT Programme:— Mrs. Wilson having been warmly thanked, the Programme:-

PIANO SOLO...... Selected Mrs. R. J. WARD.

"Welsh Carol"
"March of the Men of Harlech."
Hannonized by W. KARL E.
VINCENT, Eq.).....

RECITATION ... " The Death of Gelert

Miss Jenny Jones.

Song...." Cambrian War-Cry." ...Mrs. BROCKHURST.

Song...... " All through the Night "

DISTRIBUTION OF RUSSIAN TROOPS IN MANCHURIA.

The following is the latest information regarding the distribution of Russian troops in Manchuria:-

churia:—
AT PORT ARTHUR, 20,350 men, consisting of Infantry,
Third Brigade, 9th, 10th, 11th and 12th regiments East Siberian Sharpshooters, comprising
2,000 men in each regiment; Seventh Brigade
(one half) or 25th and 26th regiments, East
Siberian Sharpshooters, 2,000 men each.
The other half of the Brigade being the
27th regiment at Haicheng, and the 28th regiment of the same Corps (East Siberian Sharpshooters) at Liaoyang. Nat:—All of the third
Brigade, except the 11th regiment, have since
proceeded to the coast of the Liaotung Peninsula
and the Valu. Cavalry: one company Baikal proceeded to the coast of the Liaotung Peninsula and the Yalu. Cavalry: one company Baikal Cossacks, 150 men. Artillery: two Companies East Siberian Battalion, 600 men; one regiment Port Arthur garrison artillery, 2,400 men. Pioneers: two battalions East Siberian Pioneer Regiment, 1,000 men. Cos. E. S. Sharpshooters, 750 men.

AT VINKOW (Newchwang), 1,200 men, and half Co., East
Siberian Battalion, with four guns, 150 men.

Siberian Battalion, with four guns, 150 men.

HAICHENG, 1.150 men—four Cos. 28th Regiment
E. S. Sharpshooters, 1,000 men, and half Co.,
East Siberian Battalion, with four guns, 150

AT LIAOYANG, 1,900 men-three Cos. 15th Regimen

men.

At Liaoyang, 1,000 men—three Cos. 15th Regiment E. S. Sharpshooters 750 men; four Cos. 28th Regiment, ditto 1,000 men, and half Co. Transbaikal Field Artillery, with four guns, 150 men. At Moukden, 550 men—One Co. 15th Regiment E. S. Sharpshooters, 250 men; half Co. Transbaikal field Artillery, 150 men, and one Co. Transbaikal field Artillery, 150 men, and one Co. At Tiehlis, 2,750 men—16th Regiment E. S. Sharpshooters 2,000 men; 7th Co. First Brigade east Siberian Artillery, with eight guns, 300 men, two Cos. Transbaikal field Artillery, with evelve guns, 300 men, and one Co., Amur Cossacks, 150 men. At Ninguta, 1,250 men—Iwo Cos. 18th Regiment E. S. Sharpshooters, 500 men; three Cos. Amur Cossacks 450 men, and one Co., east Siberian Artillery Battalion, 300 men.

At Harbin, 4,550 men—17th Regiment E. S. Sharpshooters, 2,000 men; sx Cos. 18th Regiment ditto, 1,500 men; one Co. Amur Cossacks, 150 men, and one battalion east Siberian Artillery, with twenty-four guns, 900 men.

At TSITSIHAR, 1,950 men—Six Cos. 20th Regiment E. S. Sharphooters 1,500 men, second Co., of the Second Birgade of the east Siberian Artillery.

Second Brigade of the east Siberian Artillery, with eight guns, 300 men, and one Co., Amur Cossacks, 150 men. HAILAR, 1,000 men, belonging to the Third Battalion Nelchinsk Reserves.

Battation Neichinsk Reserves.
In addition to the above there are fifty-five Companies Railway Guards consisting of 24,000 men, mostly quartered at Harbin, Linoyang, Kungchulin, Héngtaohotze and Tashihchiao. There is also another Railway Corps consisting of some four battalions stationed at Harbin, Hêngtaohotze, Kung-chulin, and Liaoyang.—N.-C. Daily News.

LITERARY GOSSIP.

"Messiah" at the Crystal Palace, Rossetti said that it seemed to him that "everybody got up and shouted at him as loudly as possible,"

In the year 1902 Germany published of books and pamphlets nearly 27,000, and the United States only about a third as many. On the other hand, the United States published 21,000 newspapers and periodicals, and Germany only a little more than a third as many. In creative works, novels, romances and works of pure imagination, England leads the world; Germany is ahead in educational and theological works and books for the young. France runs copiously to history, and Italy to religion. Fiction mainly rules in the United States.

Mrs. Isa Craig Knox, who died at Brockley the other day in her seventy-third year, first pub-lished verse in the Scotsman in 1851. Some years thereafter she was for a period on the literary staff of that journal, and in the late sixties and seventies she was a considerable contributor in seventies she was a considerable contributor in prose and verse to *Fraser's Magazine, Good Words*, and other periodicals. In 1859 Miss Isa Craig, as she then was, won distinction by her "Ode on the Centenary of Burns," which gained a prize of £50 over nearly 700 competitors, included among whom were Robert Buchanan, F. W. H. Myers, and Mr. Gerald Massey.

The Goncourt Academy, which has just awarded its first prize to M. John-Antoine Nau, was formed under the terms of the will of Edmond de Goncourt, quite a number of years ago. There had to be litigation before the funds could be applied, in the face of the opposition of relatives, to the purpose specified by the testator, and this litigation took six years. The Academy consists of ten members, who are to draw incomes of of ten members, who are to draw incomes of £250 a year each, but are to combine in offering every year a prize of £200 to some book adjudged to be of real literary merit. Among the members of the Academy originally contemplated by De Goncourt were Flaubert, Maupassant, Zola, and Daudet. He outlived the two first named, however, and Zola, by apostatising and seeking admission to the other Academy, became ineligible.

There has just died at Berne, at the age of 65, one of the last descendants of Haller, the great Swiss linguist and botanist. His was himself an Swiss linguist and botanist. His was himself an historian of mark in the Republic, and his history of Berne one of the most authoritative works dealing with the city. His name was Berchtold Haller, and besides being a life-long bachelor, he was unusually short of stature. For all that he possessed real originality of mind, and an old-world charm and dignity of manner that are becoming rare in all countries. His diminutive height once placed him at an amusing disadvantage in a passage of arms with a Frenchman with whom discussion was becoming warm. "I am a desdiscussion was becoming warm. "I am a descendant of the great Haller," said the Swiss, "Ah, a case of really long, long descent," sneered the adversary, eyeing down the little man, who quite collapsed.

The London papers are full of appreciative notices of the late Mr. Gissing. They one and all agree that he was an instance of a man doing splendid work in an essentially uncongenial field. No man was less inclined by nature to deal with the sorrows of mean streets and the tragedies of London lodging-houses, yet his fame rests on his delineation of this sordid side of life. By nature he was essentially a scholar and a recluse, whose whole soul revolted against the squalor, the vulgarity, and the suffering which he depicted with such masterly power. One may recall in this connexion a passage from that exquisite book of travel which he wrote, "By the Ionian Sea." "Every man," Mr. Gissing here told his readers, Mr. Gissing has himself told of some of his early struggles. When he was at work at his "New Grub struggles. When he was at work at his "New Grub Street" his finances became exhausted. He finished the book, however, in six weeks, working ten hours a day, speaking to no one, and keeping himself alive by selling books off his shelves to second-hand dealers. "I sold the copyright for £150 and ate once more," he afterwards wrote.

Last Christmas Eve was the fortieth anniversary of the death of W. M. Thackeray, whose grave at Kensal Green Cemetery attracts comparatively few pilgrims, but to whose memory a touching tribute—the encircling of the great novelist's bust in Westminster Abbey with a floral wreath—has on each succeeding Christmas Eve for the last six years been paid by some unknown admirer. The following lines by the late American poet R. H. Stoddard have an appropriate interest, and may not be familiar to all our readers. 'The poem is entitled " Adsum—December 23-24, 1863":

The Angel came by night
(Such angels still come down),
And like a winter cloud
Passed over London town;
Along its lonesome streets,
Where Want had ceased to weep,
Until it reached a house
Where a great may askept: Where a great man lay asleep;

The man of all his time Who knew the most of men, The soundest head and heart, The sharpest, kindest pen. It paused beside his bed, And whispered in his ear; e never turned his head, But answered, "I am here."

Speaking before the Positivist Society on the day of all the dead—December 31st—Mr. Frederic Harrison said that the year then closing had been marked by a somewhat unusual list of noteworthy deaths, including that of the most noteworthy deaths, including that of the most eminent philosopher in Europe. They as Posi-tivists had never failed to express their admira-tion of Herbert Spencer and of the courage which had marked his whole life. In a beautiful letter to himself the eminent philosopher had expressed his hearty sympathy with their earnest efforts towards international justice and peace. They as Positivists had differed from Herbert Spencer at times, and they had not forborne to exat times, and they had not forborne to ex-press those differences, but they honoured him as a synthetic philosopher, and as one who abstained from crowding his mind and his pages with the mere details of science and the unprovable problems of metaphysics. Comte and Spencer devoted their lives to the supremetask of synthetic philosophy, and they alone of modern thinkers had produced the philosophy of life. It was with joy and hope that they had seen men of all views unite in one chorus of admiration for the philosophic recluse, and for the courage and patience which distinguished his life. The death of Herbert Spencer might serve to remind them of the reverence which was due to those who had passed away. This reverence had grown the reverence which was due to those who had passed away. This reverence had grown dim. The dead were dead indeed. They were in their unvisited graves, and were forgotten as soon as the mourning robes were cast aside. The religion of humanity would amend all this. The dead lay forgotten in their graves. It was for the future to revive them, and restore them in this world to us who they had made, and to whom they had left their uncompleted task.

THE FACTORY GIRLS' FUND.

We are asked to acknowledge receipt of the following further amounts subscribed towards the Factory Girls' Fund:—

Chilose, a dance in the same performance. The applicant contended that these dances come under the same name, samhaso, but their nature is different, and that no misunderstanding would be caused to the public. 'The protest was sustained.

AMERICAN TOPICS.

It is now proposed to create a Greater Philadelphia by annexing to the present city outlying cities and villages sufficient to give the enlarged city an area nearly twice as great as that of New York city and about half as great as that of the State of Rhode Island.

objects to making the trip on a regular liner. The King will send his nephew, Prince Albert, and the latter's wife, the Princess Elizabeth, to represent him.

is credited with saying that out of \$6,000,000 worth of footwear exported from the United States Great Britain took only \$2,169 worth of boots and shoes from the United States; last year she took \$2,013,890 worth

Since the decision in the Alaskan boundary case was announced there has sprung up in British Columbia an energetic movement for the con-struction of a railway into the Yukon Territory from that province. In Vancouver the desire is to have the railway built directly from there to Dawson, in the Yukon Territory. There are other propositions spoken of, especially by the inhabitants of the northern portion of the province for a railway from Kittimat Arm to Dawson,

According to the Agricultural Department's figures, New York had a greater acreage used for producing hay, and cut a greater amount of hay, than any other State in the Union. The value of her hay product was also greater than that of any other State, and almost \$13,000,000 greater than the value of the hay crop of the entire New England States. Second to New York, measured by land States. the value of the hay crop, stands Pennsylvania, and then come Ohio, Illinois, Missouri, Iowa, Michigan, Wiscousin, and Indiana, this exhausting the list of States where the hay crop of 1903 was valued in excess of \$20,000,000.

It is natural, says *Public Opinion*, that the deaths of the last of the great leaders on the confederate side during the civil war, General Longstreet and General Gordon, should have revived in some quarters discussion of the disputed questions with which their names are connected. But with a large number of editorial comments from southern papers before us, we can confidently say that there is no disposition to become excited over those questions at this late day. The criticisms visited upon Longstreet because he accepted too quickly the results of the war, and the dispute between Gordon and Longstreet as to the latter's responsibility for the confederate defeat at Gettysburg; all this is forgotten, and in place of recrimination there is praise for their valour and forgetfulness of their faults.

According to the New York Daily Stockholder,

In the Patent Bureau of the Department of Agriculture and Commerce, a decision was given and amounted to \$75.491,056, as compared with on Dec. 26th last, according to the Oficial \$72.448.694 last year, \$69,523,480 in 1902, Gazette of Feb. 15th, on a protest presented by \$66,08,086 in 1901, and \$63,989,076 in 1900. Mr. Frederic Cornes, No. 50, Yokohama. Mr. Dividends are payable during the month on Cornes applied to the Bureau to register his trademark, which displayed a sambaso, dancing will agree to the stocks having a par value of \$1,536.711.060 and The examiners of the Bureau rejected the applical last year, \$48,675,614 in 1902, \$34,747,995 in tion in accordance with the 2nd clause of Art. II 1901 and \$335,546,887 in 1900. Combined inof the law on the ground that the mark was interest and dividend payments \$115,565,314, as similar to that of No. 11,432, which shows the compared with \$106,605,610 last year. compared with \$106,605,619 last year, \$118,-199,094 in 1902, \$100,756,081 in 1901 and \$97,535,963 in 1900.

In his annual report, Mr. Secretary Wilson advocated the granting by Congress of an appropriation of \$500,000 for the purpose of exterminating the cotton boll weevil, whose depredations wrought such havoc in parts of the south, The House of Representatives has acted promptly upon this suggestion of the Secretary of Agriculture, and has voted an appropriation of \$250,000 for the purpose of protecting cotton against the boll weevil. This is only half the amount asked by the Secretary, but it is, nevertheless, a considerable sum, and its employment should bring about some results of consequence. Of course It is now announced that King Leopold will the question how to deal with the pest is still be unable to visit the St. Louis Exposition this largely an experimental one, but it will at least be year, as the royal yacht is not sufficiently strong approached under favourable conditions as far as the matter of ways and means is concerned, that is, assuming, as is not unlikely, that the Senate will follow the lead of the House.

the latter's wife, the Princess Elizabeth, to present him.

A well-known boot and shoe dealer in Scotland credited with saying that out of \$6,000,000 is accessible to enable those specially familiar to make a fairly close settingte. worth of footwear exported from the United States with the subject to make a fairly close estimate in 1902, \$2,000,000 worth came to the United as to the total. Director of the Mint Roberts Kingdom, \$1,000,000 worth went to Australasia, estimated the production of gold in the United and \$500,000 worth to Canada. Ten years ago States at \$74,425,340. This estimate is States at \$74,425,340. This estimate is adopted by Mr. T. A. Rickard in an article in the Engineering and Mining Journal, in which he estimates the total production of gold in the world at large at \$327,000,000. This is about \$28,100,000 in excess of the estimate of the previous year's production made by that writer, and about \$31,000,0000 in excess of the estimate for about \$31,000,0000 in excess of the estimate for the same period made by Director Roberts in November last. According to the figures before us, Australasia led with a production valued at \$88,170,000, the United States coming second with \$74,425,340, the Transvaal third with \$61,527,231, Russia fourth with \$24,000,000 and Cangle fifth with \$10,000,000. Canada fifth with \$19,500,000.

> Last September the Dry Goods Economist gathered the opinions of some 2,000 retailers of dry goods in every section of the Union as to the prospects for business during the autumn and winter. These views were optimistic. Now the Economist has asked the same persons for their experiences, and, furthermore, sounded the trade on the outlook for the coming spring. The replies show that the forecasts of last September, with few exceptions, were accurate. Retailers in several instances have increased their business from 10 to 50 per cent., and in some cases have Last September the Dry Goods Economist from 10 to 50 per cent., and in some cases have doubled their sales, as compared with the autumn and winter season immediately preceding. As to the outlook, in the east everything is regarded as fair and in the west the feeling is generally optimistic. Farmers are rich and manufacturing and commercial business is not behind a year ago. the far northwest the general outlook is bright and is regarded as encouraging. A new era has dawned in the south, the debts of years are being paid off, and a clean slate for 1904 appears pro-bable for many. Retail stocks are generally well bable for many. Retail stocks are generally well in hand, and merchants are in good shape to handle large quantities of merchandise. The tendency is to buy in smaller quantities than in former years, but this will be offset by more frequent purchases. Indeed, the volume of merchandise passed into consumption will fully equal, if not exceed, that distributed in any previous exprise generally.

The annual report of the United States Post-January payments by corporations for interest master-General for the last fiscal year shows

against \$124,785,697 in the preceding fiscal year. The excess of expenditures over receipts was, therefore, \$4,560,044, as compared with \$2,937,-649 the preceding year. The estimated revenue for 1904 is \$146,304,642, which, with an for 1904 is \$146,304,642, which, with an appropriation of \$153,511,549, would leave a deficit for 1904 in the postal revenues of \$7,206,906. The sales of stamps, postal cards, etc., amounted to \$123,511,549. That was the etc., amounted to \$123,511,549. That was the principal item of revenue. The cost of transportation of mails on railroads was \$36,195, 116. The Postmaster General says that the postal service is growing with great strides. The money order business increases at a rapid rate. The number of domestic money international money order business shows a still Arco Valley, German Minister, paid a visit the greater increase, the number of orders issued same day at 4 p.in. to Baron Komura, Minister met hurricelly, and resolved to boycott the floor. There are 2,935 railroad routes, for Foreign Affairs. the total length of which is 192,852 miles, with an annual travel of 333,491,684 miles. During the fiscal year 25,951,178 letters and parcels were registered, an increase of 2,761,210 in paid registrations as compared with the preceeding

NEWS OF THE WEEK.

The German cruiser Hansa arrived on Feb.

Four cases of dysentery were reported since Feb. 14th in Tokyo.

The Kajiki Academy, Kagoshima, was destroyed by fire on the night of Feb. 17th.

Four Russians at Nagasaki were ordered by the Japanese authorities on the night of Feb. 16th to leave that place.

On the 4th inst., the Civil Commission in Manila passed a vote of one million pesos for harbour improvements in Manila.

The Jiji reports that over thirty thousand Chinese living at Vladivostock are making preparations to leave by a German steamer.

The Bank of Japan sent on Feb. 11th three hundred and forty cases containing notes and silver coins to its Osaka branch.

The French warship Guichen left Nagasaki on Feb. 16th for Chemulpo. She is expected to carry wounded Russians to Shanghai.

Fire broke out on the night of Feb. 16th in the House of Correction, Tokyo, the result being that five buildings were burned down. Negligence seems to have been the cause

Some ten Russian sailors belonging to the ships recently captured, were released at Saseho after examination, and arrived on Feb. 17th at Nagasaki, They will leave for Shanghai by the first steamer.

It is reported that the White Star Line has ordered a steamer 755 feet in length, or thirty feet longer than the Baltic, the largest ship in the world. The construction of the vessel, it is said, will begin immediately at Belfast, Ireland.

A telegram from Montevideo, dated January 23rd, says that the losses sustained by the insurgents since their recent defeat at Manzavillagra, Uruguay, are estimated at 500. The insurgent forces numbered more than 6000. These troubles have not been made public hitherto.

The purchase by the British Government of the hill above Kinghorn Ness Battery, which commands a view of the entrance of the Firth of Forth and is intended for use as an observation station solely has now been practically completed.

The Nichi Nichi has a Nagasaki telegram which states that the Russian steamer Tulia (?) Some remarkable discoveries have, according which was lying at that port was captured on to the Standard's Athens correspondent, just been Feb. 17th by the Japanese authorities. It was made by consigned to Mr. Ginsburg and was chartered by Ephesus. the Russian Navy.

According to information from Berlin, General Kuropatkin has been appointed to command the Russian Army and Admiral Alexieff the Russian Navy in the Far East. Vice Admiral Skrydoloff, commander of the Black Sea Squadron (formerly Perganum, now in the Museum at Berlin. commander on the Pacific Squadron) will serve under Admiral Alexieff.

Sir William Ramsay, lecturing in London on "Stars and Atoms," has made the startling state-ment that a leading firm of platinum manufac-turers had unconsciously been throwing radium into the streets for more than 20 years, and that the precious substance is now lying somewhere in the dustheaps of London.

She left in the evening to pay off at Chatham, where she was commissioned on April 19, 1903. She underwent a paying-off steam trial in the North Sea on 7th inst., and afterwards steamed into Sheerness Harbour to prepare for paying off at Chatham.

A coolie was arrested on Feb. 16th by the Kaga-cho police, Yokohama, and charged with released from custody under bond of \$15,000. entering on Feb. 12th a godown of Messrs. Jardine. Matheson and Company. He got in through a window which had been left open morrow by the Deli, having resigned the posit and stole two hundred pounds of waste silk.

This he sold to T. Kato, a silk and cocoon dealer in Kanagawa.

King Peter of Servia, according to a report from Cetinje, Montenegro, published by the Neues Wiener Journal, is prepared voluntarily to renounce the throne and allow the powers to nominate his successor. The Prince of Montenegro is said to have received a mandate from Russia to clear up the precarious situation in Servia, and King Peter is alleged to have recognized the untenability of his position.

end at the rate of 4s per share £20,000, to reserve fund £25,000, to re-insurance fund £10,000, to investment fluctuation account £4,300, a balance being carried forward to new account of £24,448.13.9.

A singular discovery has been made during the overhaul which the Victory has received since she

that ordinary postal revenue amounted in residence of Mr. Popp on the Hill at Kobe was company, including the Turkish Ambassador, \$131,984,535 and the receipts from money order destroyed by fire. The damage done is slighs Lord and Lady Amstrong, Sir Andrew Noble, business to \$2,239,908, making a total revenue and will not reach a hundred yen, but there it and Admiral Hickmet Pasha. The yacht is 260 of \$134,224,443, as compared with \$1:1,848,047 ground for suspecting that the fire was the work in 1902. The expenditures were \$138,784,487, of an incendiary. corvette Ertogroul on the Japan coast.)

> made by Austrian explorers among the ruins of Ephesus. Near the theatre they have found a building which, according to an inscription, was a library built by a man named Celsus. Even more important is the discovery of ten sculptures in high relief, forming a balustrade, and representing an historic subject of the time of the Romans, somewhat similar to the frieze of the altar from

Dissatisfaction with the management of the Exchange at Cardiff Docks culminated on Dec. orders issued in 1903 was 45,941,681, as The Ministers of State held a conference on 31st in a revolt of over 1,000 merchants, ship-against 40,474,327 in 1902. The amount of Feb. 17th at 1 p.m. at the official residence of owners, and stockbrokers against the proposal of domestic orders issued was \$353,627,648. The the Premier. They left before 4 o'clock. Count the directors to raise the annual subscription The Exchange was the scene of tumultuous excitement during the day. In noise it would have eclipsed recent exhibitions on the New York cotton market. Time after time members broke into singing popular songs. After all the subscription will be allowed to remain at a guinea.

> A telegram to the Manila Cablenews reads as follows:—Chicago, Jan. 27.—Mayor Carter H. Harrison and other municipal officials, besides The first-class cruiser Argonaut, Capt. G. H. Cherry, arrived at Plymouth on Jan. 3rd, having completed her commission on the China Station.
>
> Mr. Bluebeard, have been arrested in connection Mr. Bluebeard, have been arrested in connection with the Iroquois Theatre disaster. They have been indicted for manslaughter and criminal negligence in failing to enforce the requirements of the city ordinances with reference to theatres.

> Deputy Commissioner L. E. Stanhope are among
> the indicted officials. Mayor Harrison has been

> > The Bangkok Times of the 21st January says:
> > -Mr. C. Rivett-Carnac leaves for Europe tomorrow by the Deli, having resigned the position of Financial Adviser which he has occupied for of Financial Adviser which he has occupied for the last five years, and last evening he was re-ceived in farewell audience of His Majesty the King. In future, we understand, Mr. Rivett-Carnac's headquarters will be in London, where he will act as Financial Agent to the Siamese Government. Mr. Rivett-Carnac's name will be Government. Mr. Rivett-Carnac's name will be chiefly remembered here in connection with the establishment of the gold standard in Siam, and a general reform of the currency, which has proved of great benefit to the country and materially advanced its finances.

was an available balance at profit and loss account on Nov. 30th, 1903, of £83,748, of which there were allotted to payment of a dividend at the rate of 4s per share £22,000 to large the large half and the rate of 4s per share £22,000 to large half and material strength of the German Navy during the large half at the rate of 4s per share £22,000 to large half and material strength of the German Navy during the large half at the rate of 4s per share £22,000 to large half and material strength of the German Navy during the large half at the case of the year a statement, is published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year a statement, is published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year a statement, is published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year a statement, is published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year a statement, is published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year a statement, is published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year a statement, is published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year and the published in which the systematic increase in the numerical and material strength of the German Navy during the large half at the close of the year a statement, is published in which the systematic increase in the numerical and the published half at the close of the year and the published half at the close of the year and the months, including three battleships, one large cruisers, three small cruisers, one gunboat, and two river gunboats. The construction of those vessels has been accomplished in the three Imperial naval yards at Dantzic, Kiel, and Wilhelmshaven navai yards at Dantzic, Kiel, and Wintermanyen and in the shipbuilding yards of seven private firms. The orders for the Imperial Navy which have been placed with these private firms have given a welcome impulse to the shipbuilding industry, since the large steamship lines have recently shown little inclination to make additions to their fleets. During to a the Imperial hand authorities have taken the has been in dock at Portsmouth. It is that the spot in the cockpit hitherto pointed out as the place where the hero of Trafalgar breathed his last is the wrong one. It was close against one of the huge ribs of the ship, a little further formard, where Lord Nelson really expired. This place is now to be railed round, and it will be lighted with electric light, for which a store battery is to be placed on board. The old ship is undergoing a thorough refit, which will not be completed for several weeks.

It is that the placed with these private must be come impulse to the shipbuilding industry, since the large steamship lines have recently shown little inclination to make additions to their fleets. Durforthing 1903 the Imperial naval authorities have taken over from the constructors one battleship, one large cruiser, four small cruisers, one gunboat, and one river gunboat. Of these, one small cruiser, the one gunboat, and the one river gunboat are among the vessels already enumerated as having been launched earlier in the year. The construction of five new vessels, the first instalments of votes for which have been passed in the naval estimates, Forth and is intended for use as an observation station solely has now been practically completed.

On Wednesday evening, between eight and nine o'clock, a summer-house in the garden of the Turkish Ambassador in the presence of a large cruisers, and one river gunboat.

square. As long ago as 1869, the Warden of of the building has been made to correspond with the Standards began searching for a site suitable its appearance when originally completed in the for the exhibition of a standard measure of too feet, and a standard chain of 66 feet, with sub-divisions. It was decided that the site and the standard measure of too feet, with sub-divisions. divisions. It was decided that the site must be easily accessible to the public who may wish to compare their measures; and that the place must be such where comparisons may be made without being disturbed by idlers; and where sufficient protection from wilful damage may summent protection from withit damage may at all times be secured; and where there is a long and level plot of ground, upon which the longer standard measures may be laid down, with an adjacent wall for the mural standards.

Many sites were tried, namely, the south side of the Victoria Tower, Somerset House, Downing-street, New Palace-yard, and the Embankment, but either they proved unsuitable, or permission could not be obtained from the Office of Works. Finally, the Trafalgar-square site was obtained through the intervention of the Astronomer Royal, where all the blocks for defining the several measures are of brozze, those inlaid in the granite steps being slightly conical and secured by cement, while the mural standard measures are screwed into the granite wall. However, it was soon discovered that the site had its dis-advantages, namely, insufficient security from damage and disturbance, and slight inaccuracy due to exposure to the atmosphere. Accordingdue to exposure to the atmosphere. Accordingly, the Department have been long trying to find a covered site for a new set of standards; and with this object in view the possibilities of the Guildhall were originally considered, but the idea Guildhall were originally considered, but the idea abandoned owing to the constant traffic to and fro in that building. Westminster Hall fulfils all came the new yard measure found in 1760 fro in that building. Westminster Hall fulfils all came the new yard measure found in the Tower requirements but the Department experienced great difficulty in obtaining the permission of the authorities. The new measurement, here set up, is, of course, accessible to all bona-fide seekers after accuracy, and as it is impervious to atmospheric fluctuations, it renders it possible for the particular survey for which it is intended to be carried out to the 1-1,000th part of an inch. Altertactically, it has been copied in steel by the United the standard yard was to be recovered by making the latitude of London, in a vacum at sea level and, doubtless, other copies will soon be disequal to 39.1393 inches. However, the Royal and, doubtless, other copies will soon be dis-patched all over the world.

Our standard units of measures of length, capacity, and weight—the yard, bushel, and pound-have come down to us from the Saxons, who derived their origin from a corn of weight. No change was made by the Normans in the Saxon system, but William the Conqueror ordered the custody of the standards to be transferred from the City of Winchester to the Exchequer at West-minster. The King's standards were deposited by the King's orders in a consecrated building, the Pyx Chapel, just as those of ancient countries were placed in their temples. The chapel became vested in the Sovereign, and has ever since been held by the officer who has had charge been held by the officer who has had charge of the standards. In 1866, when the Exchequer ceased to be a separate office of the Government, and was amalgamated with the audit, the Standards Department of the Board of Trade, with offices in Old Palaceyard, Westminster, was created, and all the standards passed to the custody of the Warden, when they were deposited in fire-proof safes. In 1870, increased accommodation was given to the Stancreased accommodation was given to the Standards Department by the addition of several new rooms to the office, which now includes all the three floors of the old Norman Jewel Tower at Westminister, in which until comparatively re-

Trafalgar

and with it are preserved the standard quart, added by Elizabeth, and the standard wine-gallon of good Queen Anne. All three were abolished in 1824, when the new imperial gallon was made the standard of capacity for measuring grain and dry commodities. All measures of capacity, both liquid and dry, were at first taken from troy weight, and several laws were passed in the reign of Henry III., enacting that eight pounds of Troy, taken from the middle of the ear of corn and well dried, should make one gallon of wine measure.

Another interesting relic is furnished by the standard avoirdupois weights, constructed in the reign of Elizabeth, by which all the commercial reign of Elizabeth, by which all the commercial weights of this country were regulated up to the reign of George IV. These are still in good condition. New imperial standard weights, constructed under Captain Kater's direction, were substituted for them in 1825. The oldest English standard of length now existing consists of the exchequer yard of Henry VII. alone, while there is also extant the standard yard of Elizabeth's time, which has the John III of At inches marked. time, which has the cloth ell of 45 inches marked on the same bronze bar. A royal Commission on Weights and Measures, which sat in 1758, ordered a new standard yard and a new standard troy pound to be constituted the legal standards of length and weight in this country. The troy the standard yard was to be recovered by making the length of a mean-time seconds pendulum in the latitude of London, in a vacum at sea level equal to 39.1393 inches. However, the Royal Committee, appointed to restore the perished standards, reported against the accuracy of the pendulum method, so they restored it, between 1843 and 1854, by taking the best secondary evidence, and produced a standard bar of gin metal. The Commission replaced troy weight by avoirdupois, and the standard pound is a mas of platinum, weighing 7,000 grains in vacuo.

In pursuance of the Standards Act of 1855, the standards of the British yard measure and of the British pound weight are immured in the wall of the staircase leading to the Upper Waiting Hall of the House of Commons, and Parliamentary copies are de-posited at the Royal Mint, Greenwich Obser-vatory, and with the Royal Society of London. The immured standards are tested every twenty years, in the presence of the Speaker, the Presi dent of the Board of Trade, and the Secretary to the Lord Great Chamberlain. The last test took place on April 2, 1892, when it was found that, compared with the test of 1872, the yard differed 0.0000152in., and the pound 0.00064 grain. It is, however, believed that the differences arose from errors of observation in 1872. After the test, a declaration is made that the immured imrooms to the office, which now includes all the three floors of the old Norman Jewel Tower at Westminister, in which until comparatively recently the original Acts of Parliament were deposited. From the great thickness of the stone walls of the tower, the rooms in this building are very favourable for standard operations, being free from vibration, and not liable to sudden fluctuations of temperature. There are rooms devoted to weighing, rooms devoted to glass fluid measures, and rooms devoted to glass fluid measures, and rooms devoted. The flat standards are not in any manner destroyed, the in any manner destroyed, when they are replaced as follows: The platinum pound is function, and there is always a consolation, but the salways a consolation, to have social defaced, or otherwise injured, when they are replaced as follows: The platinum pound is malorated in a square, by the first and a scale of Germany. For German sentiment was not anti-Japanese, but it was pro-Japanese even before the outbreak of gany box, and screwed down and sealed. The gun-metal yard is placed on its eight rollers within a mahogany box, and both mahogany boxes are placed within a lead case, which is soldered down.

1859-1864.

TO THE EDITOR OF THE "JAPAN MAIL."

To the Editor of the "Japan Mail."

Sta,—I was extremely pleased to see in your issue of the Japan Weekly Mail of 5th Dec. to land here today, the interesting paper on the above subject by Mr. G. W. Rogers, read at the Yokohama Literary Society, and if, as he says, it was written almost entirely from memory, he deserves the greatest credit for its compilation. I gladly add it to my collection of reminiscences of the old days, which now comprises papers written by Mr. Wilkin in 1893 ("Yokohama in the Sixties") and added to by myself, an account! wrote for your paper early in 1902, and Mr. Mollison's description in May last year, which with Mr. Rogers' paper just received, all written from different standpoints, give an interesting and pretty accurate idea of things as they were, say from 1859 to about 1874, and which should be of greater value as time goes on, showing as they do a state of affairs hardly conceivable without such descriptions to comparatively newcomers.

I would point out a slight slip in Mr. Rogers' paper, and which you also make on the first page of the above Weekly Mail. Referring to the Mrs. Borradaile's second wife and was not the lady of that name who was with Mr. Richardson's disastrous party in 1862. That lady died many years ago. She was the sister of Mrs. Wm. Marshall, whose husband was also of the party, and got I believe \$15000 compensation for the wounds he received in the attack. I think the error as to the identity was first made by the Lundon and China Express and it is quite understandable how it arose, both ladies having been the wives of Mr. Borradaile.

Your obedient Servant, ARTHUR BRENT.

Your obedient Servant, ARTHUR BRENT. 44 Great Tower Street, London, E. C. 8 January, 1904.

INJURED MAIL MATTER.

(TO THE EDITOR OF THE "JAPAN MAIL")

SIR,—Would you kindly spare me space in your paper to acquaint the public of the following accident, According to a statement from the Post Office, Tacoma, several mail bags conveyed by the Tacoma, which left Yokohama on the 18th Dec. last, were somewhat disfigured by rats aboard the ship. The damaged bags are as follows:—

damaged bags are as follows:

2 bags containing prints, samples etc., for Tacoma, slightly rat eaten; I bag containing letters for Tacoma, badly rat eaten; I bag containing letters for Tacoma, badly rat eaten; I bag containing registered articles, for London, slightly rat eaten; I bag containing prints, samples etc., for Paris, slightly rat eaten; I bag containing letters, samples etc., for Belfort and Bale, Switz., badly rat eaten.

In consequence, it is possibly believed that some of the mail matters which were collected at this office and forwarded for the above destinations might have been damaged, slightly or badly.

Yours faithfully,

T. AONUMA.

Supt. of Foreign mails.

Yokohama, February 12.

GERMANY AND THE WAR.

TO THE EDITOR OF THE " JAPAN MAIL."

10 THE LIPTOR OF THE "JAPAN MAIL."

SIR,—The Japan Mail of February 13th has a paragraph on German Sentiment, which speaks of Germany's tardy "conversion" to Japan's cause, and which ends with the Japanese proverb, Kaleba Kangun makereba 20ku (if you win you are called a loyal soldier, if you lose you are a rebel). I can quite understand that an Englishman might be a little too ready to quote against another nation a saying which the Japanese applied to his own country (English), when during the China-Japan war England's sympathies for Japan became more and more strong sympathies for Japan became more and more strong along with the latter's victories. I can understand it, because it is always a consolation, to have socios

therefore self-convicted of an absolutely unprovoked some at Germany, which in fact, is equivalent to an attempt to lower her in the opinion of the Japanese. I am, dear Sir, Yours very truly,

NEUTER.

I am, dear Sir, Yours very truly,

NEUTER.

[Our correspondent appears to labour under the same inability as the German journals to which we referred in our note of the 13th inst. (not 12th) an inability to keep King Charles' head out of the memorial. England must always be dragged in: every stick is good for beating England. However, we would ask "Neuter" to distinguish between sympathy and judgment. That the German people, or at any rate such part of them as have any knowledge of the Far East, sympathise with Japan, may be taken for granted. But the view they take of her cause is another matter, and we are not aware that their journals had expressed any favourable judgment in that sense prior to the successes on the 8th and 9th. As to the suggestion that we are "attempting to lower Germany in the opinion of the Japanese," it is scarcely worth considering. It is our habit to say what we think without any sinister purpose. So far as our knowledge of the Japanese goes, their opinion of the German nation is not assailable. But their opinion of German policy might be a great deal higher than it is.—

ED. J. M.]

HONGKONG AND SHANGHAI BANKING CORPORATION.

The following is the seventy-seventh report of the court of directors to the ordinary half-yearly general meeting of Shareholders to be held at the City Half, Hongkong, on Saturday, the 20th February, at noon. Gentlemen,—The directors have nowto submit to you a general statement of the affairs of the Bank, and balance sheet for the half-year ending 31st December, 1003.

and balance sheet for the half-year ending 31st December, 1903.

The net profits for that period, including \$1,435,638.77, balance brought forward from last account, after paying all charges, deducting interest paid and due, and making provision for bad and doubtful accounts, amount to \$3,771,886.08.

The directors recommend the transfer of \$500,000 from the profit and loss account to credit of the silver reserve fund, which fund will then stand at \$6,500,000.

reserve fund, which fund will then stand at \$6,500,000. After making this transfer and deducting remuneration to directors there remains for appropriation \$3,256,886.08, out of which the directors recommend the payment of a dividend of one pound and ten shillings sterling per share, which at 4/6 will absorb \$533,333.33, and a bonus of ten shillings sterling per share, which at 4/6 will absorb \$17,777.78. The difference in exchange between 4/6, the rate at which the dividend and bonus are declared, and 1/8½, the rate of the day, amounts to \$1,128,408.89. The balance \$1,417,366.08 to be carried to new profit and loss account.

Mr. A. J. Raymond has been elected chairman for the year 1904 and Mr. H. E. Tomkins Deputy Chairman.

man.

The Honourable R. Shewan having resigned his neart on leaving the Colony, Mr. C. A. Tomes has been invited to fill the vacancy; the appointment requires confirmation at this Meeting.

Mr. E. Goetz and the Honourable C. W. Dickson retire in rotation, but being eligible for re-election offer themselves accordingly.

The accounts have been audited by Mr. W. Hutton Petts and Mr. A. G. Wood, the latter acting for Edonousable C. S. Sharp who is absent from the Colony.

Honourable C. S. Sharp, who is shortly returning to the Colony, and Mr. W. Hutton Potts offer themselves for re-election.

THE U.S. AND CHINA'S INTEGRITY.

Gold, £1,945,897.5s.
3d.22,331,487.89
97,119,132.74

A telegram from Washington states and on February 10th Mr. Hay, Secretary of a panic in St. Petersburg and on the Bourse

Powers asking whether they would be willing to join in giving notice to Russia and Japan that during as well as after hostilities the neutrality and integrity of China must be recognized.

ST. PETERSBURG AMAZED.

Patriotic demonstrations took place in St. Petersburg and elsewhere in Russia on Tuesday, but the news as to Port Arthur caused an immense sensation, the populace being amazed at Japan attacking before declaring war. The streets of St. Petersburg were thronged by excited crowds and the Court Ball has been abandoned.

RUSSIA'S LACK OF NAVAL **OFFICERS**

London, February 11.

Owing to the lack of Naval officers, all ensigns in the Russian Navy were yesterday granted commissions.

THE CZAR TO HIS OFFICERS.

The Czar, addressing his officers, said that a treacherous foe in the darkness of night, without provocation, attacked our fortress and fleet.

MR. KURINO.

Mr. Kurino, Japanese Minister, has left St. Petersburg.

BRITISH NEUTRALITY.

The British proclamation of neutrality appears to-morrow.

THE STOCK MARKET.

London, February 12.

Russian stocks to-day gained (? declined) another 1½ and Japanese stock rose ¾ reflecting fairly the feeling in London.

CONGRATULATING JAPAN.

All the papers in Great Britain unite in congratulating Japan upon the brilliant opening of the campaign.

Even the German papers ridicule the Russian talk of treachery because Japan attacked without a formal declaration of war.

THE CZAR'S MANIFESTO.

The Czar has issued a manifesto which virtually amounts to a declaration of war.

AMERICA'S NEUTRALITY.

The Washington Cabinet has decided to

maintain absolute neutrality.

Mr. Hay's proposals contemplate the restriction of hostilities within the smallest possible area, and are regarded as implying that neither Russia or Japan will be allowed to invade China proper.

WAR NEWS.

London, February 14.

Sir William Nicholson and Col. James Haldane, British Attachés to the Japanese army, have started. The contractors have undertaken to complete the line across (? around) Lake Baikal by Feb. 28th or earlier. A circular has been issued by the Russian Minister of Finance, warning the public against sacrificing Russian securities owing to heavy falls. He exhorts them to adopt a calmer attitude, though temporary difficulties are possible. He declares that Russia's economic force is unshaken. The circular is a significant indication of the sensation created throughout Russia. Several cruisers and destroyers are being prepared at Brest and Toulon to proceed to the Far East; 60,000 tons of coal briquets have been hastily despatched to Saigon. In yes-terday's telegrams the word "gained" with reference to Russian securities should have been " fell."

PANIC IN ST. PETERSBURG.

critical. Holders of Government stocks are her rudder; the Retvisan in her pumping losing enormously. Several banks are tot-

RUSSIAN NAVAL MOVEMENTS.

The Dimitri Donskoi and the Aurora, with six destroyers proceeded from Suez to Jibutil where they have coaled and are awaiting the arrival of the Oslabia, the transport Saratoff and three destroyers which have already left Suez. Several transports and torpedo boats are now in the Canal.

EGYPT'S NEUTRALITY.

London, February 13

A Russian destroyer has been ordered to leave Port Said after the Government had received an application from Russia for per-mission to dock the destroyer at Suez.

The Austrian collier fava, chartered for Port Arthur, has been treated as a belligerent and ordered to leave Port Said immediately.

She is now discharging.

RUSSIA'S INTERNAL TROUBLES.

The revolutionary propaganda in southern Russia is increasing. Many provincial governors have been summoned to St. Petersburg to confer with the Government. NEUTRALITY.

Germany and China have proclaimed neutrality

CHINA'S NEUTRALITY.

London, February 15.

France has accepted Mr. Hay's note regarding China's neutrality. Great Britain has agreed in principle. It is expected also that Russia will concur.

An official Japanese note published in Paris says that Japan advised China to remain neutral with the view of reducing the evils of war to a minimum, although she was well aware of the advantages she would herself derive from an alliance with China. She had urged China to take effectual measures to protect her strategic points and prevent the belligerents from violating her (China's) neutrality, by making Chinese ports their basis of operations or using them sea. as harbours of refuge.

THE BLACK SEA FLEET.

London, February 17

Speaking in the House of Commons, Mr. Akers Douglas (who is leading the House temporarily owing to the illness of Mr. A. J. Balfour) said that Great Britain had not been approached regarding the passage of the Dardanelles, by the Black Sea Fleet. There was no reason to suppose that Russia contemplates such a violation of the treaties.

UNREST IN RUSSIA.

Government circles in St. Petersburg are uneasy, especially as seditious proclamations are again circulating among the students.

RUSSIA'S MOVEMENTS.

London, February 18 The Russian Government has issued fifty million roubles worth of credit notes.

The Oslabiya, Dinitri Donskoi, and a number of torpedo destroyers are ordered to remain at Jubutil till further orders.

It was stated in St. Petersburg on Feb. 18th that General Nanoff, Governor of Turkistan, has been instructed to prepare for possible military action in the direction of India in the event of Britain adopting an attitude openly hostile to Russia or attention to the property of the prope tempting upon any enterprise in Persia or Thibet prejudicial to Russian interests.

(RECEIVED AT THE LEGATION OF FRANCE.) THE BATTLE OF PORT ARTHUR.

that the financial situation there has become the iron-clad Cesarewitch had an injury to pation of the Bay of Krat and the neighmachinery, and the Pallada in the middle plished, of her hull. These vessels continue afloat. The Measures are being taken to get them into the inner roadstead.

On the following day, the 9th February, at and cruisers bombarded Port Arthur. The citadel and the Russian squadron replied. After an hour of bombardment the Japanese withdrew to the south. During the combat the iron-clad *Poltava*, and the cruisers the cruisers Diana, Askold and Novik received injuries below the water-line.

The damage done to the citadel is insignificant. Two officers and 41 sailors were wounded; a killed.

Proclamations of neutrality by Great Britain and the United States are expected momentarily.

THE "CEZAREWITCH."

The Cezarewitch will soon be ready for

FRANCE AND SIAM.

M. Delcassé commenced on Tuesday to lay before the Council of Ministers the state of the negotiations with Siam. It is probable that the arrangement will be concluded.

FRENCH NEWS

Saigon, February 14. Admiral Maréchal, former Commander in-chief of the French Squadron in the Far East, is dead.

The Council of Ministers has settled the conditions of the Convention with Siam. M. Etienne, Vice-President of the Chamber and President of the Colonial Group in the Chamber, M. Deloucle, Deputy for Cochin China, M. Doumer, Deputy, former Minister and formerly Governor General of Indo-China, opposed the immediate evacuation of Chantaboun.

At Port Arthur, the transport Yenissei. when laying mines, was accidentally blown up. There were 95 killed.

FRANCE AND SIAM.

Saigon, February 15.
In the Convention with Siam it is agreed that Siam renounces all pretension to the Kingdom of Luang-Prebang; that she cedes 8 points on the right bank of the Mekong; that Frenchmen shall command the Cam-bodgian troops in the provinces of Battam-bong, Augkor, and Sisuphon; that France will maintain her protegés; that France shall (Official from St. Petersburg.)
Saigon, February 11.
In the night attack against Port Arthur shall have been effected and after the occu-

bouring territory shall have been accom-

The Parliamentary Commission will have to clear up numerous points before the Convention is ratified.

The treaty was to be signed at Paris on the evening of the 13th.

> (RECEIVED AT THE FOREIGN OFFICE) OFFICIAL TELEGRAMS.

The Japanese Consul at Chefoo reports that according to a statement by the master of an American steamer which had just arrived from Port Arthur, the cruiser Askold, which was one of the ships injured in the fight on the 9th and was subsequently removed into the inner harbour, sank at her moorings on the 13th.

He also states that 29 were killed and sixty wounded on board the ships and that in Hwantan Fort two were killed and a

great number were wounded.

Mr. Motono, Japanese Minister in Paris, telegraphs that on the 12th he transmitted to M. Delcassé, French Foreign Minister, Japan's statement of her case, and that he received a reply immediately saying that France would observe neutrality.

THE "HANSA."

RUSSIA'S DECLARATION OF WAR.

London, February 11.
The Taur to-day declared war against Japan.

JAPANESE STEAMERS.

The Nippon Yusen Kaisha's steamer Wakasa Maru (Capt. J. B. Macmillan) has arrived safely

at Colombo,
The steamer Bingo Maru (Capt. Davies) took
fire in the Thames. It was immediately extinguished, but her midships hold was damaged.

THE BRITISH PRESS.

All the papers in London commend the merits of Japan and say that the prestige of Russia is injured to such an extent that it can not be recovered. The Times declares that the results secured by Japan are great in importance and in

DISASTROUS FIRE AT SHANGHAL

Shanghai, February 11, 8,40 p.m.
A disastrous fire has occurred in the Nankin Road destroying several foreign buildings, including the Russian Consulate, the general stores of Messrs. Lane Crawford & Co., and Hall & Holtz, Ltd., and

Hanchow.

THE U. S. PROPOSAL

London, February 12.

The U. S. Government bas received from Great Britain and Germany their consent to its proposal which aims at confining the war between Japan and Russia to a certain limited zone in the Far East,

The Times discusses the proposal of the United States and points out that France hesitates the consent to the proposal. This paper believes that the war zone will not apply to China proper.

NEUTRALITY.
Great Britain and the United States have declared

neutrality. NICEROY ALEXIEFF.
Viceroy Alexieff has been given supreme powers command the military forces.

FRANCE.

France strongly desires to avert further extensions

have perished. 'This happens to be the dron has steamed down to the vicinity of herring-fishery season and thus the Shogyo's Tsushima. statement acquires melancholy probability. It is remarked by the Nichi Nichi Shimbun that no value can attach to the only shadow the nature of a diversion. The idea is that p.m.:of excuse which the Russians may offer, the Russians had planned an offensive moveof exclise which the Russians may one; the Russian ment on the 10th instant, their programme troyers set out for Port Arthur during a being that the Vladivostock Squadron, heavy snow-storm. On the way thither the being to and attempted to escape, can not should make its appearance in the Sea of separated. Only the commanding section hold valid for an instant. The Russian Japan, and cause an alarm which would draw which consisted of the Hayatori and the russian section of a large past of the Japanese fleet. In Again, reached their destination, At 3 a.m. vessels could steam nearly 3 knots for every off a large part of the Japanese fleet. In Asagiri reached their destination. At 3 a.m. knot steamed by the Japanese steamers, the meanwhile the bulk of the Russian on the 14th the Asagiri sighted the harbour's and there should not have been the least Squadron would emerge from Port Arthur mouth, and was heavily fired on by the difficulty in arresting them. Probably, in and steam to the neighbourhood of Sadeed almost certainly, the Zensho Maru, sebo, challenging the weakened Japanese, which escaped, did not come within range and got into shallow water under shelter before the cruisers could open upon her, but even supposing that the first shot fired at the Nagonoura resulted in sink-sing her, the Russians ought to have saved her unfortunate passengers and crew. Here the Vladivostock Squadron to have the view of the effect of the very saved her unfortunate passengers and crew. It is not unreasonable to suppose that they put to sea before receiving news of the affair were not out for capturing merchant vessels at Port Arthur. There are rumours, indeed, or taking prisoners, that they destroyed life that the ships left Vladivostock on the 7th.

Feb. 20, 1904.]

trating any retaliatory excesses.

The master and crew of the Zensho Maru, which escaped, affirm that no signal or summons of any kind was made by the Russian cruisers. They opened fire at once.

Japanese destroyers have been trying to discover the whereabouts of the Vladivostock squadron but unsuccessfully. It disappeared after its splended exploit of murder. Hakodate was for a moment perturbed in expectation of an attack but equanimity has been restored, and news comes that a squadron of Japanese ships was to reach that port on the evening of the 12th.

As for the alleged bombardment of Fukuyama, it proves to be a groundless story.

Otaru also has been considerably disturbed by the apparition of the Vladivostock squadron in neighbouring seas. Old people, women and children made preparations to escape and there was a momentary run on the local banks.

The Governor of Hokkaido wires that up to the evening of the 12th the Russians had not been seen again nor had they made any attempt to pass the Tsugaru Strait. Throughout that day the cruiser Takao (1,778 tons) and four destroyers patrolled the strait in the neighbourhood of Hakodate.

There was considerable anxiety for a a.m. on the 11th for Hakodate, and she must have been in the zone of danger at a very critical time. News has been received, however, of her safe arrival at Hakodate on the 12th at 4 p.m.

Later news says that the Nagonoura Maru had a cargo of rice and that she carried only four passengers. It is to be hoped that this may prove correct.

It is reported that the British Squadron though at one time her passengers and crew has left Hongkong for the Sea of Japan.

Tokyo papers mention this with great satisfaction, as the presence of the British fleet will probably prevent the perpetration of further brutalities like the sinking of the

stories are vague and uncertain. What But the Authorities are u

It is conjectured in Japan that the movements of the Vladivostock Squadron are of and property indiscriminately and that they They appeared off the Tsugaru Strait on the will destroy it wherever they find it.

| If they had started on the evening The Japanese press, we need scarcely of the 7th they should have been off the say, is full of indignation, but it counsels its Straits on the 10th, but it is conceivable that their procedure seems to be mainly of a minatory nature. They have accomplished nothing except the sinking of a small steamer, and it is conceivable that they allowed her consort to escape because they desired to promote wide dissemination of the news of their presence.

> Tuesday, February 16. The Vladivostock Squadron seems to have retired again into that port. The sum of its achievements thus far is the barbarous The sum of destruction of a little merchant steamer.

Wednesday, February 17.
A later account says that the Vladivostock squadron left that Port on the afternoon of the 9th, and that news had already been received of the Port Arthur affair. cer in command of the Squadron had been removed on the day before its departure but the cause is not known. Mr. Kawakami, who is arrived at Nagasaki by the Batavia, says that no torpedoes are laid at Vladivostock, which is likely enough, seeing that the harbour is frozen

The official report of this cruel incident is that at 10 a.m. on the 11th instant the Zensho Maru sighted four Russian cruisers on her port how. The Nagonoura Maru was moment about the Nippon Yusen Kaisha's her port how. The Nagonoura Maru was s. s. Owari Maru. She left Niigata at 10 then some distance ahead of the Zensho Maru and had ceased moving. At about II o'clock the men-of-war fired at the Zensho, but the shot fell short by about 80 yards. Then a shot was fired at the Nagonoura. It struck her stern and she went down in ten minutes. Thereafter the Russians discharged three shell at the Zensho, but probably owing to the high sea, they missed her, and taking advantage of a squall of wind and rain she managed to escape,

Friday, February 19.
There are again rumours that the Vladivo-Reports reach Tokyo of the apparition of stock Squadron has put to sea and has been Russian vessels here and there, but the sighted on the coast of south-western Yezo. stories are vague and uncertain. What But the Authorities are understood to deny

THIRD ATIACK UPON PORT ARTHUR.

Vice-Admiral Togo reports as follows, under date of the 16th instant at 10.10

On the 13th instant a division of deson scouting duty. She held on, however, and discharged a torpedo at a war-ship from the funnel of which smoke was ascending. Returning the fire of the enemy's torpedoboats she made her way back safely. On the same morning at 5 o'clock the Havatori approached Port Arthur. Sighting two of the enemy's ships through the darkness, she received their fire, but immediately discharged a torpedo at one of them. projectile was distinctly seen to burst and the Hayatori escaped safely. It is not possible to speak definitely as to the results of this brave attack by the Hayatori and the Asagiri as the darkness countrymen not to be betrayed into perpe-they were accompanied by colliers which rendered things indistinct, but there can be trating any retaliatory excesses. upon the enemy was great.

The officer in command of the squadron that made the above attack was Captain Nagai Gunkichi; the *Hayatori* was commanded by Commander Takenouchi Jiro and the *Asagiri* by Commander Ishikawa

The Jiji Shimpo's Chefoo correspondent wires news of the attack but adds little to Admiral Togo's report, which is nevertheless characterized by that officer's usual brevity and freedom from adjectives. The correspondent says, however, that after the fight on the 9th the remnant of the Russian Squadron retired temporarily to Talien Bay, whence they subsequently returned to Port Arthur and took shelter under the forts. He adds that the Russians must have suffered more or less loss in this last essay by the Japanese, a fact not likely to be disputed. It appears to us that the story is sufficiently eloquent without any comment. We do not know whence the destroyers set out, but it is plain that they had to steam during a whole night through a violent snow storm. After they became separated and after the power of concerted action was thus lost, the natural course would have been for them to turn about and regain the fleet. They went on, however, singly. The Russians were not taken by surprise. They brought their search-lights to bear quickly and opened a heavy fire on the Asagiri, which little craft finding her-self alone under the heavy batteries on the two promontories and under the guns of a hostile squadron, nevertheless dashed into the harbour, discharged her torpedo and emerged unscathed. Her commander can not say definitely what material damage he inflicted, as the darkness was too intense for clear observation, but whatever injury he The did to the enemy's ships, there can be no were second opinion about the brilliancy of his exploit and about the singular inefficiency of the Russians, who, although they picked up the little craft almost immediates. ately with their search-lights, and although they had her practically at their mercy, failed to sink or cripple her. Two hours later the *Hayatori*. knowing nothing of her consort's doings neared the harbour. Had

Feb. 20, 1904.

follow each other at such a brief interval, the plan would have commanded admirathe ballow each other at such a brief interval, here lose ourselves in a maze of conjectures, the plan would have commanded admirathe ballows. The safest plan is to hold to simple probabilities, namely, that the Yenise's unhappy fate was quite independent of the scarcely have expected a second two hours later. They were not caught napping, however. They had their search-lights in full action and they "let off" their guns such action and they "let off" their guns such actions and they "let off" their guns such actions and they defently selforts proved. there does not seem to be much doubt stitutes an altogether abnormal element in

It has been suggested that the blowing up of the Yenisei at Port Arthur was the work of the Japanese destroyers in their last attack. There is just a bare possibility that the hypothesis is correct. The torpedo dis-charged by the *Hayatori* at 5 a.m. on the 14th instant was seen to explode against a Russian vessel, and in view of the coolness; and accuracy of Japanese naval officers' observation, there can be little doubt that the ship was disabled. Five in the morning at Port Arthur on the 14th was equivalent to 9 p.m. on the 13th in Europe, and it is therefore quite possible that St. Peters-burg received the news at midnight on the latter day. If then it was at once the latter day. If then it was at once telegraphed to Paris, it might have been re-wired to the East on the morning of the 14th, which is the date of the Saigon telegram received in Tokyo on the 15th. The thing is just within the range of possibilities, but it is not probable. For if we examine the dates of previous intelligence, it is found that Admiral Alexien's report of the attack at midnight on the 8th instant, was circulated in Paris on the 10th and reached Tokyo on the night of the 11th. Thus there was an interval of two days between the time of the attack and the publica-tion in Paris of Alexieff's report, whereas if the *Yenisei* incident is to be regarded as the result of the exploit on the 14th, we must assume that the news went round the world in one day. Moreover, it can scarcely be imagined that the Viceroy would telegraph such a clumsily false statement. His Excellency showed no disposition at the outset to conceal anything. position at the outset to conceal anything. His first report was remarkable for outspoken frankness. It is true that he subsequently displayed a marked desire to minimize the injuries suffered by his fleet and one can easily understand his mood when one takes note of the panic caused in Russian financial circles by the event. In view of the Russian empire's peculiarly

it been agreed that the two boats should statement into early circulation. But we here lose ourselves in a maze of conjectures.

cessfully. But their defensive efforts proved and the Hayatori reached Port Arthur, they as futile as before, and on this occasion received the fire of the forts and of the enemy's torpedo-boats, and it is further to about the destruction wrought by the be observed that the commanders of the Japanese torpedo. It can scarcely be destroyers do not speak of having actual-aid that these incidents will teach the ly entered the port. The inference is that said that these incidents will teach the ly entered the port. The inference is that world a new lesson about torpedo possibilities, because an enemy so helpless at sea as the Russians have shown themselves continued by a screen of torpedo boats. What vessels then were likely to be in stitutes an altogether abnormal element in that situation? If we subtract those beany calculation. May we not add, also, lieved to have been previously disabled, or any calculation. May we not add, also, incred to have been previously disabled, or that assailants so intrepid as the Japanese are not found everywhere? They literally assaults, there remain only the battle-ships take their lives in their hands when duty Peresviet and Pobieda and the armoured is in question. Such men deserve success, and will command it.

It has been suggested that the blowing that the blowing the the Mayare that the blowing the same that the blowing the the Mayare that the blowing the same that the tures that the Hayatori's torpedo struck the

Bayan.
We learn that there were four destroyers engaged in the gallant exploit-the Murasame, the Harusame, the Asagiri and the Hayatori. The two first have rejoined the fleet in safety. This is believed to be part of the division that was directed against Talien on the night of the 8th and that found they have changed their tone entirely since no Russian vessels there.

The Japanese fugitives who lest ron Arthur on the morning of the 14th in the steamer Wen-chow, reported, it will be remembered, that they observed the flagship Petropavlovsk to have a large hole in her bow near the anchor-chain hole. There The Japanese fugitives who left Port are conjectures that this is the ship hit by the Hayatori's projectile.

Again we hear statements as to the in-feriority of the Russian explosives. This is inferred from the large size of the fragments into which their shells burst.

An officer of the torpedo squadron that made the attack on the 8th is quoted by the Asahi as saying that as the squadron approached they counted distinctly the lights of sixteen Russian ships all ranged in order before the entrance to the harbour, and all having their prows pointing westward. The Japanese fired 20 torpedoes, and this officer declares that in every case the projectiles were seen to explode. He therefore reckons that the strength of the Russian fleet must have been reduced by at least one-third in this fight, and that Admiral Alexieff's reports are altogether misleading. When the destroyers were approaching the harbour's mouth they encountered a Russian destroyer which seemed to be on the look-out, but it took no notice of them, and as they were retiring they saw another destroyer which extinguished its light as they approached.

NEUTRALITY.

can not be enforced in that region. Therefore the Peking Government confines its announcement to China proper.

The Spanish Government and the Government of the Straits Settlements issued proclamations of neutrality on the 11th instant.

In connexion with neutrality the next interesting question will be the coaling of the Russian men-of-war now on their way eastward from Europe. The Nisslin and the Kasuga were just in time to get their last supply at Singapore, whence they are coming direct to Japan without touching at any point en route. But the Aurora, the Dimitri Donskoi and the Osliabia must either change their route or turn homewards. They will probably steer for the Straits of Sunda, where coal can be obtained, it is said, and will thence make for Saigon, but of course there would be a breach of neutrality in such procedure also.

Later news from Berlin says that Germany has decided to depart from her usual custom, and that in this instance she will duly proclaim neutrality.

Great Britain's declaration of neutrality received the King's signature on the 11th instant.

There was a disposition at first on the part of the press of Vienna to condemn the Japanese for engaging in belligerent operations immediately after the announcement of breaking-off relations and without giving any formal notice of warlike intention. But receiving news of Japan's naval successes. They now laud her promptitude and effi-ciency. As for the Hungarian journals, they were always with Japan, and they are now quite remarkably outspoken. We take these facts from intelligence published in

In England, Korea and China many applications are being made for permission

to serve on Japan's side.
Viceroy Yuan is said to have intimated to the Taotai of Kinchow that the troops of Ma Yuh-kon are to move immediately to that town, and that steps must accordingly be taken to provision them. Kinchow is beyond the Great Wall on the Tientsin-Kaiping Railway.

Telegrams received in Yokohama on Sunday show that New Zealand is tremendously interested in the war. Her sympathies too, are all for the island Empire.

A friend writing to us in the first week of January from one of the big provincial towns of England, says :--

of England, says:—

I have just returned from a week in London and have been doing the pantomimes and music-halls with the youngsters. The "patter" in the pantomimes, as usual, was full of topical and political up-to-date allusions, but none went down better than the references to the Japanese, the Anglo-Japanese Alliance, and the prespective clash in the Far East. Every time that a Japanese quip was made, the audiences cheered, while the allusions in the songs were caught up just as readily. There can be no doubt about where the sympathies of the English people lie in this matter, and should the diplomats fail to find a "middle way" and our allies be forced to draw the sword, then the British nation will demand that the Government carry out its pledges to gallant view of the Russian empire's peculiarly delicate circumstances, it becomes a scrious question whether frank lying would not be more meritorious on the part of her officials in certain crises than reckless truthfulness. Alexieff may have changed his view of a Viceroy's duties in the days immediately succeeding the attack of the Japanese squadrons. On the other hand, Alexieff may have telegraphed the naked truth to St. Petersburg on the 14th, and St. Petersburg may have published a version of its own. In that case there would have been feverish haste to get the misleading sion of Manchuria, the principle of neutrality that the Government also are heart and soul with the Japanese but they have naturally to be more reticent in giving music-hall are, of course, small things, but they are suggestive. How very different is the feeling they display in the temper of the nation to that which delives that the Government also are heart and soul with the Japanese but they have naturally to be more reticent in giving music-hall are, of course, small things, but they are suggestive. How very different is the feeling they display in the temper of the nation to that which the Government also are heart and soul with the Japanese but they have naturally to be more reticent in giving music-hall are, of course, small things, but they have naturally to be more reticent in giving music-hall are, of course, small things, but they have naturally to be more reticent in giving they display in the temper of a theatre or a music-hall are, of course, small things, but they have naturally to the reverse that the Government are to draw the sword, then the Japanese but they have naturally to be more reticent in giving the others of a theatre or a formation of music-hall are, of cour

But for all that, the Japanese alliance is more popular

Tuesday, February 16. By the courtesy of His Excellency the German Minister we are enabled to publish the following:-

might conflict with Germany's neutrality.

Berlin, February 13th, 1904. The Chancelog of the Empire. (Signed) Count von Buelow.

to the Japanese Government.

There is telegraphic news from China that she has announced her intention of enforcing strict neutrality in the region westward of the Liao River up to the Great Wall, as well as in the Eighteen Provinces. That region was indicated in the agreement of 1902 as the first part of Manchuria to be evacuated by Russia, and the Peking Government assumes that it has been evacuat-We do not know whether this news is trustworthy.

Miss Howard, an English lady who has lived for the past three years in the house- Minister in Seoul, has instructed the Japan-hold of Prince Shimazu as teacher of his less Consuls at these two places to provide been very remarkable. is stated by a news agency to have just contributed her salary leave, or for the protection of those wishing for six months to the Red Cross Society of to remain. Japan.

the British Government intend to be very strict in their application of international law with regard to coal. The law is that a belligereat vessel is not entitled to obtain in a neutral port any larger supply of coal than the offer of assistance made by American would enable her to reach the nearest port of her home country. Even that explicit rule, if benevolently applied, might

The Mexican Government has declared enable a Russian ship to get all the coal she wanted at British ports on her way out to the Far East. The suppliers of the coal need only refrain from asking whether it is to be burned going east or going west. On are said to be taking a form which inspires the other hand, neutrality would become a farce were such assential assistance rendered to the war-ships of a belligerent en route for the scene of action. The occasion to give a definite decision in the case of war-shlps has not yet presented itself to the British Authorities, but when it does present itself their line of action may be inferred from the incident now telegraphically reported, namely, that a steamer carrying coal for Port Arthur was turned back at Port Said. If coal destined for the uses of a belligerent may not be carried in neutral bottoms, or, to not be carried in neutral bottoms, or, to speak more correctly, if ships carrying it are not allowed to make use of neutral ports, still less may coal be supplied at a neutral port to the fighting ships of at a neutral port to the fighting ships of at a neutral port to the fighting ships of at belligerent. And the same view is evidently taken by France, for when questioned by the Japanese Representative in Paris about the coaling of the Dimitri Donskoi and her consorts at libutil the French. and her consorts at Jibutil, the French Government are said to have explained

For they clearly perceive that she has right on her that the incident had occurred prior to side, while that big bully, Russia, has none whalever. Of course, I do not forget that the English working admitting that a repetition of the action man looks upon a Russian as his hereditary enemy. admitting that a repetition of the action would be illegal now that war has been declared. It is not easy to foresee, in these circumstances, what will be the ultimate course of the Russian squadron now in route eastward. The Dimitri Donskoi, the Aurora and the six destroyers accompanying them were apparently at Jibutil on the 11th and According to official declarations made here the telegraph said that they would there According to official declarations made here the telegraph said that they would there by the Imperial Governments of Russia and Japan is war at the time being between Russia and Japan. This is hereby brought to public and three destroyers had already left knowledge and it is added that as a result of this state of things all persons resident in the German territories and in the German protectorates as well rule of international law a war-ship of a state of the colligation to remain more product the ability to referring from all acts which that 24 hours in a neutral port. Between under the obligation to refrain from all acts which than 24 hours in a neutral port. Between might conflict with Germany's neutrality.

Suez and Jibutil the whole length of the Red Sea has to be traversed, and it is scarcely likely that the battle-ship and her consorts will find the two cruisers and the torpedo-craft at Jibutil. Arriving The above has appeared in the German at Jibutil, too, they will not be allowed to Official Gazette and has been duly notified coal, and thenceforth all the way eastward they will not be able to get a pound of fuel, unless the Dntch disregard international obligations in the Strait of Sunda. It is a very interesting question. To us it seems that there will be only one course for the little squadron, namely, home again.

The Russian Consuls in Fusan and Gensan have asked the French Representative in Seoul to make arrangements for the protection of Russian interests after their de-parture, but the French Representative having no immediately available means of accomplishing this. Mr. Hayashi, Japanese hold of Prince Shimazu as teacher of his ese Consuls at these two places to provide sons, and whose success in that capacity has all facilities for the withdrawal of the Consuls and such of their nationals as may desire to

Mr. Motono telegraphs from Paris that Wednesday, February 17.

Reuter's telegrams indicate plainly that sincerest sympathy with the sister society in the British Government intend to be very rict in their application of international law Japan will accept it. It is stated that the kich then spoke. He said that whereas the successful termination. He said that whereas the said that whereas the state of the said that whereas the spoke and some state of the said that whereas the said that whereas the said that whereas the spoke are spoke. Japanese Government has agreed to this offer. The Government has also accepted

> its intention of observing strict neutrality and the Siamese Government issued a pro clamation in that sense on the 12th instant.

> As for the Chinese, their neutral methods some doubt of their real character.

It appears to be believed in Japan that when Mr. Motono made inquiry of the French Government with respect to the coaling of Russian war-ships at Jibouti, the reply given was that the coal had been contracted for before any declaration of war was made. Our own rendering of the telegram and was in the ships' possession prior to the declaration of war. Of course if it was only promised, then Mr. Akiyama, a Councillor of

WAR FUNDS.

The Official Gazette announces the issue of a domestic loan of 100 million yen. scribers are to send in their applications to the Bank of Japan, its agencies or branches, from the 1st to the 10th of March, accompanying the application with a deposit of 2 yen in every hundred of the sum offered. The bonds, which are to be of five denominations, namely, 50 yen, 100 yen, 500 yen, 1,000 yen and 5,000 yen, will carry interest at the rate of 5 per cent., and the lowest selling price will be 95 yen. Payments will be required in eight installments, namely

Anything offered over and above the minimum selling price must be paid in at the time of the second installment. The principal will be paid back in 5 years.

A big meeting of business-men and journalists was held in the Imperial Hotel, Tokyo, on the 14th instant. About 250 persons attended. The object of the meeting was to come to an understanding that pretty differences of opinion should be laid aside and that the nation should unite to support the Government and carry on the war as one man. Most of those present had attended in the same place last November, for the purpose of passing a resolution in the sense of urging the Government to take resolute steps with regard to Russia. Mr. Shimada Saburo, who addressed the meeting in succession to Mr. Ooka Ikuzo and Mr. Taguchi Ukichi, reminded his hearers of the previous action, and said that as they had associated themselves comply with a warfilia policy on that selves openly with a warlike policy on that occasion, so now the responsibility devolved this was an affair of life and death for Japan, its issue had comparatively small importance for Russia, her Far-Eastern possessions being, in effect, only a branch of her huge business. Still Russia's first step had been to ask Europe for money. Money, indeed, was the prime necessity, and it appeared to Mr. Sonoda that the Japanese would not experience any difficulty in furnishing the required amount if they contributed their stores of gold and silver objects of art and ornaments: if, in short, objects of art and ornaments: It, In short, they brought to the war chest the great sum of money now uselessly absorbed in such channels. His own pessessions of that nature were small but he gladly gave them all, though they included silver vases presented to him by the Imperial Household Department. ment.

The meeting then unanimously resolved was that the coal had been actually supplied that the support of the whole nation was essential to strengthen the Army and Navy, and that the best way to give that support was to relieve the minds of the soldiers and saved; and (3) to devise means for assisting small capitalists so as to promote the genera

mechanism.

The meeting also passed a vote of thanks to Admiral Togo and Rear-Admiral Uryu.

A committee was finally appointed to carry out the above resolutions. It consistcarry out the above resolutions. It consisted of Mr. Ikebe, of the Asalii Shimbun; Mr. Tokutomi, of the Kokumin Shimbun; Mr. Tokutomi, of the Kokumin Shimbun; Mr. Confident. It may therefore be inferred that these troops will form the Eigen His Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a warm message from Her Majesty the Emperor has addressed a w hashi Konkyo of the Bank of Japan, Mr. Sonoda Kokichi of the Fifteenth Bank, Mr. Misaki Kamenosuke of the Shokin Ginko, and Mr. Asabuki Yeiji.

All over Japan there is a movement towards voluntary subscriptions to the war chest. The amount is expected to reach a very large figure. We observe that 29 Chinese residents of Yokohama have put up 1,320 yen. The Kenkyu-kai section of the House of Peers have decided to hand over

their working fund of 31,150 yen.

On the 13th instant 51 bankers met in Tokyo to consult about subscribing to the The result of their consultation was that in Tokyo alone the required sum of 100 million yen would be put up. The 15th Bank present war. offers 10 millions; the Mitsui, Mitsu Bishi We learn and Specie Banks, 5 millions each; the First Bank, 3 millions; the Bank of Japan 20 millions; the Imperial Household Department 20 millions, and so on. There is no doubt that money will be subscribed easily. There is no

It is stated that Tokyo alone is prepared to put up 110 million yen for the first loan, and that if Osaka, Kyoto, &c., be added the subscriptions will amount to 150 millions. Yokohama is putting up 15 millions and Osaka 37 millions. Other places have not yet been heard from.

The Emperor has signified his pleasure that the whole store of old gold and silver coins lying in the Imperial Treasury together with the bullion, shall be handed over to the Bank of Japan to strengthen the

It seems probable that the idea started by Mr. Sonoda Kokichi at the big meeting of business-men and journalists a few days ago will become very popular. Mr. Sonoda's theory is that every one has a greater or less sum of money sunk in gold and silver ornaments of various kinds, and that if these ornaments were handed to the Treasury a very large amount of specie would become available without any diminution of the country's floating capital. Mr. Sonoda did not stop at mere advice. He collected all such objects in his own possession, including gold cups and vases given to him by the Emperor, and he handed over the whole to the Bank of Japan. On every side we hear of people following his example. The Emperor's order that all the old gold and silver coins in the Imperial Treasury as well as all the bullion should be similarly dealt with, is a sequel of Mr. Sonoda's suggestion, and those that know the Japanese predict that sacrifices of this nature will become the order of the day. The spirit of patriotism that prevails something extraordinary. Even people in the lowliest circumstances are setting de combat; Cesarevitch, Pallada, Retvizan, aside sums saved by daily efforts of hard self-denial in order that they may contribute something to the cause of country.

There must still be great quantities of oban instant.

efficiency of the country's wealth-earning and koban stored in the strong-rooms of wealthy people, and that the aggregate value of the gold and silver ornaments in the various households is immense can not be doubted. approval and encouragement to Vice-Admiral What we hope is that these things will neither Togo on account of the operations at Port be broken up nor sold. They can be kept Arthur.

> His Excellency Count Arco Valley, in continuation of his many benevolent deeds in Japan, has contributed a thousand yen to the Red Cross Hospital.

THE CHEMULPO PRISONERS.

It appears that the Japanese authorities have behaved with much generosity in the case of the survivors of the Koreetz and the Varyag. Some five hundred of these men, including officers, had fled to the British, French and Italian ships lying in the har-bour. The *Talbot* had 120 on board at one time. Of course the fugitives had to be given up, but the Japanese decided to restore them all provided they gave pledge not to take up arms again during the

French Representative gave a written engagement that these officers and men of the two Russian ships should not take part again in the war.

We learn from the Nichi Nichi's Seoul correspondent that the number of Russian officers and men including the wounded—who went by the Pascal to Saigon was 260 Our contemporary says that if there be added to the officers and men remaining, the total number of prisoners from the Koreetz and the Varyan reaches nearly 700.

THE RUSSIAN NAVAL LOSSES

Viceroy Alexieff has telegraphed to St Petersburg that the following ships are hors de combat; Cesarevitch, Pallada, Retvizan, Askold, Novik, Sevastopol, Potropaulovsk.

IMPERIAL MESSAGES.

The Emperor has addressed a message of

On Monday the Emperor gave farewell audience to over 200 officers, from the rank of second lieutenant upwards. They were entertained in the Palace. A similar ceremony is to take place to-day when 290 officers will be present, and there will be a third audience on the 17th. All these officers belong to the Divisions now ordered to the front.

BISHOP NICOLAI'S ADDRESS.

At a meeting recently held by some leading members of the Nippon Seikiokwai (Greek Church) Bishop Nicolai delivered an address as follows :-

pledge not to take up arms again during the present war.

We learn further that a Red-Cross hospital has been organized in Chemulpo by the Japanese and that they have offered to treat the Russian wounded there. A missionary hospital has been obtained for the purpose and a staff of surgeons and skilled nurses are with the troops that landed on the 8th instant.

There things contrast forcibly with the sinking of an inoffensive merchant steamer and the destruction of all her crew.

Mr. Hayashi wires from Chemulpo that it has been decided to place 32 wounded Russians under the care of the Japanese in the newly established Red Cross hospital at that port, and that Dr. Wada, of the Seoul Hospital, has gone to Chemulpo to assist surgically. Twenty men who were too badly hurt to be carried away from the Pascal remained on board that vessel when she started for Chefoo and Shanghai.

When the Pascal left Chemulpo on the 14th instant, she had on board, in addition to M. Pavlow and the staff of the Russian Legation, the Legation Guard of 75 men; 7 officers and 39 men of the Varyag and 9 officers and 169 men of the Koreets. The French Representative gave a written engagement that these officers and men of the troops that landed on the strength of the stre

your members would suffer a great loss.

I hope there will be no change in our church through the outbreak of war. Denkioska (evangelists) must propagate the Master's Gospel, students must attend the Mission school as usual and I will devote myself to the translation of the Prayer-book with my assistant, Mr. Nakae. And if an Imperial Proclamation of war is issued your members must pray for the triumph of Japan and when the Japanese army has conquered the Russian forces you must offer to God a prayer of thankfulness. This is the obligation laid on the Greek Christian in their native country. Our Lord Jesus Christ teaches us patriotism and loyalty. Christ himself shed tears for Jerusalem. That was because of his patriotism. And you must follow in your Master's steps. you must follow in your Master's steps.

you must follow in your Master's steps.

I prayed as usual to-day in the Cathedral but henceforth I will not take part in the public prayers. This is not for the reason that it might be dangerous for me to appear in the Cathedral, but for the reason that until now I prayed for victory and the peace of the Japanese Emperor, but now in case of war I cannot pray, as a Russian subject, that our native country should be conquered by an enemy. I have as you also have an obligation to my country, therefore I am glad to see that you realise your obligation to your country. For myself I will not for the time being serve in the public prayers of the Japanese Church.

JAPANESE BONDS.

London, February 14

Japanese loan bonds have advanced. MOBILIZATION IN RUSSIA.

The reserves in Siberia are being mobilized. The officers in reserve in Russia have also been levied. FRIENDLINESS.

FRIENDLINESS.
London, February 15.
Viscountess Hayashi (wife of the Japanese Minister in London) has commenced to collect donations toward a fund for relieving soldiers suffering from sickness or wounds. The British people are readily contributing towards this fund.

CHINESE NEUTRALITY.

China has informed the Powers that she can not bear the responsibility of maintaining neutrality in such areas as are still under foreign administration.

THE RUSSIAN SHIPS.

The warships Osliabia, Aurora and Dmitri Donskoi and the transports Saratoff and Orel have not yet reached the Indian Ocean.

GREAT BRITAIN AND JAPAN.

London, February 16.
The public in Great Britain are pleased at the safe arrival of the Nisshin and Kasuea

RUSSIA MISTRUSTS GREAT BRITAIN,

Lord Lansdowne, Secretary of State for Foreign Affairs, in the course of a speech in the Upper House last night, controverted the notion in Russia that Japanese warships are concentrated at Wei-hai-wei and using that port as a naval base

THE BRITISH BUDGET.

The House of Commons has concluded the discussion on the Budget, with the result that the Government has a majority of 51 votes.

LOAN BONDS.

All loan bonds have advanced about /4 since the DIPLOMATIC CORRESPONDENCE.

The official papers since 1900 between Great Britain and Russia have been issued. According to these documents, Russia displayed hypocritical action in the delay of negotiations.

THE DEATH OF MR. HANNA

Mr. Marcus Alonzo Hanna, a member of the U. S.

Mr. Marcus Alonzo Hanna, a member of the U. S. Senate, is dead. His age was 67 years.

[The following notice of the deceased statesman appears in Who's Who:—Hanna, Marcus Alonzo; Chairman, National Republican Committee, since 1896; Senator, Ohio U.S.A., since 1897; A Hanna & Co., coal and iron merchants; President, National Union Bank; Director, Cleveland City Railway Co.; b. New Lisbon, Ohio, 24 Sept. 1837; m. 1867, d. of Daniel P. Rhodes, Cleveland. Educ.: Western Reserve University. Until 1869 partner in wholesale grocery house; takes prominent part in electioneering tactics, and secured the nomination and election of MrKinley as President; delegate to National Republican Convention, 1884, 1888, and 1896.]

(FROM THE "ASAHI SHIMBUS.") THE TZAR.

London, February 11. The proposed visit of the Tzar to Moscow has been postponed.

THE KAISER.

The visit of the Kaiser to the Mediterranean has been put off.

THE BALKAN QUESTION.

The Balkan question is becoming serious. Turkey and Bulgaria are busily engaged in making military preparations, so that war is anticipated to be unavoidable.

THE JAPANESE VICTORIES.

The Japanese victories seem to have changed the attitude of the press on the continent. All the papers in Vienna praise Japan, and public opinion in Berlin is emphatically in favour of Japan.

GREAT BRITAIN.

In accordance with International Law, all coal on accordance with international Law, all coal ports in the British dominions have been ordered to supply to warships of the beligerent countries only such quantity of coal as will enable them to reach the nearest port of their own country.

The Fritte Minister (Mr. Baltotir) has developed bronchial trouble. Another doctor has been summoned.

DESTRUCTION OF RUSSIAN TELEGRAPHS.

Peking, February 9.

(FROM THE "S.-CHINA MORNING POST.") AN EXPERIMENT.

London, February 3. London, February 3.

The Marquis of Lansdowne, speaking in the House of Lords, yesterday afternoon, stated that the idea that the Government had made a suggestion to the effect that one hundred thousand Asiatics should be imported into the Transvaal was incorrect. The proposal was to introduce ten thousand Chinese labourers as an experiment.

UNTRIED LEADERS.

The leadership of the House of Commons, in the absence of the Premier, Mr. A. J. Balfour, was shared yesterday by the Home Secretary, Mr. Akers Douglas, and the Chancellor of the Exchequer, Mr. Austen Chamberlain.

Mr. Austen Chamberlain replied, on behalf of the Government, to the acrimonious attacks of the Opposition.

LORD MILNER'S VIEWS

London, February 4.

The opponents of Chinese labour are conducting an active campaign throughout Great Britain. They now include a very considerable number of Unionists. The South African Blue Book, just published, includes a despatch from Viscount Milner dwelling was the trade deserging and the Gilliar crossession. cludes a despatch from Viscount Alther dwelling upon the trade depression and the falling revenue in the Transvaal Colony. According to Lord Milner, unless the situation soon changes, a great exodus of the white population is inevitable. As a result of these visible facts the scale of Colonial opinion has turned most decisively in favour of the importation of Asiatic labour as the only possible way out of a serious citization. serious situation.

BATTLESHIP "NEW ZEALAND" LAUNCHED.

London, February 5.

The twin-screw, first-class, armoured battleship
New Zealand was successfully launched yesterday at

WAR OFFICE OFFICIALS DISMISSED

London, February 5. In pursuance of the army reform scheme, the heads of departments at the War Office on Monday, February 1, received leters of dismissal. Equivalent employment will be found for all the officials else-

UNION JACK CLUB,

The King and Queen, accompanied by the Prince and Princess of Wales, and the Duke and Duchess of Connaught, last evening attended a skating carnival in London in aid of the Union Jack Club. The King afterwards entertained at supper a party of sixty guests interested in the movement.

(From the "N.-C. Daily News.") COLLAPSE OF THE COTTON CORNER.

London, February 5.
Wild scenes on the New York cotton market are reported. After violent fluctuations, cotton closed 100 points down.

THE TIBET EXPEDITION.

In the House of Commons, Mr. Brodrick, Secretary for India, stated that it was not the object of the mission to Tibet to annex any portion of the country. The Bluebook will include the correspondence with

GERMAN TROUBLE IN SOUTH-WEST AFRICA.

Windhoek, Okahandja, and Damaraland have been relieved without loss, the enemy retreating to the mountain. The Germans have up to this lost 26 men killed in the fighting, and 44 settlers murdered. NO CIPHER MESSAGES FOR JAPAN.

London, February 7. The General Post Office has issued a notification that private code telegrams will not be accepted for

Japan. COLLAPSE OF THE COTTON CORNER.

London, February. 6.
There were enormous liquidations on the New York cotton market yesterday. The bulls were overwhelmed by an avalanche of selling, and their rou-was unprecedented.

Wild speculation in coffee continues (at New York). PACIFICATION OF SOUTH AFRICA,

The programme of colonial reliefs shows a considerable reduction in the army in South Africa in the course of the year. Nine infantry and three cavalry regiments will return home between March and August.

THE PREMIER'S ILLNESS.

London, February 7.
The Prime Minister (Mr. Balfour) has developed bronchial trouble. Another doctor has been sum-

Peking, February 9.

It is learnt by telegram from Kinchou that the Russian telegraphic communication between Kaiping and Haicheng, Yinkou and Tashihchiao was totally destroyed on the 5th instant by mounted bandits.

CANTON UNREST.

the Canton-Hankow railway deny knowledge of any-thing more than the customary feeling of unrest at Chinese New Year. It is stated Viceroy Shum is prepared to leave the city. GREAT BRITAIN, RUSSIA, AND TIBET.

London via Bombay, February 9 Russia, in a momorandum dated the 2nd of F

ruary 1903, threatened to take steps to protect her interests in consequence of British action in Tibet. On the 18th of February, Lord Lansdowne in-formed Count Benckendorff, the Russian Ambas-

On the 18th of February, Lord Lansdowne informed Count Benckendorff, the Russian Ambassador, that if there were any display of Russian activity Great Britain would be obliged to reply by a display of activity exceeding that of Russia.

Some weeks later Count Benckendorff submitted a statement of the Russian view, declaring that any disturbance of the status quo in Tibet would compel Russia to safeguard her interests elsewhere in Asia. Lord Lansdowne replied that Great Britain must insist on Tibet's fulfilling her treaty obligations.

When the Younghusband Mission advanced, Count Benckendorff made earnest representations, to which Lord Lansdowne replied that it was beyond measure strange that these protests should be made by a Power which all over the world never hesitated to encroach on its neighbours. If the Russian Government had a right to complain of Great Britain's advancing in Tibet, what kind of language was Great Britain not entitled to use concerning Russian encroachments on Manchuria, Turkestan, and Persia?

JAPANESE ATTACK ON DALNY.

JAPANESE ATTACK ON DALNY.

The C. N. S. Kinkiang, just arrived from Dalny, reports that place was bombarded by the Japanese fleet. The electric light works were destroyed, Japanese marines were landed.

THE FIRING ON THE "FUPING."

(FROM THE " MANILA CABLENEWS.") NEWS FROM RUSSIA.

NEWS FROM RUSSIA.

St. Petersburg. January 27.

All the first reserve of the Russian army has been ordered to join the colours, and the reservists are already forming in battalions and squadrons, according to their arm of the service. In the inilitary district of St. Petersburg alone eighty-six thousand men have been mobilised already and are now awaiting transportation for the Far East.

All railroad property is in the hands of the War Minister and a clear track for troop trains has been telegraphed for between this capital and Moscow. Trains are being made up in sections, railway troops working night and day repairing engines and putting freight coaches in shape for the occupancy of troops and generally making extraordinary preparations for the long trans-Siberian run.

Especial vigilance is being exercised to prevent possible Nihilist treachery. Great care has been used in selecting the men for the railway service, particularly the flagmen and switchmen. Officers of proven loyally have been detailed from the line to assist in the work, and spies of the War Officer, disguissed as soldiers, mechanics, and even as army officers, are carefully scrutinising the conduct of both officers and men. The local militia is utilised to Hongkong, February 10.

The U. S. S. Monterey sailed yesterday for Canton officers, are carefully scrutinising the conduct of both to protect the interests of American citizens there officers and men. The local militia is utilised to should trouble arise. Beyond the fact that railway guard the railway depôts and machine shops, and surveyors, having met with opposition from the no one is allowed near the railroad but those actually natives, have returned from the interior, officials of under orders to assist in the work.

Thin and Falling Hair and Red Rough Hands Prevented by

ILLIONS use Cuticura Soap, assisted by Cuticura Onthert, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruft, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weakor offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. Cuticura Soap combines delicate emollient properties derived from Cuticura Ointment, the great skin cure, with the pursat of cleansing lugredients and the most refreshing of flower odours. No other medicated soap is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in Owe Soar at Owe PRICE, the BEST skin and complexion scap, and the BEST toilet and baby soap in the world.

COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleance the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and scothe and heal; and CUTICURA ESSOUTHER PILLS, to cool and cleans the blood. A SINGLE SET is often sufficient to cure torturing, disfiguring humours, exceeding a raises, and irritations, with loss of hair, where all else falls. Sold throughout the world, Austrahan Depot: R. Towns & Co., Sydney. British Depot: 27.28, Charterhouse 6q., Loudon, French Depot: 5 Rue de la Paix, Paris. POTTEE DRUG AND CREM CORF., Sole Props., Boston, U.S. A.

YOKOHAMA: SATURDAY, FEBRUARY 27TH, 1904.

BIRTHS.

On the 20th instant, at No. 10, Hinokicho, Akasaka, Tokyo, Mrs. A. Deguy, of a Son.

On Saturday, 20th inst., at 6 45 a.m., the wife of C. THWAITES, of a daughter.

On the 25th February, at the Imperial German Legation, Tokyo, Mrs F. Thiel, of a Daughter. DEATH.

In the City of Tokyo, on Feb. 22nd, EMMA THOMASINA, daughter of the late Dr. Thomas Theron Alexander.

SUMMARY OF NEWS.

THE U.S. warship New Orleans arrived at Chefoo on the morning of Feb. 21st from Manila.

THE electric tramway companies of Tokyo, from Feb. 18th, prohibited smoking in their cars.

Ex-GOVERNOR TAFT of the Philippines was sworn in as U. S. Secretary of War at Washington on the and inst.

THE losses of the Japanese who recently with-drew from Vladivostock are estimated at about yen 3,500,000.

A case of scarlet-fever was reported on Feb. 17th in Tokyo. The patient is a son of Rear-Admiral G. Ijuin.

believed owing to the strain of the present acute situation in South Africa.

THE Jiji announces that Counts Katsura and Inouye intend to subscribe ten thousand yen each towards the war loan.

THE directors of the Nippon Yusen Kaisha met on Feb. 17th and decided to subscribe one million yen towards the war loan.

I. SUMITA, who was sentenced to death on May 19th last in the Osaka Appeal Court on a charge of murder, was executed on Feb. 12th.

An association is being formed in Belgium with a capital of 1,000,000 francs (about £,40,000) to grow cotton in the Congo Free State

PRINCES KUNI and Kitashirakawa arrived on Feb. 22nd at Hiroshima from Tokyo. will be attached to the troops at the front.

A DEAD rat containing plague bacillus was found on Feb. 21st in a godown of the Nippon Yusen Kaisha at Kayaba-cho, Tokyo.

BARONESS MITSUI and other ladies of that family have donated ten thousand yen towards the fund to relieve suffering soldiers and their families.

THE construction of the electric railway between Hon-cho and Asakusa-bashi, Tokyo, has been completed, and traffic was opened on Feb.

PRINCE KUJO (father of the Crown Princess) proceeded to the Palace on Feb. 21st at 10.30 a.m. and was received in audience by the Em-

VISCOUNT SOGURA has offered to the Bank of Japan a pure gold ingot of four sun square and one sun thickness and several gold cups, etc., to strengthen the reserve

S. OKAMOTO (31), Kanda, Tokyo, murdered his wife on Feb. 19th by beating her on the head with a hardwood block. Some trivial dispute is reported to be the cause.

JAPANESE gold coins amounting to about yen 1,500,000 were exported from Yokohama to Vancouver by the steamer Express of India which left on Feb. 19th.

A TELEGRAM from Matsuyama states that two hundred captured Russians will shortly be brought there. They will be accommodated in the Budd-hist temple Chokenji, at Onsen.

THE Sakai Electric Light Company held a general meeting on Feb. 18th and decided to close their business. The property is to be sold to the Osaka Electric Light Company.

In is officially reported that Rear-Admiral Arai arrived at Chemulpo on Feb. 21st. He will attend to the raising of the Russian warships that were sunk in the recent engagement.

Tokyo papers report that four American Military officers have applied to the Department of War, through their Minister, for permission to follow the Japanese troops going to the front.

LIEUTENANT L. E. CRENAN, of the U. S. Philippine Scouts, is the latest officer in the Philippines to be charged with embezzlement of public funds. He is now under trial, but the amount of his defalcations is not mentioned.

Tokyo District Court to one year and a half's imprisonment with hard labour.

MR. K. Mochizuki, ex-member of the House of Representatives, has begun a libel case in the Yamanashi District Court against the three local papers which stated that he was employed by Russia as a spy.

A TELEGRAM from Chemulpo to the Kokumin states that the crews of the Japanese torpedo-boats presented on Feb. 21st articles to the Russian bluejackets, who are under surgical treatment in the hospital.

PRINCE KAN-IN, President of the Nippon Red Cross Society, has granted, under sanction of the Emperor, medals of merit to Messrs. H. Kessler, M. Pors, and H. V. Gielen, who recently donated a thousand yen each to the Society.

THE officials of the Kanagawa Kencho have agreed to set apart one-tenth of their salaries for the purpose of subscribing to the war loan. With a view to this intention, they have agreed to economize in their household expenses.

K. TSURUKAWA, a former policeman of Saitama Prefecture, entered on Feb. 18th the dwellings of two farmers in the village of Okawara, Chichibu district, and robbed them of money, menacing them the while with a sword. The offender is still at large.

VICE-ADMIRAL Sir Gerard H. U. Noel, K.C M.G., K.C.B., the new British Commander-in-Chief on the China Station in succession to Admiral Sir Cyprian Bridge, is on board P. & O. steamer Mongolia, which was stopped by the Russian squadron in the Red Sea.

A BRITISH gentleman, Mr. R. M. Thomson, has donated a thousand yen to the Japan Red Cross Society through the London branch of the Specie Bank, which remitted the amount by telegraph to the Yokohama office. The head office on Feb. 20th paid the money to the Society.

His Excellency Lord Kitchener has so far recovered that he has been able to dispense with the use of a stick. With only a very slight lameness, apparent from the result of a bone fracture, we are glad to notice, says the Calcutta Englishman His Excellency can move about with

A TELEGRAM from Saseho states that H. Nagai, coal merchant, has stolen a quantity of Cardiff coal valued at about yen 3,000 belonging to the Naval Station and attempted to sell it to a Russian. He absconded when the police appeared at his dwelling to arrest him. His three employees, who assisted him, were arrested on Feb. 10th at Nagasaki.

MR. K. YAMADA, chief of the district of Otaru, Hokkaido, and representative of the District Assembly, sent on Feb. 20th a telegram to the Italian Minister at Tokyo asking him to convey the thanks of the local people to the Italian crew who came out on the Kasuga and Nisshin to Japan. The Minister replied warmly on the following day.

A GREAT sensation has been caused by the alleged theft of several most important State documents from the desk of Prince Ferdinand of Bulgaria. These documents contain records of some of the strictest Palace secrets, which, it is feared, may Admiral G. Ijuin.

The financier, Villmas Cohn, one of the guarantors of the first instalment of the Transvaal Loan, has died suddenly at Johannesburg, it is

AFFAIRS AT PORT ARTHUR.

Friday, February 19. A British steamer, the Shiping which has just reached Shanghai, reports that she left Chin-wan-tao on the 9th, but being driven by contrary winds to the neighbourhood of Port Arthur, was there seized by a Russian ship and carried into port. On the 10th she attempted to leave, under the shadow of the British flag, but the Russians fired on her, and she had to put back happily uninjured. She was then sent to Dalny, where the Authorities detained her until the 15th. Her officers say that there are ten thousand Russian troops at Dalny, and that

It appears that the statement as to the sinking of the Boyarin came originally from Chefoo, and that it is now greatly doubted. Folks at Takeshiki had heard something about the Bayan, which is an armoured cruiser of 7,800 tons, and then came Chefoo's news about the Boyarin, which vessel, not having been mentioned in any previons list of casualties, seemed likely to have been the one torpedoed on the night of the 14th. But the fact is now considered apocryphal. It will probably have to be placed on the list of Chefoo canards.

Saturday, February 20. Shanghai sends news that a Russian gunboat was blown up at Port Arthur on the 13th instant. The name given is apparently Djidjit. At any rate it is not Yenisei. But we can scarcely suppose that there have been two such accidents almost simultaneous-The probability is that Shanghai's news ly. The probability is that Shang, in is identical with the news sent home by Viceroy Alexieff and telegraphed out here from Paris. The only difficulty is that Shanghai's telegram is dated the 18th. Shanghai must have known all about the Yenisei long before that time. Perhaps the statement made by the officers of the Shiping is true, namely, that the loss of the Yemsei left the Russians ignorant of the exact whereabouts of their own mines.

The funeral of the five Japanese officers and men killed in the battle at Port Arthur took place at Sasebo on Tuesday, 16th inst., says the Nagasaki Press. Three officers one midshipman, all belonging to the battleship Fuji. The funeral service was conducted in accordance with Shinto ritual, and an oration in honour of the dead was made by the Commander of the Admiralty port, Admiral Sameshima. The ceremony was attended by representatives of every branch of the Navy, and thousands of civilians assembled to pay respect to the memory of the first to give up their lives for their Emperor and country in the present war.

St. Petersburg's version of the incident on the 14th is really too naive. A 12-inch shell, we are told, struck a transport. One would suppose that 12-inch shells, were quite and the Central News. Every one of these, common birds of passage on a winter's we venture to affirm, telegraphed to London inght, whereas in fact no larger projectile is fired by any war-ship possessed by Russia attack on the morning of the 14th instant. on the Far-Eastern station and if either the From what hole or corner, then, did London forts or the line-of-battle ships fired 12-inch unearth the canard that the attack was shells to repel an attack by torpedo-destro-made by the Japanese fleet and that it pro yers, the state of demoralization existing at duced little effect?

Port Arthur on the night of the 13th and And how about the 12-inch shells that

name of high heaven were the Russians doing with 12-inch shells? Only a naval or a military men can appreciate the supreme, the incredible absurdity of firing a 12-inch shell at a 350-ton torpedo craft. It would shell at a 350-ton torpedo craft. be about as sensible to bombard a mosquito

The S.S. Wenchow, which put into Chemulpho on the 20th instant, gives a very circumstantial account-published by the Foreign Office in Tokyo—of the state of affairs at Port Arthur when she left that place for Shanghai on the morning of the 15th. According to her story, the Retvisan had to be driven ashore at the harbour's mouth after the torpedo attack, and in they know nothing whatever of the things trying to pass her after the battle on the that have happened at Port Arthur. How oth, the Petropaulousk ran on the Tiger's Tail spit. Both vessels were subsequently got off, and the Retrisan is now moored to a light-ship outside the harbour. Nine ships are in harbour, all unfit for the battle line, and the Novik is in dock, no attempt being made to repair the others. The people of the Wenchow are very precise as to the posi-tion of each vessel, and are equally positive that all are hors de combat except the Poltana and four cruisers which are anchored near the western fort. The destroyers and torpedo-boats are in two lines near the Tiger's.

Tuesday, February 23

The chief of the naval staff at Port Arthur is said to have asked the Russian Consul at Shanghai to deny that any attack was made by Japanese torpedo-craft on the night of the 13th instant, and the Consul has endeavoured to give effect to this request through the columns of the local press. The Asahi Shimbun, in publishing this piece of intelligence, chooses for caption the words shikari jusan-nichi ni arazu (yes, it wasn't the 13th), which appears to hit the falsehood on the head. The attack took place on the morning of the 14th, so the staff-officer and the Consul are both as veracious as Brutus.

Another sweet story has been published by the Russians in London. effect that when the Yenisei was blown up, the cruiser Boyarin went to her assistance but owing to a violent gale she ran on a torpedoes. A gale of wind in which 350 ton Japanese destroyers could live but a 3200 ton Russian frigate could n't, doesn't blow every day.

And what about the "London telegram" that reached us via Paris to the effect that the Japanese fleet made an attack on Port Arthur on the night of the 14th of February, but inflicted little damage? There are now in Tokyo representatives of all the leading London journals-The Times, the Standard, the Daily Telegraph, the Morning Post, the Daily Chronicle, the Daily Mail and the Daily Express-and there are also agents of Renter

14th February should be handed down in were accidentally issuing from Russian guns injured at Port Arthur are the Retvison,

Yenisei, the fortuitous death of the Boyarin in going to her assistance and the wandering 12-inch shells, Port Arthur must have been a tremenduous place in the small hours of the morning on the 14th of February.

A slight addition is made to our knowledge of what passed on the occasion of that torpedo attack. It appears that the destroyers became separated in rounding some head-land the location of which can only be conjectured. It appears, further, that neither the Asagiri nor the Hayatori could clearly distinguish whether any Russian ship was lying outside the harbour: the snow was falling too thickly. A merchant steamer, apparently the Norway, was alone visible. But presently fire was opened from the Russian side, and this furnished the desired indication. At least one torpedo was observed to burst against a Russian vessel, probably the Boyarin. It is further alleged that the Russian destroyers fired into each other-an accident very apt to happen on such occasions-and that three of them were injured.

A Chinese belonging to the Russo-Chinese Bank, who left Port Arthur on the morning of the 9th of February, says that the attack of the torpedo-craft took the Russians entirely by surprise and that within an hour the ships had fired away all their Tail Spit; that is to say, at the mouth of ammunition. The greatest confusion prevail-the harbour on the west. supplies of ammunition, others thinking only of saving themselves and their belongings. But the most interesting fact-if it be indeed a fact-related by this Chinaman is that the deus ex machina on the Japanese side wasa barber. He had resided for years in Port Arthur, had acquired the Russian language, and knew every detail about the officers and the ships. Thus equipped he answered, from the Japanese destroyers every hail addressed to them by the Russians, and so the little craft managed to reach a death-dealing position. Si non è vero.

Numbers of Japanese—the last batch consisted of 166 women and 7 men—are reaching Chefoo from Port Arthur. On the whole it does not appear that these people were badly treated. The higher officials It is to the took much care that no indignities should be inflicted on them, and if there was any cause of complaint it appears to have been furnished by petty jacks-in-office who did not reflect says the Nagasaki Press. Three officers rock and became a total wreck. We begin the spirit of their superiors, A great deal were among the dead, viz., Lieut.-Combon to suspect strongly that both the Yenisei of delay occurred en route. Thus a party of mander Nakayama, one sub-lieutenant, and and the Royarin owed their fate to Japanese of the pressure of the pressur way from Newchwang to Port Arthur. That, however, seems to have been due to the necessity of collecting them all at Port Arthur by a fixed time. It is noted that the Russians passed them without charge over the railway and did not exact anything for their passage by steamer. The facts go far to prove that previous accounts were exaggerated. There are, indeed, stories of a different complexion, but they do not indicate any remarkable degree of roughness on the part of the Russians.

> A ship which arrived at Chefoo on the 22nd February, having left Talien on the 21st and Port Arthur on the 20th, reports that a feeling of great depression prevails the hands of everyone capable of bearing them.

The officers of the steamer Wenchow, which arrived at Nagasaki on the 22nd, And how about the 12-inch shells that informed the Governor that the ships lying Russian account of the affairs is that a 12-inch happening, to hit unhappy Russian trans- and Novik, of which the North is alone shell struck a transport!!! What in the ports? What between the suicide of the capable of speedy repair. The remaining

eight warships with the torpedo-craft, numbering 20 in all, are anchored inside the harbour and display no intention of going

out into the open to fight.

It is semi-officially stated in Tokyo that the troops at Port Arthur on the 15th inst. were 22 companies of the 9th, 10th, 11th, and 12th regiments. The whole of the 25th, 26th, 27th and part of the 28th regiments, which began to arrive on the 7th inst., and a battalion of artillery.

Wednesday, February 24. It is again stated on the authority of the crew of a German steamer which was lying at Dainy on the 11th and 12th, that on the former day the Yenisei was blown up by accident when laying mines, and that on the 12th two small cruisers shared her fate, having come into contact with torpedoes the position of which was not distinct owing to the Veniser's misfortune

Chefoo wires that an attempt to send 1,200 oxen from that place to Port Arthur has been checked by the Customs Authori-The enterprise was in foreign hands but the nationality is not stated.

Thursday, February 25.

It is stated that the foreign journalists in Port Arthur have been ordered to leave that place and repair to Chefoo or Newchwang. It is news to learn that there are any foreign journalists at the Russian base. They will have an interesting story to tell when their pens are free.

Japanese newspapers report that the Chinese at work in the dock at Port Arthur have gone on strike. There are said to be two thousand of them. The shrewd Chinaman is not likely to lose this opportunity of exacting a few extra cash.

(FROM THE "JOH SHIMPO.")

ANOTHER JAPANESE ATTACK ON PORT ARTHUR.

Chefoo, February 25th, 3.26 p.m. According to a telegram received by the Russian Consul here from the officer commanding at Port Arthur, the Japanese Squadron attacked the fortress on the night of the 24th and the following day and was repulsed by the fire from the forts, the result being that four Japanese battleships were sunk.

Shanghai, February 25, 5.30 p.m. The reported sinking of four Japanese battleships at Port Arthur is contradicted here. The Japanese squadron, consisting of four battleships and nine cruisers, was sighted to-day off Shantung promontory passing in a westerly direction, coming from the north-east. It appears that the Japanese squadron sunk four transports. laden with stones, at the outside of the port in order to make the blockade more complete. The place where these transports are sunk is reported not to have been quite suitable for the purpose.

VICEROY ADMIRAL ALEXIEFF'S REPORTS.

The Viceroy's official reports are now an interesting study. We place them in the order of their publication

Saigon, February 11.

The Messager du Gouvernement publishes the following despatch from Admiral Alexieff to the Emperor of Russia:—"I have the honour to respectfully inform Your Majesty that towards midnight eight or nine Japanese torpedo-boats attempted suddenly to blow up with mines the ships of the Russian Squadron which were in the outer roadstead at Port Arthur. The iron-clads Retaisan and Csarguitch and the cruiser Pullada were injured. These ships are about to be examined in order to ascertain the amount of the injury." Saigon, February 11.

Saigon, February II.

In the night attack against Port Arthur the monclad Cesarewitch had an injury to her rudder; the
Revisan in her pumping machinery, and the Pullada
in the middle of her hull. These vessels continue
afloat. Measures are being taken to get them into
the inner roadstead.

On the following American

affort. hieraries are only many the inner roadstead.

On the following day, the 9th February, at 11 a.m., a squadron of 15 Japanese iron-clads and cruisers bombarded Port Arthur. The citadel and the Russian squadron replied. After an hour of bombardnient the Japanese withdrew to the south. During the combat the iron-clad Pollava, and the cruisers Diana, Askold and Nonik received injuries below the water-line.

The damage done to the citadel is insignificant. Two officers and 41 sailors were wounded; 9 killed.

Saigon, February 11.

Se Petersburg—The injuries suffered by the

Two officers and 41 sailors were wounded; 9 killed.

Saigon, February 11.

St. Petersburg—The injuries suffered by the Cesarewitch and the Retrusan are not grave. Both ships took part in the defence of Port Arthur on the following day. The Pullada will soon put to sea again. The injuries to the squadron and the forts during the attack on Port Arthur were of little gravity. Admiral Alexieff, telegraphing to St. Petersburg on the 11th instant, says that the Cesarewitch and and Pullada were brought into the harbour on the 1th instant, and that the hole in the hull of the Retrisan had been plugged. The repairs of the battleships, however, will be difficult, and it is impossible to tell when they will be completed. The Pullada and the Novik will be docked one after the other and their repairs will occupy about 15 days. The ships in the battle on the 9th were all brought into harbour on the 10th. The repairs of these vessels will be completed in the course of three days. The wounded men of the Pullada will probably all die, having been seriously injured by the gas of the exploding torpedo. A reconnaisance made of the neighbouring seas on the 10th did not disclose the presence of a single Japanese ship. More efficient measures of defense have been taken by means of torpedo-boats and gun-boats. The night of the 11th passed without incident.

St. Petersburg, February 14.

The following ships are no lenger fit for the field.

St. Pelersburg, February 14
The following ships are no longer fit for the fighting line:—Cesarewitch, Pallada, Retvisan, Askol , Novik, Sevastopol and Petropavlovsk.

It will be observed that this last report makes no mention of the line-of-battle ship Poltava and the cruiser Diana which, on the 11th instant, were announced to have rereceived injuries below the water line. will also be observed that whereas the Pollada was to have been ready for sea in 15 days from the 11th, she is now stated to be unfit for the fighting line. And it will finally be observed that the Sevsatopol and the Petrospavlovskare returned to the proport of the 1th for the as wounded in the report of the 14th for the first time. When did these two last ships get their hurts? We can only conclude that it was in the torpedo attack on the night of the 14th. Probably before going to press we shall have some telegraphic information as to the Viceroy's version of the incidents of that night, for, humiliating as its experiences were for his naval officers, he is not likely to avoid all public mention of it. Taking the Viceroy's statement as it stands, the Russian fighting strength has been reduced by the following:-

	•	_		Tons.
Cesaveron	tch, line-	of-battle-	ship	13,100

Moreover, of these ships two, the Poltava facility.

and the Diana, are admitted to have been struck below the water line. It may therefore be confidently affirmed that the Viceroy has completely lost the command of the sea. It was reported by the officers of a steamer which left Port Arthur for Shanghai on the evening of the 8th that the Russians at the former place were in the highest spirits and that they counted on crushing the Japanese without difficulty should the latter venture to attack. Probably they are correspond-ingly demoralized now. They have lost 8 of their best ships and they have not succeeded in putting a single Japanese vessel hors de combat, or even in injuring a single Japanese vessel sufficiently to drive her into dock. Admiral Togo is still at sea with his whole fleet. Should the successor of the present Russian Admiral show himself a competent man, he might still accomplish something with his squadron of 3 iron-clads and three cruisers; and could he effect a junction with the four fine vessels now lying idle in Vladivostock, he would be formidable, and might at least put up as gallant a fight as the Chinese did ten years ago at the Yalu. But as things stand the power of the sea has gone from Russia, and her choice of a battle-field on shore must be largely influenced by that disastrous fact.

London wires that Viceroy Alexieff and his staff have moved from Port Arthur to Har-bin. That is very likely. Harbin is more suitably situated than Port Arthur as a centre of military operations, especially now that the naval force of Russia at the latter place has been shattered.

WIJU AND YONG AM-PHO.

It is stated that the Korean Government has now decided to declare Wiju and Yong Am-pho open ports, and that the declaration will be published in a few days. The decision comes somewhat late in the day, and from all indications it would seem that the ordinary functions of open ports are not likely to be performed quietly at either of these places for some time to come. The Russians are evidently massing troops in the direction of the Yalu, though as yet they have not made any definite attempt to establish a lodgement on the river or to cross it. We judge from the fragmentary reports received in Tokyo that at present the Russians are thinking of repelling an invasion from the Korean side rather than of attempting one themselves. They are keeping a close watch on the regions beyond Wiju by means of Cossack scouts and they have a detachment of videttes in Yong Am-pho, but as for the main part of their force in the district, Antung and Kiulien seem to be the points of concentration. In fact, the Russians are for the moment perplexed as to the point where a Japanese blow is to struck. They are cut off from maritime sources of information, and the Japanese of intelligence that everything is obscure. Doubtless if Japan had waited another six months until His Majesty the Tsar was "good and ready" to deliver those "blows worthy of his dignity and might" which he now promises with such solemn bombast, his Manchurian army's case would be more 574 comfortable. Meanwhile the Korean Government—we again been the Korean Government—we again been ernment—we again learn—has issued orders to all the provincial officials throughout the empire to treat Japanese soldiers with the utmost civility and to afford them every

CHINESE NEUTRALITY.

Saturday, February 20. The following documents have been published in Tokyo:

Note from the Chinese Minister to Japan ad-dressed to Baron Komura, Minister for Foreign Affairs, dated February 13th, 1904.

Japan and Russia have broken off their peaceful relations; but China being on friendly terms with the two countries, her Government attaching great importance to the relations of good neigh-bourhood and in obedience to the Imperial com-mand, have taken steps for the observance of the rules of neutrality and ordered the authorities of rules of neutrality and ordered the authorntes of rules of neutrality and ordered the authorntes of rules of neutrality and ordered the authorntes of rules of neutrality and that when Japan urged upon keep tranquillity in their respective districts and chiar and that when Japan urged upon to extend protection to the commercial and Christian population. Muldan and Heiga king being tian population. Moukden and Hsing king being the sites of the Imperial Mausoleums and palaces, the Governor General concerned has been given strict instructions to guard them with the greatest vigilance. The towns, villages and official buildings in the Three Eastern Provinces as well as the persons and properties of their in-habitants shall not be damaged or injured by the two beligerents. The Chinese troops stationed would be driven to make a corresponding in those provinces shall not attack the troops of change in her own programme. It would the beligerent countries nor shall the latter be seem that in this matter the Wai-wu-pu was allowed to attack the former. A garrison has been despatched by the Peiyang Commissioner to such districts lying west of the Liao as were already evacuated by Russia. In the various provinces as well as in Outer and Inner Mongolia the rules of neutrality are to be carried out, so that troops of the two belligerents may not in-trude thereupon; and in case they have crossed the boundary line china will take the measures for repelling them. Such steps on the part of China shall however not be taken as making a rupture

in the friendly relations.

In Manchuria, however, there are localities still well as the rights pertaining thereto shall remain under China's sovereignty whichever side may gain victory and shall not be occupied by either

of the Powers now in war.

same declaration to the Minister for Foreign might become an asylum for the mounted Affairs of the Government to which you are ac-bandits whose enterprises against the railway

Reply dated February 17th, 1904, of the Japan ese Government to the Chinese Note.

The Imperial Government, desiring to avoid as far as possible a disturbance of the peaceful condition of affairs which now prevails in China, will, in all parts of the Chinese territory exception the regions occupied by Pussion Programments. ing the regions occupied by Russia, respect the neutrality of China so long as Russia does the

The rules of war which govern the Imperial f rees of Japan in the field, do not permit the wanton destruction of property. Accordingly the Imperial Chinese Government may rest assured that the Mausoleums and Palaces at Mouk-den and Hsing-king and the public buildings of China everywhere, will be secure from any injury not attributable to the action of Russia.

Furthermore the rights of Chinese officials and inhabitants within the zone of military opera-tions, will in their persons and property, be fully respected and protected by the Imperial forces 50 far as military necessity permits. In the event however, they should extend aid and comfort to the enemy of Japan, the Imperial Government reserve to themselves the right to take such action as the circumstances require.

It only remains to say in conclusion that the present war is not being waged by Japan for the purpose of conquest, but solely in defence of her legitimate rights and interests, and consequently that the Imperial Government have no intention to acquire territory as a result of the conflict, at the expense of China.

The Imperial Government also wish the Im- reflect the resolution said to have been taken perial Chinese Government to clearly understand that whatever action may be taken by them on Chinese territory which is made the theatre of war, will be the result of military necessity and not impairment of Chinese sovereignty.

Thursday, February 25. It appears that Mr. Uchida has remonstrated strongly against China's tame acquiescence in Russia's refusal to regard the West Liao region as neutral ground. Mr. Uchida has pointed out to Prince Ching that this territory was duly evacuated by Russia, the evacuation being completed by the situation as it actually existed, one of the actualities being that China's administrative authority extended beyond the Great Wall as far as the Liao River. If China, in consideration of Russian menaces, now restricted her sphere of neutrality, thus extending the area of the conflict, Japan influenced by the minatory tone adopted by M. Lessar and the staff of the Russian Lega-These gentlemen pointed out that though Japan had gained some trifling successes at sea, Russia would soon pour half a million of men into Manchuria, and crush the insolent little Power. But the latest news is that, in deference to Mr. Uchida's representations, the Chinese have given to Russia an unequivocal reply, reject-In Manchuria, however, there are localities still on occupation by foreign troops and beyond the reach of the power of China, where the enforcement of the rules of neutrality will, it is feared, be impossible. The Three Eastern Provinces as well as the rights pertaining thereto shall remain in the protest and declaring their intention of treating the whole region up to the Liao rove of considerable importance. Not that the regions west of the Liao have any well as the rights pertaining there in the region up to the Liao in the region up to the Liao rove of considerable importance. ing her protest and declaring their intention as sources of supply, but that China is thus enabled to place her forces in a position which, should her neutrality prove at any moment illusory, might have most embarassing results for Russia, and that this West The above is being communicated to the re-presentatives of foreign Powers in Peking. At rassing results for Russia, and that this West the same time you are instructed to make the Liao district, under Chinese administration, bandits whose enterprises against the railway cause Russia so many nightmares.

Tientsin reports that the Russians having purchased in that place large quantities of flour apparently for the use of the troops in Port Arthur, Viceroy Yuan warned the railway authorities to carefully scrutinise on the 22nd instant with reference to the president warned to the president warne sea approaches sealed, there will be no been disarmed, as they are unfit for sea other functions to discharge.

by the Peking Government. The advance guard of Yuan Shih-kai's army, namely 500 cavalry, have gone from Lan-chow to Yung-ping, which latter city is well within the Great-Wall circuit.

THE NEUTRAL POWERS.

Monday, February 22. The Governor of the Philippines has notified that the United States proclamation of strict neutrality must be carefully observed by all persons under his jurisdiction.

Austria-Hungary has proclaimed strict

neutrality.

A telegram from Singapore dated the 19th instant says that the Russian transport steamer Voronej, from Shanghai for Odessa, was not allowed to remain at Singapore for the purpose of loading merchandise, and was given only 300 tons of coal to continue her

The Argentine Republic has declared

neutrality,

The French Government has announced its intention of observing the rules of neutrawould be driven to make a corresponding lity laid down by it during the Hispano-change in her own programme. It would American War. These rules do not set any limit of time for the stay of a belligerent manof-war in a French port, when she is not accompanied by a prize, but they do prohibit her from using a French port in manner constituting it a basis of operations, and they forbid the supply of any articles to a belligerent vessel except such provisions as are essential to preserving the lives of her crew while in port or on her voyage. Coal certainly does not fall into that category.

> Tuesday, February 23 The Japanese Government approached the French with regard to the Jibouti question and received a reply in the sense that the Russian battle-ship Osliabya and the cruisers Aurora and Dimitri Donskoi, accompanied by a transport carrying 600 troops, left Jibouti on the 18th instant for Odessa. Two destroyers are still in the port, but they are not fit to put to sea, and until their repairs can be effected they are suffered to remain. The French Government is said to have at the same time intimated its resolve to observe strict neutrality in every sense.

all merchandise passing over the Tientsin-Shanhaikwan line, and refuse freight having the nature of conditional contraband. It is easy to appreciate the inconvenience that the Russians must suffer went towards the Far East or whether they from the strict enforcement of China's entured to Odessan Went towards the Far East or whether they from the strict enforcement of China's returned to Odessa. We are inclined to neutrality and their loss of the sea power in think that the latter was their destination, the Gulf of Pechili and the Yellow Sea. Could they control the maritime avenues to message indicates the transport alone as Newchwang, the latter city would be an lawing sailed for Odessa, it is evident from almost unfailing emporium of supplies for their troops. But with Newchwang blocaded, with the Shanhaikwan railway's duties as neutrals. They say that the two services paralysed, and with the other torpedo-boats remaining in the harbour have resource except the single line of railway and have been placed under detention until which has also to discharge the duty of the termination of the war, and the plain transporting troops and war material. We inference is that had the boats been fit for expect to hear at any moment that Russia sea they would not have been allowed to has ordered all non-combatant subjects to proceed eastward, their long stay in the has ordered all non-combatant subjects to proceed eastward, their long stay in the leave Manchuria. The only trouble conport having disqualified them. If that rule nected with that is that they would have to applied to the torpedo-craft, it must have be carried home by the railway, which has applied to the men-forwar also. They have other functions to discharge.

Up to the present, however, it does not are notable in connexion with that. One is appear that the movements of China's troops the very high sense of justice by which

France is animated. That Great Britain should apply the laws of neutrality strictly, as she is evidently doing-vide, for example, the case of the Russian Volunteer cruiser Voronej, which had to leave Hongkong within 24 hours and was hustled out of Singapore with equal celerity, only 300 tons of coal being allowed to her— that Great Britain should be strict is easy enough, since strictness makes for the advantage of her ally, Japan. But a rigid inter-pretation of the rules in France's case costs a great effort since it, has to be made at the expense of the country amie et alliée, to which France has been so loyal and for whose friendship she had made so many sacrifices. The credit accruing to her is proportionately large.

The second notable point is that if Russia has recalled the Jibouti division, she must be assumed to have abandoned the struggle

in the East so far as the sea is concern-Such was not her intention at the first. She evidently thought of sending out her Baltic squadron, which will be powerful one of these days, when the Borodino group are completed, but which does not now possess any great fighting force. The Baltic re-inforcement and the Ossliabya re-inforcement, however, have apparently been recalled, and the remnants of the Port Arthur fleet, together with the Vladivostock squadron, are to be left to eke out a precarious and unserviceable existence. That means that the sea is entirely lost to Russia as an avenue of supplies. She

will have to carry all her provisions and all her munitions of war over the railway-four thousand miles of a single line. It is a

A telegram received at the Foreign Office in Tokyo, dated the 21st instant at Paris, states that the Jibouti squadron passed Perim on the 20th instant, steering for Suez. This removes all doubt as to the question of Russia sending naval reinforcements to the Far East, for the present at all events, promised to them before war was declared—Had the conflict with Japan occurred when a pretext which might easily be extended the ships laid down under the 1901-1902 so as to carry them round the world as programme were completed, the position in often as they desired to make its circuit—and the Far East might have been very different

to-day.

Le Temps has just published an article which explains that the officer commanding the Jibouti squadron, came to the conclusion, in view of the relative strengths of the Japanese and Russian navies in the Far East at present, that he could not accomplish anything by bringing out a detach-ment consisting of only one battle-ship and two cruisers. He deemed it necessary to proceed eastward in company with the Borodino, the Imperator Alexander and the Knids Suvaroff. These three vessels are iron-clads of 13,516 tons and 18 knots speed. The Borodino is building at the New Admiralty in St. Petersburg where she was laid down in May 1900. The Alexan-der III. is building at the Baltic Works and was laid down in May 1899; and the Suvaroff, which also is building at the Baltic Works, was laid down in May 1901. It is not probable that any one of these battlenot probable that any one of these battle-ships can be ready for sea before the end of the ship is sufficiently indifferent to the present year, unless perhaps the Alexander III.

THE " MANJOUR" & CHINESE NEUTRALITY,

Saturday, February 20.
The Manjour still lies at Shanghai. She does not go out of the river and by remain-

that after two essays to leave the Yangtze, to be acting under Viceroy Alexieff's orders. and after having been twice driven back by and if that be so, then evidently the Russian the apparition of Japanese vessels waiting to receive her, she proceeded to land her armament and convert herself into a non-entity. This spectacle attracted a large crowd of the other hand it must be admitted that the jeering Chinamen, and also attracted the case is a severe test. attention of the Taotai, who ordered the ship to take her guns on board again. The Hochi's correspondent sends a photograph Railway . Company at Pootung, was busily engaged making ready for action; that she had taken down all her top-hamper, guished naval officer," that the Manjour will await the arrival of two Russian destroyers, and will then endeavour to steal out of the river. But the latest telegram says that her commander, Muraieff, being pressed by the Taotai to leave the port, has replied that he will do so when the Japanese warships waiting for him are also required to leave. That is a curious rejoinder, for the Japanese war-ships, whatever they may be, are doubtless lying at the mouth of the Yangtse, which is not a neutral port and is great many miles away from Shanghai.

If the Manjour's presence at Shanghai be violation of international law, what is to be said about the presence of the Ossliabya, the Dimitri Donskoi, the Aurora and a Russian torpedo flotilla at Jiboutil? These vessels, according to Reuter's latest telegrams, have received instructions to remain at Jiboutil until further orders. They have already-or some of them have already-been allowed to coal there under the pretext that coal had been now, apparently, they are allowed to use the French port as a rendezvous for just whatever period suits their convenience. Strict neutrality becomes a mere farce in the

face of such doings.

Sunday, February 21.

The Jiji publishes a telegram from Shanghai saying that an American ship-of-war has arrived there in consequence of the illegal presence of the Manjour. We greatly doubt, however, whether the United States Government is likely to make any direct Communications move in such a matter. are passing between the Japanese Consul-General and the Taotai, and it may be assumed that something will ultimately be effected. Of course the Manjour herself is not matter of any importance. But her presence constitutes an incessant menace to Japanese merchant shipping. She may at any moment drop down the river and way-China's neutrality to remain at Shanghai making the place either a port of refuge or a basis of operations, she is evidently capable of converting the Yangtze into a battle-field should that course suit her convenience. At all events she furnishes an interesting illustration of China's practical inability to discharge the duties of

writes under date of the 13th instant, says in Russian forbearance. The Manjour is said Government's endorsement neutrality is not recognised by the Russian Government's principal representatives. On

Monday, February 22.

The British newspapers of Shanghai are of the disarming operation, and the Hochi reported to be arguing that the continued promises to publish it. But the Shanghai are papers of the 13th instant do not confirm that story. One of them says, on the contrary, that the gunboat, then lying at the wharf of the Chinese Eastern neutrality. Hence, they contend, Japan has an unquestionable right to send her men-ofwar for the purpose of seizing the Manjour. The Asahi's news is to the effect that the sent her spars ashore, was packing bags of Chinese authorities are not at all likely to coal on her deck, and had steam up. This employ force for the vindication of their paper adds, on the authority of "a distin-neutrality, and that unless Japan take some definite step, the Manjour will remain quietly where she is, a constant menace to Japanese shipping. Our readers are doubtless aware that Japanese liners continue running to Shanghai just as they did before war broke They will have to abandon the enterprise if a Russian gunboat be suffered to make Shanghai a basis of operations.

The Nippon alleges that the Akitsushima, Akashi and Suma have lest Japan to look

after the Manjour.

Tuesday, February 23.
There is a good deal of talk about the Manjour. For a small, insignificant vessel she is giving a great deal of trouble. The Taotai of Shanghai is reported to have made strong representations to the Russian Consul, but the latter evades immediate responsibility by pleading that the matter is in the hands of M. Lessar in Peking. To Mr. Uchida, on the other hand, who addresses himself direct to Prince Ching, the answer is that several remonstrances have been made to the Russian Legation and to the St. Petersburg Government vià the Chinese Representative in that city, but they have failed to elicit any satisfactory reply in either quarter. Strange to say the French Consul in Shanghai is reported to be endorsing the procrastinating tactics of his Russian colleague, but that is scarcely credible in view of the orthodox attitude assumed by the French Government with regard to Jibouti. Doubtless the Manjour muddle will soon be settled either by the vessel leaving Shanghai or by her arma-ment being removed. But in the meanwhile the incident has made two things quite plain: one is that China is totally powerless to enforce the neutrality she has proclaimed; the other that Russia, although she took a prominent part in urging the adoption of neutrality, has not the faintest inten-tion of observing it unless her convenience runs on all fours with her obligation. be sure, that is nothing new. has given many object lessons teaching that her international engagements derive their sanctity, wholly and solely, from her own interests. But there have been few instances so flagrant as this case of the Manjour; or, at any rate, few that followed so rapidly on the first assumption of the duties they violate. As for China, can anything be more farcical than her constructive admission of impotence to enforce her own laws in the face of a little gunboat of a few hundred tons displacement?

Wednesday, February 24. ing she flagrantly violates international law. neutrality which she has undertaken. It is reported by telegraph that in con-A correspondent of the Hochi Shimbun, who plain that China's competence finds its limits sequence of representations made by Mr.

Fang, Vice-Minister of Foreign Attairs, consummation at the time, and should be that if the Manjour be compelled to title to exercise administrative authority in leave Shanghai, the whole responsibility the Western Liao region unless she now will have to be borne by China. It does not appear that this threat has had any a pure farce, or unless she alleges, that the practical effect. The general belief is that outbreak of war has changed everything. China has ordered the quod restat of her lt would seem, nevertheless, that she is naval power to proceed to Shanghai for the purpose of driving out the Manjour. Public Chinese Representative at the Court of St. opinion in Shanghai regards M. Pavlow as Petersburg telegraphs to his Government. present contumely, and thinks that it is Russia's object to involve China in trouble over this matter, and thus, by drawing her into the war, to obtain for herself (Russia) the advantage of being able to use Chinese that the Chinese Government shows signs to cower down suppliant-like before her trouble that the Chinese Government shows signs to cower down suppliant-like before her transfer and the cause of her must find th the instigator and abettor of the Manjour's that Russia refuses to recognise the Western ports as places of refuge and sources of supply. The Nichi Nichi Shimbun says that on the

It will be observed that nothing is heard of Great Britain in all this. She is "lying We remember vividly how, in 1894, she announced that no violation of the neutrality of the Yangtze valley would be permitted by her, and how Admiral Freemantle made a naval demonstration which removed all doubts as to the course he would pursue in the event of any attempt to disregard the announcement. Whether the order was strictly enforced against China there was much query at the time; but, then, to enforce it strictly would have been very difficult and Admiral Freemantle's sympathies were not equivocal. That was ten years ago, however, and conditions are very different now. The British Government is taking, we venture to think, the wisest and most beneficial course in leaving the matter to be settled by the parties directly concerned. The İtsukushima is understood to be somewhere in the neighbourhood of the scene, and when China's impotence is finally established there will be Japanese means forthcoming. To attack the Manjour in the river off Shanghai would be a very difficult operation, and we are confident that Japan would shrink from a step so disturbing to the tranquillity of a great tradal mart. Something, however, will have to be done. Russia has effectually demonstrated her determination not to pay the least deference to Chinese neutrality if it suit her convenience to ignore it, and China is thus relieved from any neutral obligations vis-à-vis Russia.

As we write a telegram reaches us via the Jiji Shimpo from Shanghai, dated the 23rd instant, which says that the United States ships New Orleans, Albany and Wilmington have reached Shanghai, and that they are expected to be followed by the British ships Pigmy and Humber. These British ships *Pigmy* and *Humber*. These five vessels are supposed to be destined to preserve the peace of the port. How they can do so unless the *Manjour* remove herself one does not see.

M. Lessar has been essaying minatory tactics. He has formally stated to Lien cuation. Russia herself explicitly declared its Fang, Vice-Minister of Foreign Affairs, consummation at the time, and she has no

that the Chinese Government shows signs of yielding to Russia's claim. Viceroy Yuan's cavalry, which was to have patrolled 21st the Shanghai Taotai, acting under the region in question, starting from Shaninstructions from Viceroy Wei, ordered the haikwan on the 23rd instant, is reported to Manjour to leave the port within 24 hours, have received orders to proceed no further but that there was no appearance of her than Yung-ping. "Proceed" is an inapprocomplying.

It will be observed that nothing is heard lies south-west of Shanhaikwan within the Wall, being thus nearer to Peking than is Shanhaikwan. Viceroy Yuan is said to have been much exasperated by this change of plan, which involves the abandonment, or at any rate the radical modification, of the previous programme, under which the troops of Ma Yu-kong were to have had their basis at Chan-yang.

It does not follow, we think, that this action on Russia's part implies a desire to draw China into the arena of hostilities. More than a month ago, when the war cloud was becoming dense, we alluded to the subject of the Liao district, and pointed out what a serious matter it would be for Russia to have Chinese troops posted so near her right flank as the western bank of the Liao River. They would be within easy striking distance of the railway, thus constituting a constant menace. Russia's strategical business is to keep all potential enemies as far away as possible from her most vulnerable part.

There has been considerable talk of Russian coaling facities in the Sunda Strait; or, to speak more accurately, at Sabang on the south of Banka Island. But even supposing that the Dutch Government were willing to neglect the duties of a neutral by allowing Russian ships to coal there, the advantage would be small for the supply is insignificant. Moreover it is stated that the whole quantity some 40,000 tons—has been bought up by British subjects for the use of the British navy. France has made it quite plain that she does not intend to permit any breach of her neutrality such as would be involved in the coaling of belligerent war-ships, and it thus seems to follow that unless Russian vessels can carry enough fuel to last them from Odessa to Port Arthur or Vladivostock. they must abandon the idea of coming eastward.

If one does not see.

China is said to have advanced a plea that really seem unfit to be entrusted with the Meanwhile there is another complication, as she has no naval strength to enforce use of fire-arms.

Uchida to the Wai wu pu, the Chinese Go one that we have long foreseen. China, it neutrality in this case, there is no resource vernment has instructed Viceroy Wei that will be remembered, has resolved to include except to insist that the Manjour must dis-China, it neutrality in this case, there is no resource vernment has instructed vicercy were that will be reinculpered, has resolved to include except to insist that the Manjour must disass the continued presence of the Manjour in the sphere of her neutrality the part of arm and remain in Shanghai as a non-neutrality, the vessel must be required at and the Great Wall. She claims that the once to leave the port, and if she decline to region was evacuated by Russia in the first do so, her armament must be seized and her evacuation period, which ended on October to that, and in truth it is a ridiculous significant to the consequently it is now that the many part of the same truth it is a ridiculous to the consequently it is now that the manjour nust dispersion in the Manjour nust dispersion in the support and the manjour nust dispersion in the sphere of linear except to insist that the Manjour nust dispersion in the sphere of leave the part of arm and remain in Shanghai as a non-interaction of the Manjour nust dispersion in the sphere of leave the part of arm and remain in Shanghai as a non-interaction of the Manjour nust dispersion in the sphere of leave the part of arm and remain in Shanghai as a non-interaction of the Manjour nust dispersion in the sphere of leave the part of arm and remain in Shanghai as a non-interaction of the Manjour nust dispersion in the sphere of the Manjour nust dispersion in the crew compelled to land. The Wai wu-pu has 8th, 1902, and that consequently it is now pretense. For China is by no means without informed M. Lessar of the issue of this order, unquestionably under the administration of naval force. She has quite a considerable and M. Lessar has reported it to Viceroy the Peking Government. Of course the array of vessels. The two cruisers Hai-tien Alexieff. Meanwhile Shanghai alleges that claim is absolutely valid. There never was and Hai-chi, for example, could make M. Lessar has been essaying minatory tacture the slightest query about the first act of evaluation order, both being excellent steel ships of 4,300 tons displacement with a nominal speed of 223/2 knots and a powerful armament, including 8-inch and 4.7-inch quick-firers. There is a statement that these vessels have been ordered to Shanghai, but what they will do when they get there remains to be seen. Most people must have lost all confidence in China's resolution to assert her sovereign rights. Nothing more invertebrate and pusillanimous than her general procedure can be conceived. Of course the cause of her to cower down suppliant-like before her enemies. From Japan's example she has not even yet inferred the value of manly self-assertion.

THE "SHIPING."

The fiji Shimpo gives an account from its Shanghai correspondent under date of the 19th instant with reference to the case of the Shiping, which was detained for 5 days at Port Arthur and Dalny. It appears from this statement that the Shiping was on her way from Chinwan-tao to Shanghai when stress of weather obliged her to make for Port Arthur. Arriving in the vicinity of the place, a shotted gun was fired at her, though she flew the British flag, and she was signalled to anchor where she was. She did so, but as the weather had moderatedin the afternoon, she got under way and had proceeded about a mile on her voyage to her destination when two more guns, both shotted, were fired at her. The shells passed ahead and astern, and the steamer lost no time in returning to her former berth, during which operation another shot was fired which passed over her. A destroyer then came and anchored in her neighbourhood and she was ultimately ordered to Dalny, where she lay until the 16th, a Russian guard being on board during some 24 hours of the time. In the night spent at Port Arthur, the 10th, she heard shots fired from the forts and observed frequent goings and comings of small vessels. At Dalny a curious explanation was given of her detention; namely, that the torpedo transport ship had been blown up accidentally while laying mines, and that with her had perished the only two men fully acquainted with the location of the torpedoes laid in the harbour. Small craft of light draught could come and go with immunity, but the Russians could not undertake to pilot a steamer safely out of the bay. Altogether the Shiping's treatment shows singular indifference to international usages, to say nothing of the insult to the British flag. Experience, too, has not inspired such confidence in Russian gunnery that a steamer can be considered safe when shells are fired Friday, February 26.
The Manjour question remains unsettled. a distance of over a mile. The Russians

THE CHEMULPO ENGAGEMENT.

Saturday, February 20.

The officer commanding the Chiyoda has arrived in Tokyo and reported to the Emperor the details of the action on the 9th instant at Chemulpo. He says that the captain of lisk, with the exception of 1500, have prothe Varyag, a man of about 50, was wound-ceeded to Harbin, and that 3,000 men have ed on the right temple during the action. The Varyag, according to this officer's account was undoubtedly sunk by the fire of the Japanese ships, but the Koreets went down in consequence of an explosion which was the work of her own people. The Sun-gari's catastrophe, he thinks, was an accidental result of the Koreets explosion, as the two ships were only 50 metres apart. The shot-torn flag of the Varyag has been brought to Tokyo and will be placed in the Yushu-kwan at Kudan.

Sunday, February 21. It is stated that a party of 7 Japanese subjects, travelling over land from Fusan to Chemulpo have been assassinated by Koreans. We read in Tokyo journals that there is no maritime communication at Steamers ply from Fusan and Chemulpo. Steamers ply from Fusan to Mokpo, but are not allowed to go on to Chemulpo. It was for that reason that the above travellers attempted to make the overland journey. They are described as belonging to a party of three hundred Japanese who await at Fusan the opening of maritime communica-tions with Chemulpo.

The Amphibite has carried away from

Chemulpo to Singapore the Russian officers and men, numbering 275, that had escaped to the Talbot after the fight on the 9th instant, together with 53 men of the Sungari.

A telegram published by the Foreign Office says that the British Consul at Chemulpo made an official communication to the Japanese Minister in Seoul about the Varyag fugitives on board H.B.M.S. Talbot. He stated that these officers and men would be detained in British territory until the close of the war. They were subsequently sent away in the Amphitrite, as our readers know.

RUSSIAN MILITARY MOVEMENTS.

Friday, February 19.
The Russians are said to be strengthen ing the defences at Newchwang. Apparently the fact of the place being an open port does

not count any longer.

It is stated that Colonel Muraieski (?), lately commandant of the Russian garrison in Peking, and transferred a few days ago to the command of the Regiment at Harbin, has been assassinated between Newchwang and Moukden when en route for the scene of his new duties.

There are renewed rumours of the presence of Russian troops south of the Yalu. One report says that 2,000 have entered Wiju and that 3,000 are at Kiu-lien-ching, and that the Wiju force has 14 guns with it. The Nippon publishes a statement, said

the Yalu; namely, four from Port Arthur, two from Dalny and one from the districts adjacent to Antung. This account does not include the troops of whom we have recently heard so much as marching from Liaoyang. We suspect that outside the War Office in Tokyo, there is not much information among the Japanese about the distribution of Russia's forces in Manchuria.

China seems to be concentrating a considerable force at Shanhaikwan and in its vicinity for the purpose of asserting her is obliged to keep a large part of them out of the field in order to guard it.

The Jiji Shimpo's Peking information constitution of the field in order to guard it. strict neutrality.

We learn from good authority that all the Russian troops hitherto stationed at Nikoceeded to Harbin, and that 3,000 men have gone from Vladivostock to Manchuria.

It is stated on good authority that Russian scouts are daily seen in the district about Wiju and on the bank of the Yalu opposite to Chhong-song.

Sunday, February 21. The Kokumin and the Asalii publish statements from Seoul to the effect that Wiju reports the advance of 300 Cossack cavalry from the Yalu towards Anju en route for the Korean capital. These troopers can scarcely be anything but scouts, but their presence in Korea-assuming the rumour to be cor-

rect-may create an inconvenient panic.

It appears, according to news from Newchwang, that on the 12th instant a rumour reached that place of a conflict between the Russians and the Japanese on shore, and something like a panic ensued. Shortly afterwards a force of Russian cavalry and infantry entered the town and took possession. This report says, further, that the Russians are searching for and arresting all Chinese who speak Japanese as well as all Japanese subjects and all Chinese that are on intimate terms with Japanese

Another telegram from Newchwang, received in a trustworthy quarter, states that a rumour of the advance of a Japanese force towards the Liao River created a panic in the settlement. The leading Russian lady fled to a certain consulate and asked for protection; the Russian merchants began to pack their belongings, and Russian paper money ceasing to be negotiable, there resulted a run on the Russo-Chinese Bank which it could not meet.

Shanghai journals say that Viceroy Alexieff, in addition to requiring the Chinese Authorities to guard the line of railway, has intimated to them that China will be held responsible for all obstacles placed in the way of the Russian army, and that Russia will demolish or remove any Chinese buildings which impede her military operations.

Tseng, in the sense that Russla desired to against an attack from the direction of the have the Chinese regular troops posted at a sea. distance of 60 miles (Russian) from the line of railway in order to protect it. The conterribly embarrasses her. Without it she can a neutral country.

not bring her forces to the field; with it she Is Russia really making herself so ex-

tains opinions expressed by migh Chinese official who has just returned from Port Arthur. He alleges that the defeats suffered by the Russian squadron have greatly broken the spirit of the Russians and inspired them with apprehension as to their ability to remain in secure pos-session of Port Arthur under Viceroy Alexieff's direction. Haste is being made, therefore, to transport all important documents from that place to Mukden, which the Viceroy is expected to make his chief base. But the question is, does this decision rest any longer with Alexieff? According to present appearances, it will be for Kuro-patkin or Makaroff to fix a plan of campaign, and neither of them can do so definitely until Japan exposes her hand.

According to a telegram from Chhong-song in Hamyong-do the Russians are leaving the Tumen River and concentrating at Possiet Bay. A concentration at Possiet could only have for purpose the defence of Vladivostock. They are said to be advanc-ing in that direction from Hun-chung and Ning-tau, all of which would indicate that they apprehend a Japanese attack upon Vladivostock.

A telegram from Seoul says that a party of 38 Cossacks have arrived at Song-chhon, which lies to the north-east of Pyong-yang. The presence of Cossacks at a point so far south of the Yalu River indicates a very bold movement, but can not be anything more than a scouting operation. These Cossacks, however, would experience no special difficulty in rejoining the Russian force northward of the Yalu in the face of a Japanese direct advance, which they would thus be able to notify in full time.

Another report has it that 500 Russian troops have reached Chong-ju, and that 20 of them have crossed the river Pak-chhon. Chong-ju is about 30 miles south of the Yalu and 45 miles north of Pyong-yang. Pak-chhon is a little river southward of Chong-ju and northward of the Chhongchhon-gang which flows past An-ju. All those places will be found on the map of Korea recently issued from this office. Russians can not have any considerable force on the south of the Yalu or ready to move southward of it. But if they could place even five thousand men at Pyong-Admiral Alexieff, according to a telegram place even five thousand unch as a from Peking, proceeded on the 19th instant yang, which is a very strong position, they would be able to give a great deal of trouble. The only point is that such a column would presently find itself operating in the air Russian staff there that application should presently find itself operating in the air be made to the Chinese Governor-General unless its communications could be guarded

Tientsin sends word that the six companies of mounted bandits whose apparition in the jecture is that the Viceroy has doubts about neighbourhood of Haicheng was recently the conduct of Chinese regulars, and that he announced, have been cutting telegraph wishes to remove them from the vicinity of wires and injuring railways in that neighthe line lest they should join the mounted bourhood, and that another naive application it. The Nippon publishes a statement, said to be on good authority, that a party of 20 Tal. The Asahi calculates that seven Russian of same en route for Pyong-yang.

The Asahi calculates that seven Russian regiments have now been moved towards taking such steps he would be materially graphs which are so essential to Russian. assisting his country's enemy, there is the success in striking blows worthy of her plain consideration that if he officially dignity and might against that provocative, assume any duties connected with the guard-treacherous little Japan. But the Governor ing of the railway, the Chinese Government of Kirin shares the view of the Governor-will be subsequently responsible for any linjury the line may suffer. The railway is policing Russian means of military commusessential to Russia, but, at the same time, it nication can not properly be undertaken by

nasty turn? We should have accepted the latter hypothesis without hesitation month ago, but since the appearance of the Tsar's recent manifestoes no silliness, however extravagant, can be thought impossible on the

part of Russians.

The latest news from northern Korea, published by the War Department, is that frail wooden bridge quite unsuited for the 30 Russians have reached Kazan in Pyong- passage of artillery. an-do. Pyong-yang itself is quiet, but the telegraph northward of Anju is not working, from which it may be inferred that the district is over-run by Russians. Kazan is a little to the south of Chong-ju. From the same source we learn that several hundreds of Russian cavalry reached Chong-ju on the 20th instant at 3 p.m., and their advance guard of 40 men crossed the Chhong-chhongang on the same evening.

Tuesday, February 23.
It appears that the small Russian force

which has crossed the Yalu and penetrated as far as the vicinity of Anju, is not supported by any column of appreciable magnitude. In fact, the operation looks very like an attempt to restrict Japan's choice of battlefield by forcing her to fight on the line of the her, she would at once become Russia's Yalu. If that be the object, it is not very cleverly conceived, since a Russian menace from the direction of the Yalu can not have formidable dimensions at present, and there are strong reasons for thinking that if Pyong-yang be the aim of the Cossack flying column the latter is late in the field. Pyong-yang is safe, and Pyong-yang, as we have often observed, is the position of we have often observed, is the position most vital importance in northern Korea. No one can venture to predict at this moment where the Japanese bolt will be the Russian advance has been checked by the Russian advance has been checked by the discovery of "an obstacle" at Pyongchuria share the general uncertainty, and any successful effort on their part to fix the location would be immensely to their advantage

The Nichi Nichi has a telegram saying that thirty-eight Cossack troopers have arrived at Unsan, where an American company is engaged in mining operations. The Cossacks are accompanied by two Chinese interpreters and one Korean. They have offensive in the Kiulien-Pyongyang direction.

American company, but the latter's Japan-dese employees, who number 200, have not forenoon of the 25th instant the Japanese have been sighted. yet been withdrawn. Unsan is some 30 miles south of Chhong-chhon.

The Russian troops south of the Yalu do not appear to be moving against Pyong-yang.

Wednesday, February 24. It appears from the indications thus far furnished that the Russians are invadingor rather raiding—Korea from two directions, namely, Possiet Bay and the Yalu. At the former place the Ussuri forces are concentrating and they have sent scouts into Ham-gyong-do, who have cut the telegraph between Son-chin and Yuen-san. Those advancing from the Yalu into Pyong-an-do-have cut the line from Wiju to Seoul, and the two bodies may soon establish commu-nications in the mountainous districts of the two northern provinces. This is a kind of guerilla warfare which can not accomplish

the Japanese from more serious matters. The Nichi Nichi Shimbun has telegrams saying that a thousand Russian troops have made their appearance at Chong-fu for displaying the exhibits of the Nippon and 400 at Kasan, while another advance guard of Cossacks have reached Wiju and to inspect the pavilion on the afternoon and

much, and will not, we should hope, divert

tremely ridiculous or is some one doing her a dicates a serious invasion of Korea from the Yalu direction, for Russia has no force in that region sufficient for such a purpose

The Hochi Shambun alleges that it would be a matter of great difficulty for any considerable Russian force to cross the Tumen into Korea, as the river's current is very swift, and there exists at present only a

It is again reported that the Russian Authorities approached the Chinese Governdecline altogether to undertake it in time of war. Russia certainly loses nothing by assur-Unless she acknowledges China's sovereignty in Manchuria, she can not possibly expect the Chinese to guard the railway, and if she acknowledge China's sovereignty, then Manchuria becomes neutral territory and the passage of Russian troops through it for belligerent purposes is utterly illegal. If China undertook the duty which the

have issued a proclamation calling upon the Chinese inhabitants to protect the railway, and reminding them that Russia protected them in the days of the Boxer outrages. Sanctas simplicitas! What a tangled web we weave when first we practise to deceive.

secret that no intelligible information can or not is an open question. be furnished from that interesting quarter, but it is plain that the Russians have adopted the one kind of strategy open to them, Vladivostock squadron in northern seas is a namely, an attempt to fix the Japanese line myth. The Naval Department announces of advance by themselves assuming the that it can not find any trustworthy conoffensive in the Kiulien-Pyongyang direc-

and Russian scouts came within sight of each other at Suk-chhon, which is 25 miles northward of Pyong-yang. They did not exchange shots, however. It is added that the Russians have cut the telegraph between Pyong-yang and Anju.

It is stated that the Russian force on the Tumen shows no inclination to advance into Korea and that the roads are so bad as to render the passage of troops almost impossible.

THE JAPANESE PAVILION AT THE ST. LOUIS EXHIBITION.

Mr. Kawashima, the celebrated silk-mercer of Kyoto, has caused to be temporarily erected on the vacant ground immediately behind the offices of the Nippon Yusen Kaisha in Yurakucho, Tokyo, the beautiful pavilion that is to be sent to the St. Louis Exhibition, where it will serve, first, as a unique example of Japanese decorative art in its highest application, and secondly as a place pushed on to a point 12 miles south of that evening of the 26th instant, and throughout ing maturity, unfavourable weather set in. place. All this seems to be a reconnaissance the day as well as in the evening of in force. We can not conceive that it in the 27th.

THE RUSSIAN SQUADRON IN VLADIVO-STOCK.

Various telegrams are reaching Tokyo which seem to indicate that the Vladivostock squadron has again put to sea. A village
—Tsusumura—on the south of Tsushima
reports that on the 20th instant the sound of heavy guns was heard to the north-west. Hakodate, under date of the 20th, wires that a ship of unknown nationality has been sighted in the neighbourhood of Okujiri ment with a demand that the latter should island apparently seeking to cut the sub-undertake to guard the Manchurian Rail-way. But the Chinese replied that whereas the Russians had not seen fit to entrust them with that duty in time of peace, they must cable, and from Iki island arrives a statement that 5 ships of unknown nationality have been seen in the neighbouring waters. Finally, the master of the Tamagawa Muru reports that on his voyage to Tsushima from Fusan, he sighted a vessel which he did not recognise. The Nichi Nichi Shimbun predicts that Russia will disregard the principle adopted by all civilized nations, maniely, that undefended towns and villages should not be bombarded by a hostile fleet. Russians are endeavouring to thrust on Many places on the coasts of Japan invite enterprises of that kind, whereas the only active ally.

Viceroy Alexieff, however, is reported to Vladivostock, Port Arthur and Talien. It may be observed in connexion with this that the principle of not bombarding undefended towns used to be wholly disregarded by the Occident in dealing with the Orient. Nothing was commoner than that ships flying the colours of a highly civilized Western country should proceed to cannonade villages and towns incapable of offering any appreciable resistance. This was a frequent form of reprisals. It was by the Council of the discovery of "an obstacle at ryong any, and that the inadvisability of posting any large force southward of the Yalu has been recognised. Everything is kept so been recognised. Everything is kept so been recognised, but whether Russia adheres to it

Again it seems that the apparition of the

THE RICE CROP.

Official investigations show that the rice crop of last year does not come up to the very high estimates made in the autumn. It was expected to exceed 47 million koku, whereas it is something less than 46 millions. The following figures are published by the Official Gazette:—

Year.	Crop in Koku.
1893	37,267,418
1894	41,859,047
1895	
1896	
1897	
1898	
1899	
1900	
1901	
1902	
1903	46,475,038

The average crop being 43,253,374 koku, it appears that last year's yield was 6,221,664 koku above the average and also that it was 9,527,947 koku better than that for 1902. The reason assigned for the slight disappointment is that just as the grain was approach-

THE " NAGONOURA MARU."

Tuesday, February 23 We learn with very great satisfaction that the charges of inhumanity brought against Russian naval officers in connexion with the sinking of the Nagonoura Maru were unreached Nagasaki on the 22nd instant which has suddenly broken off negotiations and from Vladivostock. She had on board 53 lapanese residents of Vladivostock, 1585 Chinese, and 41 persons saved from the Stablerg, been burning with indignation against an enemy which has suddenly broken off negotiations and whose aim it was to obtain a slight success in the long desired war by a treacherous attack. Chinese, and 41 persons saved from the Nagonoura Maru. Only 2 of the Nagonoura's crew were drowned. It appears, therefore, that the Russians were careful to

The Master of the Nagonoura Maru says that the Russian ships of the Vladivostock Squadron signalled to him, in the first place, that he and his crew must quit the steamer at once. He signalled in reply asking for succour, and the Russians answered that they were preparing to succour him. But immediately the four men-of-war opened fire, and their shells struck the little steamer. The master, his crew of 33 and his four passengers, hastened to lower the boats and escape from the side opposite to the warships, but while they were doing so a shot struck two of the men and they fell into the sea. The rest concluded that their hour had come and that their best chance less that their best chance less that the struck is a struck two strucks two of the men and they fell into the sea. The rest concluded that their hour had come and that their best chance less to make sacrifices in the national cause that the struck is a struck two strucks and the struck is a struck two strucks and the struck is a struck two of the men and they fell into the power and greatness of the Empire of Russia. and their shells struck the little steamer. had come and that their best chance lay in making direct for the Russian ships, which they did, the shots of the Gromobor passing over their heads as they approached her. They were taken on board and put into three cabins; the 4 passengers in one and the 31 seamen in two others Presently they saw their steamer stand on end, explode and go down During the next two days, the 12th and the 13th, the four cruisers steamed hither and thither, and finally made for Vladivostock where crew and passengers of the Nagonoura Maru series of the Nagonoura Maru ser to the jail at Vladivostock, and on the It is unnecessary to remind readers who have following morning various articles of warm informed themselves more or less about clothing were supplied to them. The same

THE " NISSHIN" AND " KASUGA" FÊTE.

On Friday Tokyo entertained the officers On Friday Tokyo entertained the officers and men that brought out the Nishin and the Kasuga. The Hibiya Park was the scene of the jollification in the afternoon, and the Imperial Hotel in the evening. There were day fire-works and night fire-works; there were illuminations; there were wrestlers; there was a banquet, and there was a crowd that cheered itself hoarse whenever a foreigner appeared. Nothing could have foreigner appeared. It was perhaps a little that very few examples are available Haichens, or the doings in Port Arthur, or

THE RUSSIAN MANIFESTO.

The following telegram has been received at the Foreign Office :-

The Russian Government is said to have officially published on the t8th inst., the following Communique:—

long desired war by a treacherous attack. The Russian nation with natural impatience is wishing for a speedy revenge and expects news from the Far East with feverish anxiety. The unity and power of the Russian nation remove doubts that Japan will receive chastisement for her treachery and for having challenged Russia to war. While our Sovereign desired to maintain peace, the cirdecisive action is taken by the Russian army. The wide distances of the territory attacked and the desire of the Emperor to maintain peace, were the reasons for the impossibility of making far reaching preparations for war beforehand. It will not take much time to give Japan signal defeats worthy of the power of Russia, while Russia will be careful not to shed unnecessarily the blood of her children in inflicting chastisement on a nation which well deserves it and which has challenged Russia in an arrogant manner.

The above is said to have been published with a view to consoling public opinion in Russia which was much depressed by the late unfavour able news from the seat of war.

A WONDERFUL COLLECTION OF BRONZES.

Japanese art, that Mr. Okazaki is one of the afternoon they were released and put on board a German steamer bound for Nagasaki.

Japanese art, that all, Oracan is considered, if not actually the most board a German steamer bound for Nagasaki.

most celebrated, if not actually the most soldiers numbering 50, under the command of two officers, broke into the house of a and chisellers. Jomi Eizuke of Kyoto is probably as well known, but the two men and wounded another. The United work in such different lines that they can scarcely be called rivals. A full understanding of the mysteries of bronze castings is virtually beyond attainment by any but a to lay a complaint before the Russian officer been brighter, and more hospitable and more goodhumoured. It was perhaps a little above the heads of some of the gentlement that had worked before the mast in the two cruisers. A good square meal with lots of liquor would have been more on their level. But they certainly enjoyed themselves, and many of them were profoundly astonished.

The Nisshin is to belong to the Maizuru station, the Kasuga to that at Kure.

—1260), it becomes such a rare object or the doings in Mukden, or the doings in Port Arthur, or the doings of Tsugaru Strait? The answer is a murmur from Kobe about some rude coolies. What has Kobe done to its coolies, we wonder. How has it manufactured them? we are speaking includes specimens ranging from the Chin dynasty (255—206 B.C.) the gun-boat Bobn (950 tons), which has through the Han (206 B.C. 221 A.D.) and been laid up there for the winter, is making

the Minor Dynasties (221—618) to the Tang (618—907). Some of them were taken originally from sepulchres, some from temples, but nearly all have long enjoyed the loving tendance of reverent collectors. The patinas are really wonderful. They show fields and clouds of the most brilliant working tendance deep and glowing lanis. verdigris-green, deep and glowing lapislazuli blue, rich grape-purple, dead-leaf russet and eel-skin yellow. It is evident that the bronzes must have undergone very varied experiences, some deriving their oxidization from centuries of association with extreme humidity while others have mellowed in a dry atmosphere. There is no decoration in high relief. That is essentially our Sovereign desired to maintain peace, the circumstances of the outbreak of hostilities compel us context must be withdrawn with profound apologies.

Our Sovereign desired to maintain peace, the circumstances of the outbreak of hostilities compel us bronze has incised or very low-relief designs only—diapers, arabesques and highly concessof our troops, which can not be received before ventionalized animals or restiling the concessor of the circumstances of the outbreak of hostilities compel us bronze has incised or very low-relief designs only—diapers, arabesques and highly condecisive action is taken by the Russian ventionalized animals or restiling the circumstances of the outbreak of hostilities compel us bronze has incised or very low-relief designs only—diapers, arabesques and highly condecisive action is taken by the Russian ventionalized animals or restiling the circumstances of the outbreak of hostilities compel us bronze has incised or very low-relief designs only—diapers, arabesques and highly condecisive action is taken by the Russian ventionalized animals or restiling the circumstances of the outbreak of hostilities compel us bronze has incised or very low-relief designs only—diapers, arabesques and highly condecisive action is taken by the Russian ventional ventional ventional ventional ventions. kind of work is finely illustrated on the Okazaki specimens. One feels when looking at these bronzes that the only becoming way to treat them is to place them severally under glass cases and bestow on them the same attention as one would give to a choice relic of the old Grecian masters. The secret of their provenance in not told. We suspect that some of them at all events reached the hands of outsiders through the door unwittingly opened by the Boxers to the treasures of Chinese virtuosi. American collectors, collectors of the right sort, will revel in them, and will be delighted to hear Mr. Okazaki's expositions, coming from one of Japan's greatest modern artists. A few of the bronzes have inscriptions which remain to be deciphered and identified, a work that will doubtless be achieved before the collection reaches America.

AFFAIRS AT NEWCHWANG.

Sunday, February 21.

It would appear that there are still about a hundred Japanese fugitives at Port Arthur, mostly women and children. Mr. Uchida, Japanese Representative in Washington, has requested the United States Minister to take

Monday, February 22. It is reported that a party of Russian soldiers numbering 50, under the command of two officers, broke into the house of a

a practicable exit made through the ice.

Tuesday, February 23.

It is stated that at Newchwang, since the circulation of a rumour that Japanese troops had landed at that place or in its neighbour-hood, all the inhabitants have hastened to hang out the flags of their various countries together with an intimation that they are not Russians. The Russian authorities have vainly endeavoured to check this, and are represented to be themselves considerably perturbed.

The United States Consul at Newchwang, fearing that the Russians in Manchuria may again take measures to forcibly conduct Japanese fugitives to Port Arthur, has sent an official to Tashikiao to guard against such a contingency. Tashikiao is the junction of the Mukden-Dalny Railway with the New-

chwang branch.

KOREA.

Saturday, February 20

A telegram from Seoul says that the Japanese have issued war notes, exchangepaper silver. The denominations are 10 yen, 5 yen, 1 yen, 50 sen, 20 sen and 10 sen. These will be a great convenience to all persons connected with the troops, especially to the foreign war correspondents.

It is stated that all the employees of the Russian Yalu Timber Company have withdrawn from Yong Am-pho to Antung. The United States Representative

Seoul is said to be pressing for the immediate opening of Yong Am-pho and Wiju. We suspect that there will be a military opening ceremony there before long.

Monday, February 22.

There appears to be a sad flutter in the nest of the Soks and the Myongs and the Hongs and the Lis and the Mins; that is to say, in the circle of the Korean Russo-phils. Some have fled, some are flying and some are trembling. Very likely these gentlemen were honestly anxious to do the best for their country. From their point of view they had just as much warrant to angle for Russian protection as for Japanese. Therefore none will be so wantonly cruel as to ridicule their present discomfiture. They have had their day. That is all that need be said. But some rumours say that among these Russo-phils supposed to be flying on their own account, two or three are really commissioned to find and prepare a retreat for their per-ennially perplexed monarch. Chhun-chong in Kan-won-do is named as the locality

His Majesty received Major-General Kioshi on the 19th instant. The Major-General is in command of the brigade that landed at Chemulpo on the memorable afternoon and night of the 8th instant.

WAR NOTES.

Feb. 27, 1904.]

Friday, February 19.

The cable between Formosa and Foochow was recently cut, and repairs are being effected by the Japanese. A telegram to the Jiji Shimpo says that the French officials in Foochow are endeavouring to incite the Chinese against assisting in the work of restoration.

The Japanese Government has accepted an offer made by American friends of Japan to purchase and equip a hospital ship and send her out to assist the work of the Red Cross Society in this country.

Baron Rosen and M. Pavlow left Shanghai on the 19th instant by the Yarra.

Saturday, February 20.

The Russian four-per-cents, were arrested in their descent by the efforts of the Russian Government, but it is stated that the announcement of an issue of 50 million roubles worth of notes in St. Petersburg has again disturbed the market.

Sunday, February 21.

The ice on the Peiho has broken up. There are still a couple of inches at Taku, but maritime communications are expected to be opened in two or three days.

The Foreign Office in Tokyo has received a telegram from Europe saying that the Russian Government is adopting extraordinary measures to encourage the nation in the struggle with Japan. Prayers are offered in all the provincial towns and inspiriting proclamations are issued. It is announced that some time must elapse before news can be received of a really satisfactory result, and that in the interval the authorities will publish everything reaching them from the seat of war, not concealing the evil or exaggerating the good. In pursuance of that plan the facts of the fight at Port Arthur on the 9th instant are avowedly announced. They take the form of a list showing the names of the principal officers engaged on the Russian side and the rewards bestowed on them, the public being thus left to infer a victory. The same telegram confirms the rumour that Kuropatkin has been appointed to command the Russian army in the Far East, his title of "General," however, remaining unchanged. The Minister of Finance has resigned, owing to ill-health, and has been succeeded by an official whose name becomes quite impossible in its transliterated forms.

Russian four-per-cents have again fallen in the London market. They are now

quoted at £89.15s.

The laying of torpedoes in Talien Bay is

The London Times considers that Russia has decided to retreat upon Harbin, and of the harbour on the 15th. unreadiness.

The Emperor has addressed a message of approval and applause to the officer com-manding the Fourth Division of destroyers, Captain Nagai, in connexion with the attack

the Japanese authorities for the use of their sick and wounded during the war. In a personal interview with Baron Hashimoto, Surgeon-General of the Red Cross Society, Dr. Scriba and Dr. Teusler tendered their sick and wounded during the war. In a personal interview with Baron Hashimoto, Surgeon-General of the Red Cross Society, Dr. Scriba and Dr. Teusler tendered their services at any time in case of need, and Dr. Teusler received from the Society permission to go with them to the front, subject would be practically wortness.

It is expected that the Emperor will that millions upon millions of gold coins, old and new, are hoarded by the people.

Over 30 persons have thus far followed the extraordinary session of the Diet, which will probably be summoned for lodging old coins and gold ornaments with about the 20th of March. According to

charge.

The Chinese residents of the United States are said to have addressed to the Wai-wu-pu, for transmission to the Court, a petition embodying three requests; first, that the Emperor himself should assume the reins of government; secondly, that China should ally herself with Japan and declare war against Russia; and thirdly that the Chinese in America should be allowed to contribute war expenses. It is added that, in consideration of the reflection on the Empress-Dowager conveyed in the first item of the memorial, the document has been pigeon-holed by the Wai-vou-pu.

Monday, February 22. Many of the Japanese fugitives from Manchuria were obliged to abandon all their belongings or to sacrifice them for a mere song, and as Chinese bandits and Cossacks relieved them, en route, of any little money they had been able to collect, their plight is said to be very miserable.

The North-China Daily News has commenced a subscription for the families of Japanese soldiers serving at the front, and funds are said to be coming in rapidly.

The Japanese Consuls in Tientsin and Chefoo have arranged to charter a steamer belonging to the Kaiping Mine Company for the purpose of conveying Japanese fugi-tives from Chin-wan-tao.

A telegram from the Japanese Consul at Chefoo, dated the 22nd February, says that German steamer has just arrived from Dalny having 170 Japanese fugitives aboard, most of them women. They were first sent to Dalny from the interior of Manchuria. The Russian authorities at Dalny and Port Arthur seem to have protected them duly, though they were maltreated on the way.

Tuesday, February 23.

A Japanese who left Pyong-yang on the 13th instant says that the Japanese residing there, together with fugitives from Antung and Wiju, formed a volunteer company of 120 men, 40 of them being armed with rifles which they obtained at the Consulate.

The Emperor has made handsome pre-sents to the officers who commanded the Nisshin and the Kasuga on the voyage out, and has given Orders to three British subjects and two Italians.

The Swiss Government has informed the Japanese Government that the conference of the Red Cross Society, which was to have been held in May next, has been postponed

on account of the war.

The people on the German steamer Stol-berg, which has arrived at Nagasaki from said to have been concluded on the 15th Vladivostock, say that the news of the Port Arthur affair reached Vladivostock on the 11th, and that mines were laid at the mouth

Wednesday, February 24.
The Oshima has raised a steam-launch belonging to the Varyag and it is said to be immediately usable. As for the Varyag herself, steps to float her are to be taken as made on the 14th instant.

The American Episcopal Mission has offered St. Luke's Hospital, Tokyo, with its attending staff of physicians and nurses, to difficulty in repairing her, but the Koreets was blown up and even though raised she would be practically worthless.

to the orders of the Military Surgeons in law 10 days should elapse from the time of issuing the proclamation to the time of opening the session, but the Emperor has power, of course, to abbreviate the interval on special occasions.

The *Elba*, having on board 7 officers and 124 men of the *Varyag*, left Chemulpo on the 23rd instant for Hongkong.

The War Department has received a telegram from Chefoo saying that the bulk of the Chinese coolies in Russia's service in Manchuria were flying from that country. Over ten thousand have already returned to Chefoo, and it is believed that the Russians

are experiencing very great inconvenience.

The master of the steamer Columbia, which arrived in Yokohama on the 23rd, reports that on the morning of the 22nd he sighted a cruiser with three funnels and two masts off Inuboye-zaki in Shimosa, and that he conjectured her to be one of the Vladivostock squadron. The probability of this is strongly questioned by the Naval authorities.

A telegram received from Paris says that Russian securities are falling continuously.
On the 20th they dropped from 92.10 to This is attributed to the signs of 91.002. unrest shown in Europe, but that explanations can not be regarded as conclusive. The Bank of France has appointed a commission to investigate the matter, and its main recommendation seems to be a measure designed to check speculative transactions.

Thursday, February 2 The steamer Korea is said to have had on board a large quantity of preserved provisions destined for Port Arthur. It is thought that this contraband has been treated as was that on board the German steamer Emma; in other words, it was merely diverted from its Russian destination.

WAR FUNDS.

Following the example set by the Emperor, Marquis Tokugawa, feudal chief of Mito, has taken from his strong room the various old gold and silver coins that have been reposing there for years, and is about to hand them over to the Bank of Japan. These are historical coins. There are the too gold oban given by the Tokugawa Court to the Mito chief during the tempo era (1830-43) when the latter built the Asahi Maru and presented her to the Slugum for purposes of coast defence. There are the 100 oban placed in the strong room in 1843 by the celebrated Prince Nariaki (Rekko), with the injunction that they were to be used for war expenses only. are the golden ingots—weighing about 10 lbs.—used in Nariaki's days for medicinal purposes, and there are many gold and silver utensils, the whole representing about 100,000 yen in bullion value, The Jiji Skimpo thinks that if all the old feudal families do as Marquis Tokugawa has done, a large amount of precious metals will quickly be collected. Of course there is not the smallest immediate occasion to bring specie to the vaults of the Bank of Japan, where a hundred millions are already lying, a sum that might be reduced by one half without disturbing the equilibrium of the gold system. The Nichi Nichi computes that millions upon millions of gold coins,

houses are said to be consulting with a view

The Shogyo Shimpo says that no bills will be submitted to the Diet in its special session except the war budget and such taxation measures as the Government may think necessary in connexion with the war. Hence the occasion is not likely to last more than 10 days.

The subscriptions in sight for the 100 million yen loan are said to aggregate 280 million yen already, although the list will not be opened until the 1st of March. Eighteen prefectures as well as Hokkaido and Formosa have not yet been heard from, and it is therefore anticipated that about 350 million will be offered in all. Success seems to have attended the scheme for issuing bonds of small denominationsespecially those for 25 yen. The price offered for these is expected to be one or two per cent. above the minimum figure, whereas the tenders for large sums will be mostly at 95. Considering that the Government five-per-cent consols and other securities are now selling at 88, the rate of subscription true that telegrams reaching St. Petersfor this war loan is remarkable.

We observe in the Jiji Shimpo a statement that Mr. H. W. Denison has contributed a thousand yen to the war fund. That is incorrect. The figure should be two thousand. It is further stated that the agent of Armstrong and Company, who came out with the Nisshin and the Kasuga, has contributed a thousand yen. The well known merchant of Formosa, Mr. Lin, has put up a sum of 500,000 yeu, and has directed that his son should purchase war bonds to the amount of 2½ millions. The Kokumin says that owing to his exertions the Chinese in Amoy are about to subscribe 20 or 30

million yen to the loan.

Japanese four per cents, continue to fall in the London market, and so do British con-On the other hand the Japanese five-per-cents. have risen 15 shillings.

THE RED CROSS LADIES' NURSING ASSOCIATION.

We understand that Lady MacDonald and a Committee of foreign ladies are organizing a concert in Tokyo for the benefit of the Red Cross Ladies' Nursing Associathon. It may be well to say a word about this Association since its nature and objects are probably not widely known among foreigners. The President of the Association is H.I.H. Princess Komatsu, the members are all ladies, and the manager is Marchioness Nabeshima. All the members are trained in the duties of nurse, and their work is consequently of the greatest assistance to the Red Cross Society. Bandages and many other surgical necessities are sent to the field by the Association. Its members visit the wounded men in the hospitals and also work as nurses there. Some of them even go to concert will be wholly foreign, and the con- genial host.

cert will, in effect, afford an opportunity for the practical display of that spirit of generous helpfulness which evidently animates the foreign community at this juncture; a spirit which knows no distinction of nationality, but thinks only of the sufferings of the officers and men who are all equally worthy of sympathy as champions of their country's

VICEROY ALEXIEFF.

Peking thinks that Viceroy Alexieff's departure from Port Arthur to Mukden may be interpreted from two points of view. He desires to inspect the defences along the line desires to inspect the defences along the line It shows practical sympathy which will go of the Yalu, and he has convinced himself far to heal the soreness that has recently that, the tenure of Port Arthur being scarcely possible without disproportionate sacrifices the best plan is to draw in the line of defence. Other onlookers incline to the view that he is discontented and has withdrawn from the front for that reason. But it has to be noted Considering that the Government's that the Viceroy's permanent departure from burg from that place no longer bear his signature, being forwarded in the name of his chief of staff. But it is also true that no active official in his place would remain quiet at Port Arthur in existing circumstances: he would move about from part to part of the region entrusted to his care, and endeavour to make the best possible disposition of the forces at his command. Russia is on the defensive for the moment and she labours under the disadvantage of having a very wide front to guard, and being exposed to attack from many directions exposed to attack from many directions on only one of which her videttes can operate. Viceroy Alexieff may well be moving about through his command, but at any moment we may hear of his return to Port Arthur. Then again, it must be remembered that Kuropatkin is coming out to take command of the Manchurian Army and that Makaroff is in route to assume the direction of the Navy. Probably these officers are to meet Alexieff at Harbin and arrange in consultation a plan of campaign. Of course their task will be greatly simplified when Japan shows her hand. In the meanwhile it seems to us that no hard-and-fast inferences are to be drawn from Alexieff's movements,

GENERAL BARON KODAMA AND THE

WAR CORRESPONDENTS.

General Baron Kodama entertained at luncheon in the Nobles' Club on Friday twenty-two of the principal war correspondents of foreign journals, who are now staying in Tokyo. Generals Fukushima and Murata were among the gnests. Before each cover was placed a bouquet of flags-Japanese, American and Englishand Baron Kodama when drinking to the good health af his foreign guests, raised the flags aloft and gave the characteristic nathe front. They also keep in close touch tional greeting to each. Mr. Maxwell, with the regular nurses of the Red Cross, correspondent of the Standard, expressed in welcoming them off when they start for the ficial, welcoming them when they return, sending appreciation of Baron Kodama's nospitality, presents and comforts to them during the discharge of their arduous functions and discharge of their arduous functions and discharge of their arduous functions and assist proposed a toast which evoked a most response, the health of the gallouter response, the health of the gallouter response. hearty response, the health of the gal-lant officers and men that took the Japandone by the Association is wide and very lant officers and men that took the Japanhelpful. Though its operations are, so to ese destroyers into action on the night speak, subordinate to the larger work of the 8th and the 14th, and Mr. Melton Red Cross, it usefully supplements the latter, and is also entirely self-supporting. a clever and delightfully racy sketch of We understand that the committee of the "Our Bobs," which he presented to the

GERMANY AND JAPAN.

The Emperor of Germany has addressed a message direct to the Empress of Japan informing Her Majesty that the German naval and military hospitals at Yokohama and at Tsing-tao in Kiaochou Bay are placed at the disposal of Japan for the use of soldiers or sailors wounded during the war. The Empress has replied, expressing her profound apprecia-tion of this gracious offer, and stating that it will be gratefully availed of should the occasion arise.

Germany's action in this matter can not fail to produce a deep impression in Japan.

exhibited itself.

AN ENGLISH COUNTY FAMILY.

One of the most delightful books of Memoirs placed on the market this winter bears the title :-

"Memoirs of Anna Maria Wilhelmina Pickering."
Edited by her Son, Spencer Pickering, F.R.S. Together with Extracts from the Journals of her Father, John Spencer Stanhope, F.R.S., describing his Travels and Imprisonment under Napoleon. (Hodder and Stoughton.)

Mrs. Pickering was born in 1824, being the daughter of John Spencer Stanhope and Elizabeth Wilhelmina Coke, whose father, a descendant of the famous Lord Chief Justice (ob. 1633), was afterwards Earl of Leicester. The extraordinary manner in which the two families, by dint of double and triple marriages, were mixed up, is illustrated by a passage from the Memoirs, which we quote :-

This extract will convey to the reader an idea of the bright discursive style of the book, while it further gives one an idea of the atmosphere in which the writer moved, the atmosphere of an English county family of a hundred years ago, in which all the men were brave and all the women more or less charming, and for the most part not yet hideously dressed. The book is full of fun, Anna Maria. Through nearly 350 pages we travel with her, spending most of the time at Cannon Hall or Holkham, with an occasional visit to London, a tour abroad, and a trip to Scotland or Wales. We meet distinguished people and hear amusing stories, seeing life through Anna Maria's merry eyes. Not a page of the Memoirs is dull, not a subject hackneyed. There is a charming story of Victoria as a maiden Queen:

An official who saw her get out of the carriage on An official who saw her get out of the carriage on her return from the first opening of Parliament was struck with the extremely quiet dignity of her manner while crossing the rooms in the Palace at St. James's; and, as she passed through a door which led up a staircase to her own apartments, a wish came across him to know whether this stately dignity would be maintained after she had passed out of sight of them: he managed to satisfy his curiosity,

and, at the foot of the staircase, saw her roll her train round her arm, then take up her dress all found, and, like a girl, as she was, run up, two steps at a time, talling loudly to her dogs.

There is an equally pleasing account of her in the new dignity of a young wife:

The Queen was always wonderfully graceful, and could throw more meaning into a bow than could any woman in Europe. One of the prestiest things I ever saw was an unexpected meeting between her and Prince Albert. I was walking with my husband in Hyde Park, and seeing the scarlet outriders just turning the corner by the Serpentine, we went up to the railings to watch the Queen pass. On the other side of the railings was a genteman on houseback, and we saw that it was Prince Albert. We waited to see the meeting, expecting that he would ride up to the carriage and speak to her. But he took off his hat, and held it in the most deferential manner to the very bow of his saddle, and sat thus, bareheaded, and quite immovable, waiting for his Sovereign to pass. His two grooms were also bareheaded. The Queen's carriage came on; as it passed, she did not acknowledge him with a smite or a kiss of the hand, as I had expected, but howed in a perfectly grave and dignified manner—the Queen receiving the homage of the first of hor subjects; then her head went lower, and she threw into her bow all the deference of a wife for the husband whom she honoured above all the world. Were I writing of anyone else, this might be set down to imagination, but where the Queen was concerned there was no fancy; she knew exactly what she meant to express, and she expressed it exactly.

One of the most vivid scenes in the book is an account of the fremendous ovation ac-The Queen was always wonderfully graceful, and

One of the most vivid scenes in the book is an account of the tremendous ovation accorded to the Queen at the Opera House immediately after the dastardly attempt on her life in 1842. When Anna Maria first furore was caused by the introduction of the polka. "I never saw anything like the excitement the dance created," she "Everyone who danced it at our ball became from that moment marked people of fashion, and remained so. are many delightful anecdotes-of the Queen-Dowager and her mania for pins; of the marriage of Louis XVI. and Marie Antoinette; of the Duke of Wellington's tactics in the hunting-field; of Mr. Spencer Stanhope's romantic Scotch tour with the Lord of the Isles; of the Princess Royal, who, when quite a baby, was found admiring herself before a cheval glass, and saying, " No, Princessy; I never did see anything like you"; of Madame Tussaud, just becoming famous

After that dreadful attempt of Fieschi with his infernal machine, my aunts went to Madame Tussaud's to see his image, and they were perfectly startled when in the wax figure they recognised my grandmother's fratteur, who used to come every morning to rub her floors while they were living at Versailles; they then called to mind that his name was indeed Fieschi."

As one reads further the men and events of the early years of Queen Victoria's reign on the voyage of discovery that created Cannes. Longley, Archbishop of Canterbury, is hastily apostrophised as "Butter in a lordly dish." A Yorkshire yokel boasts that his fifty years of married life had passed without a jar, and his old helpmate comments: "Varie conscientious but varie dool." Lord Melbourne stops a maid-of-honour running away from Buckingham Palace with "We are not going to have a revolution on your account." Sydney Smith, from the pulpit of St. Paul's, claims the attention of Archibald, a member of the family, with a sneeze: "Ar-chie, Ar-chie." You see Keane and Macready as Richard III.; "the joyous Chantrey" in his studio; the Emperor Francis Joseph a promising and prophetic young man; Prince Albert as a collegian, King Christian of Denmark before he was certain branches of industry has not gone investments to the extent of £80,000,000. Lord Melbourne stops a maid-of-honour

and of election amenities.

The second half of the book is devoted to extracts from the journal of John Spencer Stanhope, father of Anna Maria, who, as a young man, came into direct and unpleasant contact with Napoleon's rule in Spain and France, where he was for many months a prisoner. His journal is almost as interesting as his daughter's recollections, though he had not her liveliness and sprightly wit. He recounts several hairbreadth escapes, and is able to give an insight into the iron sternness of Napoleon's government. In later years his engagement to Elizabeth Coke, whose father became the first Earl of Leicester, was a source of much satisfaction to the bride-groom's family. " To crown all, the gamekeeper expressed his approbation of the marriage, saying that it was a very good pheasant connexion."

Altogether these Memoirs are memoirs to

BRITAIN'S STANDARD OF PROSPERITY.

What is the British criterion of prosperity i Mr. Rufus Fleming, the United States Consul at Edinburgh, has been endeavouring to discover this very thing, and in a confidential report to Mr. Secretary Hay points out the difficulties which surrounded the task. He says: " Except in so far as facts and statistics speak for themselves, it is no easy matter to correctly represent actual condi-tions. One cannot be too carefulin estimating the value of opinions expressed by newspapers, trade journals, and managers of manufacturing plants. I do not mean that there is any other purpose on the part of the press or managers of great works than to say exactly what they think. But the mental habit of measuring conditions in this new century by those of the old days, when enormous, has imparted a pessimistic colour to all comment on industry and commerce. The monopoly they long enjoyed at home and in many outside markets having come to an end, the requirement of vaster production at much lower prices to make industries pay renders vivid the memory of the casy-going times of prosperity, and gives a distorted view of the existing situation. In fact, the chief apparit to meet anywhere, and when profits were Japan Herald writing:
enormous, has imparted a pessimistic colour being of picting in motion and comment or include a pessimistic colour being of picting in Table 19. this more frankly than the American captains in other words, Chefs de Mission. Next of industry. One of these gentlemen, the head time more care will be taken in drafting a of a manufacturing concern in the Middle resolution in the English tongue ere it be West, who has been in this country two or submitted to a public meeting in Yokohama.

married, and General Bonaparte on St. far enough to affect very materially the well-Helena; the last of the Yorkshire bone-setters bone-setting; stories of famine riots cantile lines is partly due to the fact that skilled workmen are not fully employed, but the wiser heads in business are disposed to attribute restricted buying chiefly to the great losses sustained by speculative thousands—through the margin-wasting de-pression of South African and other shares. These losses have temporarily reduced the purchasing power of a class whose trade is, as a rule, the mainstay of mercantile houses,"

NOTES ON CURRENT EVENTS.

On the 18th instant the Emperor summoned Count Inouye and addressed to him a gracious message to the effect that His Majesty desired to have his advice on important affairs of State, and trusted him to use the utmost diligence. The Emperor used similar language to Marquis Ito, Marquis Yamagata and Count Matsukata when appointing them to the Privy Council at the time of the last political crisis. Count Inouye, however is not appointed to the Privy Council, and we therefore conclude that this injunction is conveyed to him as a special mark of the confidence placed in him by the Emperor at this juncture.

Humourous situations crop up in the least expected places. Towards the close of the meeting of foreign residents held at the Oriental Hotel on Tuesday, Mr. N. W. McIvorproposed, and Mr. A. Bellamy Brown seconded, that Bishop Awdry and Bishop McKim together with the Heads of Missions in Tokyo be invited to serve as an advisory manufacturing plants. I do not mean that board in conjunction with the Committee they are intentionally misleading or that elected that afternoon to deal with the funds relieve the distress occasioned by the war. The motion, most unexpectedly, was lost by a large majority, and for a time it was diffi-cult to understand the reason for the British manufacturers had little competition vote. But the following evening we find the

ent danger to British manufacturers in im-portant branches lies in their reluctance to close of the meeting, to the effect that the turn away from the past and forget all about it, and to face the present and future, face clerical element. Perhaps the proposer of the come vividly before the eye. Lord Broughturn away from the past and forget all about

None will admit accredited Ministers of the various Powers:

sterling, Egypt standing fourth in the list of countries in which French interests are engaged. The writer then proceeds to summarise the political arrangements by which French interests in Egypt are guaranteed, the Capitulations, the Caise de la Dette, and the mixed Tribunals, all of which restrict the autonomy of Egypt and of the Power in occupation. But he claims that France has repeatedly shown a disposition to relax the assertion of her control wherever it conduced to the well-being of the country. It is not the moment, he concludes, to state precisely the responsibilities of the past, but rather in a contrary spirit to contemplate modifica-tions possible in existing circumstances.

France can never forget that she possesses in Egypt interests too considerable for her to abandon their supervision, rights too precious and well defined for her to allow them to be weakened, unless for the best of

In the course of an article on the late Princess Mathilde Buonaparte, the Spectator

says:—

The Princess Mathilde, daughter of Jerome Buonaparte, had much of her brother's force and brightness; might, had she been a little more independent of her father, have been Empress of the French; and had she been born in the class to which she mentally belonged—namely, the old Scotch ladies of rank—would have been celebrated for her rough and realistic wit in a dozen biographies. — You dislike revolutions?" she said on one occasion. — That is not my role. But for a revolution I should have been selling oranges in Ajaccio,"—just the sentence the Scotch lady so placed would have utered. In circumstances many of which were unpropitious, she successfully held her own as a leader of society, and old as she lived to be, the abler the Parisian, the more he sought intimacy with the haughty lady who never forgot, even when most interested in a discussion, that she was a Princess. No doubt she was half Royal, and the fact gave her something of her position, but she did not derive from the house of Wurtemberg either her wits or the energy which enabled her to survive and forget the many crushing blows of her personal career.

The position of the Princess Mathilde, like that of many of the disinherized Princes.

Islows of her personal career.

The position of the Princess Mathilde, like that of many of the disinherited Princes, shows that the glamour produced by the possession of a throne spreads far, and lasts for a long while after the throne is lost. It is nearly ninety years since Water-loo; yet if the French Republic were rendered unpopular by misfortune, the thoughts of every Frenchman would turn first of all to the expatriated members of the ancient dynasty, or of the family which twice supplanted it. twice supplanted it.

The Pascal arrived in Shanghai on the 18th, and the telegraph states that the French Consul there gave a brilliant enter-tainment in honour of Baron Rosen, M. Pavlow and the principal officers of the defunct Russian ships. There is a story that M. Pavlow landed at Chefoo from the Pascal, and came thence incognito by the Suncho. Shanghai's hand is visible in that fable.

It is stated that the new battle-ships or-

Yet this is the case in Egypt, where two-thirds of the Egyptian Debt is held by withdraw 600 men but owing to the withdraw 600 men but owing to the withdraw 600 men but owing to the outbreak of the Russo-Japanese war this intention had been abandoned. The Foreign frames are reckoned at nearly £5,000,000 France are reckoned The Government had intended to buttress of the security of foreign life and property, and moreover Germany must be prepared to discharge the duties of strict neutrality.

The Official Gazette of the 22nd instant contains a series of rules relating to the treatment of prisoners. A special office, called Furyo jöhökyöku, is to be established in Tokyo, and will undertake all business of this nature. Among the regulations we observe some which provide for the safe transmission of money or comforts sent by friends or relatives of prisoners and for the conveyance of the effects of deceased soldiers to their relatives as well as for carrying out the provisions of their wills.

We gather from a Peking telegram pub-lished by the *Jiji Shimpo* that there has been some mistake perpetrated in transmitting information to *The Times*. A message sent across the wires from Mr. Greener, who is with the Russian Siberian army, was transmitted from Peking by Dr. Morrison. related to the Japanese army and the doings of the Japanese navy, and it appears to have been of such a misleading nature that Viscount Hayashi, Japan's Representative in London, deemed necessary to publish a contradiction. Dr. Morrison is understood to disclaim all responsibility as he merely transmitted the message, and of course Mr. Greener can not have had any source of information except the Russians. Evidently if the Tsar is so very silly as to proclaim that the Japanese have been the provocative party in this catastrophe and that he and his innocent statesmen and unoffending army and navy have been treacherously assailed by Japan, we must be prepared to find that veracity is not the first weapon with which his subjects will be disposed to fight.

We learn from a New Zealand paper that on Dec. 16th the foundation stone of a new building for the Missions to Seamen Institute —the outcome of a public-spirited donation of £7,800 from Mrs. Williams, widow of the late Captain W. R. Williams .- was laid with much ceremony at Wellington. In addition to the Premier, Mr. Seddon, and other Ministers, there was a large company present. The stone was laid by Mrs. Williams.

Mr. Kurino, formerly Japanese Representative in St. Petersburg, has left Berlin with his staff for Stockholm.

Copies of Mr. Stead's new paper have reached Yokohama and a very poor production it is, considering the amount of puffing which preceded its appearance. The London correspondent of the China Mail makes merry over it in this style :-

dered in England recently are to be called the Katori and Kashima. These names are taken from the celebrated Shrines in Hitachi, where are worshipped the deities to whom Jimu Tenno prayed when he undertook his expedition.

Viscount Yoshikawa has been appointed Minister of State for Home Affairs.

A telegram received in an official quarter in Tokyo, states that the German Minister of Foreign Affairs, speaking in the Reichstag on the 19th inst., said that it was impossible to reduce the German garrison at Kiaochow. It was now composed of 2,600

like the Adventures of John Gilpin, and the Black Tulip of Dumas. Also on Tuesday it treated its eager readers to a biography of Joan of Aic. In a week or two, it will discover the lamentable demise of Her Most Gracious Majesty Queen Anne, and then we shan't be long!

Among the crowd of illustrated weekly papers which have lately appeared in London, the latest to reach our hands is The Bystander. About the size of the New York Independent, the new journal deals with social, theatrical, travel and sporting topics in a light and airy fashion. It is freely illustrated from photographs, while its cover pages and a special supplement by the late Phil May—a study of the late Sir Wm. Allen are in colours. It is rather difficult to perceive what place The Bystander desires to fill, but doubtless it will find patrons among to hil, but doubtless it will find patrons among the large class who want plenty of pictures and nothing very serious in the way of letter press. No 6, of Vol. 1, we might mention, contains an article on "The Great Britain of the Far East," the reading matter in which runs to 40 lines, and the pictures to three pages and a half. Messrs Kelly & Walsh have the magazine on sale Walsh have the magazine on sale.

It is announced that the Birmingham Daily Gazette, the Midland Express, and the Evening Dispatch have been amalgamated under one ownership, and are now the property of Mr. Alfred C. Harmsworth and Mr. C. Arthur Pearson. Fleet Street is curious as to whether this move is a preliminary to an amalgamation of the London liminary to an amalgamation of the London interests of the firms named. The Morning Leader prints the following list of the daily newspapers owned by Messrs. Harmsworth and Messrs. Pearson;

MESSRS, HARMSWORTH.

Daily Mail.
Evening News.
Daily Mirror.
Manchester Daily Mail.
Birmingham Gazette. Leeds Mercury. Glasgow Daily Record and Mail. Portsmouth Daily Mail. MESSIG, PEARSON

Daily Express.
St. James's Gazette.
Birmingham Alidland Express.
Birmingham Evening Dispatch.
Leicester Evening Arass.
Newcastle North Mail.
Newcastle Evening Mail.

In addition, Messrs. Harmsworth have an-nounced a halfpenny daily paper for Edinburgh, and own the London Weekly Dispatch and the Illustrated Mail.

A map showing the distribution of insanity in the United States has been prepared by Dr. William White, superintendent of the Government Hospital for the Insane, and furnishes, says The Public Ledger (Philadel-phia), "powerful corroboration of those adherents of the theory that it is the struggle for existence, the fear of misery, poverty, and unwholesome conditions of city life, which are twisting men's wits in our day."

The writer goes on to say :-

New England. This apparent aberration is explained by the theory that the settlers of California and the coast were of the class of riffraff and cranks and wild-eyed men who followed in the wake of gold, whereas the Rocky Mountain States and the Middle West were settled by the hard and virile, serious-mind dmen who found new States with the sane and sensied men who found new States with the sane and sensi-ble purposes of winning a sure livelihood from mother earth. In other words, they were not of the class from which 'rainbow-chasers' are recruited. Another reason for the soundness of the agricultural and sparsely settled regions is the fact that the workers work with their hands, and closeness to the soil makes men physically strong and wholesome, with important resultant effects on the mind. The pioneers leave the old home, and they leave the less adven-turous and less hardy at home, who intermarry, and turous and less hardy at home, who intermarry, and the unfittest are the result. The farmer, then, has his compensations, in spite of the talk of his loneess and its evil effects.

According to authentic figures on the production of copper for the year 1903, the output both from the United States of North America and the world at large was the largest on record. The following figures show the production for 1901, 1902 and

1903:			
Country.	1903.	1902.	1901.
United States	318,861	303,446	272,609

1902		551,316
1903	. 318,861	589,361

It is very difficult to discover the actual condition of affairs in Holy Russia, so strict is the censorship and so well-disciplined are the journalists of the Muscovite empire. But from all accounts matters are going from bad to worse very rapidly. Indeed, a prominent London journal declares that the state of affairs now existing has been compared by competent observers to that which obtained in France before the great fevolution. It is certain that the re-forms which were introduced by the Czar Alexander II., failed of their intended effect, and that the peasantry has exchanged serfdom to the great nobles and landed proprietors for slavery to the money-lenders, who find them the ready money with which to carry on their slothful and improvident husbandry. Carefully as the true condition of the Budget is concealed by the Finance Ministers, it cannot be denied, continues our contemporary, that Russia is really bankrupt, that the majority of the people of the country districts are in a state that money which would be far better employed in European Russia is wasted in amployed in European Russia is wasted in amployed in European Russia is wasted in ambient on the advice of the Minister of the Interior, the Czar has pronulgated an edict, composed of delegates from the nobles and from the Zemstvos, for the purpose of discomments of the Empire of Committees, composed of delegates from the nobles and from the Zemstvos, for the purpose of discomments of the Empire of Committees, composed of delegates from the nobles and from the Zemstvos, for the purpose of discomments of the Empire of Committees, the money is intended seriously, it is only just proposed in time, but as the different Russia. If this move is intended seriously, it is only just proposed in time, but as the Government's hands are full in the Far, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen, after March to an average of about 20,000,000 yen husbandry. Carefully as the true condition

Middle, and Near East, it gives rise to the suspicion that the Committees are only meant to keep the peasants quiet.

The Official Gasette publishes a statement as to the result of the operation of the new Insurance Regulations. It will be remembered that the Japanese Government greatly modified its enactment in the case of life insurance companies. Instead of requiring that they should deposit their legal reserves with the Treasury, the authorities agreed to limit the deposit to 150,000 yen, paid in one installment. Even with that condition universal compliance seems to have been impossible, and in the case of the fire commarket. The increase in proports was mainly agricultured in the market.

As regards the condition of foreign trade in the year under review, the exports and imports of commodities amounted to 280,500,000 yen and 317,130,000 yen respectively, the aggregate being 606,630,000 yen, when compared with the total for 1902, namely 530,030,000 yen, which was then country's foreign trade, show a very satisfactory result, notwithstanding the sluggishness of the general market. The increase in proports was mainly agricultured to a supercondition of foreign trade in the year under review, the exports and imports of commodities amounted to 280,500,000 yen and 317,130,000 yen respectively, the aggregate being 606,630,000 yen, which was then compared with the total for 1902, namely 530,030,000 yen, which was then country's foreign trade in the year under review, the exports and imports of commodities amounted to 280,500,000 yen and 317,130,000 yen respectively, the aggregate being 606,630,000 yen, when compared with the total for 1902, namely 530,030,000 yen, which was then country's foreign trade, in the market. modified its enactment in the case of life insurance companies. Instead of requiring impossible, and in the case of the fire com-

meeting as follows:--

GENTLEMEN: -- In my capacity of this Bank's Go-GENTLEMEN:—In my capacity of this Bank's Governor, a charge conferred on me in October of last year, it gives me great pleasure to welcome you to this Forty-third meeting of Shareholders. I have now the honour to submit to you the report of the transactions of the Bank for the 36th year of Meiji (1903), and in doing so I shall avail myself of the opportunity to make a few remarks on the general economic condition of the country as well as on the main features of the Bank's business during the year under review.

year under review. In the 36th year of Meiji, although there were In the 36th year of Meyr, although there were-some fluctuations from time to time, yet the general, economic situation was on the whole sound, and the year closed amid indications of moderate prosperity in all times of industry. As a consequence of the economic caution maintained for many years, a gradual increase of available capital in the money market made itself apparent from the beginning of the year under review. Accordingly the Bank lower-ed its rate of daily interest 2 viv in March and other banks followed suit. Even at the season of the raw de dis rate of daily interest a rin in March and other banks followed suit. Even at the season of the raw silk trade, there was no considerable increase in the demand for funds, and the money market remained very quiet. A bad harvest in the previous year had necessitated the importation of a large amount of our staple tood, rice, and it was feared that a considerable outflow of specie would result. But fortunately the flourishing condition of our export trade and other causes making for an inflow of foreign capital, produced a balance of exchanges and obviated any large cash remittances.

Taking advantage of this quiet situation in the money market and the consequent fall of the rate of interest, companies of various descriptions secured better terms for their liabilities or floated new obligations at lower rates. These facts tended to impart stability to the condition of enterprise and furnished

and in the month of November, it was reduced temporarily to about 15,000,000 yen. Towards the end of the year, the demand for money rapidly increased during several days, but the aggregate advances on the last day of the year did not greatly exceed 51,000,000 yen. Seldom during recent years had the Bank's loans tallen to such a small figure, and the fact clearly indicated a general industrial depression as well as the existence of a large supply of available capital in the market.

As regards the condition of foreign trade in the

universal compliance seems to have been impossible, and in the case of the fire companies many were unable to make any deposit at all under the terms of their constitution. Thus the net result is that out of 71 companies doing business in Japan, 35 only are to continue operations and 36 will withdraw. It is regrettable that this should be the case, but we do not see that any fault can be found with the Japanese Government. It has exacted a minimum of security by way of protection for its own subjects.

THE BANK OF JAPAN.

The semi-annual meeting of shareholders of the Bank of Japan was held in Tokyo on Feb. Massuo, Governor of the Bank, addressed the meeting as follows:—

Massuo, Governor of the Bank, addressed the meeting as follows:—

With reference to the minor affairs of the Bank, addressed the meeting as follows:—

With reference to the minor affairs of the Bank, addressed the meeting as follows:—

With reference to the minor affairs of the Bank, with reference to the minor affairs of the Bank, with reference to the minor affairs of the Bank, with reference to the minor affairs of the Bank, with reference to the minor affairs of the Bank, with reference to the minor affairs of the Bank, with reference to the minor affairs of the general market. The increase in imports an animal market. The increase in imports a d a very produce such as habutary, conton yrn, tea, copper and coal, explains the increase in exports. The inport and export of over rincipal articles of over principal articles of produce such as habutary, cotton yrn, tea, copper and coal, explains a market. The increase in imports and export of over princ

year. This gold movement is still continuing in the same direction.

With reference to the minor affairs of the Bank, there is very little to be reported. The building of our branch office at Osaka, commenced in 1897, was completed last year, and the new office was opened on February 1st. New buildings were felt to be necessary also at Nagoya and Kyoto, and they have been in course of construction since September last. With much regret I have to report that our late Governor, Mr. Tatsuo Yamamoto, retired from office in October on the expiration of his term. The faithful and meritorious services rendered by him in the world of finance and economy under many difficult circumstances will be long cherished in our memory.

I have thus briefly reviewed the economic situation during last year. The gradual increase of available capital in the market and the favorable condition of our foreign trade must be regarded as most propitious signs. But, now, unfortunately, war has become inevitable in order to secure the permanent peace of

our foreign trade must be regarded as most propitious signs. But, now, unfortunately, war has become inevitable in order to secure the permanent peace of the Far East. It is well known, that a sound financial condition is of cardinal importance in time of war, and that the foundations of public finance must be laid in the national economy. The circulation of money and the production and distribution of commodities are likely to differ greatly in time of war as compared with time of peace, and it behoves business men to vigorously prosecute peaceful enterprises in spite of the many difficulties incidental to war. Moreover, war expenditures tend to cause a sudden increase in the amount of money in circulation, so that those controlling the market must endeavour to find avenues of employment for this surplus and to established equilibrium between the Treasury's disbursements and the demand for capital. The success of our military operations will depend in no small oursements and the demand for capital. The success of our military operations will depend in no small degree on prudent management in business circles, and we must all appreciate our responsibility at this critical time. In such matters an institution like this Bank must take the lead, and I count on united support in discharging our duties without failure.

THANKS TO RUSSIA.

RUSSIA seems to be determined that this grim chapter of international history shall have its comic side. What is more, shall be entirely at her own expense. The TSAR figures as the jester, and the character seems to suit him well, though the world has hitherto supposed him to be rather of a grave and sombre than of a jocular temperament. It is true that HIS IMPERIAL Majesty's humour would be more appreciable were it less cryptic. We are uncertain, for example, what he means by treachery. Hitherto the traitor's stock-in-trade has been supposed to be a marked readiness to make promises and offer pledges without any idea of keeping the former or being bound by the latter. Japan has not shown herself specially rich in that faculty. She has never solemnly engaged, for example, to do a certain thing by a certain definite date, and then proceeded to do the very opposite thing when the date arrived. She has never made with another nation an agreement binding herself to commence an explicit operation on a fixed day and to complete the work in three installments each at its own determinate period, and she has never, when those periods arrived, treated them as though they were still in the lap of an inscrutably distant future. That kind of conduct would be called treachery by ordinary folks, but, for reasons which we need not elaborate, it is plainly not counted treachery by Russia. Her definition of treachery appears to be the striking at an enemy without waiting for him to get good and ready. To warn him that friendly intercourse has ceased and that he must be prepared for any action which the other side's interests appear to dictatethat is not enough. If he be a large, slowly moving creature, requiring much time to sharpen his ponderous sword and don his weighty armour, that time must be given. There must be no hasty striking, no unseemly quickness of attack. To be alert, to be prompt, to obey the German stategist's axiom by taking the initiative the very instant that war is known to be necessary, that is treachery. By behaving in that shameless manner Japan has written herself down a traitor. Great, big, strong Japan and poor, weak, little Russia! The comparison makes the former's procedure all the nastier and more discourteous. The Government in Tokyo have shown most disingenous suspicion of Russia. When they saw her protracting the negotiations week after week GERMANY'S recent attitude towards and month after month the while she hast-

honourable and promise-keeping empire, and also directs attention to the fact that Gerby allowing themselves to imagine its many readily accepted the proposal made statesmen capable of insincerity. And then, by the United States Government for limitafter having waited so long that the world ing the area of the war, though the terms of she appears to be willing that the laughter laughed at their suicidal patience and their the measure could not be expected to please own nationals cried bitterly against such a Russia. Just as such welcome incidents sacrifice of the country's interests, they were so inconsiderate, so offensively abrupt, as to Berlin's readiness, at one time apparent, to step out of a game where they had every- sacrifice Japan on the altar of European thing to lose and nothing to gain, and to politics had given place to a juster appreciainform Russia that friendly discussion must cease and stern action take its place. of his happy inspirations. His MAJESTY That was bad enough. But worse was to follow. For within the ridiculously short space of three days the giant Japan rushed at the pigmy Russia and chou for Japanese wounded men; an act dealt her some blows that made her reel. What is the result? The result is that sympathy, derived additional value from quite a time must elapse before Russia can return the buffets in a manner worthy of her bulk and slowness. "Look here," cries the synonym among the Japanese people for TSAR. "I wasn't ready and I can't be ready for ever so long, and what a figure I shall Kokumin Shimbun evidently thinks that its have to cut in the meanwhile! I never provoked any one. I never purloined another person's belongings. I never promised to return them and did n't do it. I never put off for weeks and months the making of replies to friendly proposals, and when I did make them, they were not each more unsatisfactory and less sincere than the other. It was Japan that did all those things, the provoking, treacherous little creature. I didn't dream that she would dare to hit me, and now she has not only given me a buffet, but done it at such an unseasonable moment that ever so much time must elapse before I shall be good and ready to return the slap." It is really kind of the TSAR to furnish these materials for a good laugh,

The sober truth, however, is that His Majesty's Manifesto is addressed not to the world but to his own people. It is solely for domestic consumption. The Russians, throughout the wide dominions of the great Northern Power, must not know the truth. At Dalny they did not know on the 15th of February that Port Arthur had been attacked on the 8th and 9th. Neither did the Chinese in Canton know that Weihaiwei had fallen in 1895 until a month after the brave Admiral Ting had breathed his last, The truth can not be served out without sauce or en masse to the Russian people. They must have it diluted and in small doses, their constitution not being robust.

GERMANY AND JAPAN.

Japan has evidently gone far to efface ened her preparations for war; when they any unfavourable impressions previously exheard her proclaiming that now, now she isting. The Berlin Government is said to have was about to make concessions and that shown unquestionable though necessarily much margin for talk still existed in the circumspect friendliness towards this counregion of neutral zones and spheres of influ-try in the latter stages of the Russo-Japanence, the while she hurried out her warships ese negotiations, and telegrams lately to Eastern seas and her regiments to the received from Europe indicate that the tone

by attributing ulterior designs to an noticed by the Kokumin Shimbun, which were leading the Japanese to hope that tion of her potentialities, the KAISER had one telegraphed direct to the EMPRESS of JAPAN offering the use of the German naval and military hospitals at Yokohama and Kiaowhich, already significant as a mark of the Kaiser's graceful thought of addressing himself to the EMPRESS, whose name is a everything benevolent and charitable. The countrymen's sentiments towards Germany will be materially affected by all these evidences of goodwill, and we may add to the catalogue a circumstance which, we frankly confess, caused us some surprise, namely, the ridicule heaped by the German press upon the TSAR's most undignified complaint that he had been treated with treachery by the Japanese because they did not give him ample time to get ready for beating them. No people know the silliness of such pretences better than the Germans, who have reached their high place among the nations by a uniform exercise of the very qualities the Japanese are now displaying, promptitude and determination. Nevertheless we did not expect to hear German journals strike a note so discordant with Russia's wishes as this peremptory rejection of the TSAR's plea. It is scarcely necessary to dwell upon the importance of Germany's friendship from a Japanese point of view, or to point out how much Russia must be ultimately influenced by such unequivocal evidences of Germany's disapproval. Liaotung was the beginning of the breach between Japan and Germany. Perhaps it may now be the bridge to happier relations.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

Among magazines, as an organ of public opinion, the Taiyo has no rival in this country. On the burning questions of the day it commands the services of the best writers. Numerous are the articles in the February number on the one absorbing topic of the hour. Count Ökuma is quoted as urging the Government to take the public into its confidence more than it has hitherto done on the ground that by so doing it will greatly strengthen its position. Mr. Ozaki Yukio greatly strengthen its position. Mr. Ozaki Yukio expresses himself as dissatisfied with Japan's attitude to Russia, thinking it quite unreasonable that Japan should even demand a limitation of the military force Russia keeps in Manchuria and maintaining that no self-respecting Power would dream of being dictated to by a foreign nation on to Eastern seas and her regiments to the received from Europe indicate that the tone such a subject. Even after Germany's victory scene of the treachery which was not orthodox of the German press is now distinctly cordial treachery, they betrayed their distrust to Japan. These things are appreciatingly of its standing army to please a neighbouring

country. Not even Napoleon I could exact such sions of troops, she would need to leave one of concessions from his conquered foes.* But the these in Korea. With the other 9 she would march above named and other short effusions are cast into Manchuria and attack Russia's strongholds. into the shade by a very masterly review of the whole situation, in the Far East in its political and military aspects by Colonel H. Nezu, entitled Tairo Shusen Saku (The Anti-Russian War Policy) The article is too long to be thoroughly dealt with in this Summary. We can do no more than quote a few of the conclusions to which the most careful investigation has led the writer, who, it must be remembered, has spent many years in the study of China and Korean affairs and who is recognized by the Japanese as one of the greatest of authorities on the Far Eastern Question. Colonel of authorities on the Far Eastern Question. Colonel Nezu's article is a carefully reasoned presentation of the situation in which Japan finds herself to day. His essay covers over 10 closely printed pages. It is divided into four parts as follows (1) The gravity of the Situation. (2) The best time for beginning the War. (3) The length of time the War will occupy and the cost of it. (4) The summing up of the argument in favour of immediate action. If has been proved by a series of peopriations and by other things, says Col. Nezu. negotiations and by other things, says Col. Nezu, that Russian interests in the Far East and Japan-ese interests in Korea and China are hopelessly antagonistic and seeing that neither country prepared to give way war is quite inevitable. Russia's exit in the Far East and her establishment as a great power in this part of the world are part of a policy on which for many years past she has set her heart and her failure to realize it would be a tremendous blow to her. Col. Nezu thus sums up the issue: Ikun to nareba, Manshū ni okeru Russia no shippai wa jitsu ni Russia zenkyoku (全局) no shi-kwatsu mondas ni shite, sono seikô wa sunawachi Nihon Tcikoku no an-ki (安危) mondai tarubekereba nari. . . . "A collision between the two countries is inevitable because Russia's failure in Manchuria would be to that country a matter of life or death, and because Russia's success there would imperil the existence of this empire." Russian policy in the Far East is next discussed with considerable insight, and it is shown that whereas the representatives of other European Powers have come to the East to trade or to teach, Russia has always had quite another object in view, namely the territorial expansion of her empire. So deep-seated in the hearts of her statesmen is this Far Eastern expansion, says Col. Nezu, that unless we stop her, it is quite sure that she will swallow up the greater part of China. If Russia's policy were other than it is, some kind of arrangement might be come to by the two countries. But knowing her policy as we do, we dare not allow her to hold sway in Manchuria, much less let her have a permanent footing in Korea. To remain in Manchuria and to govern it is a policy which at all costs Russia is determined to follow. Hence we must meet this resolution with still stronger resolution and fight till we drive her out of that province (Kore wo yo suru ni, Manshu mondai no kwanzen naru kaiketsu wa, sunawachi Manshū keiyei (整營) no kontei daha (打破) ni hoka narazu. Manthu keiyei no kontei wa Rojin ga hijo no dai kesshin wo motte mamoru tokoro, ima ware kore wo daha sen to hossu, nanzo mata hijo no daikesshin nakarubeken ya.† Col. Nezu next marshals the arguments in favour of Japan's having it out with Russia now rather than a few years later. The more time that is given to Russia the stronger will she make her military position in Manchuria. She labours under many disadvantages now that might be removed later on. The navies and armies of the two Powers are then compared by Col. Nezu. Coming to the consideration of the time the war is likely to occupy, Col. Nezu says that if Japan sends to divi-

There is much confusion in Mr. Ozaki's line of argument. Russia's position in Manchuria rests on usurpation and aggression and is not for a moment to be compared to that of the French nation vis a visual forms.

to be compared to that of the French nation vis a visite Germans after the Franco-Prussian war.—
(WRITER OF SUMMARY.)

† "The only thoroughly satisfactory solution of the Manchurian question is the destruction of the foint despite of Russia's Manchurian schemes. In the defence of this Russia will show tremendous resolution. If, then we wish to destroy it, we too must display extraordinary strength of purpose."

The colonel thinks that even in six months Russia is likely to be hard pressed. Defeat in battle will mean more to her than to the Japanese, as she figures as one of the greatest Powers. Her prestige would be so reduced that her numerous enemies would certainly use the occasion for taking vengeance on her for past injustice, cruelty and oppression. Defeat after defeat would make her war with Japan intensely unpopular in St. Petersburg, and with a fading reputation her at-tempts to float war loans would prove a financially disastrous business. I do not think that the wa need last more than a year or a year and a half before Kussia will begin to feel the strain of carrying on extensive military operations so far away from home to be greater than she can sustain for any length of time. Col. Nezu laughs at the notion that Japan will need to march far into Siberia before she can induce Russia to treat for terms. The railway through Manchuria being in Japan's possession, as it certainly will be, and Russia's communication by land and sea cut off, how can she remain in Port Arthur for any length of time? Into the expense of the war Col. Nezu goes next, but we cannot follow him here. Japan's arms are victorious, Col. Nezu predicts that the Chinese will only be too glad to work hand-in-hand with her island neighbour in safeguarding her empire against a second Russian invasion. China, educated and renovated by Japan could withstand any European aggression with which she might be threatened. Manchuria would be thrown open to the nations of the world. Japan's Korean railway would certainly be con-nected with the Manchurian line and thus a great future for both China and Korea would be opened It is not territorial expansion that Japan has in her mind now as much as keeping the whole of the Eastern world from being placed at the mercy of a thoroughly unscrupulous, unjust and despotic European Power.‡

Dr. Ariga Nagao contributes a long article to the Taiyō on "Japanese Students in Foreign Lands." He voices general opinion when he says that from one cause or another the results of sending men to study abroad have been disappointing. Dr. Ariga, as he tells us in his essay, has himself spent many years abroad and is well acquainted with hundreds of young men who have either been sent by the Government or have gone abroad at their own ex-pense, so that his opinion should carry great weight on this subject. Dr. Ariga says that the notion that the chief object of sending young men abroad is to enable them to complete their studies in foreign lands can no longer be entertained. When he himself entered the Berlin University and listened to lectures on Psychology and Ethics, the shallowness and elementariness of these lectures astounded him. Most subjects could today be better studied in this country than abroad. The object of foreign travel and residence is to broaden views and to enable the student to return to Japan and tell his fellow-countrymen what the great world outside Japan is thinking and doing. The characters of travelled people are quite different from those of persons who have spent all their days in one small country, and who have only mixed with their fellow-countrymen. The acquisition of the power of speaking foreign languages is a worthy object to be pursued while living abroad. This needs much perseverance and much time. Dr. Ariga tells us he began with English, then went to German, afterwards to French, and lastly to Russian, and that he converses in these languages, Russian, and that he converses in these languages, though very imperfectly in the last. He has much to say on the time that is required for thorough foreign study, on the class of young men that should be chosen, and so on. But we have no space to parsue the subject further.

Dr. Tanaka Seihei contributes a long assay to

Japanese on the possibility of developing the art here as it is known and developed in the West. Dr. Tanaka writes as a specialist, being undoubtedly the greatest Japanese authority on this subject. His article covers some 14 pages of the Magazine. Dr. Ueda Mannen writes in the same number of the Taiyō on "Stage Language."

The Teikoku Bungaku from the beginning of the year increased its size. The principal contributors to this Magazine are students of the Tökyö Imperial University. Occasionally Dr. Tökyö Imperial University. Occasionally Dr. Inoue Tetsujirö or some other professor gives the Magazine a helping hand. The subjects treated in this organ are mostly foreign literary subjects. Lengthy accounts of the views and writings of various well-known Western authors are given. Like a large number of other magazines issued by schools and colleges, the Teikoku Bungaku is very colourless and commands little respect from the outside reading world. The respect from the outside reading world. respect from the outside reading world. The January number contains some verses which record the impression of Mr. Tsuchii Bansui while travelling in Europe. Mr. Tsuchii is considered to be one of the ablest of Japan's modern versifiers and among students he has many admirers. Some years ago he wrote a good deal; but after taking to humdrum teaching, the poetry went out of him, as it has gone out of many other schoolteachers. His European tour seems to have had the effect of arousing the muse afresh.

To the same number of the magazine Dr. Inoue Tetsujirō contributes an article on the "Future of

Tetsujiro contributes an article on the "Future of Japanese Music." Dr. Inoue is of opinion that

Japanese Music." Dr. Houe is of opinion that nusical taste in Japan needs much more cultivation than it receives. He by no means endorses the despondent views held by some in reference to the capabilities of the Japanese in this direction. But he does not agree with Dr. Tanaka in thinking that the best plan to adopt to the inner large analysis. Tanaka in thinking that the best plan to adopt is to ignore Japanese music altogether and instruct young people in the art as it is practised in the West. Here Dr. Inoue's conservatism comes in and he writes, "Our music is part of our very selves. It was evolved out of Japanese human nature. To despise it is impossible. It must be improved and developed." Dr. Inoue admits that for centuries Japanese music has undergone no development whatever. The defects of the Japanese system of music be sets down under eight headings as follows:—(1) Its very limited scope. Vocal and instrumental music alike are still in a most elementary stage. The standard is decidedly very low. (2) It is monotonous. The same sounds occur so repeatedly that the ears get wearied of hearing them. (3) It has only melody, no harmony (Ketcho) arite, wacho naki koto.) (4) It is without a system of notes. (5) Japanese instruments are of the rudest kind and no development has taken place in this line for centuries. (6) The training of the wice is not understood in this country and hence is most defective. (7) Our song composers have always occupied a low level. There is no submost defective. (7) Our song composers have al-ways occupied a low level. There is no sublimity about the words that are sung to the ac-companiment of harp and samisen music. As for samisen songs they are most of them obscene and quite unfit for the ears of refined ladies and gen-tlemen. (8) The method of teaching music is very defective. Dr. Tanaka agrees with me, says Mr. Inouye, in reference to Nos. 4, 7 and 8 of the above-named points. The question of the future of Japanese music depends entirely on whether or not these 8 defects can be remedied. If they are irremediable, then Japanese music is doomed.

The Teikoku Bungaku (January number) prints an English contribution signed Yone Noguchi called "A Protest Against Modernism: A Japanese with Charles Warren Stoddard," which is full of bathos and much that is quite unintelligible. Some few poetical ideas of the Noguchi type expressed in American slang, the sublime and the ridiculous mixed in unique fashion, will be found in the piece. There are, however, some happy touches, here and there. Here are a few sentences:—"I have been getting rid of the sad the Taiyō on Music, which is a dispassionate review of the present state of feeling among the property of the present state of feeling among the property of the state of feeling among the property of the state of feeling among the property of the state of the state of feeling among the property of the state of the s

abundantly, and keep a few intimate books and circles as well as in the commercial and industrial 'a parrot to swear for fun ')?"

Noguchi's English poems are in circulation in this country, we observe. Some say he is quite mad. Others that he is a great genius. He defies all the laws of English composition; but geniuses have often claimed the liberty to do that, and certainly such a practice is no proof of

Two years ago there was published at Leipsic a book which showed up the seamy side of Russia in such a striking manner that it ran through several editions in a few months. It through several editions in a few months. It attracted the attention of Dr. Gotō Shimpei, who suggested to Mr. Tawara Teijirō the advisability of his translating it into Japanese. This has now been done and the book has just been issued by the Kohumin Shimbun Printing Pressunder the title of Rokoku Ankokumen (The Dark Side of Russia). In the translation it covers 270 pages. It will be sure to command a large sale at the present time, as it predicts Russia's downat the present time, as it predicts Russia's downfall. The author says, "I have no doubt whatever that 100 years hence, if not 50 years hence, Russia will have lost most of her territory in both Europe and Asia. European Russia will certainly tumble to pieces and a number of small states will take its place." The author goes on to argue that Russian policy is not capable of being pursued very much longer. The mere lust of dominion apart from economic pressure is bound to land a country in ruin. England, France, Germany and America desire new territory principally for com-mercial purposes. There is a pressure of populamercial purposes. There is a pressure of popula-tion at home and so they extend their borders. Not so Russia. She has only a population of 5.7 per square mile and yet she is perpetually seizing fresh territory. She is as a greedy as a cormorant. She benefits none of the races which she subjugates. She defies the laws of humanity and the canons of justice alike; she disturbs the peace of the world and oppresses her subjects with heavy taxation. On the altar of her ambition are sacrificed the happiness and welfare of her subjects." The book has much to say on the corrupt state of the Russian army, and on the inability of any Emperor on the throne to rule as he wishes. The state of the Russian army was disclosed to the Germans by a Colonel Grimm, says this book. According to this work Russia is ripe for a revolution and it is bound to come. This has been predicted for the last 50 years; but still Russia holds on. The work has been excellently translated. The narrative flows along in a fascinating way. The book will command a large sale.

By degrees Japan is getting supplied with a (2) The supply of new Government text-books number of valuable dictionaries on technical sub-for the elementary schools.—These books are jects. The Dōbunkan, Jimbochō, Kanda, has needed in April next, and according to informaannounced that it has in the press a very bulky lexicon on Economics. It is to be called the Keizai Daijisho and will appear next July. It is as are needed. Objection has been taken to the to cover no less than 2,500 pages, and hence will hasty manner in which the books have been precertainly be quite exhaustive. In past years we pared, and the compilers have admitted that they certainly be quite exhaustive. In past years we have often called attention to the fact that a very large number of the books issuing from the Japanese press were translations, but during the last 12 months, it seems to us, there has been a distinct advance in literature, in that more original works have appeared. The Dobumkan announces the publication of a valuable work written by Mr. Yoshii Nizō and containing the views of Mr. Matsusaki Zōnosuke on "Coinage and Credit." The work is the result of years of investigation on the subject treated. Mr. Yoshii, in addition to visits paid to England, Germany, and France, was one of the commissioners sent to India to inquire into the state of trade there. The work covers about 800 pages and sells at 2 yen per copy.

The Shōgwō fi-i (Wa-Ei and Ei-Wa) is a handy little dictionary covering 320 pages and selling

The Mögro Ji-t (Wa-Li and Li-Wa) is a namy little dictionary covering 320 pages and selling for 60 sen per copy at the Döbunkan. It was compiled at the office of the Keizai Sekai. A companion work is their Dictionary of Commercial abbreviated terms, (Ei-Wa Shōgyō Ryaku-go Ji i) which is issued by the same house at 40 sen

(somewhere where he could smell the roses for efficiency. It is a great pity that in literary It ruins the best enterprises. The best magazines He on most subjects are now issued by big publish-but ing houses which can afford to sink a little money in order to make their organs permanently successful. The *Taiyō* is now said to pay well, through it did not do so till quite recently. The Joint-Stock Company known as the Kinködö has been for some time past running a number of magazines on special subjects. Among them the Kjoikukai (Educational World) may be said to have been fairly successful. It has now entered on its third year. It commands the services of some good writers and the views to which it gives the greatest prominence are mostly of a practical type. In a recent number we find some well written comments on current educational topics from which we extract the following :

(1) The price of school text-books. there is little doubt that hitherto the profits made by the sale of text-books have exceeded what is reasonable, any attempt on the part of the Mombusho to fix a maximum price for books prepared by private individuals is open to many objections. In the first place when the Department of Education makes the cost of compiling and printing books by a Government bureau the criterion as to the price for which books prepared by private pub-lishers can be sold it adopts a wrong standard. In preparing text-books a Government bureau runs no risks and does everything on a wholesale than the Mombusho official who passes judgment on his work, which is very frequently quite true. The private publisher is involved in many expenses in putting his books on the market not borne by a Government book-publishing bureau. And, moreover, he is never quite certain

tion that has reached us the authorities are not at all sure that they will have as many copies ready as are needed. Objection has been taken to the books for the market are uncertain as to their prospects of success against the State-compiled works, and so the country is likely to fall between two stools, and the Department of Education will have to bear the responsibility of attempting an impossibility in the compilation of text-books.

(3) Schools and their graduates.—It seems to us after wide observation that in most cases education ceases with graduation. The teachers at Government schools seem to think that their responsibility ends when their pupils finish the school course, and consequently they make no bbreviated terms, (Ei-Wa Śhōgyō Ryaku-go attempt to perfect the work of training that has attempt to perfect the work of training that has been commenced in the school. They are content to live and die as mere school teachers and have not the ambition to be leaders of society.

Magazines on education are far too numerous

Magazines on education are far too numerous

narazu, shakai no kyöshi tomo nari uru ni grazu All schools ought to devise some means world the Japanese should carry competition and for collecting their graduates periodically and the division of available forces so far as they do. supplying them with instruction and guidance as

supplying them with instruction and guidance as long as they are willing to receive them.

(4) The lack of energy among educationists.—
The educational world is a very sleepy world.
The majority of school teachers are men-machines, without initiative or originality of any kind.
One remedy for this state of things would be for educationists and religious devotees to join hands.
The latter would certainly put some life into the former and the objects of the two classes of instructors are in the main the same. We should like to see school teachers occupying pulpits occasionally and preachers occupying school platforms. Before the great outside public they should present muited front and endeavour to lead society in the right paths.

The article before us, after discussing other

The article before us, after discussing other matters, enumerates the urgent educational questions of the day as follows:—(1) The alteration of our School system. This question has been discussed ad nauseam, and certain changes are almost universally acknowledged to be most desirable. But there the matter rests. Action was expected But there the matter rests. Action was expected from the present Minister, since he himself advocated certain radical changes, but as yet nothing certain is known as to his contemplated action.

(2) Business Education. This is a topic the importance of which the central and provincial authorities alike fully recognize. The primary, middle, and normal schools ought to have a combined experience of the property o price for which books prepared by private publishers can be sold it adopts a wrong standard. In preparing text-books a Government bureau pruns no risks and does everything on a wholesale business without any sure guarantee of success. (a) He has to chose and pay the author on the chance of success (b) He is not at all certain that his book will be franked by the Mombushö, than is now done. How much of the expense chance of success (b) He is not at all certain that his book will be franked by the Mombushö, than is now done. How much of the expense should be borne by the Central Government and how much by the local Government is a matter that needs readjusting. (4) The extension of general education and its efficiency. The country must be prepared to spend quite a third more author may refuse to give way on the ground that he knows more about the subject treated than the Mombushō official who passes judgprincipal burden of this should be borne by the provinces. To make the local authorities responsible for the increased outlay is the easiest way of solving this question. The general standard of the nation needs raising and this can only be done by making our ordinary general education more effective and better adapted to the times—(s). The question of Taxy beat. about the demand for any one work. If he has times.—(5) The question of Text-books, The some successes, he has many failures. If he is decision to entrust the compilation of text-books some successes, he has many failures. If he is decision to entrust the compilation of text-books lucky enough to publish a work that commands at the model of the publish a work that commands at the model of the publish as well as the profit of the papers that the present Minister disapproves that accrues for his successful venture.

(a) The supply of new Government text-books clusion. As indicated above, the supply for this for the elementary schools.—These books are needed in April next, and according to information that has reached us the authorities are not at the scheme.—(6) School Fres. There is no question that has reached us the authorities are not at the scheme.—(6) School Fres. the scheme.—(6) School Fees. There is no question connected with education that needs more attention than this. The principle that all who can afford it should pay for me high-class education pared, and the compilers have admitted that they will need revision later on, and so it is reported that only a limited number of copies of each work will be struck off. It looks then as though a great many schools will find themselves without textbooks at the beginning of the next academic year. The books hitherto in use are forbidden; and the number of newly compiled volumes is short. The private publishers who are free to prepare books for the market are uncertain as to their their abolition and the number of several as to their prospects of success and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as to their their abolition and the number of several as the several as the privileges they are well as the privileges they are privileges they are the privileges they are the privileges they are privileges they are privile retained. All are agreed, however, in thinking that a new type of inspector is needed. * * *

There is a want of enterprise with the Kyōiku Kohō when we compare it with a magazine like the Kyōiku Sekai. It has jogged along since the year of our Lord 1894 in much the same way from month to month, content to fill its pages with such material as is obtainable without much regard to its interest or suitability. But now and again readable articles are to be found in its pages. Such is a paper by Dr. Vokoi likei

making our system of education more practical, more commonsense in character; but looking at the schools of the country and the students they the schools of the country and the students they turn out, we are obliged to confess that existing school mills produce many theory-spinners, but few practical men. I have made a special study of agriculture and I should like to see a system of education followed which would turn out intelligent practical farmers by the thousund. That our present system does not do. Education, to be worthy of the name should certainly teach children how to read, write and calculate. In this, however, our schools to-day do not show such good results as did those existing 20 years ago. It is the general opinion among those who have looked into this subject that the boys who graduate at Primary and Middle Schools to-day can neither read, or compose as well as did their predecesread, or compose as well as did their predecessors to years ago. Now one does expect practical results from education. Whatever occupation a boy or girl may take to, be or she will feel the need of the means of increasing knowledge by consulting books. We are not sure at all that the Mombusho was wise in prescribing limits to the number of Chinase characters to be used. Contain number of Chinese characters to be used. Certain it is that many of those omitted are in constant it is that many of those omitted are in constant use in general literature. . . . There is a great want of thoroughness with our teaching and our learning. We do not aim sufficiently at being accurate. What many of our students think they know they only half know, and many of them after studying for years are not at all ashamed to make mistakes in the most elementary parts of a subject. The application of learning to real life is something that we as a people have yet to learn. To too many the pursuit of learning is a mere pastime quite disconnected with real life. Our chief aim in education should be to develop One chief aim in education should be to develop the ordinary intelligence of the mind and to teach young people how to apply their minds to any and every subject that calls for consideration.

FIRES.

Fire broke out on Feb. 19th at the village of Nanaura, Hoji, near Kanazawa, destroying forty

Fire broke out on the morning of Feb. 19th at Shingu-machi, near Wakayama, destroying seventy

The Tokyo Button Manufactory and three other buildings were burned down by fire on Feb. 20th at 3.10 p.m. The accident occurred in the factory the cause being the explosion of an inflammable preparation.

Shortly after six o'clock on Sunday evening fire broke out in an empty house at Vamamotocho Itchome near the Race Course road, Yokohama. A very strong gale was blowing from the south at the time, but the firemen managed to extinguish the flames before more than five houses had been destroyed.

Fire occurred on Feb. 22nd at 9.50 p.m. in the office of an Indian merchant at No. 127, Yokohama. It was put out before the flames could extend throughout the building, the result being that part of a sample room only was damaged. The cause is reported to be a small quantity of sulphur which was among the contents of the sample room.

The Yamagata District Court was destroyed by fire on Feb. 22nd at 8 p.m. The cause is reported to be negligence. The business of the Court will be transacted in the Local Court.

Fire broke out on the evening of Feb. 23rd at Hanakawato, Tokyo, destroying six houses. Negligence was the cause.

Another outbreak of fire occurred on the night National observations of the declines of a farmer, S. Leak appropriately responded, expressing his keen Naito, in the village of Tokaido, Toyotama, near appreciation of the kind feeling shown in this Tokyo, destroying the building. A woman was killed. Sparks from the kitchen stove were the and heartily honoured and the pleasing function

DAI NIPPON.

1904.

From my land, a torii on the waves,

- I have charged the rising sun o bear this word to thy sea-born braves, When his long land-course be run:-
- By the shore of all the seas of the earth, Alone have we stood, from the hour of our birth, "And our destinies are one.

- From the Taira of old Japan,
 "In the land where the gods were young;
 From the loins of the Minamoto clan;
 From the Hojo lords who flung
 To the storm the armada of Kubla Khan; From the Tokugawa who ruled the han; " From these are my people sprung.
- I, too, am outpost of the deep,
- "And a sentry to the seas:
 And my dead, too, in thousands sleep
- "Where never stirs the breeze;
 And my land, too, like to thine own,
 A conqueror's foot has never known,
 "Nor slept in servile case.

- Brother, give me thy helping hand, "Brother, stand thou by me, We are the vanguards of the land, "And the first-born of the free,
- I in the East, as thou in the West,
- We are twin-we are twin; and our mother's
- " Is the civilising sea."

James Bernard Fagan, in The Times.

" THE NEW BOY."

"The New Boy" was played again to a crowded and sympathetic house on Saturday evening, the audience including several leading residents of Tokyo. It was matter of favourable comment that the comedy went with a swing from the opening to the close and that Mr. Aslet's Felix Roach was an even more finished piece of acting than at the first performance. He had gained confidence, was more cynically at home in the part, and yet gave no sign of over-study. If Yokohama possessed the prototypes of London's Party and yet gave in sign of over-study. It Yokohama possessed the prototypes of London's pit and upper gallery habitues many of his exits would have been rewarded with a hiss: as it was, would have been rewarded with a hiss: as it was, he was loudly applauded time and again. The Bijou Orchestra were again most delightful and their rendering of the selection from "Hiawatha" was encored. The ladies received many floral tributes at the close, the stage being almost swamped in flowers. Altogether the piece has made a decided hit

Yokohama, February 25, 1904.

Dear Mr. Leak,—We, the undersigned, take this opportunity on the eve of your departure from Japan to express our best wishes for your future happiness and prosperity; in doing so we beg your acceptance of the accompanying gifts as a souvenir of your residence in Japan which we affectionately hope will remind you of the many friends you leave behind.

The presentation was made by Mr. F. W. Thomas in a few well chosen words, and Mr. concluded.

THE LAW COURTS.

THE CASE OF TREASON.

The trial of M. Takahashi, who was arrested at Yokostika on a charge that he was in the Russian tokouna on a charge man he was in the Russian service as a military spy, began on Feb. 20th in the Yokohama District Court before Judge Hadano and Public Procurator Kobayashi.

Mr. T. Yasumura was present as counsel for the accused.

Having stated to the Court the punishment to which the accused is liable, the Public Procurator said that Takahashi was employed for take said that Takahashi was employed for three years past by Commander Roussine, naval attache of the Russian Legation, Tokyo, as a military spy. The accused became acquainted, through T. Hara, who had been employed by the Russian Legation on the same service, with the clerks K. Hasegawa of the Yokosuka Naval Station and C. Seno of the Maidzuru Naval Station, whom he requested to furnish to him on behalf of the Russian officer details of naval secrets. He naid requested to infinish to min on benait of the Russian officer details of naval secrets. He paid them yen 5 per month as postal expenses and paid also compensation to them. The clerks agreed to his proposal, but privately they laid all the letters from the accused before the authorities whenever these were received. The employees then gave the accused some information employees then gave the accused some information which were considered not to be secrets of naval affairs, which the accused furnished to the Russian officer in Russian. The Public Procurator added that after enquiring at the Department of Foreign Affairs, he understood that the name of the accused was not recorded in the Department as an interpreter of the navalettaché of the Russian an interpreter of the naval attaché of the Russian Legation, though the accused insisted in the pre-liminary examination that he had been so employed.

The Court examined the accused. He stated that he was employed by the Russian Legation in Inat he was employed by the Russian Legation in July, 1895, on the recommendation of Kawasumi, one of his friends, who is connected with the Russian (Greek Church) mission. He was thereafter removed to No. 72 Bluff, Yokohama, where the Russian naval officer was staying. He was educated at the Nicholai Mission School for seven years after which he was any seven wars after which he was any seven was a first which he was any seven was a first which he was any seven was a staying. the Russian beautiful deducated at the Nicholai Mission School for seven years, after which he was engaged in the service of the Church. Accompanied by a Russian Missionary, the accused went to in February for a little over a year. In February large here Siberia for a little over a year. In February, 1901, Commander Roussine arrived here to take the place of the previous naval officer and also lived at No. 72, Bluff, Yokohama. The accused was employed to make extracts from Bijou Orchestra were again most delightful and their rendering of the selection from "Hiawatha" was encored. The ladies received many floral tributes at the close, the stage being almost swamped in flowers. Altogether the piece has made a decided hit.

PRESENTATION.

An interesting presentation was made on Thursday afternoon to Mr. F. T. Leak upon his approaching departure for home. Mr. Leak has resided in Yokohama for some years and in the capacity of Hon. Secretary of the Yokohama Sacrom of Friends. The presentation took the form of a handsome pair of silver boxes (cigar and cigarette) with ornate relief work, each of which bore the inscription:—"To F. T. Leak, from his Yokohama Friends, 1904" The gift was accompanied by a brief address, signed by the subscribers, which read:—

**Nous Manual station, called on the accused, when the latter asked him to furnish information as to naval affairs which was not publicly known. The request was entirely meant to be a joke. The accused stated that on the introduction of T. Hara, who had been in the service of the Russian Legation, the accused became acquainted with Hasegawa. He was paying yen 5 per month as postal expenses besides compensation, of which the amount was not fixed every month. Having been shown a letter of the accused addressed to Hasegawa, accused stated that in 1902, he obtained a plan of a new road in Yokosuka constructed from the railway station, and about the same time he asked Hasegawa to found the same time he asked Hasegawa to found the station, the movements of the torpedo-boats and warships, the armament of the Navy, the commanding officers, general views on the naval force, etc. These instruction were Navy, the commanding officers, general views on the naval force, etc. These instruction were prepared by the Russian officer who employed accused. Hasegawa, however, did not reply. In the same year the accused received from the same year the accused received from Hasegawa a report regarding the replacement of the guns on board the Hashidate. The accused used a false name, Inaba Tokusaburo, whenever he wrote to Hasegawa. He also asked Hasegawa for detailed plans of the Maisrishing and other training them. The accused called S. Sear other training ships. The accused asked S. Seno, an employee of the Maidzuru Naval Station for

reports as to naval secrets.
The Court rose for tiffin.

At 1 p.m. the trial was resumed when the Public Procurator introduced several letters which the accused wrote to Oshima, an employee of the Saseho Naval Station, which evidence was also similar to that in the cases of the foregoing naval employees. The accused stated that at the reemployees. The accused stated that at the request of his employer, he wrote letters to Oshima and Seno to furnish general information with reference to the construction of dockyards and to the harbours of Takeshiki, Tsushima, and Saseho, etc. The accused was simply a go-between for the Russian officer and the Japanese, translating into Japanese and into Russian.

The Court showed accused the whole evidence including many letters written by him and the statements of witnesses, and summarized their

Counsel for the defence asked the Court for leave to examine Mr. Ikariyama, Chief of the Kagacho police, and Sekimoto, a detective of the same station, on the ground that they had been connected with the accused in some secret matter.

The Court rejected the application. Counsel thereupon asked the Court to examine the accused as to whether the two police officers were con-nected with him and further asked the Court to close the Court during the examination which counsel considered to be injurious to public order.

After a consultation, the Court decided to exclude the public.

This was at 2,20 p.m.

The Court re-opened in about an hour, when the accused stated that while employed by Commander Roussine he took notice of the Japanese who called on the Russian officer. Whenever he saw a suspicious one, he always informed Mr. Ikariyama, the Chief of the Kaga-cho police. He believed himself that he was performing rather a patriotic action and certainly no such ugly cou-duct as that of a *Rotan* (Russian spy). The accused added that he was always concealing and destroying such information as he considered to

The Public Procurator stated that the accused this preferement the apostle party. To obtain was in the service of the Russian officer as a spy to the regular fares.

There is a strong possibility that Miss Ada Rehan may become Sir Henry Irving's leading shameful conduct and to avoid the suspicion of the authorities. The Public Procurator summarized lady next season. Sir Henry has made Miss authorities. The Public Procurator summarized the evidence consisting of over fifty letters written by the accused, and contended that the accused should be punished with eight years' minor con-

Counsel for the defence asked the Court to

acquit the accused.

M. Takahashi, who was charged with being in the service of Russia as a military spy, employed by Lieut. Commander Roussine, naval attaché of the Russian Legation, was sentenced on Feb. 23rd at 10.30 a.m. in the Yokohama District Court before Judge Hadano, to eight years' minor confinement.

The Judge read a lengthy statement as to the reasons for the sentence, summarizing the evidence, which consisted of letters written by the accused and of the statements of the gendarmerie officers who arrested him at Yokosuka and the other witnesses, which documents were produced at the trial.

The Court was filled with a crowd of auditors

including the wife and female servant of the accused. After the reading of the sentence by the Judge, cries of "zama miro!" ("what an unbearable sight!") or "ii-hibida!" ("serves him right!") were shouted in the Court.

JOVANSEN v. CLUB HOTEL.

This case, in which the plaintiff claims yen 90.48, came up again in the Yokohama Local Court before Judge Yei-iri on Feb. 20th, when judgment was delivered rejecting the claim of plaintiff with costs.

LIBEL CASE.

The trial of the libel case filed by Mr. A. Hofmann, Kobe, against three Tokyo papers, the Niroku, Hochi, and Yorodzu was concluded on Feb. 23rd in the Tokyo District Court. Sentence will be delivered on the 27th at 9 a.m.

FORGING POSTAL MONEY ORDERS.

C. Fukushima and T. Ichimura were sentenced on Feb. 24th in the Tokyo District Court to six years minor confinement each. They bought several postal money orders of sen 20 each at various times since September last and having They bought

CHARGE OF PERJURY.

S. Adachi (44) who was charged in the Honolulu Court, Hawaii, of having a ade a false statement in November last when he was being examined as a witness and afterwards fled to Yokohama, was arrested on Feb. 22nd by the Harbour Police and delivered to Mr. Hendry, U.S. Marshal, who arrived here to take over the accused. The latter was taken on board the steamer Siberia, which left on Feb. 24th for the islands. It appears that after accused left Honolulu the U.S. authorities asked the Yokohama police by telegram to arrest him. On Dec. roth the Harbour Dolice arrested him and detained him for sixty days awaiting the arrival of a U.S. officer to receive him. After the expiration of that period, as provided by law, the Japanese temporarily released the accused, but kept him under surveillance. On Calgary for Calgary for the U.S. officer arrived with a warrant calgary for the U.S. of the control of t Feb. 11th the U.S. officer arrived with a warrant for his rendition.

However, in order to give the owners of such cards reasonable time to dispose of those on hand, they will be accepted for mailing until July 1, 1904, upon payment of postage at the proper rate. On and after July 1, 1904, such cards will be treated as unmailable at any rate of postage.

writer in the New York Sun declares that "Chicago is undoubtedly the wickedest city in the world." Chicago's murder record has ever been a black one, but the figures for this police year are appalling. So far as such crimes go, 1903 is certainly her black banner period. In 1902 136 murders were admitted by the police to have occurred there, while many a fractured skull case at the hospital docketed "cause of ac-cident unknown," might well have been charged up to sandbags or to bludgeons. But merely those cases reported in the newspapers for 1903, up to Dec. 28, numbered 158.

The Secretary of the United States Navy, Mr. Moody, has received from the General Board of the Navy a recommendation that a strongly fortified coaling station be established at Kiska Island, in the Aleutian chain. According to the board, the place is of greater strategic value than The plans any other point in the North Pacific. provide for storing 100,000 tons of coal or four times as much as can be stored at San Francisco, and the estimated cost of the work is \$1,500,000. There is a fine harbour in Kiska Island, and a natural breakwater for this is formed by Little Kiska Island. Kiska Island is in the main pretty incident of the retirement of the former and Aleutian chain, 500 miles west of Dutch Harbour.

strategical importance.

One of the most notable scientific institutions in the United States was established as the result of the bequest of an English scientist and phi-lanthropist who, after spending much of his time in travel upon the European continent, died at Genoa, in Italy, in 1820. We refer to the Smith-Genoa, in Italy, in 1829. We refer to the Smith-sonian Institution in Washington, established in 1846 in pursuance of the bequest of Mr. James Smithson, which became available in 1835. The dead man slept in the quiet birthplace of Columbus for almost three-quarters of a century, but his remains have lately been brought to the United States. They will be interred in the national capital within sight of the great institution he founded, and in time a monument will be erected which will commemorate in a fitting way the story of his benefaction, which has done so much to carry out the desire of its founder "for the increase and diffusion of knowledge among

Part I of the report of the Bureau of Statistics of New Jersey for 1903, contains the statistics of manufactures of the state for the year 1902. Among the industries for which figures are given, the most important in the number of persons employed, capital invested and value of products employed, capital invested and value of products is the silk industry. Including the dyehouses and throwing mills, there are 165 establishments engaged in the production of silk goods. The aggregate amount of capital invested in all the establishments is \$24.872,624. The aggregate value of stock or material used is \$27,389,826. The principal item of stock is raw silk, of which 5,087,192 pounds, valued at \$21,380,045, was used. The total selling value of the goods produced reached the sum of \$47,849,603. The average number of persons employed during the year was 14,068 males and 12,022 females. The total amount paid in wages during the year was \$11,089,184.

According to the Textile prom, textile mills were put in operation in the United States in 1903. This, with the exception of 1900, when 400 mills were erected, is the largest annual total on record. The new mills for 1903 are distributed among the different branches of the industry in practically the same proportion as in 1902. Each branch—cotton, woollen, silk, hitting and miscellaneous—shows an increase in the Orthodox Church and its saints, and exalt the virtues of Christian self-sacrifice and renunciation of worldly goods and prosperity. Literary and According to the Textile World, 334 new textile mills were put in operation in the United

Total......334 262 255 400 245 134 230 Of the eighty-one new cotton mills, forty were located in the south and forty-one in the north.

The spinning capacity of the new southern,
281,752 spindles, is more than double that of the northern mills. Many of the new mills, especially in the north, were equipped without spindles, for and similar fabrics that do not require the spin-ning process. For this reason the number of mills is relatively larger than the number of spindles. A marked feature of the cotton mill construction in 1903 was the large number erected for the in 1903 was the large number erected for the manufacture of yarn and batting from cotton waste. The tendency for mills to concentrate in districts where manufacturing is already established is shown in 1903 by the fact that Georgia, North Carolina, South Carolina and Alabama are in the lead in cotton mill construction in the south. The total number of cotton spindles (416,752) installed last year is below the average for the past seven years. More new woollen mills were completed in 1903 than in any of the previous eight years. previous eight years.

In 1903 the total pine lumber cut in Michigan, Wisconsin and Minnesota aggregated 4,791, 552,000 feet, as compared with 5,294,395,000 feet in 1902 and 5,336,448,000 feet in 1901. Presumably the fiscal policy of Mr. Chamber-lit passed, until the Revolution, into the possession of the Duc de Luynes. A large number of curios eet in 1902 and 5,336,448,000 feet in 1901.

The General Board regards the island as of great Following figures, copied from the American note Lumberman, give the cut for important years :-

1903 ... 4,791,853,000 1896 ... 5,725,763,035 1902 ... 5,294,395,000 1895 ... 7,050,669,235 1901 ... 5,336,448,000 1894 ... 6,821,516,412 1900 ... 5,485,261,000 1893 ... 7,326,263,782 1899 ... 6,056,508,000 1890 ... 8,597,623,000 1808 ... 6,155,300,200 1877 ... 3,595,333,496 1897 6,233,454,000

Stocks of northern pine on hand at the close of 1903, constrated with preceding years, were 1,964,562,000 feet, compared with 2,112,719 000 1,904,502,000 inet, compared with 2,323,605,000 in 1902, 2,388,256,000 in 1901 and 2,839,605,000 in 1900. That is going back far enough to cover the boom in the lumber trade beginning with 1900. Stocks on hand at the close of 1903 were less by 148,167,000 feet than they were at the close of 1902, 423,704,000 less than at the close of 1901 and 875,153,000 less than at the close of 1900. During these four years the output declined 693,709,000 feet. A feature of the shingle production in the old white pine States is the fact that the totals from 1890 to 1903 have not shown that degree of decline that pertains to the out shown that degree of decline that pertains to the out put of lumber. The falling off during the thirteen years named was 1,978,123,000 the product in 1890 having been 4,320,325,000, and in 1903, 2,342,202,000. During the thirteen years there was much fluctuation from year to year. In 1826 the total fell to 1,886,063,000. In 1897, 1892, 1893, 1897 and 1898 the totals were in the three billion class, in 1895 the product was 2,093,367,859, and the total has now risen to 3,000,000,000 since 1898. Slocks of shingles on hand at the end of 1903 make a heavy showing against 1902, the figures standing for 667,072,000 the close of 1903, compared to 397,815,000 in 1902. In 1903 the production of hemlock reached 1,334,444,000 feet, against 1,277,814,000 feet in 1903 and 1,264,943,000 feet in 1901. The output of northern hard woods amounted in 1903 to 799,734,000 feet, which compares with 730,315,000 feet in 1902 and 790,592,000 feet in 1901.

The compositions are dedicated to the Grand Duke Constantine Constantinovich.

It is evident that the proposal, first made by a It is evident that the proposal, irst made by a Madrid newspaper, that there should be a national celebration of the third centenary of the publication of "Don Quixote," is being enthusiastically taken up in Spain. The date is May of next year, and a Royal decree has now been published associating the King and Government with the movement. It is also announced that a Royal Commission is to be formed on which represent Commission is to be formed, on which representatives of the learned societies will find a place to make fitting preparations for doing honour to the great Cervantes, whose wonderful story is known wherever literature is understood

It is curious that at the very time when Sir Oliver Lodge, whose lecture we refer to elsewhere, was refusing to discuss the medical properties of radium, Mr. Strutt should have been able to announce that he had discovered that able to announce that he had discovered that amazing substance in the waters of Bath. Perhaps it is this which gives that "flavour of warm flat irons" to which Mr. Samuel Weller so strongly objected, and which Mr. John Samauker declared to be the "kallibeate" taste: but however that may be, it may very well be that radium is the most important curative agent in the Bath springs. King Lud seems to have been well ahead of his time in the matter of medical

in its resume of the number of books published in England last year. Although a thousand better than 1902, the total number of books recorded in the past twelve months is about a hundred below 1899 and 1898, and four hundred less than in 1897. Of the year's total of new books and editions of 8,381, novels, tales, and juvenile works taken together once more head the list; while poetry and drama make a quite respectable show. About three hundred sixpenny novels, mainly neweditions of course, were issued

Mr. T. N. Foulis, of Edinburgh and London, is publishing the "Life of Omar Al Khayyami." The author is Persian journalist, who differs on many points from previous writers on this subject, and is the first Persian author to discuss in English comments concerning Omar. He totally disagrees with English and American biographers regarding the poet's parentage, his profession and his philosophy in general, claiming him to be of Arab descent and never to have had anything to do with tent-making. This book should be of interest to those who are students not only of Omar but of Persian literature. There will be further interest in the decoration of the volume which is Persian, while on the vellum cases for the very limited edition de luxe the decorations are being prepared in Persia by native artists.

It is now rather more than twelve months since M. Sven Hedin returned to Europe from his long expedition of exploration in Chinese Turkestan and Thibet, which lasted from the summer of 1899 to that of 1902. Two volumes just published by him give a full account of his wanderings and his geographical discoveries, which constitute most important additions to science. He found on the confines of Chinese Turkestan, traces of an extinct civilisation, and excavation brought to light coins and other remains, which have been identified as associated with a powerful State situated in the third century, between Turkestan and the Huns, and having as its capital the flourishing city of Lowlan, of which mention occurs several times in Chinese records The country was completely obliterated and buried under the sand storms which about this epoch set in in that region.

The late Princess Mathilde was for a long time on terms of intimate friendship with the great critic Sainte-Beuve. She constantly corresponded with him on literary matters. Estrangement only came when Sainte-Beuve began to write for Le Temps—a journal which in those days professed advanced opinions, which the Princess held in aversion. But they were reconciled again eventually. When Sainte-Beuve was on his death-bed one of his last instructions to his secretary was that if the Princess asked that her letters to him should be returned to her she was to have them. She did ask for them, fearing lest their premature publication by Sainte-Beuve's literary executor might give offence to living men of letters mentioned in them. That was a long time ago, however, and there is probably no reason why the letters should not be made public now.

The Castle of Langeais, in Touraine, which M. Jacques Siegfried, imitating the Duc d'Aumale's example with respect to Chantilly, has announced his intention of bequeathing to the Institute of France, stands on the right bank of the Loire, between Cinq-Mars and Bourgueil. It was begun in the thirteenth century by Pierre de la Brosse, barber to Louis IX., afterwards favourite of Philip Jean Bourré, Minister to Louis XI., the ruler familiar to readers of "Quentin Durward." Langeais is one of the finest existing specimens of the military architecture of that period, having been carefully preserved and restored both by M. Siegfried and its previous owner, M. Baron. It has many historical associations. At one time it was the property of a princess of Lorraine, who sold it to the famous Marshal d'Effiat, the father of the no less celebrated Cinq-Mars, from whose family

castle. There are magnificent chimneypieces of carved stone in the Hall of the Duchess Anne and the Guardroom. Ceilings and panellings of carved wood abound. In one apartment is as-sembled a collection of old French faience; another is full of armour. Ancient articles of furniture, oak chests, coffers, tables, and tapestry are dispersed here and there, and among the numerous pictures are several valuable historical portraits—for instance, me fine one of Catherine de Medici, others of Mazarin's nieces, another of Mile. de la Vallière, and another of Madame de Maintenon, whose sedan chair is also preserved here. All these things and many others are to be included in M. Siegfried's princely bequest.

Sir Hubert Parry, who has been recalling some pleasant talks on musical matters which he had with Herbert Spencer, has managed to crowd a remarkable amount of work into his life of fifty-five The present Director of the Royal College of Music, he has examined and lectured much outside the College, he has contributed volumin-ously to Grove's Dictionary, besides publishing important volumes on his own account, while his achievements in composition are, of course, of the first importance. At Highnam Court, Gloucester, Sir Hubert Parry has a charming country residence, which was purchased by his father, the late Mr. Gambier Parry, from an old West of England family named Guise. On his father's side Sir Hubert is descended from the great naval family of Gambier whence perhaps he derives his love of the sea, while his mother was the daughter of Mr. H. F. Clinton, the historian, and author of valuable works on Greek and Roman art.

An amazing story is told in the Odessi Listak dealing with the bigotry and prejudice feit among certain classes in Russia against Tolstoy. While during the summer months, he was spending the summer in Gashra, on the south coast of the Crimea, he occasionally visited a relation, a lady occupying a flat in the well-known seaside health resort of Yalta. On one occasion during a visit the great writer was taken suddenly ill, and was compelled to take to his bed for several days. No sooner did the owner of the house, a wealthy widow, hear of this than she at once came to the flat in a rage and commanded that "that godless, excommunicated fellow" be turned out. This being naturally refused, she applied to the police to carry out her wishes. When they declined to interfere, she engaged a band of itinerant musicians to play all day beneath the window of the sick room, while her servants were sent on the roof of the house to beat upon it with sticks, or to spring rattles in the rooms nearest to that in which Tolstoy was lying. In the end, so excruciating became the din that the great writer had perforce to be carried to less noisy quarters, lest his life should be endangered.

NOTICES TO MARINERS.

His Excellency Oura Kanetake, Minister of State for Communications, gave notice on Feb.

oth, that a Fog Siren has been established at
Tairadate Lighthouse, Province of Mutsu, and it
will be sounded, during thick or foggy weather,
giving one blast of 3 seconds' duration separated by silent intervals of 42 seconds, on and after February 20th, 1904. And also that Kawara-su Buoy, southwestward of Hiroshima, Shiaku-seto, Inland Sea, has been temporarily withdrawn, owing to damage. The Buoy will be replaced in its position on an early date of which due notice will be given.

Under date of February 15, the Minister of State for Communications gives notice that "according to the case necessary some lights of the Japanese coasts shall be temporarily extinguished." Two days later he announced:

Notice is hereby given that on and after February 25th, 1904, a Fixed White Light will be exhibited from a structure erected on Yakataishi Rock, northward of Vetajiuna, Hiroshima Bay, Inland Sea.

The Light having 80 candle power will illuminate

the entire horizon.

The Beacon is built of stone, conical in shape, painted red and surmounted by a Fixed White Light.

The Position of the Beacon according to the Lande Both 34° 17' 47'' (approx.) Longitude East 132° 28' 33'' (approx.)

On the same date the temporary light will be dis-

continued.

Note:—The Beacon is not in constant supervision. Should the light go out by accident there may be some delay in relighting it.

NEWS OF THE WEEK.

The German warship Thetis arrived on Feb. 22nd at Chemulpo.

Marquis Ito left Tokyo on Feb. 22nd for Oiso by the 8.30 a.m. train.

The M. M. Ernest Simons recently did the run from Kobe to Woosung in 50 hours, or at the rate of 18 knots an hour.

Major-General Kojima, in reserve, died on the night of Feb 22nd. The illness is said to have been apoplexy. He was sixty years of age.

Mr. M. Morita, director of the Commercial and Industrial Bureau, left Tokyo on Feb. 22nd for Seoul and China. His business is not stated.

The Department of Communications has decided that post parcels for Pyong-Yang and Chinnampho, Korea, will not for the present be accepted.

The prizes secured at Chemulpo after the naval engagement were brought on Feb. 22nd to Tokyo. These will shortly be exhibited at the Yushu-Kwan, Kudan.

According to telegrams, Nagano, Yamanashi and several other prefectural assemblies have decided to reduce their local expenses in consequence of the present crisis.

Shichi (31) the wife of a blacksmith, at Morishita-cho, Asakusa, Tokyo, committed suicide on the night of Feb. 20th by drinking nitric acid. Temporary insanity is reported to be the cause

Mr. R. Omura, Manager of the Hakodate Dock Company, and six others were ordered on the night of Feb. 22nd to leave Hakodate on suspicion of having been in the service of Russia

A Straits paper states that during the present snipe season in Perak, which is coming to a close, one sportsman reports having accounted for 48 birds with 52 shots. Can any Japan sportsman equal this?

Queen Alexandra has again contributed to the funds of the Salvation Army, and both the Queen of Holland and the Queen Mother have just given contributions to the work of the Army in the

The Lady Nurses' Society sent a hundred cases of biscuits by the hospital ship Kosai Maru, which left Yokohama on Feb. 22nd for Chemulpo, to be presented to the Russian sufferers now being treated at the Japanese hospital.

The Nichi Nichi's Osaka correspondent states that some foreigners and Japanese employed by Russia — military spies are now in that city. They are sending their information to foreign ships lying at various ports of the Empire.

Mr. Sudzuki, Public Procurator of the Yoko-hama District Court, has been removed to the Niigata District Court, and Mr. S. Kobayashi Public Procurator of the Maebashi District Court is appointed to fill the vacancy at Yokohama

Major-General Uyehara, who has been paying wisit to Great Britain, Germany and France to The real secret to Britain's position amongst the investigate foreign military affairs, returned on nations of the world, in the Viscount's opinion, Feb. 17th, arriving at Kobe by the French mail is her love of justice and her laws and the sincerity steamer. He immediately left by the train for of her citizens Tokyo.

The elevation of the light above the sea will be to the Minister for Agriculture and Commerce to 12 feet, and in clear weather it will be seen for a appoint special correspondents at London, New distance of 8 nautical miles.

York, Lyons, Bombay and other important business. ness centres in order to secure information with regard to business, fashions, conditions of supplies, etc. The Guild intends to spend yen 25,000 per annum for the purpose.

> The Governor of Nagasaki telegraphed on Feb. 23rd that two cases of small-pox were found* among the fugitives who arrived there by a steamer from Vladivostock via Tsuruga. They were immediately removed to hospital.

> Lieut. Boyle on Feb. 23rd donated two thou-sand yen towards the fund for relieving distressed soldiers, through Mr. Ozaki, Mayor of Tokyo. At the same time, he also presented thirty-three yen, which amount had been contributed by the foreign sailors of the Kasuga and Nisshin for the same purpose.

> A telegram from Takeshiki reports that a Japanese torpedo boat (destroyer) was passed on Feb. 23rd off Hirato, by an American steamer (Korea) which was steering in the direction of Shimonoseki. The passengers of the latter, including many foreign ladies, waved their handkerchiefs and cheered the war vessel.

> A button dealer, M. Suda, found on the night of Feb. 23rd, at Ginza, near Shimbashi station yen 75 and a bank pass-book showing a balance of 100 9,900 and sent the property to the Kyo-bashi police station the following day. It was found that the money and book had been lost by Mr. J. Helm, No. 42, Yokohama. The police delivered the property to the owner.

> The Chief of Police of Kanagawa-ken, issued, on Feb. 19th, the following instructions, forbidding us to publish any information with regard to various military matters, as set out below :

> The organization of Divisions, the names of high officers, including Commanders-in-Chief and staff officers connected with the forces.

2.—Transportation of troops of the various divi-sions by land or sea.
3.—Th∎ departure of trains carrying troops.

4.—Destination of troops carried by trains.

5.—The names of places where troops from the arious divisions are concentrated or the place of their

departure.

6.—The movement of transport ships and names of commanding stations.

Before his departure from Bizerta for the Sues Canal Admiral Wirenius, in command of the Russian squadron, made one or two observations of some interest to the superior officers of the French Navy, who had gone to bid him farewell. He said that in any event the present crisis would have the effect of greatly hastening the full re-alisation of two of Russia's principal ideals of Naval policy in the Far East. These are to convert Vladivostock and Port Arthur into the two most important Naval arsenals in the Empire, each having a fleet of corresponding strength depending upon it as a base. As a direct result of the present crisis, this project will be fully realised before the end of 1905.—What does Admiral Wirenius think now?

In the course of an interview which appears in Cassell's Saturday Journal, Viscount Hayashi, the Japanese Minister in London, says:

the Japanese Minister in London, says:

There is something solid and dignified about the average Brition that never fails to impress me; England is so progressive. As a city I consider London unique. In the first place it is so large, yet so orderly and well-governed. It is an example of what your laws, the love of justice, and the loyal spirit of a great people towards their country and King can produce. As a foreigner from the Fac East, I can assure you that London at once arrests attention. I know Paris is a fine city; so is Berlin, and, for that matter, St. Petersburg; but as an example in city governmentship, if I may use that term, London is a study.

The real secret to Britain's position amonest the

In the little Slum Halls situated in twenty-four The Yokohama Silk Union Guild has applied of the meanest streets in London the Salvation

Army every morning this winter has been sup-plying farthing breakfasts to hundreds of hungry boys and girls. From a description in the Social Gazette of some of the scenes witnessed at these feasts we take the following :-

Feb. 27, 1904.]

"Can't you bring any sort of a cup?" asked the Captain of one little fellow. "No," was the somewhat short reply. "But haven't you a small basin, jug, or anything at home that will hold the cocoa?" again queried the Captain. "No!" he said, hanging his head. "It's true wot'e sez, Captin," chimed in a little chap who was standing by, "'cos'e an' is muver sleeps on the stairs."

The little boy and his mother were homeless, and slept by night on the stairs of model dwellings. The children turn up at these feasts in crowds ranging from seventy-five to 250. The clothes of many of them would form an excellent study in rags, and would be very comical were the fact

In the dim light, as they sit around, their big, black eyes shine out of their thin, pallid cheeks with black eyes since but of their time, paind theeks with startling distinctness. Some of them are fine little fellows. One whom we saw had a head whose shape and size would send a phrenologist into raptures, and whose yellow, tangled locks, blue eyes, and pretty, but, alas! the white face, irresistibly brought to mind the story of Pope Gregory and the young Angles.

The Nichi Nichi states that the Government has decided, for the purpose of meeting the war expenditure, to increase the taxes on land, business incomes, registration, sake, etc. The draft proposals will be brought forward in the coming extraordinary session of the Diet. The increased taxation will be reduced to ordinary levels after the war is over.

THE NAVAL BATTLE AT CHEMULPO.

The Nagasaki Press has received from a resident of Chemulpo the following interesting details of the naval action which terminated in the destruction of the Russian cruiser Varyag and gunboat Koreets:

Chemulpo, February Io.

At 9.30 a.m. yesterday the British Consul sent round to all British subjects an original letter from the Japanese Consul a copy of which I enclose herewith:—

Japanese Consulate, Chemulpo,

February 5th, 1904.

Sir,—I have the honour to notify you that Rear Admiral S. Uriu, commanding a squadron of the Imperial Japanese Navy, who is at present in Chemulpo roadstead with the force under his command, mulpo roadstead with the force under his command, requests me to notify to you that, as hostilities exist between the Government of Japan and the Government of Russia, he shall be obliged to attack the Men of War of Russia, stationed at present in the Port of Chemulpo, with the force under his command, in case of the refusal of the Senior Naval Officer present at Chemulpo to his demands to the Russian Senior Naval Officer present to leave the Port of Chemulpo before noon on the oth February, 1904.

to leave the Port of Chemuipo beiore in on the ght February, 1904.

The above mentioned attack will not take place before 4 p.m. 9th February, 1904.

I have the honour to be, Sir,
Your obedient Servant,
(Signed) Moroshino Kato.
His Imperial Japanese Majesty's Consul.

At 11.30 a.m. the Russian 1st class cruiser Varyag

At 11.30 a.m. the Russian 1st class cruiser Varyag and the gunboat Korrets steamed out of the harbour and at 11.50, when they were nearing Round Island, the fighting commenced, the first shot being fired by the Varyag.

It was, unfortunately very misty, but calm with intermittent sunshine and there was a light easterly breeze. With glasses we could only see the fight at intervals. While it lasted the fighting was very severe, chiefly 6-inch and 9-inch guns being used. At 12.20 p.m. the Varyag and Koreets were seen to be returning to port as quickly as possible, the former with a decided list to port of aboutseven degrees, and by 12.40 the fight was practically over. The Koreets was not damaged at all and there were no casualties on her. the Japanese having evidently concentrated the whole of their attention on the Varyag, which was terribly knocked about, both the upper and lower bridges were shot away, the funnels riddled with bullets, most of her guns put out of action, and two large holes made in the port side, one just below the water line being undoubtedly the cause of her listing over. The casualties on the Varyag were 1 officer and 40 men killed, 4 officers and 60 men seriously wounded of whom 9 have since died.

The Albanian insurgents have been routed, losing 800 killed and wounded. The Turkish loss is also heavy.

THE LAST TORPEDO ATTACK.

London, February 19.

The Tsar has issued a manifesto bitterly inveighing against Japan, and declaring that smuch time is now necessary in order to strike blows worthy of the dignity and might of Russia. But, the manifesto adds, Japan's creachery and provocation will yet be avenged a hundred fold.

FIGHTING IN THE BALKANS.

The Albanian insurgents have been routed, losing 800 killed and wounded. The Turkish loss is also heavy.

THE LAST TORPEDO ATTACK.

London, February 20.

The only Russian men-of-war passed Gottland (Sweden) on Feb. 12.

notes. The speed was then reduced to to knots, to enable the hand steering gear to be used effectively. To maintain the fight at such a low rate of speed was impossible and the only course open was to return to port, which she did, and the wounded were then transferred to the Elba, Riseal, and Talbot.

then transferred to the Elba, Ruscal, and Talbot.

A few minutes before 4 o'clock, the time when Admiral Uriu intended to renew the attack in the harbour, the Japanese fleet appeared to be about to enter the harbour, witen precisely at 4 o'clock the Korects was blown up. The Japanese ships then retired, but continued to watch the Varyag which was gradually listing more and more to port. At 5 p.m. she was seen to be on fire and an hour later she heeled over and sank. She now lies on her port side and at low tide this morning two of her starboard guns were clearly in view.

Immediately after the Varyag sank the Russian steamer Songaru was seen to be on fire and at 2 o'clock this morning she also disappeared.

They all lie in shallow water and the recovery of the Varyag should not be a difficult task.

When the Varyag and Korects steamed out to what, in the face of such enormous odds, was certain destruction, the crews from the men-of-war in port

destruction, the crews from the men-of-war in port cheered them again and again and when the Koreets was blown up the band of the French cruiser Piscal

was blown up the band of the French cruiser Piscarl played the Russian national anthem and the Russian sailors on board the neutral ships went on their knees. Although the fight took place eight or nine miles from the shore, some of the windows in the settlement were broken by the vibration caused by the firing of the heavy guns.

The suspense between 1 and 4 o'clock on the 9th was very trying to us on shore, for during the previous night the Japanese transport landed 2,500 troops, who are lodged in the houses in Chemulpo, and it was thought to be a question whether the Russians would or would not first bombard the Japanese settlement and then go out to meet their fate Had the Russian ships remained in port and not accepted the Japanese challenge, it is the general impression that the Japanese Admiral would not have dared to have attacked them in harbour for fear of damaging the other foreign men-of-war. fear of damaging the other foreign men-of-war.

TELEGRAMS.

(REFER'S SPECIAL SERVICE)

ADMIRAL MAKAROFF TO COME EAST.

London, Feb. 19th. Admiral Makaroff has left St. Petersburg to supersede Admiral Starke in the com-mand of the fleet at Port Arthur. He is accompanied by a large staff, including engineers and naval architects.

MR. MARK HANNA'S DEATH. Mr. Mark Hanna is dead.

CHINESE LABOUR IN THE TRANSVAAL.

Mr. Samuel's amendment to the address, opposing the importation of Chinese labour to the Transvaal, has been rejected. The Transvaal is now enabled to proceed with the importation of Chinese.

RUSSIAN SHIPS FROM THE BALTIC

Six Russian men-of-war passed Gottland

strike blows worthy of the dignity and might urges them both not to let their inclinations of Russia. But, the manifesto adds, Japan's carry them beyond what is proper.

go full speed astern to save her from running on the struck and slightly damaged the Volunteer steamer Kasan. It is believed that the warship torpedoed was the cruiser Boyarin.

THE RUSSIAN RED SEA SQUADRON.

London, February 21.

A Squadron, believed to be Russian, coming from Jibouti, passed Perim, going northward. This coincides with the St. Petersburg report that the squadron has been ordered home.

ITALIAN REINFORCEMENTS.

The Italian cruisers Calabria, Carlo Alberto, Lombardia and Dogali have been ordered to the Far East.

MORE RUSSIAN RECRIMINATIONS.

The Russian official statement formally charges Japan with violating international law by making a series of revolting attacks before making a declaration of war. Viceroy Alexieff has been ordered to defer

his departure for Harbin until Admiral

Makaroff arrives.

RUSSIA AND AMERICAN CONSULS.

London, February 21.

Russia has informed the United States that she will not grant an exequatur to Mr. Morgan as U. S. Consul at Dalny, because she desires to have no foreign officials in the Liaotung peninsula during the war.

THE TSAR'S MANIFESTO.

The remarkable wording of the Tsar's Manifesto, admitting implicitly the unpreparedness of Russia and foreshadowing a long delay before decisive action is taken, has been much commented on.

The Times considers this means a war of exhaustion, and another wholesale retreat similar to that of Moscow (during the wars of Napoleon) leaving Port Arthur and Vladivostock isolated. It observes that this is a great resolve, but its success depends upon the will of the enemy.

THE BALKANS.

Later.

It is semi-officially declared in Vienna that Russia's interests in the Balkans is rather intensified than diminished by the latest turn of events. The idea that the war in the Far East prevents Russia from co-operating in the pacification of Macedonia is unfounded.

KUROPATKIN MADE COMMANDER-IN-CHIEF.

London, February 22.

An Imperial Ukase relieves General Kuropatkin of his position as Minister of War and appoints him to the post of Commanderin-Chief of the Russian Army in Manchuria.

FRENCH RELIEF MEASURES.

All the French newspapers have opened subscription lists to relieve the Russian sick and wounded.

FRENCH OPINION.

Le Temps has published an article laying stress on the anxiety of both Great Britain and France to remain aloof from the war. It

A BOURSE PANIC.

There was a panic on the Paris Bourse on Saturday owing to various baseless rumours that Italy, Germany and France were mo-

THE CAPE CABINET.

London, February 23.

The new Cape Cabinet has been formed, with Dr. Jameson as Premier.

RUSSIA'S SQUADRON STOPS P. & O. STEAMER

Reuter's correspondent at Aden wires that

the P. and O. steamer Mongolia encountered a Russian battleship and four destroyers in the Red Sea. A destroyer tried to cut-off the Mongolia but failed, and then the whole squadron chased her, but being unable to overtake the steamer, signalled her to halt, whereupon the Mongolia stopped. troyer approached and scrutinised the Mon golia, after which it signalled: "Beg to be excused."

明治计五年三月廿日第三種郵便物證可

[Note—There can be little doubt that the P. & O steamer was mistaken for one of the Nippon Yusen Kaisha's London liners, the P. & O. Company and the N. Y. K. pursuing a very similar style in painting their ships, the white line from stem to stern being identical.—ED, f.M.]

ANXIETY IN EUROPE.

The war is evidently exciting apprehen-on among neutral Powers. Sweden is sion among neutral Powers. mobilising troops and fortifying her coasts; Spain is sending considerable re-inforcements to the Canaries, and is otherwise preparing; Portugal is sending the Vasco da Gama to the Far East and appears to contemplate mobilization.

RUSSIA ON THE PAMIRS.

It is announced in St. Petersburg, in connection with the departure of General Wanoff for Turkestan, that the Russian troops in the direction of the Pamirs are to be consideraby reinforced.

THE "SMOLENSK."

The transport Smolensk has re-entered the Canal and is steering homewards.

THE QUESTION OF CHINA'S NEUTRALITY.

London, February 24 Russia and Japan, replying to the United States, announce that they both are prepared to respect the neutrality of China outside Manchuria and the actual seat of war.

SCARCITY IN VLADIVOSTOCK.

All civilians in Vladivostock have been ordered to leave owing to scarcity of food. The Government is taking everything available.

RUSSIA'S NAIVE ALLEGATIONS.

London, February 24. Russia has sent a Note to the Powers, in which she charges Japan with a violation of the law of nations in connection with the engagements at Chemulpho and Port Arthur.

ORDERED HOME

Admiral Wirenius' squadron, including the transports, has been ordered home.

A STRANGE OUTBREAK.

M. Muravieff, Russian Minister of Justice. when delivering judgment as President of the Hague Tribunal in the Venezuelan case, which was argued, before the Hague Court of International Arbitration, referred

disparagingly to the Japanese pretensions. Mr. N. Mitsuhashi, Japanese Minister to the Hague, objected to such remarks from the Arbitration Tribunal, and has requested instructions from Tokyo.

RUSSIA ON INTERNATIONAL LAW.

London, February 25.

Russia's Note, after quoting what it describes as various flagrant breaches of for Dalny. international law, says that Russia considers it her duty to lodge a protest with the Powers. She is convinced that they agree with her in this attitude. She declares to be invalid all orders and declarations arising from Japan's illegal assumption of power in

STARTLING NEWS FROM PORT ARTHUR.

It is officially announced in St. Petersburg that four Japanese battleships and two transports have been sunk at Port Arthur.

(RECEIVED AT THE LEGATION OF FRANCE.) THE FOURTEENTH.

Saigon, February 19. It is telegraphed from London that the Japanese fleet attacked Port Arthur on the 14th instant without appreciable result.

(From the "Jijt Sitingo. RUSSIA'S COAL TRANSPORTS.

The Russian steamers Hersberry (i) Alstone (i) and Java left Barry last month carrying welsh coal for Port Arthur. They are expected to arrive at their destination in March.

THE RUSSIAN SQUADRON.

The Oslabja and other Russian warships are still lying at Jubuil awaiting instructions from Admiral Makkaloff, who left Cronstadt yesterday, to succeed Vice Admiral Starke.

RUSSIAN WARSHIPS.

London, February 19 A Russian warship has arrived at one of the Canary Islands where she will be supplied with coal to enable her to reach the nearest port in Russia. Several Russian warships are lying at Jibutil and others have arrived at Teberdzka (?) in the Red Sea.

THE TZAR'S DECLARATION.

According to the Times' correspondent at Vienna, Russia's Declaration of War has bewildered the Austrians

[The /iji gives " led astray " for " bewildered."] RUSSIAN PLANS,

The Times declares that Russia intends to with-draw to Harbin, and that the insufficient measures of preparation are matters of astonishment.

THE RELIEF FUND.

London, February 21,
The contributions to the fund promoted by Viscountess Hayashi, wife of the Japanese Minister in London, to relieve the sufferers by the war have reached £2,400.

THE BALTIC SOUADRON.

The Russian authorities are now attempting to break the ice in the Neva River to allow of the departure of the Baltic Squadron.

THE RED SEA SQUADRON.

The Russian squadron at Jibouti has been sighted off Perim. It seems to be going in a northern

THE TSAR'S DISSATISFACTION.

According to official information from St. Peters-burg, the Tsar repeatedly expresses his discontent, on the ground that Japan has brought on the war.

THE NEAR EAST QUESTION.

The Porte is exasperating Bulgaria, and the impression is that war will be opened in April.

RUSSIA'S BLACK SEA SQUADRON

The British torpedo gunboat Hurrier, lying in the Bosphorus, has been ordered to watch the actions of the Russian squadron in the Black Sea and to communicate the same to the British squadron at

THE RUSSIAN RED SEA SQUADRON.

London, February 22 The Russian Squadron chased and stopped the P. & O. S. N. Co. steamer Mongolia off the Jebel Rudzuka (?) (an island of Arabia a little the north of Perim—[1/1] supposing it to be a steamer of the Nippon Yusen Kaisha, and has apologized for the

The Russian Squadron coal transports are at Jebe

It is rumoured that the proposed departure of the Russian Squadron for the Far East has been suspended. Two Russian transports have left for Suez on their way home

STOCKS AND SHARES IN PARIS

Last Saturday, the Paris Bourse experienced a panic. The cause is believed to be that Russia has refused to protect the U. S. Consul who has been appointed

THE BALKAN QUESTION.

The Turkish Minister at Washington has declared the Bulgarians are making military preparations and that war has become unavoidable.

(FROM THE "ASART SHIMBUN.") VICEROY ALEXIEFF.

London, February 17 Viceroy Alexieff and his staff officers have gone to Harbin.

RUSSIA'S DEFENSIVE MEASURES.

Russia is strengthening the forts at Newchwang and reorganizing her defences both by land and sea.
RUSSIAN TROOPS FOR THE FRONT.

A hundred and twenty thousand troops from Moscow, Warsaw, and Kieff are preparing for an advance and some are already on their way to the Far East. For the most part they will assemble at Harbin. All the trains from the principal towns are filled with soldiers.

THE BAIKAL RAILWAY.

The Russian railway authorities are entirely oc-cupied by the transportation of troops overland and are also endeavouring to complete the work on the Baikal railway within two months, though the con-struction is extraordinarily difficult.

RUSSIA'S DEMAND UPON CHINA

With regard to the request of Viceroy Alexieff that the Chinese Government should give orders to its military to assist Russia in protecting the Manchurian railway, the Chinese authorities replied that the Government could not entertain a request to assist the Russians at this critical time, when the latter had insisted in time of peace that the Chinese have no such capacity.

RUSSIAN CENSORSHIP OF TELEGRAMS.

Russia has abolished the censorship of foreign telegrams excepting those with regard to military affairs.

(FROM THE "S.C. MORNING POST,") FRESSURE AT CARDIFF.

London, February 6. The Admiralty agents at Cardiff have been instructed to secure at once large cargoes of coal for the British fleet in the Far East. The agents, however, are compelled to wait, owing to the pressure caused by the demand from foreign fleets.

BELLIGERENT SHIPS.

London, February 12.

The Khedive of Egypt has instructed the Egyptian port authorities that belligerent ships must pass through the Suez Canal as speedily as possible, and that there must be no delay. Two Russian transports and two torpedo loats are coaling at Port Said. "SECOND ALABAMA CASE."

The Russian Press accuses Britain of lending Japan Wei-hai-wei. This action, it is contended, threatens a second "Alabama" case.

FEVERISH PREPARATIONS AT ST. PETERSBURG.

London, February 11. There is great activity at St. Petersburg and all the principal centres of Russia. Hospital trains have been hastily organised, and with doctors, nurses, and medical stores are being hurriedly despatched to the Far Fast Far East.

FRANCE NEUTRAL

An important order has been issued by M. Pelletan, the French Minister of Marine. He has ordered the French naval squadron in the Far East not to leave French waters.

A ROYAL WEDDING.

Her Royal Highness Princess Alice of Albany was married yesterday to H.R.H. Prince Alexander of Teck in the St. George's Chapel at Windsor. Their Majestics King Edward and Queen Alexandra were present, together with the Prince and Princess of Wales, the Duke and Duches of Connaught, and several foreign Princes and Princesses.

GUN PLATFORMS IN WARSHIPS.

An interesting point in connection with all battle-ships designs is the height of the gun-platform above that in use in Japan.

GENERAL KUROPATKIN.

London, February 23.
General Kuropatkin has commenced his preparations. He will leave St. Petersburg in March.

RUSSIA BLAMES JAPAN.

Russia has circulated a Note among the Powers, in which she declares that Japan has contravened the provisions of International Law at Chemulpo and Port Arthur.

An interesting point in connection with all battle-ship designs is the height of the gun-platform above water, for on his depends, in a large measure, the ability of the ship to fight in a heavy seaway; and this question has been specially brought forward in connection with the new Chilian battleship recently bought by the British Government, and illustrated and described in a double number of Engineering. One of these, formerly the Libertad and now H.M.S. Triumph, built by Messrs. Vickers, Sons, and Maxium, like all modern above seaway; and this question has been specially brought forward in connection with the new Chilian battleship recently bought by the British Government, and illustrated and described in a double number of Engineering. One of these, formerly the Libertad and now H.M.S. Triumph, built by Messrs. Vickers, Sons, and Maxium, like all modern probable water, for on his depends, in a large measure, the ability of the ship to fight in a heavy seaway; and this question has been specially brought forward in connection with the new Chilian battleship recently bought by the British Government, and illustrated and described in a double number of Engineering. One of these, formerly the Libertad and now H.M.S. Triumph, built by Messrs. Vickers, Sons, and Maxium, like all modern battleships, has been built without a forecastle or poop. Her bow guns are 25 ft. above the water line forward, which is the same height of the ship to fight in a heavy seaway; and the ability of the ship to fight in a heavy seaway; and the ability of the ship to fight in a beavy seaway; and th

battleships. As regards the after barbette guns, the height is between 23 ft. and 24 ft., or about 1 ft. more than in the case of our King Edward VII. class. In comparison with cruisers having a forecastle the conditions in battleships are not quite so favourable. For instance, the ships of the Cressy class have an advantage of about 9 ft., to those of the Drake class 10 ft., and those of the Diadem class about 8 ft.; but it must be remembered that in all of these cruisers the guns are of less calibre, involving not only less weight for the gun, but considerably less weight for the mountings, whiist at the same time the amourprotection for gun and gun-mounting is very conthe guns are of less calibre, involving not only less weight for the gun, but considerably less weight for the mountings, whilst at the same time the armourprotection for gun and gun-mounting is very considerably less. Even were it considered desirable to have battleship guns at such a great height as 33 ft. to 34 ft. above the water-line, it would involve a serious question for the naval architect as to how far the placing of such a load at such a great height would influence the seaworthiness and stability of the ship. Without adequate protection, which involves very considerable weight, the guns and mountings must be necessarily liable to serious damage in action, and the battleship must be able to withstand all attack in the line of battle. This, indeed, is one of the main differences between the battleship is in a more favourable condition than the cruisers we have mentioned, because these cruisers have no poop: the Triumph's guns are from 1 ft. to 3 ft. higher than in cruisers of the three classes haved authorities as to the desirability of having such long and powerful weapons mounted in the 'tween decks, or within the concentrated casemate, as in the Triumph. These guns are of ½-in. calibre, and occupy the position devoted to weapons of 6-in. calibre in other British ships. It has been suggested that these 7½-in, pieces, because of their greater length in comparison with 6-in, quick-firers, are less advantageously situated for firing when the ship is rolling. Were this true, it would certainly be a serious objection to the placing of the guns in this position; but examination of the published records of our British ships has enabled Engineering to produce a diagram which clearly demonstrates that, notwithstanding the great length of 33 ft. of the 200-pounder guns in the Triumph, which is about 10 ft. longer than the 100-pounder guns fitted to our modern battleships and cruisers, the muzzles of the larger guns are more advantageously placed for similar angless of heel than the 6-in guns. The 6-in guns of similar angles of heel than the 0-in guns. The 0-in guns of the King Edward class are 5½ in, below the centre line of the nuzzle of the 7½-in, guns of the Triumph, while the 6-in, quick-firers of the cruisers already named are in the Diadem class 1 ft, 11 in, and in the Cressy and Drake classes, 11 ft, 8 in, nearer the water-line than the Triumph's 7½-in.

MRS. MAYBRICK.

London, January 31.

Lloyd's Weekly Newspaper says this morning that Mrs. Florence Maybrick, the American who was serving a life sentence for having poisoned her husband, was released from Aylesbury female convict

husband, was released from Aylesbury female convictorison at 6.45 o'clock on the morning of January 25th on special license. Her mother, the paper says, had visited her on January 23rd, and evidently was the bearer of important news. The Governor of the prison on Sunday conferred with the prison officials with a view to arranging for the departure of the prisoner, which was carried out very quietly.

Mrs. Maybrick, accompanied by one of the prison matrons, entered a closed carriage and drove to Aylesbury station, where she took a train for London. She drove from Euston station and from there went to a private house not far from the metropolis. She will remain there for a short period in order to recuperate and to await the completion of certain formaltities, which will give her a freedom of movement not allowed by persons on ordinary ticket of leave.

of leave.

Mrs. Maybrick, the paper concludes, during the last few months in prison, was employed in the lightest work, as a reward for good conduct.

London, February 2 The whereabouts of Mrs. Maybrick is variously announced in the newspapers this morning as Cornwall, Holloway prison, at sea, bound for the United

wall. Holloway prison, at sea, bound for the United States, etc.

The Daily Chronicle, which is under the same ownership as Lloyd's Weekly Newsyngher, the journal that on Sunday published the story of Mrs. Maybrick's release declares the statement that Mrs. Maybrick has sailed for the United States to be untrue, and adds that she is still in England, and that certain conditions attached to her liberation impel her to exercise great discretion in her attitude toward the public, and for a time, at least, it will only be possible for her to acknowledge through the press her gratitude for the efforts of her sympathizers in obtaining her release.

The Daily News says the whereabouts of the institution in which Mrs. Maybrick is recuperating is kept a profound secret because she is still in the custody of the authorities.

"In fact," the paper says, "Mrs. Maybrick and her custodians are concealing their identity, and this is necessitated by her being privileged to walk abroad with her female wardens. It is understood that after a period of rest she will return to either Woking or Holloway prison to receive her formal discharge on special license."

TCHING HUMOURS

SPEEDY CURE TREATMENT FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure of the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from infancy to age, with loss of hair, when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINEMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excariations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS, CHOCOLATE COATED,

Are a new, tasteless, edourless, economical substitute for the celebrated liquid CUTICUEA
RESOLVENT, as well as for all other blood puriders and humour cures. Put up in screwcap pocket vials containing 60 doses. CUTICUEA PILLS are alterative, antiseptic, tonic,
and digestive, and beyond question the purest, sweetest, most successful and economical
blood and skin purifiers, humour cures, and tonic-digestives, yet compounded.

SUMMARY OF NEWS.

On February 19th, the China Mail announced Telegraph Treaty.

the Agriculture and Commerce, to commence

An official telegram states that the U.S. Senate ratified on Feb. 23rd the Panama Canal Treaty.

THE Enoshima Electric Tramway between Oiwake and Gokurakuji was opened on March

NINETEEN convicts broke out of Abashiri prison, Nemoro, on February 25th and perpetrated outrages in the city.

ACCORDING to an official telegram, Lieut. General Sakaroff has been temporarily appointed Russian Minister for War.

THE construction of the railway between Kagi and Kakan, Formosa, being completed, traffic was opened on Feb. 28th.

THE Osaka-Kobe Electric Railway Company has decided to float a second issue of debentures amounting to yen 475,000.

THE mother of Count Hisamatsu, who has been ill since the beginning of January, died on Feb. 28th, aged sixty-two years.

Mr. J. Noda, a number of the editorial staff of the *Jitsugyo Shimbun*, Yokohama, was ordered on Feb. 27th to leave Yokohama.

A TELEGRAM from Nagasaki states that Mr. Morgan, U.S. Consul to An-tung, arrived there on Feb. 27th en route to his post,

THE Osaka Shosen Kaisha re-opened on Feb. 29th their line between Osaka and Chemulpo, with the steamer Chikugoguwa Maru

TELEGRAPHIC communication between Foochow and Formosa was reopened on Feb. 25th. line had been interrupted since the 11th.

MR TADASU YOSHIKAWA, eldest son of Viscount Yoshikawa, Minister of State for Home Affairs, died on the night of Feb. 24th. He had been ill for several months.

Two copper-plate printers and m tea dealer were arrested on Feb. 29th in Tokyo. They had forged ten yen notes and circulated them in Tokyo and Yokohama.

A TELEGRAM has been sent to Kobe from the Y. C. & A. C. saying that the Association team can make it convenient to go down to play the Interport Match in Kobe on Saturday, March 12.

A man armed with a large knife early on the morning of Feb. 28th entered the dwelling of a leather dealer, C. Mitani, Shintani-cho, Asakusa, Tokyo, and stole ven 8.50 after menacing the

THE presidents of the Nippon Life Insurance Company and the Iriyama Colliery Company were prosecuted on Feb. 25th in the Tokyo District Court on a charge of infringing the Commercial Code.

THE Jiji states that H. Miyake (46) and W. Fukuda (41), members of the editorial staff of the Niroku, were arrested on the morning of Feb. 28th on suspicion of having received money by means of threats.

It is officially reported that the Russian The net profits of the Yokohama Specie Bank for Government has suspended telegraphic communications that pear are said to be yen 1,617,667.

Constitution of the Yokohama Specie Bank for Government has suspended telegraphic communications between Vladivostock and Nagasaki, in accordance with Art. 8 of the International

They will be shown at the St. Louis Ex-ion. They are only three feet in height and hibition. black in colour

MR. S. SHIBA, Otamachi, Yokohama, says the Asahi, has purchased the German steamer Pioneer of 1,700 gross tons, lying at Yokohama, for £7,000. She had arrived from Christmas Island with phosphate rock.

According to telegrams from the Governor of Nagasaki received in Tokyo since Feb. 27th, small-pox is prevalent in that port, the patients being principally persons who had arrived from Vladivostock and Chin-wan-tao.

On the morning of Feb. 29th, Count Katsura, the Premier, Marquis Oyama, Chief of the Gene-ral Staff Office, and other high officers of the military and naval staff proceeded to the Palace and had audience of the Emperor.

T. Anda, blacksmith (26) and a woman committed suicide on the morning of Feb. 28th at the Kwagetsu-ro brothel, Suzuki, Tokyo, by drinking sulphuric acid and then cutting their throats with razors. Heavy debts were the cause.

THE Osaka Shosen Kaisha's steamer Tairri Maru, which was under construction at the Naga-saki Shipbuilding Yard, was launched on Feb. 27th. Her gross tonnage is 1,200 tons. After completion she will be employed on the South China line.

LORD ROBERTS, Commander-in-chief of the forces; Lieutenant-General Lord Grenfell, Commanding the Fourth Army Corps, and Sir William Butler, commanding the Western District, have been invited to join the new army council of the British Army.

MR. G. ISEKI, a Tokyo lawyer, who was sentenced in the Tokyo District Court to four months' imprisonment on a charge of fraud, was discharged on Feb. 25th by the Tokyo Appeal Court on the ground that the evidence against him was insufficient.

A goods train of the Nippon Railway was derailed on March 1st at 1 p.m. at a point be-tween Ojimatani and Nakayama, near Morioka, with the result that all the cars were overturned, and thirteen were damaged, the locomotive being thrown down the bank

SIR CHARLES STEWART SCOTT, who has been the British Ambassador to Russia since 1898, will retire from that position next April. There is much speculation as to who will be his successor. The Pall Mall Gazette states that King Edward will proceed to St. Petersburg early in July next, and that there is much speculation as to the object of his visit.

THE Uraga Dock Company held a general meeting on Feb. 27th in Tokyo and passed the accounts for the last half-year. The gross income was yen 285,830.75, from which amount yen 281,155,80 was disbursed in expenses. The balance was yen 4,674.55, to which yen 8,545,08 brought from the previous account was added. This total was carried forward to the next account,

THE death is announced of Lady Inglis, the beroine of Lucknow. As the wife of the soldier who commanded the brave garrison after the death of Sir Henry Lawrence and Major Banks, she was the central female figure in that brave company. During the terrible period from early in July until the arrival of Havelock and Outram, the Bayard of the East, towards the end of September, Lady Inglis played a courageous part that the Deuteros was a total loss on the Paracels.

Over two hundred pigmies were brought from other ladies of the beleaguered garrison. Her Chiyoda Mutual Life Insurance Company one of the Philippine islands by the steamer husband died forty-two years ago, after being on Feb. 23rd was permitted by the authorities of Shawmul, which arrived at Yokohama on March made a K.C.B.

THE LAST PORT-ARTHUR AFFAIR

A Friday, February 26.

There is no longer any question as to the nature of the affair which, according to St. Petersburg's official report, ended in the sinking of four battle-ships and two trans-What happened was, surmised above, that on the night of the 23rd-24th neveral vessels laden with stones were taken to Port Arthur by the Japanese for the purpose of being sunk at the mouth of the har-bour. The forts and the secondary arma-ment of the Retvisas—which vessel is still lying outside moored to the light-ship— opened on the Japonese with sufficient ac-curacy to prevent them from reaching the position they desired. Four of the stoneladen ships were either sent to the bottom by gun-fire or abandoned—this part of the story is still somewhat obscure,—but their story is still somewhat obscure,—but their crews were carried off safely by the torpedo craft which accomppanied them. There was thus no loss of life, nordid any of the Japanese war craft suffer the slightest injury. other hand, however, the operation of sealing the harbour's mouth did not succeed.

There is another Russian version, said to have been telegraphed to a Major-General in Shanghai. It puts the time of the incident at 2 a.m. on the 24th, and it says that there were twelve Japanese vessels loaded with explosives. The document does not explain, however, what purpose these explosives were intended to serve. The forts and the Retvisan discovered the approach of the Japanese in good time and opened such fierce fire on them that two of the were sunk and two had to be run aground. Part of their crews were drowned, and the rest were probably rescued by the torpedo-craft. which rescued by the torpedo-craft, which, also, received close attention from the Russian gunners, but whether they suffered in consequence there was no way of ascertaining. The torpedo-hoats with the 8 steamers that escaped, were seen on the horizon at dawn. The sender of this report adds that all the wounded Russian warships are being rapidly repaired, and refers to the fact of the Retvisan's fighting on the night of the 23rd-24th as a proof that she has still to be reckoned with. But can she put to sea? A line-of-battle ship moored permanently to a light-hulk can not be called serviceable.

Up to the moment of going to press no official statement had been published about the Port Arthur affair of the 24th instant. But no doubts are entertained that what happened was an attempt by the Japanese squadron to seal Port Arthur by sinking stone-laden vessels at the entrance. Five steamers were used for the purpose, the Jinsen Maru (2,331 tons gross), the Tientsin Maru (2,943 tons), the Hokoku Maru (2,766 tons), the Buyo Maru (1,136 tons) and the Bushu Maru (1,240 tons). Each ship is said to have had a complement of 5 on board, namely, 3 in the engine room and 2 on deck. All escaped, and neither the torpedo-craft nor the squadron seem to have suffered any damage whatever. The close range, but even that consolation can side only question is whether these vessels were not be accorded to the Russians. sunk in the desired place, or whether, as Alexieff's report says, they were sunk elsewhere or abandoned in consequence of the fire of the forts and the Retvisan. The idea that the Retvizan took part in the defence being invisible.

Saturday, February 27. The facts of the enterprise undertaken by the Japanese for the purpose of closing the entrance to Port Arthur are now clearly ascertained from official and other reports. It appears that the steamers chosen for men offered themselves, the general idea anese had no casualties whatever. being that here was a unique opportunity to it was too, for the frail vessels had to be taken Arthur have been published. torpedo-craft. In command of the 77 volun- act. teers was Captain Arima Ryokitsu, and he was assisted by Commander Hirose Takeo; by First Lieutenants Saito Shichigoro and Masaki Yoshitaro; by Second Lieutenant Shimasaki Yasuzo; by Chief Engineers Yamaga Daizo, Kurita Tomitaro and Minamisawa Yasuo; by Engineers Oishi Chika-nori, and by Assistant Engineer Sugi Masato. The five steamers and the torpedo craft that were to accompany them for part of their way, assembled on the evening of the 23rd at some place probably 50 or 60 miles from

shoals to 1½ fathoms, and on the west to engaged in a general reconnoiring attack of Port 23¼. Evidently in order to block an entrance and a general reconnoiring attack of Port 23¼. Evidently in order to block an entrance and a general reconnoiring attack of Port 23¼. Evidently in order to block an entrance and a general reconnoiring attack of Port and the port of the very 70 yards, very precise work is required on the part of the vessels are closes and the port of the vessels at close range, but even that consolation can appear to the port and to peut and to the port. The port and the port of the 25th, our main fleet advanced toward Port Arthur and commenced a bombardment of the Russian ships and foitnesses from a distance. A little past noon the Nordh, Askold and Bayar all fled into the port. It must therefore be admitted that our attempt at shutting the entrance to the port was but of little effect. Then we fired into the port. Big sincke was seen arising from inside. This bombardment lasted only a quarter of an hour and the fleet retired. During this operation our fleet of cruisers sank one Russian torpedo-catcher in Pigeon anyhow to sink frail merchant vessels at close range, but even that consolation can are the vening of the 25th, our main fleet advanced toward Port Arthur, Talien and Pigeon Bay.

On the evening of the 25th, our main fleet advanced toward Port Arthur, Talien and Pigeon Bay.

On the morning of the 25th, our main fleet advanced toward Port Arthur, Talien and Pigeon Bay.

On the morning of the 25th, our main fleet advanced toward Port Arthur, Talien and Pigeon Bay.

On the morning of the 25th, our main fleet advanced toward Port Arthur, Talien and Pigeon Bay.

On the morning of the 25th, our main fleet advanced toward Port Arthur, Talien and Pigeon Bay.

On the morning of the 25th, our main fleet advan

At 10 a.m. on the 24th the torpedo-craft returned to the squadron's base. They reported in the sense of the above statements and at the same time, or subsequently, Admiral Togo received news, presumably is scouted in Japanese naval circles. They from his scouting ships, that the Bayan, the say that the Retvisan is on the bottom, and Novik and 4 or 5 Russian destroyers were that only the shallow water saves her from outside Port Arthur. That night (24th), outside Port Arthur. That night (24th), red one day owing to inclement weather. When therefore, he ordered a squadron of destroyers they were completed, the whole squadron proceeded

and torpedo-boats to attack the enemy. The squadron set out and made the circuit of the whole region outside Port Arthur and Talien but did not find any Russian vessel. It would seem that the Russians' habit is to seek the shelter of the harbour at night and to lading with stones and sinking were all old peep out during the day-time. His torpedovessels, and everything valuable had been craft having rejoined him empty-handed at 7 taken from them before they started on their a.m. on the 25th, Admiral Togo set out with last voyage. We have already published the the main squadron shortly afterwards, and names of the ships and their tonnage, but it on sighting Port Arthur observed that the may be added that the *Tenshin Maru* and *Askold*, the *Bayan* and the *Novik* were all the *finsen Maru* belonged to the Nippon outside. He opened fire on them and after Yusen Kaisha, by which Company they 20 minutes the three ships retreated into the were purchased during the war of 1894-5. harbour. This made it plain to the Admiral They were respectively 17 and 27 years old that the blocking enterprise had not been and were valued at 200,000 yen and successful. His attack against the three 150,000 or 160,000 yen. The Hokohu Maru cruisers was made at long range. It combelonged to Mr. Kawamura. She was menced at 11.45 a.m. and ended at 12.05 years old and is supposed to have p.m., when the Russians sought the shelter been worth 60,000 or 70,000 yen. As for of the harbour. Simultaneously the squadron, the Buyo Maru and the Bushu Maru, they using its heaviest ordnance, threw shells into belonged to the Nippon Shosen Kaisha and the harbour and had the satisfaction of observ their united value is estimated at about ing a burst of flame and smoke as the result, 100,000 yen, so that, speaking roughly, the The squadron then withdrew. Meanwhile an little squadron represented something independent division had observed two of like half a million of yen. It was manned the enemy's destroyers steaming from a by 77 volunteers. When the Naval authorpoint westward of Liao-ti-shan. These were ities decided to make this essay, they called attacked. One made her escape; one was for volunteers, and an enormous number of destroyed. In all these operations the Japuner offered, the meables, the general idea anges had no casualties whatever.

The names of the 77 men that volunteered do a brave thing. A tolerably brave thing to take the stone-laden steamers into Port right up to the mouth of the harbour and Japanese journals justly say that because sunk within short range of the Russian she has such men Japan is able to hold her forts, the Russian war-ships and the Russian own in this fight. Certainly it was a fine Greater risks are seldom run.

Not the least striking feature of the whole affair was the incident on the 25th instant, when Admiral Togo's squadron lay off Port Arthur and threw 12-inch shells into the harbour where the Russian men-of-war lay. The Russians have much patience.

ADMIRAL KAMIMURA'S REPORT.

The official report from Admiral Kamimura, commanding the Second Fleet, dated February 26th, is substantially as follows:-

at some place probably 50 or 60 miles from Port Arthur, but of course the name of their rendezvous is concealed. By about 4 a.m. on the 24th they reached the immediate vicinity of Port Arthur. Admiral Alexieff truly affirms that they had a very warm reception. What happened to the five vessels is clearly shown elsewhere.

The entrance to the harbour is 350 yards wide—that is to say, through a distance of 350 yards 334 fathoms of water are found. On the east the water then suddenly shoals to 13/2 fathoms, and on the west to engaged in a general reconnoiring attack of Port.

Admiral Togo is still in an advanced position. A

ADMIRAL TOGO'S REPORT.

detailed report will be sent from him

Admiral Togo's Report, received at the Admiralty on the 27th at 2 p.m. and written by him on the 26th, runs as follows:-

Preparations for the movement referred to in this

of the Murakumo, the Yagiri, the Shiranus and the Kagero, under the command of Commander Mano, proceeded towards the mouth of the harbour. The duties of this division were to go in advance of the special transports, to attack the enemy's acouting vessels and to engage any ships he might have on guard. The destroyers approached the harbour and discharged torpedoes at a ship which harbour and discharged torpedoes at a ship which harbour and discharged torpedoes at a ship which harbour effect of the projectiles was not clearly discernible. An hour and a half later, namely, at 3.70 a.m., the division of special transport vessels advanced for the purpose of senhing the mouth of the harbour. These five steamers had to encounter the full blaze of the enemy's search-lights and his violent cannonade. As they steamed in the Tenshin Maru, in endeavouring to get out of the field of a search-light, went a little out of her course and ran aground on the east of Lao-to-shan. The Hupo Maru was sunk by her crew at a point about 400 metres outside the Tenshin Muru. The Huboku Maru pushed on to the harbour's mouth, and was sunk by her crew at the base of the light-house with her head pointing about north-west. The Bushu Muru was scuttled by her crew at a point south east-by-south of the Hokoku and at a distance of about 2½ cables. The fifth steamer, namely, the Jussen Maru seems to have run aground under the hill Mautau-shan. All the officers and men, who had performed this brave act, were taken off by five Marw seems to have run aground under the hill Mantau-shan. All the officers and men, who had performed this brave act, were taken off by five torpedo-boats Hayahusa, Kasasagi, Manasuru, Chidar and Tsubame under Commander Sakurai, which went in boldly through the enemy's fire just as the day was breaking and rescued every one of the five steamers' crews. Three of the Hokoku's crew were slightly wounded by the enemy's fire but the rest were unscathed, as also were the officers and men of the torpedo-boats, and the boats themselves received no damage whatever. It is most regrettable that the special transports were not successfully sunk so as to effect their purpose, but nothing can detract from the courageous and devoted conduct of the officers and men that took them in or from that of the officers and crews of the torpedo-boats that rescued them.

them, but with what result it is not clear.

On the night of the 24th three divisions of destroyers were sent in to make the circuit of the place.

One searched Pigeon Bay; a second tried Talien, but neither found any ships. The third division went to Port Arthur and discharged projectiles but with uncertain result.

On the 24th at a much property secundary stepmed.

opened on the interior of the harbour. The forts and the cruisers joined in returning the fire about 20 minutes, and then the cruisers retired into the harbour

While this was in progress, a division of Japanese cruisers went to the south of the harbour to recon-noitre. They saw two Russian destroyers making for the harbour's mouth from the direction of Luctithan. Upon these they opened fire. One escaped, but the other—a four funnelled boat—ran on the rocks in Pigeon Bay and was smashed by the Japanese fire. The cruisers returned unharmed.

ICEROY ALEXIEFF'S REPORT

The following is the substance of the official report sent by Admiral Alexieff:

February 24th, 2.45 a.m.—Japanese torpedo boats again attacked Port Arthur with the object of shutting again attacked Port Arthur with the object of shutting up the entrance of the port by sending some big steamers with combustible materials. Two of these were destroyed; one near Tiger Peninsula and the other near Mount Jol-donques, by Russian fire. The fire of the *Retrisan* and the fortersesse against the Japanese torpedo boats constitued till daybreak in the morning 4 Japanese torpedo-boats were found destroyed in the bay and 8 torpedo-boats were steering towards the Japanese memo-of-war, which were waiting for them in the offing. The crews were saved by boats; some were drowned perhaps, and some others were picked up by their own torpedo boats. The passage of the port remains free. A Japanese steamer is still blurning; some mines are floating in the bay. The

on the 22nd in the direction of Port Arthur. At 2 Japanese fleet composed of two divisions was seen a.m. on the 24th a division of destroyers, consisting steaming away. Three Russian croisers were sent of the Murakumo, the Yugiri, the Shiranm and the out to pursue them vainly. They were recalled to Kagero, under the command of Commander Mano, 'clear the bay from floating mines. No loss on the purposed towards the mouth of the barbour. The Russian side

Sunday, February 28. The latest official report about the last Port Arthur affair is as follows :-

OFFICIAL REPORT.

Received by Navy Department

on the 27th Feb., 1904. The five vessels intended to obstruct the entrance to Port Arthur advanced at about 4 o'clock on the morning of the 24th from southward of Laoti-shan towards the mouth of the port. It appears that the Tenshin Maru, which was in the van, steered too far Tenshin Maru, which was in the van, steered too far to port and as she was about 3 miles to the southwest of the shore, was shot and seriously damaged, and ran purposely upon the shore. The other vessels in her wake changed their course to northeast and advanced; but the enemy's search-lights, flashing upon them, impeded their progress. The enemy's fire first struck the steering gear of the Bushu Maru, which thereupon was disabled and grounded not far from the Tenshin Maru. She destroyed herself and sank. Next, the Buyo Maru was seriously damaged by the enemy's shells and sank without reaching the harbour entrance. Meanwhile, the Hokoku Maru and the Jinsen Maru advanced with great energy and reached the entrance with difficulty. The former, on the outer side of the stranded warship Retrusun, and the latter, on the east of the same vessel. Each on the outer side of the stranded warship Retrisin, and the latter, on the east of the same vessel. Each lighted the explosives on board to destroy themselves, and their crews, after giving a loud cheer, got into the boats when they found their own vessels sinking. Immediately the crews got into their boats, they tried to row up to the torpedo boats, but the enemy's searchlights it up their path without intermission and as the enemy's fire become very severe. mission and as the enemy's fire became very severe, the hoats were compelled to row around under cover and failed to approach out torpedo boats. And further, as the seas became heavier at survise, the boats suffered great hardships and succeeded in reaching the squadron only at about 3 o'clock in the afternoon of the same day.

men that took them in or from that of the officers rand crews of the torpedo-boats that rescued them.

That day (44th) at 10 a.m. the Squadron proceed ed to the neighbourhood of Port Arthur, and a division of cruisers advanced to inspect the approach to the harbour. They suddenly perceived the North and 5 destroyers steaming from Laoti-shan in the direction of the harbour and they opened fire on them, but with what result it is not clear.

On the squadron only at about 3 o clock in the afternoon of the same day.

From this it is evident that Viceroy Alexedric is report in much more accurate than appeared to be the case originally. Two out of the five stone-laden steamers were prevented by the fire of the Russians from accomplishing their object and had to be accomplishing their object and had to be run ashore and destroyed. One was actually sunk before reaching the harbour's entrance. Two, however, reached the immediate vicinity of the Retrisan and were there sunk by On the 25th at 9 a.m. the main squadron steamed to a point within long range of the port. Three of the enemy's cruisers were observed outside, namely, the Bayeas, the Askold and the Novak. They were fired at, and at the same time an indirect fire was the defining of the same time an indirect fire was the defining of the correlation. the defence of the port. Nevertheless these Japanese steamers managed to steam right alongside of her, where their crews sent minutes, and then the crusers retired into the harbour and the Japanese Squadron drew off. As the range was long it is improbable that the enemy suffered much and as for the Japanese ships they were not touched nor had they any casualties. It appeared that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese them to the bottom and then escaped in open row-boats, reaching the squadron after nearly touched nor had they any casualties. It appeared that the enemy's object was to draw the Japanese them to the bottom and then escaped in open row-boats, reaching the squadron after nearly touched nor had they any casualties. It appeared them to the bottom and then escaped in open row-boats, reaching the squadron after nearly touched nor had they any casualties. It appeared that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was to draw the Japanese that the enemy's object was the same that the present that the control of the Japanese that the present that the present that the present that the prese then to the bottom and then escaped in open hitherto achieved in this war of records.

The Minister of State for the Navy addressed the following message to Admiral Togo on the 27th instant :-

I have received with great satisfaction your report of the third attack upon Port Arthur—It is true that such events are chiefly attributable to the virtues of His Majesty the Emperor, but without the loyal and courageous action of yourself and the officers and men under your command these achievements would not be possible. You did not indeed succeed in fully accomplishing the purpose of the operation, but there can be no doubt about the magnitude of the achievement. That you and your command have for many days unceasingly carried on offensive operations and have deprived the enemy of all opportunity to undertake anything, thus displaying the strength and enhancing the prestige of your country, is to me a source of great and respectful admiration. I offer my congratulations for the actions of your squadron and express my sense of the hardships you have undergone. I have received with great satisfaction your report

fell in the town of Port Arthur, the elevation of the guns having been affected by the rolling of the ships, many of the Chinese inhabitants fled from the place, and the Russian soldiers took advantage of their absence to loot the deserted houses.

Another statement coming from Saseho is that the Venisei, which, according to a Russian report, perished by contact with one of her own mines, was never seen after the 9th and it may therefore be assumed that she was one of the victims of the Japanese attack.

Admiral Viscount Ito has addressed a message of congratulation to Admiral Togo. He expresses great admiration of the exceptionally gallant conduct of the men that took five unarmed steamers into the innermost zone of the enemy's fire, and declares that whatever the material results of such an act, its moral significance can not be under-rated.

Monday, February 29. It appears that the cable between Chefso

and Port Arthur is injured and communication is interrupted. In connexion with this Mr. Mizuno, Japanese Consul at Cheloo, is said to have informed the Great Northern Company that any attempt to repair the cable will be regarded as a breach of neutrality. In fact, Russia must carry on her communications by means of instruments entirely within territory controlled by herself. That would reduce her to the land lines along the railways. The Great Northern Company is said to have merely acknowledged the receipt of the notice.

Japanese newspapers all state that the effort made by the gallant crews of the five steamers sent to seal Port Arthur has not been entirely fruitless. Two of the steamers as our readers know, were sunk in the appointed places, namely, one on either side of the Retvisan which is lying with her keel on the bottom outside the harbour. These two are the Hokoku Maru (2,766 tons) and the fusen Maru (2,331 tons), the former under the orders of Commander Hirose and the finsen under that of Lieut. Saito, their engineers being Messrs. Kurita and Minami respectively. The effect of the sinking of these two ships, it is said, is that whereas a vessel could formerly enter Port Arthur in 35 minutes, she now requires 2 hours for the operation. The Retvisan's position is said to be immediately under the light-house on the western promontory at the mouth of the port. Here the width is not more than 400 yards, and the presence of three ships at such a place can not fail to impede the navigation more or

It is now stated that, after all, one Japanese lost his life in this gallant operation. At all events one man is missing. The original report said that 77 only had taken charge of the 5 ships, but it appears that there were 78, and 77 of these have returned unscathed, except 3 who were slightly wounded. 77 know nothing of any one having been drowned and it can only be assumed that the missing man was killed by one of the

three weeks of almost incessant work. The torpedo divisions have approached to within striking distance of Port Arthur and Talien on four different occasions. First they made that remarkably successful attack on the 8th instant. Then they went in on the 14th instant. Next they preceded the blocking steamers on the night of the 23rd—24th, a wire for conducting electricity to explode Then they accompanied the steamers and a torpedo on one of the vessels, was cut by took off their crews. And finally they the Russians. We gather that the cutting searched the three bays, Arthur, Talien and of this wire enabled the Russians to extin-Pigeon, during the night of the 24th-25th. Every one of these operations was carried out in black darkness, the torpedo-craft not using a single light after getting within 10 miles of their destination, and the lowest speed of movement was probably 20 knots.

It is really a feat to have got through all It is really a feat to have got through all destroyers sent in to prepare the way for that work without mishaps in the shape of the blocking steamers, the people on the break-down or collision, and the necessary Retvisan saw two sink, and that the only break-down or collision, and the necessary inference is that not only has sound seamanships been displayed but also the men have remained cool enough to exercise all their in the foot and the hand. It was probably professional skill at moments of crisis. Ex- the most impotent 12-inch shell that ever perts will appreciate the record.

Tuesday, March 1.
The man who perished in the gailant attempt on the morning of the 23rd ultimo was Umehara Kenzaburo, a second class seaman of the Yashima. He belonged to the crew that manned the linsen Maru.

Wednesday, March 2. The chief of the Russian Staff at Port Arthur sends official intelligence to Shanghai that on the 24th inst. the Japanese attempted to sink four vessels at the entrance to the harbour, but the ships were all sent to the bottom by the fire of the Retvisan and the forts before they could reach the desired places. He adds that on the 25th and 26th Japanese torpedo-boats were sunk and that

steamers that approached her on either side did not see them. By this time the day was on the morning of the 24th. She has 47 dawning and they had to abandon all hope quick-firers ranging from 12-pounders to of being picked up by the torpedo-boats. 1-pounders, and any of these would be They pulled steadily in a southerly direction, 1-pounders, and any of these would be They pulled steadily in a southerly direction, solidate and defend their menaced position, as tolerably effective against frail iron vessels but the wind was so violent from the east legitimate interests.

After the men that at one time they seemed doomed to be 1-pounders, and any of these visual states of the state of the states of search-lights from all sides and to be the late, however. Becoming separated, they of Japan, has the honour, in pursuance of instruc-centre of a fierce fire from sea and shore. On the same night have done more injury than the fire of the 3 destroyers disappeared and have not forts. It was by her shells that the Bushu Government which for the reason named have ceased to possess value.

In further fulfilment of the command of his Government of the undersigned has also the honour since been heard of. They are announced as Marn was disabled when changing direction. missing. Finally, there was one destroyer disposed of by the Japanese cruisers in Pigeon Bay on the 25th instant.

Thursday, March 3.

The Russian Foreign Affairs Official at Port Arthur telegraphs to Major General Deshino(?) at Shanghai that after the affairs of the 23rd and 24th, maps of Port Arthur, Adams Bay and the Yellow Sea were found on the stone-laden Japanese ships and that guish a fire on board the ship, but it is all very vague.

The same report says that the Japanese Squadron did not approach within range of the forts on the 24th instant.

The report further claims that among the effect of the 12-in shell which burst on the deck of the Askold was to wound one man reached its mark.

This Foreign Affairs Official adds that at low water a Japanese destroyer can be seen on the bottom in Port Arthur harbour; that 5 unexploded torpedoes have been found, and that since the 27th of February there has been no sign of the Japanese fleet. He

wires on the 20th.

Saseho reports that in the attack on the 25th instant the Russians fired blank cartridges and tried to draw the Japanese to short range, but as buoys were observed, indicating the presence of mines, the Japanese kept at a respectful distance. These mines what me are said to be about 5 miles from the to take. harbour's mouth.

JAPAN'S DECLARATIONS OF FEB: 6TH:

The following are the declarations made by the Japanese Representative in Petersburg to the Russian Minister of Foreign Affairs on the 6th of Februarydeclarations which Russia now apparently claims to have regarded as a pleasant amenity:-

The undersigned, Envoy Extraordinary and Minister Plenipotentiary of His Majesty the Emperor of Japan, has the honour, in pursuance of instructions from his Government, to address to His Excellency the Minister for Foreign Affairs of His Majesty the Emperor of all the

Russias the following communication:
The Government of His Majesty the Emperor of Japan regard the independence and territorial integrity of the Empire of Korea as essential to their own repose and safety, and they are consequently unable to view with indifference any action tending to render the position of Korea

The successive rejections by the Imperial Russian Government by means of inadmissible amendments, of Japan's proposals respecting Korea, the adoption of which the Imperial Government regarded as indispensable to assure the independence and territorial integrity of the Korean Empire and to safeguard Japan's pre-ponderating interests in the Peninsula, coupled with the successive refusals of the Imperial Russian Government to enter into engagements to respect China's territorial integrity in Man-churia, which is seriously menaced by their continued occupation of the province, notwithstanding their treaty engagements with China and their repeated assurances to other Powers possessing interests in those regions, have made it necessary for the Imperial Government seriously to consider what measures of self-defence they are called upon

In the presence of delays which remain largely The finsen Maru and the Bushu Maru unexplained and naval and military activities each had 3 boats when they were taken in which it is difficult to reconcile with entirely on the 26th the Japanese Squadron engaged to be sunk at the entrance to Port Arthur, the forts at long range. We have not heard but each lost two of its boats by the enemy's exercised in the depending negotiations, a degree anything about the sinking of Japanese torpedo-boats or about any operations by them on the 26th. Perhaps this tale emanates the torpedo-craft that were to rescue them on the source responsible for the Klains.

RUSSIAN MILITARY MOVEMENTS.

Friday, February 26.
The Shogyo Shimpo takes the same view as that already expressed in these columns, but goes into greater detail. It says that the crossing of the Yalu by any considerable force would be a matter of great difficulty as there are no bridges and none could be erected at present. It is true that immediate facilities for passage are afforded by the ice, but the season for the ice is nearly over, and without providing for the approaching open weather, troops could not venture into Korca in any numbers. Besides, the Russians have not the command of the sea, and consequently could not prevent the Japanese from landing a force at the mouth of the Yalu, thus cutting the communications of any troops that happened to be south of the river. It is possible that an affair of outposts may occur at any moment, but nothing in the nature of a general engagement on Korean soil need be anticipated. The Russians will probably concentrate on Kiulien-ching and Fenhwan-ting. Their present action in Korea is a feint.

Saturday, February 27.
The Chinese are represented as stating that parties of 30 Cossacks are stationed along the line of the Manchurian The Shogyo Shimpo's Seoul railway at intervals of 1 ½ miles, and that they keep fires burning all night. That would mean that between Mukden and As for the Korean soldie Dalny some 5,000 men are on duty every night. Let us reduce the number by one half, and put it at 2,500. Then since the men must have at least 3 nights in bed out of four, it would follow that for the duty of guarding that stretch of railway alone 10,000 troops are constantly required. And this calculation would give 30 men for every length of 23/3 miles.

The ice has finally broken on the Peiho A steamer entered the river on the 26th.

There are various rumours as to the movements of Russian troops immediately north of Pyong-Yang. One story has it that 200 men are posted between Pyong-Yang and Anju, but the most advanced are not said to have penetrated beyond Sunan, which is about 17 miles from Pyong-yang. There is a statement that over fifty guns have reached Anju, but that such a park of artillery should be in the possession of the van of a small army is not credible.

Sunday, February 28. The Russians are said to be buying large quantities of fodder for horses in Manchuria, and the Chinese Government has issued orders that no further sales shall be made.

It is expected that a collision must soon occur in the district immediately north of Pyong-yang. The Russians, however, do Pyong-yang. The Russians, however, do not seem to be in any formidable force. They are all cavalry and it is scarcely probable that they contemplate making a serious

It is stated in trustworthy circles that on the 28th instant at 9 a.m. Russian mounted scouts appeared within 700 metres of Pyongyang, and, being fired on by the Japanese, retired.

Monday, February 29. Seoul reports that the sound of artillery was heard outside the northern gate of Pyong-yang on the moming of the 28th threats in order to secure the submission exceed 400 cavalry, and that they are instant. Presumably this is an exaggerated and cooperation of the Chinese inhabitants, place, as already reported, between a party of lead him into an impasse. Japan in Korea thought the last threats in order to secure the submission exceed 400 cavalry, and that they are and cooperation of the Chinese inhabitants, merely scouting without any intention of account of the brief engagement that took he has taken a path which will presently fighting. Neither are there any Russian Russian scouts and the Japanese troops in has averted what might have become a threat of the result of the main. Pyong-yang. It would seem that mounted similar difficulty on a smaller scale, for she strength is at Liaoyang.

videttes on the Russian side have pushed has openly constituted herself the guardian down as far as Sinan and even to a more of Korean independence and integrity. But southerly point, but they are not in any considerable force, and the probability is that churia, if, as representing the Russian Gotheir purpose is merely to keep in touch with the Japanese and to necessitate on the ceased to be a violater of pledges and was latter's part caution which will delay a general advance northward. There is no possibility of placing any reliance on the stories told by Koreans about the number of men engaged in such operations. The experience of the China-Japan war taught that fact,

Tuesday, March 1.

News from Pyong-yang confirms the pre viously received intelligence that on the morning of the 28th Feb., the first collision took place between Japanese and Russian troops Forty Cossacks advanced by a branch of the Wiju highroad towards the Chhil-song gate of the town, being partially covered by a Korean tomb. Thence they opened fire on the Japanese guarding the gate, who replied, with the result that the Russians retired, as was of course their business to do. It is a pity that in such positions the tactics of the Boers can not be adopted, namely, never to unmask a position by replying to the fire of scouts. It appears that Pyong-yang is now nearly a deserted town, the inhabitants having all retreated to safe places. The Shogyo Shimpo's Seoul correspondent alleges that two of the enemy's horses were

As for the Korean soldiers who were posted at Pyong-yang and who had the reputation of being the little empire's best troops, they too have made themselves

scarce.

Viceroy Alexieff and his staff are said to be still in Mukden. News from Peking is to the effect that the Viceroy tried by cajolery and by threats to induce Governor-General Tseng to collect supplies and furnish coolies for the use of the Russian forces, and, in short, to administer Manchuria as though its inhabitants were allies of Russia. Tseng, though not a strong man, has sufficient discernment not to assume such an attitude without instructions from the Central Government and in the face of the neutrality which he knows that China has proclaimed Hence he has quietly ignored and is ignoring the Viceroy's behests. Under these circumstances Alexieff is reported to have taken the law into his own hands by pro-claiming that the inhabitants of Manchuria must render every assistance to the Russians against the Japanese and that any persons failing to do so will be severely punished. Alexieff doubtless considers that the report and latical. They are probably taken from reports that its Chinese and Tartar population must carried in by Korean peasants. The Nichi's correspondent thinks that the Russians south of the Yalu have no construction and that they are merely Alexieff doubtless considers that Manchuria take that view. But he would be acting more logically if he removed the Chinese Governor-General and all the Chinese officials, replacing them by nominees of his own. Nothing could be more anomalous than that the Chinese Empire should continue to administer a region which the Russians are openly engaged in stealing from China, and that the Chinese administrators should be expected sive position at the river. The weakness of to aid in the consummation of the theft. Out such a position would be that it lies exposed of the present state of affairs some very to be outflanked from the sea. curious complications are sure to arise, and if at this early stage the Russian Viceroy is from Seoul say that the number of Russian

if Alexieff took a similar course in Mannow the assertor of China's integrity and independence so far as concerned her three Eastern Provinces, this war need never have been commenced.

It is not in the above respects, however, that Russia is flagrantly disregarding the neutrality which she herself urged China to proclaim. In Peking also she shows the same mood. The movement of Ma's ten thousand men to Chau-yang, and of Yuan's force to Kinchow, outside the wall, has created great alarm at Russian head-quarters as indicating that at a moment of emergency Russia may find a not altogether contemptible enemy posted on her flank. Accordingly Viceroy Alexieff is said to have conveyed to the Peking Government, through M. Lessar, an intimation that at the first sign of hostility on China's part, or in the event of her persisting to assert her neutrality in the West Liao region, Russia will at once march an army of five hundred thousand men against Peking from Chanchiakow. move such a force, or any considerable force, across the desert and into Chili would be a feat quite beyond Russia's immediate strength even though she were free to devote her whole attention to its accomplishment, But China does not reason in the face of menaces: she merely wilts. It would seem that she is disposed now to let the West Liao question drift and to refrain from any attempt calculated to inconvenience Russia, although Mr. Uchida is employing all his eloquence to inspire her with some courage, Can China possibly be saved from destruc-tion when she has not the slighest disposition to save herself?

In this context we read a repetition of the curious statement that the Peking and Tientsin Times has been purchased Russia, and that it is now exerting itself to convince its Chinese readers of the impo-tence of Japan in a military sense as compared with Russia.

Wednesday, March 2. It is reported from Seoul that the most advanced scouts of the Russians northward of Pyong-yang, namely 50 men, are at Haiju, a place not marked on the maps but presumably a small town in the neighbour-hood of Sukchhon or Sunan. At Kasan there are said to be 500 and at Chonju 4,000. These numbers are very problematical. They are probably taken from reports

idea of attacking, and that they are merely an observation corps. That may be assumed, for to attack Pyong-yang with a force of five thousand or even five times five thousand would be a hopeless task. It looks as if the Russian plan was to hold the Japanese southward of the Yalu as long as possible and meanwhile to establish a strong defen-

offices at Ningpyong and Anju, have made prisoner of the principal local official in Anju, and have carried off all the books of the local Government. Curious spoil.

Thursday, March 3.

Yuensan sends news that 1500 Russian troops have passed south of the Tumen, have reached Hoi-yong, have seized the local headman and have required the inhabitants to furnish provisions. Hoi-yong is on the inland road from the mouth of the Tumen to Sonchin. It is celebrated as the furthest point to which the Japanese General Kato Kyomasa penetrated in his pursuit of the Korean monarch over 300 years ago. The Russians can scarcely contemplate any serious move into Korea from that direction. Probably what is happening is that the force—a considerable force—sent from Vladivo-stock to Possiet Bay, has thrown a small flying column into Korea across the Tumen. The Russian plan of campaign is gradually developing. They have determined to developing. They have determined to menace Korea from the directions of the Yalu and the Tumen, that is to say, from the north-west and the north-east, Laoyang being the ultimate base in the former case and Vladivostock in the latter. The strategical disadvantages of their position would disappear if Japan accepted these challenges and devoted her whole strength to pushing back the two invasions by operating from Pyongyang in one case and from Yongsan in the other. But the Russian forces on the Valu and in Possiet Bay are both exposed to the danger of having their communications cut. The regiments in Possiet Bay have been carried thither by sea from Vladivostock and are drawing their supplies from that place. We have it in evidence that the Vladivostock ice-crusher Nadorshnik, instead of discharging her normal functions, has been transporting troops and munitions to Possiet Bay. Such movements would have been well enough 55 years ago, in the era of raids and forays. 35 years ago, in the era of raios and rolays. But they are now an idle dissipation of strength; precisely such a dissipation as Russian commanders made in the case of their naval squadrons—a dissipation then attributed to magnificent supineness, but really attributable, it would seem, to an entirely false conception of the enemy's strength However it must be confessed that this aggressive activity on the part of the army contrasts pleasantly with the inert help-lessness of the navy.

It is reported that a Russian vessel has

come to Kilju, which lies a little north of Sonchin, and is there engaged in recon-noitering operations. What is there to noitering operations. reconnoiter, we wonder. Unless perhaps the Russians think that a Japanese column is to move towards the Tumen from Yuensan. It is from the latter place that this news comes

We are now informed that not more than 500 Russians, all cavalry, are be-sending troops there, Russia will certainly tween Seoul and Wiju; that there are feel the strain very severely. General not any in Kiulien, and that Antung Kuropatkin is said to have alleged that the has a garrison of 2,000. This is the war will last at least 18 months. In that case other three journals put 500 only.

The Jiji Slimpo has a telegram that 300 calmly.

The Russians have seized the telegraph Russian troops from Possiet Bay have fisces at Ningpyong and Anju, have made crossed the Tumen and advanced to Ungrisoner of the principal local official in kwi Bay. Probably this is an offshoot of the movement described above.

GERMAN OPINION REGARDING RUSSIA'S PLAINT.

The following Berlin telegram, dated Feb. 25th the has been received at the Foreign Office. Tokyo:

Office, Tokyo:—

In commenting on the late circular of the Russian Minister for Foreign Affairs, the Lokal dusciger remarks that Japan had, in a formal sense, undoubtedly no right to land troops or to exercise her Sovereignty within the territority of a country which was recognized as an independent State and which declared its neutrality vis-a-vis the Russo-Japanese war, but practically the question is wholly different, because Korea, with her weak and insufficient military force, was not able to maintain neutrality. Therefore the Russians could freely enter Korea if the Japanese Russians could freely enter Korea if the Japanese had not come there before them. It is, therefore natural from the geographical position of the seat of war that Korean territory should be utilized as a basis of Japanese military operations. The recognition by the Powers of the independence of Korea under these treaties, does not necessarily imply that they have guaranteed her inviolability in case of war, as, for instance, with regard to the case of Belgium.

One point is, however worthy of notice in the Russian circular, that neither Korea's neutrality nor the validity of ordinances emanating from the Korean Government is any longer acknowledged by the Russian Government.

The following comment appeared in the Berlin Bowse Courier :-

While the two belligerents are preparing for a serious combat on the battle field, the interval is employed by them in waging a collateral diplomatic war, Japanese inspired articles giving her case concerning the termination of negotiations and the rupture of diplomatic relations, while Russia brings severe accusations against Japan of violating international law. In regard to the Russian Circular, from an invertent point of view it can only be said that no national law. In regard to the Russian Circular, from an important point of view, it can only be said that no complaint can be made against the Japanese Government from the moment when they broke off diplomatic relations with Russia. The question, bowever, still remains unsolved: what were the reasons which induced Japan to break off diplomatic relations before the receipt of Russia's reply in Tokyo, which was only a matter of 24 hours difference in waiting and would not have caused any important change in the situation. At all events, it is useless now to pronounce any opinion as to which of the two parties was in the right or in the wrong; and according to the rules of war, the cammon of one will now decide.

The Vossiche Zeitung says that the Russo-Japan war is progressing in a manner for which it would be difficult to find any precedent. No one imagined that in a few hours Japan would have been able to secure the superiority at sea. It turns out to be quite false that four Japanese men-of-war were sunk outside Port Arthur, and the truth is that the Russian fleet is shut up in the harbour unable to attempt any offensive movement. It is to the operations on land that public attention will now be directed. Numerically the Russian army is the stronger, but considering the great distance of the field of operations and the difficulty of not any in Kiulien, and that Antung has a garrison of 2,000. This is the account given by the fifi, the Asalii, and the Nichi Nichi. But the Kokumin says that there are probably 1,000 in the neighbourhood of Wiju, 1,200 in Chong-ju, 78 in Ning-pyong, 30 at Sun-an and 2,400 distributed between Kasan, Pak-chhon and Anju. No one—at least no journalist—seems to be guite confident about this matter. It will be perceived that the Kokumin's intelligence assigns 4,728 men to regions where the other three journals put 500 only.

Kuropatkin is said to have alleged that the war will last at least 18 months. In that case this war will not only produce most grave this war will not only produce most grave condition of the combatants, but will also be severely felt by the neutral States that have commercial relations with the belligerents. Germany happily stands in a position which secures her against being reached, however unit confident about this matter. It will be perceived that the Kokumin's intelligence assigns 4,728 men to regions where the other three journals put 500 only. churia, will be able to watch the struggle

KOREA.

Saturday, February 27. The Americans and Japanese from Unsan are said to be withdrawing to Pyong-yang.

Li Yong ik seems to have been the real cause of all recent anti-Japanese obstructions in Korea. Hence his removal from office and his retirement to Japan where he will find a safe asylum and time to reflect. It is said that Li had made his obstructive influence very strongly felt of late. There is a report that the Imperial Treasury of which he had charge was found to be filled with empty boxes, and thus as the Japanese say, "his tail is exposed." Min Yong-chhol, who belonged to the same political clique, is to seek refuge in the Korean Legation in Peking, where he will be in charge; Li Keun-thaik has resigned his post and left the capital for his provincial home; and Kil Yong-chu also is expected to make himself scarce. The Emperor, it is now thought, will have fewer fits of trembling.

Monday, February 29. The following has been published:

Korean Minister for Foreign Affairs communicated under date of Feb. 25, to the Japanese Minister at Seoul substantially as follows —

Wiju, in Northern Pyel-teung, had formerly een the site for overland trade with China, but as the consequence of certain events, the trade has for a time been discontinued. Since, how-ever, the trade of that town has gradually been revived, the Korean Government now deem it proper to open the town for foreign commence. I therefore, in accordance with the decision of the Council, and with the approval of H.M. the Emperor, declare this to the Foreign Representatives accredited to this Court. The limits of the city and the date of opening shall be communicated later.

The Korean Government declared on the evening of the 25th that Anju is to be open to foreign trade. As yet the limits included in the term "Wiju" and the day of opening are not fixed, but the expectation is that Yong Am-pho will be included in the limits. This, doubtless, is one of the "orders" which the Russians have adopted the precaution of declaring null in prospective.

News from Seoul says that the war notes hitherto issued in that city total some 70,000 yen, and that probably their issue in the capital will not exceed that amount. They They will be used rather in provincial districts.

Seoul and Chemulpo seem to be suffering much from scarcity of provisions. Prices have risen 500 or 600 per cent., and even at these enormously enhanced figures provisions are difficult to obtain. Arrangements had been made for a supply of 500 koku of rice, but the ordinary means of communication having been interrupted owing to the passage of troops, this staple could not be carried. In deference to Japanese representations a quantity of Annam rice stored in the imperial warehouses was put on the market, and the Osaka Shosen Kaisha has now determined to renew the line of steamers between Fusan and Chemulpo from the 29th inst. It will be understood, of course, that the usual steamship services have been interrupted. Rice is said to be now selling at 21 yen per koku, and a small bundle of vegetables costs 90 sen.

The Russian troops in Korea have seized the encampment of the Korean soldiers at Anju and taken possession of the men's arms. The Koreans do not appear to have offered any resistance. Eighty of them fled to Pyong-yang on the 26th instant.

A Japanese newspaper of doubtful credibility alleges that in consequence of the graphs that the ice in the Tadong river is It is a pity that these politicians, instead of newly concluded Protocol the Korean Govnearly broken up and that navigation is crying out about the independence of their vernment has issued instructions to its probably possible. Representative in St. Petersburg to withdraw with all his staff from the Russian capital.

It is stated (Nippon) that the Emperor of Korea has signified his intention of contri-Korea has signified his intention of contri-granting 100,000 yen to the Soldiers Relief frund, that the Crown Prince will give to 000 Fund, that the Crown Prince will give 50,000 and Prince Yong 20,000.

The Nippon says that in the sequel of the new Protocol Mr. Hayashi has asked the Korean Government for the Scoul-Wiju railway concession.

Tuesday, March 1.

It is reported that the Korean force sent to guard the northern frontier of Hamyongdo has been completely routed by the Russians but there are no details. Probably the force referred to was posted on the southern bank of the Tumen.

One may note in this context that Russia's talk about Japan's failure to observe the neutrality of Korea sounds strangely in connexion with her own doings. Long before, very long before, the outbreak of hostilities or the rupture of diplomatic negotiations, Viceroy Alexieff was moving troops towards the northern bank of the Yalu and massing them northern bank of the Yalu and massing them at Feng-hwang and Kiulien. What did he intend to do with them? The question was answered on the very morrow of the rupture of negotiations, for the advance guard of these troops forthwith crossed the Yalu and began to move through Korea towards Pyong-yang. It would be difficult, we imagine, to discover in all the history of civilized states anything more frivoluse than civilized states anything more frivolous than the conduct of Russian statesmen at this crisis. They are simply grasping at every straw, however fragile, which seems capable of helping to convict Japan of unworthiness to remain in the comity of nations. No wonder that the Japanese apply to Russia's procedure the epithet used in describing the petulance of women and children, guchi

The views entertained by the various Powers with regard to the new Korean-Japanese Protocol have not yet been ascertained fully, but the British and American Governments are understood to have expressed approval of it.

The Ministers of the United States and of Great Britain have respectively applied to the Korean Government to provide due protection for the mining property of American citizens at Unsan and for the persons and property of missionaries throughout Pyongan-

An exodus of Koreans from Pyong-yang and from the places along the high-road thence to Anju and Wiju is reported. These people have not been fortunate. Twice within ten years they find themselves brought into immediate contact with war.

Wednesday, March 2. The Emperor of Korea has subscribed ten Prince Yong 3,000 for the purpose of erecting a place to entertain Japanese officers.

It is confirmed that in the exercise of the

privileges secured by the recent Protocol, Mr. Hayashi has asked for the concession of the Scoul-Wiju Railway.

Li Yong-ik seems to have left Seoul just in time, immediately after his departure he was impeached, and the Emperor ordered

his removal from high office to a prison, but Li had disappeared. He was in Osaka on the last day of February and he set out for

Tokyo yesterday.

The Japanese Consul at Chemulpo tele- Protocol, is not of much consequence,

Thursday, March 3.

It is stated from Seoul that although the Korean Government does not object to Power is inclined to make protest. France, we presume, is the Power referred to. She probably contends that when her people, having failed to undertake the construction of the line within the appointed time and having no prospect of being able to undertake the conditions and the state of the state take it at any time, surrendered the conces-sion, it was understood that the work would be done by the Korean Government itself.

Mr. Miyasu, Japanese Consul at Seoul repeats his statements as to the scarcity of provisions at Seoul and Chemulpo owing to mendation is that steps be at once taken to re-establish the regular line of steamers

between Japan and Chemulpo.

The leading London journals discuss the new Japan-Korea protocol. Their general view seems to be that it places Korea in much the same position with regard to Japan between the two countries.

Li Yong-ik, speaking at Osaka, claims to have had a hand in concluding the new Protocol. He has apparently donned a thoroughly pro-Japanese garment since his arrival in this country, and he now declares himself as much pleased by Japanese victories at sea as he is grieved to think that Japanese soldiers have not found com-fortable accommodation in Korea. We trust that Mr. Li's mood will last.

A telegram to the Shogyo Shimpo from Berlin says that the German Government has raised no objection whatever to the new Japan-Korea Protocol.

It is stated that Mr. Hayashi, learning of some transactions with reference to the appointment of a Japanese subject as adviser to the Korean Government, had pointed out that it would be desirable that he should be consulted before the making of such Connected with this story is the name of Mr. Oye Taku, well-known at one time on account of his relations with the late Count Goto in political matters.

It is reported that there has arisen in Seoul a party hostile to the new Protocol. The head of the malcontents is Li Yong-in, Vice-President of the Privy Council. These people are said to be making themselves so active that the Cabinet talks of resigning.

Friday, March 4. We read in the Kokumin Shimbun that France's objection with regard to a Japanese concession for the construction of the Seoul-Wiju railway is met on the Japanese side by the explanation that the line is needed for strategical purposes, an object with which the quondam French concessionaires are not in any way concerned. From that point of view Korea's last Protocol with Japan binds her to grant the concession and disposes effectually of the French protest, which, after all, is probably not very serious. It is considered that the anti-Japanese contribution of the protocol of the p

party in Seoul which has lately raised its head in opposition to the Japanese-Korean min Shimbun that the Russian Government

country when she is taken under the protec-tion of a Power which fought once for that independence and is now guaranteeing it against the aggressions of an all-devouring State, do not exert themselves to educate among their countrymen the protentialities of self-defence without which her independence is impossible.

Lieut. General Inouye, who commands the Twelfth Division, now in Korea, has issued a notification with regard to the treatment of prisoners and the manner of dealing with spies or persons that obstruct the military operations.

CHINA.

General Ma Yu-kon's forces, consisting of 20 battalions-nominally ten thousand of all the arrival of troops. He says that already arms—have passed the Great Wall and there is considerable distress and that it will taken up positions at Chou-yang, Kien-chan be greatly aggravated if things are allowed to remain as they are now. His recomthey will advance should such a movement be required by the occasion. China, then, seems to have finally determined to regard as within the neutral zone all that part of Manchuria included between the Great Wall and the Liao River. Long before war became certain the interest attaching to this quesas that occupied by Egypt with regard to tion was pointed out in these columns. Of England, and that the practical working of course if China confine herself to posting a the agreement will result in similar relations few soldiers northward of the Wall in the vicinity of Shanhaikwan, Russia need not pay much attention to her. But if the determination of the Peking Government be to assert its neutrality throughout the above region right up to the Western bank of the Liao, there will be posted in close proximity to Russia's right flank and, above all, to her line of railway a body of troops having the character of potential enemies. We shall be surprised if Russia does not continue her most strenuous efforts to free herself from that great inconvenience. It is perhaps prema-ture, however, to conclude that China has become vertebrate in this matter. Accounts differ. One rumour represents her as having made up her mind irrevocably; another says that the Wai-wu-pu is still negotiating with Viceroy Alexieff on the subject. As for Russia, she appears to have adopted a practical method of protesting by at once posting a small force on the west bank of the river.

Viceroy Yuan is reported to be very solicitous about the foreigners in the military service of his country. He has required the German employées to sign and seal a set of seven pledges, the nature of which is not stated, and he has issued orders that no foreign military men shall be allowed to accompany the Chinese troops outside the Great Wall.

We alluded in a recent issue to secret shipments of cattle from the neighbourhood of Chefoo to Liaotung, and to the fact that the Japanese Consul had strenuously called the attention of the Chefoo Taotai to this breach of neutrality. The Taotai is now said to be taking vigorous steps to check the abuse. He has ordered the gun-boat Chen-hai to watch the coast.

Shanghai sends word that the United States ships San Francisco, Brooklyn and Tacoma have assembled there, and that they will presently set out to carry Mr. Morgan, the United States Consul, to Dalny. This statement requires confirmation.

The Chinese Authorities are said to be taking vigorous measures to prevent the secret export of munitions of war to Man-

The 1904 issue of the "Directory and Chronicle" published at the office of the Hongkong Daily Press, is to hand and calls Chronicle for the high terms of commendation usually employed in commenting upon this really monumental work. In the Directory proper every locality where foreigners are settled reside finds a place, from Vladivostock and Nicolaiesk through a long series of inland cities and sea and river ports southward to Singapore, Penang, Dutch India, the Philippines, the list winding up with Labuan in Borneo. The Yokohama section is necessarily condensed but the information, so far as we have been able to gather, is fairly accurate and up to date. If we may infer from this the general trustworthiness of the Directory then it has indeed substantial claims to a place on the merchant's and official's desks. There is in addition a mass of matter inserted for reference, such as treaties, conventions, protocols, tariffs, Orders in Council-so that within one pair of covers a busy man may well find facts or figures for which he must otherwise have recourse to a dozen volumes. A special feature of this year's issue is, we note, the publication of the com-plete Customs Tariff of Japan, including not only the articles and rates of duty covered by the revision that came into force in April, 1903, but also those covered by the Commercial Treaties with the various Powers. But a point presents itself: will the "Directory and Chronicle" continue to grow in proportion to the treaty and convention-making that seems to have set in?

From the *Peking and Tientsin Times* we take the following proclamation which has been issued by Yuan Shi-kai, the powerful Viceroy of Pe-chi-li:—

s.—Anyone creating wild rumours calculated to alarm or produce doubt in the people's mind will be beheaded.

Anyone teaching or learning mystic practices like Boxer measures and red lantern doctrines will be

3.—All persons gathering together for purposes of plunder or forcible disorder will be beheaded.

4.—Anyone in the Government service, military or civil, found connecting himself in any way with

civil, found connecting himself in any way with people spreading strange doctrines or connected with disorders, will be beheaded.

5.—For the harbouring of those who spread wild doctrines and mischievous beliefs, the head of the family will be imprisoned for five years and all the property confiscated.

6.—If in any family or in any village any person is known to spread mischievous doctrines, the head of the family or the Tipao must report the same to the authorities. If this is not done and the matter is discovered, the head of such family will be imprisoned for one year, or the head of such village for three years.

7.—If in any place any altar or other thing is erected by those teaching strange doctrines to make public demonstrations thereon, anyone reporting the same will be rewarded by the property belonging to

public demonstrations thereon, anyone reporting the same will be rewarded by the property belonging to the guilty persons being given to him.

8.—Anyone arresting a teacher of mischievous doctrines and bringing him to the authorities will receive a reward of TIs. 200 for a leader, or TIs. 200 for any five followers of the same. Those giving such information as will enable the authorities to a tract such leader will receive held the reward.

such antormation as will enable the authorities to arrest such leader, will receive half the reward.

9.—The prevention of all these evils depends greatly on the vigilance of the local officials in each district, and in any district where it is found that people are assembling and public instruction is being given in foolish doctrines, those officials must be strongly impressed.

have intimated formally their conviction of China's inability to maintain strict neutrality and their determination not to recognise her neutrality any longer.

The Chinese Authorities are said to be those inclined to foolish practices warning, that they feeling the fact. If it be true that Russia is may repent and escape punishment. But it does not exonerate those who are well known to have been evil does in the past, and for whom the authorities are said to be make this prohibition an excuse for troubling the people.

11.—If any persons falsely accuse others for the sake of reward, they will be heavily punished if such

The Peking correspondent of the Nichi Nichi Shimbun telegraphs that M. Lessar has now officially demanded of the Chinese Government the withdrawal of General Ma's forces from Chouyang, which is on the Manchurian side of the Great Wall. Apparently Russia's objections had not previously taken an official form, but they are now preferred as demands of the Russian State. It thus follows that Russia openly declares even her first-period evacuation of Manchuria to have been a farcesay, the evacuation supposed to have been concluded on October 8th, 1902. We do not immediately see how she could have contrived to be more faithless than she has been in this matter. She allowed the world to suppose, she encouraged it in the belief, that the first step in the programme of evacuation had been duly carried out, and resting in that belief no apprehension or serious suspi-cion was felt by the nations until the date for the completion of the second step came and passed without any sign of evacuation. But now the Russian Government turns round and publicly avows that the whole business was pure fraud and deception; that in reality no part of Manchuria was ever evacuated, and that the whole of the three provinces have ceased to be part of China and must therefore be excluded from the sphere of her neutrality. This monu-mental exhibition of perjury is aptly sup-ported by empty menaces of marching an army of half a million men across the steppes of Mongolia against Peking Kalgan. Russia does not from talking big. She has found it pay hitherto. The nations have cowered under her threats. But it is possible that the stage may have now become too small for her. Viceroy Yuan has perhaps some back-bone. We do not know. It were very rash to assume the existence of that attribute in any responsible Chinese stateman. But he is said to be wrathful about Russia's lawless and contumelious conduct, and to be disposed to persist in his Government's original programme even at the expense of a collision with Russia. The only question is, which course will least conduce to Russia's convenience. What a pity it is that all the Russia's bluster. The note she issued to has been made concerning them. the nations on the 9th of February shows so clearly what her diplomatic course was with regard to Japan. Manchuria, according to that note, concerned, in the first place, China but also "all the Powers having commercial interests in China" and as she knew that "all the Powers" with the solitary exception of Japan, were indisposed to interfere with her aggressions, therefore she insolently and arbitrarily declined to discuss the matter with Japan to whom it was a question of life or death. Perhaps Japan's courage may inspire some other nations to look the blustering

and unscrupulousness is said to have been displayed at Newchwang where she proposes to devote the customs revenue to military expenditures. That would be sheer robbery. The customs revenues belong to China pri-marily, and secondarily to the Powers, who hold a lien on them as security for China's debt. Sir Robert Hart is said to have protested vehemently. We can well imagine Sir Robert may be trusted to do his duty. The Chinese Government will support him until the strain begins to tell on its weak back. But the Powers will not budge. The Russian bogic is too much for them.

The Russian Government is said to have formally intimated to the Chinese Government that whereas Japan is compelling Korea to take certain steps against the latter's will, Russia will not recognise the validity of any of these steps. It is curious that Russia does not perceive the applicability of her protests to her own conduct. What is she doing now except trying to force China to take certain unwilling steps with regard to the West-Liao region? What is she doing in Manchuria except trying to compel the inhabitants and their officials to support her in a war virtually directed against their own country? The scripture of international law was evidently compiled, in Russia's opinion, solely for Russia's convenience. She declines to acknowledge the binding force of any decalogue where she is herself concerned, but she insists that its provisions shall be applied with the utmost strictness to the conduct of others.

Attempts to forward food-stuffs to Port Arthur from China have still to be checked. A Tientsin merchant was about to send seven thousand sacks of flour, it is said, when Mr. Uchida appealed to the Peking Government on the subject. Probably Chinese merchants do not fully understand the duties of strict neutrality, though they ought to do so had they read their Government's proclamation on the subject.

THE " MANJOUR."

Friday, February 26.
The Manjour was to be disarmed on the 25th instant, her armament being taken charge of by the Customs officials and her crew sent home by another steamer. As a matter of strict propriety her crew should be held by the Chinese until the conclusion of Powers sit with folded hands in the face of the war, but possibly some special agreement

> Saturday, February 27.
> The disarmament of the Manjour does not seem to have been yet effected. Japan insists that her guns shall be taken out, and that she shall be deprived of all the marks of a man-of-war. But the Russians want to reduce the matter merely to the removal of her rudder. It is expected that the more drastic course will be adopted in a few days.

Sunday, February 28. some other nations to look the blustering giant squarely between the eyes.

The Chinese in the employment of the Russians at all their coal mines in Manthe termination of the War. The Nichi churia are said to have struck work. This Nichi Shimbun is much discontented about does not appear to be in any sense a matter this affair. It says that a wholly novel being given in foolish doctrines, those officials muss be strongly impeached.

10.—These prohibitions are intended to guard the rouble note has greatly depreciated in purble still a practical recognition of the principle people against any trouble in the future, and to give chasing price and the Chinese labourers are that a ship escaping from battle and taking by the neutral Power and her crew held diplomats do everything in their power to prisoners. But no one ever heard of the idea throw suspicion on her integrity? any conflict and not placed in any jeopardy, should be treated as the *Manjour* has been treated. Such a ship should either take her chance in battle or should be handed over to the belligerent from whom she is seeking to escape. Not only does Japan thus lose an addition to her fighting force, but also there is imposed on her the burden of seeing that the *Manjour* does not subsequently escape and rejoin the Russian fleet. Our contemporary holds that in this matter China has shown herself the friend of Russia rather than of Japan, and insists that if the Peking Government intends to allow itself to be then brow-beaten by M. Lessar, Japan must adopt measures of self-protec-

about the Manjour. She is to be dismantled; that is certain. But as to what is meant by dismantling there seems to be a difference of opinion, Japan wanting some-thing much more thorough than Russia is disposed to agree to. It can scarcely be said that in this matter Russia has shown any solicitude for that international law to which she appeals so fervently when her own

equivocal rules of neutrality.

Taotal has officially informed the Japanese stringent nature. It declares that the perof this arrangement.

there is another rumour in the sense that of cattle, fowl or provisions of any kind. the Chinese Government has addressed a circular to the Powers complaining of Russia's violation of neutrality in the case of a place like Shanghai where all are interested in removing any obstacle to the tranquil conduct of trade.

We do not know the exact details of this the outlines are obscured. But it is impossible period of the war, or does she entertain some dishonest project of ostensibly complying party. Colonel Hume, Military Attaché of wetchensk on the 10th instant and produced with the requirements of law and subsequently evading them by some ruse which Aid-de-Camp to General Baron Kodama, There were 160 Japanese residents—presumably they are there still—but the military and resolute. ron? If she be honest in the matter, what occasion is there for all this discussion and

refuge in a neutral port, should be disarmed objection? If she be honest why do her

VLADIVOSTOCK.

A British steamer which left Vladivostock on the 23rd and reached Nagasaki on the 26th, reports that at the former date the four cruisers were lying inactive and showing no signs of leaving the harbour. Two armed transports were there also. The ice at the entrance to the harbour was 3 feet thick, and communications by land were very arduous. There was no appearance of the garrison having received any increment. Large baulks of timber were being sent overland to some destination not ascertained but supposed to be Port Arthur. It is, however, almost inconceivable that Liaotung should draw a timber supply from Vladivostock overland. Monday, February 29. In this context we may note that presum-The public are probably tired of hearing ably the export of timber from the Yalu has

> A report has been received from Sado that an unrecognised warship was seen in the offing, and there were suspicions that she might be one of the Vladivostock Squadron. But the Japanese Authorities take no stock in the story.

It is a significant fact that martial law interests are furthered by doing so. Japan was proclaimed at Vladivostock on the 9th of has been obliged to reduce her fighting February, and the proclamation must have was proclaimed at Vladivostock on the 9th of strength by two ships during a space of been drafted on the 8th, in other words more than three weeks simply because prior to the opening of hostilities by Japan Russia has grossly violated one of the least at Port Arthur. That was indeed a convincing indication of peaceful intention!

Wednesday, March 2. The martial law proclaimed at Vladivo-A telegram from Shangliai says that the stock on the 9th of February is of a most Consul-General with regard to the Manjour sons and property of all individuals, whether that the ship is to be disarmed, that her civilian or military, must be held at the officers and crew are not to be allowed to disposal of the military authorities; that take further part in the war, and that China every one—apparently soldiers are inis to be responsible for the full carrying out cluded—must forage for himself; that all persons desiring to avoid the operation of Thursday, March 3. The Mandjour question still hangs fire. draw at any instant, in which event no re-Rumour says that the disarmament of the sponsibility will be accepted on account of vessel had been carried to a certain point their persons or property; that all those on the 25th ultimo, when the Russian leaving by train will be allowed to carry Minister again interfered. This led to fresh away only such articles as they can attach discussion, and a final decision was reached to their persons, but those leaving by carron the last day of February. But it has not riages, carts or other vehicles may carry yet been carried into effect. Meanwhile away their entire goods with the exception

THE RELIEF OF LADYSMITH.

Sunday was the anniversary of the relief of Ladysmith after a four months' siege in which the garrison suffered many losses and affair. There has been so much talk that even privations. It is the custom to celebrate this event in London by a dinner to which to avoid the conclusion that Russian diplo- are bidden only those who took part in the macy is displaying the pragmatical fussiness defence of the town. Several of the besieged for which it has been notorious during the are now in Tokyo awaiting orders to go to past five years. The question of the Mand-the front. On Sunday night they dined at jour is as clear as crystal. Does Russia the Imperial Hotel in Tokyo. Capt. Jardine, propose to observe the unequivocal principle Capt. Lionel James, of *The Times*; Mr. of international law or does she not? Is she Maxwell, of the Standard; Mr. MacHugh, willing that the vessel should be disarmed of the Daily Express; Mr. Macringh, and placed hors be combat for the remaining of the Illustrated London News; and Mr. and placed nors be comment of the remaining Lynch, of the Daily Chronicle, formed the dishonest project of ostensibly complying party. Colonel Hume, Military Attaché of

WAR NOTES.

Friday, February 26.
It having transpired that Chinese junks are secretly carrying provisions to Port Arthur from the neighbourhood of Tsing-

hai in Shantung, Mr. Mizuno, Japanese Consul at Chefoo, has approached the Taotai on the subject, and the latter has sent a

gunboat to check these practices.

The Nichi Nichi has a telegram from Chefoo which says that, according to a trustworthy Chinaman, the Russians have made preparations to blow up the wharves and all the principal buildings at Dalny

in case of emergency.

A telegram from Chemulpo quotes a person who was in Port Arthur from the 8th to the 14th. He says that with the excep-tion of the *Pobieda* there was not one Russian ship that escaped unscathed, and that they are all in the harbour undergoing or awaiting repairs.

There are statements that Port Arthur has provisions for three months only, but such rumours must be accepted with much

reserve.

The master of an American ship, which has just entered Moji, says that six Japanese subjects have been killed by Russian gendarmes at Port Arthur on suspicion of cutting telegraph wires.

It is again alleged that Viceroy Alexiess has unquestionably transferred his head-

quarters to Harbin.

A telegram to the Kokumin alleges that General Ma Yu-kan's troops have already passed beyond the Great Wall for the purpose of preserving neutrality in the region westward of the Liao River.

The canned meat-rumoured to be worth a million yen-which is on board the S. S. Korea has for direct destination Nagasaki, not a port in Russian occupation. Con-sequently it is not probable that any severe measure will be taken with regard to the vessel or her cargo. She will be allowed to continue her voyage and to land the meat at Nagasaki, its consignee at that port being held responsible for its ultimate destination.

Saturday, February 27

A telegram from Shanghai, dated the 25th instant, says that the Wilmington suddenly weighed anchor and left the port, although 150 of her men were ashore. The Wilmington is a gunboat of 1,397 tons, and her full complement of men is 170. She could scarcely afford to go away leaving 150 of them on shore.

Shanghai is to have a Russian organ published in English. That is an interesting departure. It will be very satisfactory to learn about Russian views and hear the

Russian side.

The Vladivostock Far East publishes the speech addressed by the Tsar to the students of the Naval College in St. Petersburg on the 10th instant, when His Majesty an-nounced to the students that their course would be shortened by 3½ months and that all would be at once commissioned in view of the necessity of increasing Russia's military and naval forces. The Tsar took occa-sion to allude to Japan's treachery in attack-ing his forces before she had declared war. He must know by this time how the world laughs at him.

The order for mobilization reached Blagogovernor adopted such prompt and resolute measures that no disturbance of any kind occurred nor were the Japanese subjected to any inconvenience.

明治廿五年三月計日第三種蘇領協能可

The Vladivostock journal of the 12th says that a universal requisition for horses was issued on the 10th instant, but that it produced only 300 animals.

The inhabitants of Vladivostock appear to be all making their way to Nicholesk and Habarovsk. The trains going north from Vladivostock are said to be crowded.

It is stated that on the 11th instant a pood of beef was sold for 10 roubles in Vladiyostock.

Monday, February 29. Following is the Russian contradiction published in Shanghai by the N.-C. Daily News on Feb. 22nd, to which we have already referred:—"We have been requested by the Russian Consul-General, Mr. Kleménow, to publish the following telegram received here from Port Arthur on Saturday:—'The official communication emanating from the Japanese Embassy in London concerning the attack of torpedo destroyers on Port Arthur during a snowstorm on 13th February is totally false. There was no attack; not a single ship was damaged nor was any vessel exposed to any attack or damage. All up to date is absolutely quiet. (Signed) Admiral Witgeft, Chief of Naval Staff.''' As every-Witgeft, Chief of Naval Staff.'" As every-body now knows, the attack did not take place on the 13th. But Admiral Wetgift knew very well that at 3 a.m. on the 14th the Japanese destroyers assaulted the shipping in Port Arthur and drew the fire of the forts. Yet "all up to date is absolutely quiet." Quiet!

Tuesday, March 1.

Japanese securities are still falling in London. The four-per-cents are now quoted at £66 and the five-per-cents at £77.5s.

There has been published in Tokyo translation of an article which appeared in the Harbin Daily News of the 7th February. We do not think it worth while to re-translate the production from Japanese into English, as it is merely a bombastic utterance unworthy of serious attention. At the close of the essay its author warns England and America that Russia will not forget their sympathy with Japan at this juncture, but it really matters very little to the threatened Powers whether the Muscovite memory is retentive or leaky.

Of the Russian ships that remained in the Red Sea, the cruiser Aurora, four destroyers and one torpedo-boat, entered the Suez Canal on the 29th ultimo. There still remain the Osslabya, the Dimitri Donskoi

and three destroyers.

The number of Japanese war correspondents who received recognition from the Authorities up to the 1st of March was 20, including two magazine representatives. These belonged to Tokyo. The number for the provinces was 38. With regard to foreign correspondents, the figure given is 53, and their interpreters and servants total 26.

The Dalny newspaper of February 10th comforts its countrymen by an announcement that a great battle has taken place on the Yalu in which the Japanese fled, leaving 500 dead and wounded upon the field, the Russian casualties being only 80. It further states that Chemulpo has been captured by a Russian squadron, and that in the torpedo attack on the 8th a Japanese destroyer was sunk, one was captured and one escaped.

Wednesday, March 2.

A rumour has reached Tokyo that the railway from Harbin to Nikolskoie has been Novik—Struck amidships on the port-side at the destroyed through a distance of 2 kilometres

water line by a Japanese shell.

Varyag—Sunk at Chemulpo,
in the neighbourhood of Ningtow. That Koreelz—Sunk at Chemulpo,

would mean that Vladivostock is temporarily isolated from Harbin,

A Russian resident of Nagasaki sent to in China, all the Powers having virtually average of over 25,000 each. abandoned their some-time attitude of resistence to her claims, and Japan being the sole objector that remained. Japan, however, did not count at all. Her utter inever, did not count at all the every inevery did n Petersburg. It was incredible that she should persist in her attitude of contumely, and if she did then the duty would devolve upon Russia of crushing her once and for all, thus saving the world from the Yellow Peril and rendering a permanent service to humanity. That seemed to be Russia's heaven-sent mission in Asia, and she ought THE LADIES' SOCIETY FOR THE RELIEF OF to discharge it without flinching.

This document would be of no consequence as a mere expression of individual opinion. But so soon as the views it expresses are publicly adopted by the Governor of the Amur Provinces, it must be taken as expressing the opinion held by one section at all events of Russian officialdom.

Thursday, March 3.

The Japanese Official Gazette publishes regulations with regard to the correspondence of prisoners of war, which is to be carried free of charge.

The Russian war-vessel General Admiral, which is reported as having arrived at the Azores, is an old cruiser (4,722 tons), launched in 1873. Probably her mission is to seal the Cape route if possible, as the Osslabya and her consorts are sealing the Canal route. but as she never had a speed of more than 12 knots, and as her work for some years has been training service, she can not be very successful in the role of commerce-destroyer.

RUSSIA'S LOSSES.

The Naval Department, collating the various reports hitherto published, inclusive of those from Russian sources, comes to the following conclusions with regard to the injuries suffered by Russian ships since the beginning of the war :-

beginning of the war:—
Retvisun—Struck on the port-side under the water-line by a torpedo and sunk; now lying on the west of the harbour's mouth where she constitutes an obstruction to navigation.
Tsarevitch—Struck on the port-side at the water-line by a torpedo.
Petroparticusk—Uncertain. Said to have been injured but to what extent is not yet ascertained.
Venisei—Blown up by one of her own torpedoes.
Pultava—Struck in the stem on the port-side at the water-line by a Japanese shell.
Diana—Injured by the Japanese cannonade on the oth instant.
Askold—Struck on the port-side at the water-line by a shell.

Askold—Struck on the port-side at the water-line by a shell.

Fallada—Struck on the port-side under the water-line by a torpedo.

Boyarin—Injured, it is reported, in the Japanese

Rojaru—Injured, it is reported, in the japanese attack on the 14th instant, but nothing definite known.
Serustopal—Said originally to have a defect in her machinery and probably unfit for the fighting

WAR AND PAIRIOUS FUNDS.

The Teikoku Kiujutsu Gikai (association the Governor of the Amur on the 19th of for the succour of soldiers), which was or-January a document which that official ganized by Counts Inouye and Matsukata, published as a state document on the 5th of seems to be obtaining large funds. The February, that is to say, on the day before Barons Iwasaki have contributed fifty thou-Japan broke off diplomatic relations with sand yen; the Mitsui Family, fifty thousand; Russia. It is an interesting document as Prince Shimazu, ten thousand; Prince Mori, showing two things, first, the consummate ten thousand; Baron Shibusawa, twenty faith of the Russians in their own destiny as thousand; Mr. Okura Kihachiro, twenty rulers of Asia, and, secondly, their supreme contempt for the Japanese as belligerents.

The writer sets out by saying that Russia Pujita twenty thousand. Thus nine contempt for the sets out by saying that Russia Pujita twenty thousand. might of Russia was fully understood in St. principally wives and daughters of naval

The names of various foreign employees of the Japanese Government are published as contributors to the funds of the Red Cross Society. Dr. Baelz' name figures for a thousand yen.

FAMILIES OF SOLDIERS AT THE FRONT (Shussei Gunjin-Kwazoku Imon Fujin-kai),

This Society, whose name expresses its object, held a preliminary meeting at the Nobles' Club on Feb. 25th at 2 p.m. There were present Princess Mori, Marchioness Kuroda, Countess Itagaki, Countess Matsukata (junior), Baroness Sannomiya, Lady MacDonald, Mrs. Griscom (by proxy), Mrs. Miller and others to the number of over 100. A lecture was delivered by the Honble. Miss Shimoda Uta, of the Peeresses School and various documents were read by Baron Mori. Miss Shimoda's address was very simple. It expressed a profound sense of gravity of the situation and of the duty that devolved upon the women of the nation to help their fighting men by providing as far as possible for the latter's families. The speaker knew well that in almost every household something was already being done, whether in the way of preparing bandages or rendering more direct aid. But many of those to whom she was now speak-ing could not spare from their domestic occupations sufficient time for such work, and it was to afford them an opportunity of assisting that this society was projected. Miss Shimoda alluded in terms of the warmest gratitude to the sympathy shown by foreign ladies, especially by those of England and America.

A conference was then held as to the election of a committee and as to other details of the society's organization

THE LADIES' BENEVOLENT NURSE SOCIETY (Tokushi Kango Fujin-Kai,)

On Feb. 28th at 2 p.m. this Society, which is affiliated with the Red Cross Society, held a meeting at the residence of Prince Kanin in Nagatacho. There were present Their Imperial Highnesses Prince and Princess Kan-in, Princess Higashi-Fushimi, Princess Fushimi, Princess Nashimoto, Princess Shirakawa, Count and Countess Matsukata, Baron and Baroness Hanabusa. Marchioness Nabeshima and many other notables to the number of about Marchioness Nabeshima, in her position of President, read out several reports, and Count Matsukata delivered a speech. He alluded with deep appreciation to the loyal spirit always shown by the Japanese people

to speak of the sympathetic aid lent by foreign ladies who were organizing a concert in aid of the Society's funds. It behoved them now, in view of this admirable example, not to rest content with mere temporary subscription, but to endeayour to collect enough to place the Society's funds on a permanently secure basis. Thereafter Prince Kanin, as President, nominated seven managers and seven committee-men, and the meeting broke up.

At the meeting of the General Committee of the Yokohama and Tokyo Foreign Residents Association for the Relief of Sufferers by the War, convened at the Masonic Hall on Monday afternoon, the following gentlemen were elected as an Executive Committee:—J. W Copniann, E. C. Davis, N. F. Smith, L. Mottet, Cæsar Hawkins, Williamson Jones, E. W. Frazar, N. W. McIvor, Rev. W. Weston, J. Walter and M.

At a meeting of the Executive Committee of the above Association held on Tuesday it was unanimously resolved that :-- "The Committee of the Yokohama Foreign Relief Association for sufferers by the war desire to emphasize their appreciation of the valuable services rendered by Mr. J. P. Mollison as Chairman of the General Committee.'

Twenty-eight Chinese of Kobe have decided to subscribe jointly ven 412,000 towards the Treasury Bonds.

The directors of the Nippon Marine Insurance Company, Osaka, met on Feb. 25th and decided to subscribe two hundred thousand yen towards the war loan. The employees of the Company offer fifteen thousand ven for the same purpose.

We learn from our Nagasaki contemporary that a meeting of the ladies of the foreign com-munity in Nagasaki was held in the Nagasaki Hotel, when it was decided to raise a fund to assist the families of the Reservists who have assist the families of the Reservists who have been called out for service; and also to receive gifts of clothing, and other things which may be useful to them. The following ladies were appointed a Committee:—Mrs. Boeddinghaus, Mrs. Clark, Mrs. Evington, Mrs. Harris, Mrs. Layard, Mrs. Muller-Beeck, Mrs. Ringer, Miss Stout. Mrs. Layard was elected Treasurer, and Mrs. Evington, Secretary to this Committee.

Marquises Ito, Yamagata, and Oyama, and Counts Inouye and Matsukata will subscribe twenty thousand yen each towards the issue of Treasury Bonds.

Princess Yuki Kayo, eight years old (daughter of Prince Kayo) Kyoto, has donated fifteen yen towards the fund for relieving distressed soldiers.

THE CHEMULPO PRISONERS.

There are twenty-four of the crew of the Varyag, including petty-officers, receiving treatment in the Japanese hospital at Chemulpo. Three of them only are so slightly wounded as to be able to converse. These men say that when the ship left the harbour the men all imagined that they were merely going to Port Arthur, and had no expectation of what was in store. But the officers took refuge in the strongest part of the ship (the Varyag's conning-tower has her thickest armour—6-in.). The crew numbered 540. When the ship passed under fire, the men withdrew from the dangerous posts, and it became necessary ultimately to summon the stokers to man the guns. These wounded men do not know how many were killed altogether, but they speak of one officer, a midshipman, who was blown to pieces. Four officers criminal sentence.

Manchuria, and that, in deference to the result of the forces which were undergoing the two Japanese subjects who were undergoing at the commander at Vladivostock, under orders of his Government, requested the

in any national crisis and he then passed on were wounded. These went to the Pascal. No reason was this country and Russia. The following is assigned for setting the ship on fire. a translation of this interesting document:—Simply an order in that sense was given.

The Russian Government have, in their com-Several wounded men perished in the flames. These informants allege that their food on board ship was of the worst and that they They had received no pay for two months. had received no pay for two months.

are most grafeful for their treatment in the Japanese hospital. They confirm the report that the Kapeets was not injured at all. The Japanese did not fire on her.

> The Russian Government having instructed the French Vice-Consul in Seoul to address to the Japanese Consul at Chemulpo, Mr. Mimasu, who is also director of the temporary hospital erected there, the Tsar's thanks for the kindness shown to the Russian wounded, the Vice-Consul has conveyed this message in person, and has further intimated that the Russian Government desires to defray the expenses connected with the care of the wounded. Should Japan be unwilling to accept the money, the Tsar wishes to make a corresponding contribution to the funds of the Red Cross Hospital and he asks for guidance as to the amount. This gracious message having been conveyed to Count Matsukata, who is vice-director of the Red Cross Society of Japan, the Count replied that while sincerely grateful for the kindly expressions of the Russian Government, the proposal to defray expenses or make presents to nurses and surgeons could not be entertained. On the other hand, the Society would gladly receive any contribution to its funds which are applied to humane purposes without distinction of nationality.

NEWCHWANG.

The foreign consuls at Newchwang are said to be holding meetings for the purpose of considering the status of the place whether it is to be regarded as neutral or as within the sphere of belligerent operations. The Russians take the latter view. They have three thousand troops at the place and the Russian gunboat anchored thereor rather ice-bound — is preparing for action. Considering that the Russians do not recognise China's right to include in her neutral territory even the region nominally evacuated by them on the west of the Liao, it is not likely that they will concede her right in the case of Newchwang. If they do not, Newchwang will be virtually ruined, for the Japanese, having the command of the sea, will take care that no food supplies of any kind are carried thither by ships, and the Chinese Government will be bound to adopt a similar precaution on shore. Then the foreign Community will have no course but to remove them-selves. Possibly that would please Russia, who is understood to have ambitions as to substituting Newchwang for Dalny. But will the United States and England consent to such deliberate ignoring of their subjects' treaty rights? The boundary of Russian aggressions must be set somewhere.

The Russian Authorities have informed

the United States Consul in Newchwang that they are sending back a hundred Japanese subjects who had remained in

JAPAN AND RUSSIA

The Russian Government have, in their communiques of the 18th and 20th February, charged Japan with having treacherously obtained a slight victory by a sudden attack upon Russia, which was bent upon maintaining peace, and asserted that since the rupture of diplomatic relations can never be looked upon as the opening of hostilities, and since Japan did not issue her declaration of war until on the 11th, she was guilty of a flagrant breach of the principles of International Law in making as early as the 8th February most unwarrantable attacks on Russian men-of-war and merchant ships.

That Russia had never entertained any sincere desire for peace may be clearly seen from the facts that she persistently refused throughout the acts that see persistently refused throughout the whole course of the negotiations to meet the proposals made by Japan in a conciliatory spirit, and that by wanton delays she put off the settlement of the quession, while at the same time she was busily extending her naval and military preparations. In confirmation of these facts may be given her warlike preparations in the Far East since April last, when she failed to carry out her promised second evacuation of Manchuria.

INCREASE IN NAVAL STRENGTH.

Tatal			0

In addition to these, Russia sent destroyers in section by rail to Port Arthur. The work of putting those vessels together was hurried up and seven of them have been already completed. Furthermore, two vessels of the Volunteer Fleet were armed at Vladivostock and hoisted the Russian naval ensign.

She further ordered out one battleship, three

cruisers, seven destroyers and four torpedo-boats (total tonnage amounting to about 30,740), which might have joined the Russian squadron already in the Far East, had not certain ulterior circum-stances compelled Russia to recall them, and these if added to the others, would make the

aggregate increase 113,000 tons. Increase in land forces:—

Since the 29th June last when, on the pretext of a trial transportation on the Siberian railway, Russia sent to China two infantry brigades, two artillery battalions, a body of cavalry and military train, Russia has continued to dispatch troops to the Far East, and at the beginning of the present month their total augmented strength was over 40,000, and plans were being made for sending out if necessary over 200,000 more.

She has at the same time been engaged day and night in strengthening the fortifications at the naval ports of Port Arthur and Vladivostock, building forts at Hunchun, Liaoyang and other strategical points, and forwarding arms and am-munition to the Far East by the Siberian railway and the Volunteer fleet; and in the middle of October last, a train of 14 cars hurriedly left Russia laden with the equipment of a field hospital.

It is therefore quite evident that Russia had not the least inclination for friendly settlement, but solely sought by military preponderance to force Japan into submission.

The military activity of Russia became from the latter part of January to the beginning of February still further intensified. On the 21st January about two battalions of infantry and a detatchment of cavalry were dispatched from Port Arthur and Dalny to the northern fron-tier of Korea; and on the 28th of the same month, an order to prepare for war was given

a state of siege might at any moment be pro-claimed there, he would make his nationals preclaimed there, he would make his nationals pre-pare to withdraw to Habarovsk. At Port Arthur, all the powerful war-ships except a hattle-ship then under repair, steamed into the open sea, while troops advanced in large forces from Liao-yang towards the Yalu. Who can then say that Russia had no warlike intentions or that she was unprepared for war? Japan, seeing that the situation had become so critical that it admitted of no further delay, was compelled to break off the abortive negotiations and decided to take necessary steps for self-protection. The respon-sibility for the challenge to war rests, then, not

with Japan but solely with Russia.

Finally on the 6th February Japan announced to Russia her decision to terminate pending negotiations and that she would take such independent action as she might deem best to defend ber position menaced by Russia and to protect her established rights and legitimate interests, and that she would sever her diplomatic relations and withdraw her Legation. The term inde-pendent action" naturally includes the opening of hostilities. Even supposing that Russia was unable to understand it in that sense, that is of course no reason why Japan should, in Russia's place, be held responsible for the misinterpreta-tion. Again, it is the unanimous opinion of tion. Again, it is the unanimous opinion of international jurists that a declaration of war is not an indispensable pre-requisite to the opening of hostilities. Indeed it has been the common practice in recent wars to declare war subsequently to the opening of hostilities. Japan's action is not therefore open to the least criticism from the standpoint of international law. It must contain the confeced that the charge counter the standpoint of international law. It must certainly be confessed that the charge sounds rather odd, coming as it does from the lips of Russia; for there are not only very many historical instances of that country herself instantly taking hostile action without declaring war, but in 1808 she invaded Finland even before the rupture of their diplomatic relations

THE PHONOGRAMM TO THE RESCUE.

For many years past the pronunciation of and now there is no ladronism in the islands. English by Middle School graduates in this It has entirely disappeared. The Philippines country has been the despair of the English were never in a more peaceful condition. and American teachers employed in the As for any possible insurrectionary move-various High Schools. These gentlemen ment, such a thing is not even thought of. have been spending from three to six years. We have won over the insurrectionary junta in correcting the bad pronunciation learnt in and the criminals—about 2,500—in prison, the Middle Schools. The mispronunciation and the people are beginning to trust us referred to may be traced to two main The imprisonment of the criminal insurrecsources, namely (1) to the pernicious habit tion leaders has had a more subduing effect of using the Japanese kana for representing than execution and drastic measures would have had. I think the people are really (se), and (2) to the practice of employing Japanese teachers to give instruction in pronunciation who are thoroughly incompetent Referring to the military force in the to perform this function. More than two years Philippines, ex-Governor Tast expressed the ago we ourselves suggested to a number of opinion that their presence was a great school teachers that the easiest way out of moral restraint. There are now about school teachers that the easiest way out of the difficulty would be to make use of phonographs for teaching pronunciation in all in his opinion, is a greater number than is cases where foreigners could not be employed through want of funds. We are glad in the matter from the standpoint of the ployed through want of funds. We are glad to observe by an advertisement which Philippine Commission and not as Secretary appeared in a recent issue of the Fiji Shimpo of War, he said that he thought that this plan is about to be tried. Messrs. Cunningham and Matsuda Hitotsubashi, troops. The importing of caribao to replace teachers in the Nobles' School, have the those destroyed by rinderpest and other honour of being the first to inaugurate this new method of teaching a foreign language. The advertisement informs us that the Sankodo, 23, Nameki-machi, Asakusa, Tokyo, now have on sale two phonographs that have been especially prepared for teaching pronunciation. One of these reproduces Mr. Cunningham's pronunciation of a number of colloquial sentences; the other gives Mr. Matsuda's pronunciation. The former sells at 25 yen 50 sen and the latter at 19 yen 50 sen. This of course is only a beginning. There will doubtless to the raising of rice, and the growing of fice, and the growing of fice cannot be successfully carried on by the authorities. These, the cannot be successfully carried on by the authorities. These, the fice cannot be successfully carried on by the raising of rice, and the growing of fice cannot be successfully carried on by the authorities. These, the cannot be successfully carried on by the raising of rice, and the growing of fice cannot be successfully carried on by the raising of rice, and the growing of pure daughters, suffered nameless in the islands stocked with caribao is settled. "The people are beginning to return to their homes, and take an interest in agriculture. We must, however, get the islands of the few articles and having been robbed of that which a women holds most precious, were stocked again with cattle, and this once done they will never be swept away again by rinderpest, for we have solved the question of handling the disease, but the unacclimated for these savage Russian soldiers.

in this country before many years are past. It is desirable that there should be as much variety as possible, within certain limits, as however good and pure a man's accent may be, and however musical his tone of voice, to hear these reproduced by several thousand students month after month would prove wearisome. Messrs. Cunningham and Matsuda must expect rivals in the field but we are glad that they have set the ball rolling. The advertisement says that the new appliance combines pleasure with utility and that by means of it students of English can get on without foreign instructors. The Japanese name given to this method of teaching English is Chikuonki Eigo-ôyô Dokushu (Learning how to pronounce English without a teacher by means of a Phonograph). The question is, will the Mombusho adopt this new method of teaching pronunciation promptly or not? It will depend entirely on whether the high officials can be got to give the matter serious attention. Unfortunately the Department of Education has in the past seldom been ahead of the general public in instituting reforms or even in recognizing their desir-

THE PHILIPPINES.

The Hon. William H. Taft, who succeded the Hon. Elihu Root as Secretary of War for the United States, seems to take a very hopeful view of the situation in the Philippines, of which he was the first civil administrator. Speaking to a Washington journalist, immediately on his arrival home, he said:
"First we had the war, and when the
military ended the insurrection a period of
ladronism followed. The ladrones were at their highest power about the time of my return two years ago. We put the constabulary and Philippine Scouts to work, diseases had not succeeded very well. caribao, he explained, is absolutely essential to the raising of rice, and the growing of Arthur by the authorities.

Japanese Commercial Agent at that port that, as be hundreds of different phonographs in use imported cattle from China are difficult to As showing that the financial outlook of the archipelago is good, he remarked that for the fiscal year 1903 the balance of trade in favour of the islands was about \$500,000. The exports amounted to \$32,500,000, and the imports to about \$32,000.000. The year before the imports were the same but the exports were only \$24,000,000. Mr. Taft is strongly opposed to any change in the shipping law that would require the transportation of commerce between the Philippines and the United States in American bottoms.

THE JAPANESE-KOREAN TREATY.

The following is an official English translation of the text of the Protocol signed at Seoul on February 23rd, 1904:-

Seoul on Peoruary 2310, 1904:—
Mr. Hayashi, Envoy Extraordinary and Minister Plenipotentiary of His Majesty the Emperor of Japan, and Major-General Yi I chi Yong, Minister of State for Foreign Affairs ad interim of His Majesty the Emperor of Korea, being respectively duly empowered for the purpose, have agreed upon the following Articles.—

ed for the purpose, have agreed upon the following Articles:—
Art. I.—For the purpose of maintaining a permanent and solid friendship between Japan and Korea and firmly establishing peace in the Far East, the Imperial Government of Korea shall place full confidence in the Imperial Government of Japan and adopt the advice of the latter in regard to improvements in administration.

Art. II.—The Imperial Government of Japan shall in a spirit of firm friendship ensure the safety and repose of the Imperial House of Korea.

Art. III.—The Imperial Government of Japan definitively guarantee the independence and territorial integrity of the Korean Empire.

Art. IV.—In case the welfare of the Imperial House of Korea or the territorial integrity of Korea is endangered by aggression of a third Power or internal disturbances, the Imperial Government of Japan shall immediately take such necessary measures as the circumstances require and in such cases the Imperial Government of Korea shall give full facilities to promote the action of the Imperial Japan ese Government.

The Imperial Government of Japan may, for the

facilities to promote the action of the Imperial Japanese Government.

The Imperial Government of Japan may, for the attainment of the above mentioned object, occupy, when the circumstances require it, such places as may be necessary from strategical points of view.

Art. V.—The Governments of the two countries shall not in future, without mutual consent, conclude with a third Power such an arrangement as may be contrary to the principles of the present Protocol.

Art. VI.—Details in connection with the present

Art. VI.-Details in connection with the present Protocol shall be arranged as the circumstances may require, between the Representative of Japan and the Minister of State for Foreign Affairs of Korea.

FUGITIVES.

Another batch of 169 Japanese fugitives, who lest Vladivostock on the 24th instant by a German steamer, say that nine of their original number were murdered and ten ar-rested. The story is vague. They add that at the time of leaving Vladivostock the four cruisers were still anchored there, but they do not say by whom the murders were committed or the arrests effected.

There has arrived at Nagasaki a ship

called the Kamping, having on board 630 Japanese refugees, including 300 from Manchuria-i.e. 60 from Tehling, 65 from Mukden, 90 from Harbin and 114 from Liaoyang
-296 from Chesoo and 30 from Tientsin. Among the number were 100 women who had been detained for several days at Port These, the

NOTES ON CURRENT EVENTS.

his own purpose. Her appeals to inter-national law which she herself sets a ambitious designs even when she stands before the tribunal of public opinion chal-lenged by herself. She soizes the opportunity to declare that all her previous engagements about Korea are now abrogat-As a matter of fact it was quite unnecessary for her to do anything of the kind. War wipes out all treaties or covenants, and as she has drawn the sword teresting to hear her avowal, urbi et orbi, majority who climb the mountain, for he that she intends to absorb Korea. That only saw the sun "rise over a vast rampart appears to us to be what her announcement to the Powers indicates: nothing more or in on all sides round." Incidentally he teresting to hear her avowal, urbi et orbi, to the Powers indicates: nothing more or less. We have no doubt that she will absorb all she can get. That is her right.

A remarkable instance of the enormous increase in the value of land in London is afforded in the case of St. Clement Danes Holborn Estate Charity. This estate was purchased in 1552 of one William Breton, by the churchwardens of St. Clement Danes, for the sum of £160. It consisted of 12 messuages and freehold land situate in Holborn. The annual income now exceeds £7,000. Almshouses with extensive grounds, a chapel, committee rooms, baths, and laundry accommodating 40 persons formerly ratepayers of the parish, are maintained, and each receives, in addition, a stipend of £30 per annum. A large grammar school for boys, and middle class schools for girls were opened in 1862. Large donations are made each year to King's College Hospital, the local dispensary in Stanhope-street, and the District Visiting Society. The governing body of the charity consists of ten trustees and 20 managers, and includes the Hon W. F. D. Swith M. M. E. S. Hon. W. F. D. Smith, M.P., Mr. Emden, L.C.C., Mr. H. H. Twining, Mr. C. Awdry, and Mr. Edward Terry.

A very severe shock of earthquake was felt in Tokyo at 5.50 p.m. on the 26th instant, landed from a British steamer. It would Yokohama also experienced the shock.

The Nichi Nichi Shimbun and the Jiji Shimpo both learn from authority which they seem to regard as trustworthy, that on the 8th instant Viceroy Alexieff received instructions from St. Petersburg in the sense that diplomatic relations with Japan had been severed and that warlike operations must commence. The Nichi Nichi gives 6 p.m. as the time of the receipt of these instructions; the fin speaks of the fore-noon. On the other hand, an English officer who reached Port Arthur on the 8th and visited the Viceroy, was informed by the latter that although the exact outcome of the situation was still uncertain, there was no uncertainty about the fact that war would not take place.

ultimo. A locomotive and five carriages broke through the ice, and 4 officers and 21 men were drowned. This must have been one of the first trains sent over the new life. The failure of the ice-bridge will greatly impede the despatch of troops eastward.

The tonnage of three of the ships concerning which the Japanese Prize Court (Hohahu Shinkenjo) has announced its decision; as stated in our last, are as follows:—The Mukden (2,500 tons), belonging to the East China R. Co.; the Algun (3.950 tons), belonging to the same Company; the Rossia (3.952 to the same Company; the Rossia (3,952 tons), belonging to the Russian Trade and Navigation Company.

The Assouan Dam, which was completed in December, 1902, at a cost of over yen 50,000,000, has already proved something in the nature of a boon to the people of Egypt. Some interesting points regarding the first year's experience of the dam were emphasized by Sir Benjamin Baker in a lecture delivered some time ago at a meeting in York. Sir Benjamin stated that the Assiout Barrage, working during the summer of 1902, caused a saving of £600,000 on an expenditure of a million. During the most critical periods for the crops—March till June of last year—the awailable supply of water for irrigation was just doubled as a result of The barrels of salt beef, numbering 12,240, the action of the dam. The irrigation of rice, prohibited in previous years, was alnow converted to perennial irrigation is calculated at over five millions sterling. It is Louisiana Purchase Exhibition at St. Louis.

RUSSIA'S PLAINT.

T need scarcely be said that Russia's plaintive protest about being taken unawares is treated with ridicule by Japanese newspapers. They ask how the Russian Government interpreted the note handed to Count LAMSDORFF by the Japanese Representative in St. Petersburg on the 6th of February. The note declared that Japan, being no longer able to entertain the least hope of a settlement by the route of negotiations, was now compelled to announce the rupture of diplomatic relations, and to give formal notice that she would henceforth take whatever independent action seemed best for the protection of her vested rights and legitimate interests, the object of such action being to strengthen forward document. It places the Korean and safeguard the threatened positions. At empire distinctly and definitely under the same time Mr. Kurino was instructed Japanese protection. JAPAN AND KOREA.

Japan and Korea is a very straight-

convey to Russia an explicit notice which the hardest of Japan's tasks; a task decould not mean and did not mean anything manding great patience and very exceptional but war. The unequivocal truth is that self-denial. There is no room to doubt that Russia had intended to protract the nego- if, in 1895, she had assumed the attitude tiations on one fallacious pretext or another justified by her victories; if she had dictated until her slowly moving machinery had been certain reforms to Korea and insisted on brought into a state of complete readiness. their thorough-going prosecution under her Japan did not choose to await her antagon- own immediate direction, the position would ist's convenience. That is the whole story, long ago have become too unequivocal for One would think that Russia might at least the prosecution of any Russian intrigues, or have the dignity and manliness to refrain the intrusion of any Russian aggressions, and the present war would have been averted. There is not to be any repetition of that undue forbearance, so far, at any rate, as advice is concerned, and Korea THE newly signed Protocol between will be forced by this Protocol to follow Japan's counsels. How such compulsory complacence can be reconciled with the preservation of the little empire's real independence, we do not see. If any habitable half-way administrative authority and the giving of counsels which must be followed by the administration without option, we fail to perceive it, especially where the material for the experiment is so radically defective. That, however, is a matter for trial. The fact as it stands is that Japan has taken a most practical step towards freeing herself of all aggressive designs and relieving herself of foreign suspicion. She is to reform Korea without annexing it; protect it without impairing its sovereignty. Had Russia been willing to place her relations with Manchuria on a similar footing, there had been no war. The Japanese Government has furnished by this Protocol a powerful reply to those that attribute selfseeking motives to her policy. She is still the champion of Korean independence not an aggressor upon Korean integrity.

A BYPATH OF HISTORY.

Formosa under the Dutch, by the Rev. WM. CAMPBELL, F.R.G.S., British Presbyterian Mission, Tainan; London, KEGAN PAUL, TRENCH, TRUBNER & Co.; Yokohama, KELLY & WALSH, Ltd.

The Rev. William Campbell has already Mr. Campbell, has compiled his book from contemporary records. The new from contemporary records. The work is worthy, despite some "solemn denouncement," that doubt is com- ambitions of an Eastern State, and to mosa; while Part III. treats of the Chinese

repetition." And in this we thoroughly equate provision for meeting the spiritual European to gaze upon the only good-sized concur. Still, for all that, we return our wants of those who have already broken lake in the island. He called it Lake hearty thanks to Mr. Campbell for his book. with idolatry." Koxinga made a very Candidius, and describes it as being about It must have involved an infinite deal of complete wreck of all things Dutch, but wearisome research in very musty archives, in some explanatory notes at the end and have cost an infinite amount of time of his book Mr. Campbell tells us that and worry, such as only an enthusiast would twenty-five years ago he quite accidentally have cared to have incurred.

The First Part of the volume, dealing with topography, inhabitants, religion, Dutch trade, etc., is made up of selections from the "Oud aboriginal tribe away due east which practisen Nieuw Oost-Indian" of François Valentyn, ed a kind of baptism of infant children, and a voluminous work which was published, we learn, in Dordrecht in 1724-26. Our author says that this old writer is often quoted as the main authority on the subject and so he has reproduced all Valentyn's notes on topography, trade, and religion, and has added to them the splendid account of the customs and habits of the aborigines which the Rev. George Candidius, the pioneer missionary to Formosa (a man of most saintly character) reported to van Rechteren, and which was issued in quarto in 1630. The seventeenth century Dutch writers were observant men, and their accounts of the "beautiful island" and its many tribes, each with its diverse manners, customs and dialects, make most interesting reading. The strange marital customs of the For-mosan islanders (many of which survive to this day), with their mysterious ban on childbirth before a woman had reached the age of 35 or over (now an obsolete custom, Mr. Campbell opines, as he has seen many young women nursing children); the peculiar position of the husband and father in the wife's house, which he really never inhabits until old age begins to creep upon him; the restriction of all religious teaching to a sect of priestesses, whose most solemn rites involved a free indulgence in spirituous liquor—these things and many others equally curious set the Formosans as a race apart, though their Formosans as a race apart, though their campaign conducted by Koxinga against head-hunting proclivities and the turning the Dutch, which terminated in the fall of over of all agricultural pursuits to the women

The Dutch, having evicted the Spaniards, one ag were the dominant power in Formosa pathy from 1624 until 1661—(when Koxinga Coyett, completely wiped them out)—and within mosa. the natives was certainly wonderful, his conversions being numbered by the hundreds, and the Rev. Robertus Junius, who came to

stumbled upon some traces of the old Dutch Christian influence. He says: "I was told by a Chinese friend in Kagi city of an ed a kind of baptism of infant children, and the report appeared so trustworthy and the history of Formosa. circumstantial as led one to conclude that this must be some genuine survival of the missionary work of two hundred and twenty years ago." The Rev. Father de Mailla who visited Formosa in 1715 also heard of this custom, but he doubted the trustworthiness of the report, as it came through Chinese interpreters imperfectly acquainted with the Formosan language. This survival is undoubtedly interesting and opens up a wide field of thought. Students of missionary annals will be deeply interest-ed in the two Catechisms and a sermon by the Rev. R. Junius which Mr. Campbell has capitally translated and inserted in his book. They give an excellent idea of the kind of teaching the native converts were subjected to and of the methods of work pursued by the propagandists in the 17th century. These methods, by the way, raised much contemporary criticism-as car be seen by the voluminous extracts from old Dutch letters which Mr. Campbell printsand at one time the labours of Junius were greatly discredited both in Formosa and at But the Classis at Amsterdam supported him and the storm, which had arisen partly through jealousy, subsided.

The third part of Mr. Campbell's book contains an account of the nine months' Castle Zeelandia and the expulsion of the would seem to involve no very distant Westerners. Reading these vivid records cousinship with the Dyaks of Borneo. Westerners. Reading these vivid records taken from "'t Verwaerloosde Formosa," one agrees with Mr. Campbell that sympathy must be awakened towards Frederick Coyett, the last Dutch Governor of For-mosa. He was undoubtedly an honourthree years of the opening up of their ex- lable, brave, but ill-used man, and his tremely profitable trade in the island they character deserves to be vindicated. Nothing had started missionary work among the but contempt can be poured upon the aborigines. Georgius Candidius arrived in Council at Batavia that so shamefully desert-1627. Mr. Campbell says that "he was ed him, while their agents, who should have evidently a man of great good sense and given him the freest help and service, van earnestness, beside being very humble-mind- der Laan, Hermanus Clenk, and Claes ed, and filled with high ideals of the work in which he was engaged." His success among actions as the most despicable of men. The the natives was certainly wonderful, his connotes which Mr. Campbell prints in his Appendix are very valuable contributions to our knowledge of Formosa past and present, and and the Rev. Robertus Junius, who came to the island two years afterwards him, was requally successful. But this striking success was only transient, and when Koxinga curiously, and bunched the extremely inswept the Dutch out of Formosa he swept teresting information these notes contain in away at the same time nearly all traces of an undigested mass at the very end. We good deal of extra expense in consequence of the their missionary labours. From the letters of notice that he runs at tilt at Mr. Davidson

conquest of the island. Now all these parts under the too strenuous system of their overlap, for each practically treats of one teachers. Mr. Campbell points out in and the same period. The author in his his preface "that this fragment of church preface acknowledges the awkwardness of history teaches us that it is very questionable arrangement and says that it lias "in able missionary policy to persist in purely volved no small amount of prolixity and aggressive efforts without making additional properties."

Toth edition of the "Encyclopedia Britanica," is not correct when he says "so far as it is known there are no lakes in Formosa," for in 1873 he (Mr. Campbell) made a journey into the interior to visit the Tsmi-Hoam, or Water Savages, and was the first two miles broad by four miles long from north to south; its surface stands some 2,366 feet above sea-level. Lake Candidius is about 38 miles in a straight line from the market town of Po-tan and about 14 miles south of the Po-sia plain.

Mr. Campbell has given us a book which should prove a veritable gold-mine to the next man-of-letters who sits down to write

" DULCE ET DECORUM EST PRO PATRIA MORI."

Not a sigh, not a groan, When the Mother sends forth her son

She mourns not, though she be left alone, She only prays the Gods for more Such soldier boys.

She prays not that she may live in ease Mid swift-wing'd riches; useless toys, She scorns such paltry gifts as these.

Not a groan, not a sigh, Though she seems to hear the cannon's roar

And the wounded's agonizing cry, She only prays the Gods for more To fight the fight.

For sweeter than child is her country dear, And since wrong is wrong and right is right, She knows that the Gods must hear

Not a groan not a sigh; Though they bring the death-stung hero home,

Though they bring him home to die. Though the watching Mother sees him come Not a tear is shed.

But she thanks the Gods for the great gift given. And with joy she renders the priceless dead

To her Country and to Heaven.

YOKOHAMA CRICKET AND ATHLETIC CLUB.

The annual general meeting of members of the Yokohama Cricket and Athletic Club was held in the Pavilion on Tuesday at 5.30 p,m. Dr. E. Wheeler, President of the Club, was in the chair

The notice calling the meeting was read by the Hon. Secretary, Mr. W. S. Moss.

The Chairman said before proceeding with the ordinary business of the meeting he would like to call attention to the fact that Mr. F. O. Stuart, who had been for five years Honorary Treasurer of the Club, was taking his departure, and he thought members of the Club could do no less than give him a vote of thanks for the their missionary labours. From the letters of the Rev. R. Junius we learn that some years before the final catastrophe the natives were growing restive of the Dutch fashion of compulsory education and attendance at divine service, and great difficulty was being experienced in getting them to attend either school or conventicle. Their early enchools of the chief as a "coarse, unholy brute" and will not entertain any pleas advanced by mr. Davidson in his defence. In the carefully compiled Bibliography which closes the school or conventicle. Their early enchools at the same of the chief as a "coarse, unholy brute" and who had looked after them by giving them tea, will not entertain any pleas advanced by mr. Davidson in his defence. In the carefully compiled Bibliography which closes the book, Mr. Campbell points out that Captain Junior Athletic Club were going on gaily and thusiasm for knowledge had petered out Brinkley, in his article on Formosa in the

coming on for a future occasion—(Hear hear). Rugby football seemed to be in favour—(hear, hear and laughter) and had been enjoyed by the hear and laughter) and had been enjoyed by the spectators—he could say that. They deeply regretted the loss of a few members, among them their old friend Mr. N. P. Kingdon, and Mr. E. Flint Kilby, who did so much for the Club when he was President and afterwards took an interest in its affairs, and also Mr. David Jackson who always took a deep interest in the Club, put his hand freely in his pocket to subscribe in support of it, and at one time gave a very good silver prize for the tennis handicap.

On the motion of Mr. F. O. STUART, seconded by Mr. D. H. Blake, the minutes of last meeting were taken as read

On the motion of Mr. C. THWAITES, seconded by Mr. F. Pollard, the report and accounts were

adopted. (They are given below.)
The CHAIRMAN said the next business was the election of a Patron and Honorary Member in place of Mr. Henry Bonar who had gone from among them. He begged to propose Mr. John Carey Hall, British Consul-General.

A ballot was then taken, Messrs. F. E. WHITE A ballot was then taken, Messrs. F. E. White and Showler acting as scrutineers, and resulted in the election ■ members of the Committee of Messrs. W. S. Moss (Hon. Sccretary), W. B. White (Hon. Treasurer), Dr. Garton (Baseball), Messrs H. W. Kilby (Football), S. Wheeler (Athletics), W. Y. Showler (Ground).

After surply of cert is on hand though a quantity.

After surply of cert is on hand though a quantity. White (Hon. Treasurer), Dr. Garton (Baseball), Messrs H. W. Kilby (Football), S. Wheeler (Athletics), W. Y. Showler (Ground).

This was all the business and a vote of thanks to the Chairman, on the motion of Mr. F. O.

Following are the report and accounts:

During the past year interest in the various games supported by the Club has been well maintained. Detailed reports are given below.

During the year 52 new members were elected, and there are now 254 active members on the books of the Club.

The Committee regret to record the death of Messrs. E. Flint Kilby, N. P. Kingdon and D. Jackson, all old and enthusiastic members. Mr. Kilby for many years acted as President of the Club, and the Committee were pleased on the representation of several members to invite subscriptions. the Committee were pleased on the representation of several members to invite subscriptions towards the erection of a tombstone to his memory, and this has

been largely responded to.

Mr. F. O. Stuart, who for the past five years has acted as Hon. Treasurer to the Club, leaves Yokohama for home. The Committee wish to record his energetic and efficient services and tender him their sincere thanks.

The thanks of the Club are also due to those members who generously donated prizes in connection with the various sports throughout the year, and especially to Mr. V. Blad, who by presenting a prize for a cross-country race inaugurated an event which the Committee trust will become annual.

The thanks of the Club are given to Mr. G. G. Brady, who again organized a smoking concert and so greatly assisted to make the Interport cricket week a success.

The Committee have granted the use of the Club

so greatly assisted to make the Interport cricket week a success.

The Committee have granted the use of the Club Ground to the Junior Atletic Club. This opportunity for the boys of Yokohama to practice field games will undoubtedly increase the playing strength of the Club in time to come. The Ladies' Hockey Club has again received the use of the Club ground.

ACCOUNTS:—The usual abstract is appended, and the Committee regret that the debt on the Club has been increased during the year, though only by the small amount of yen 44.43. Subscriptions and Entrance fees have increased considerably, but this has been counter-balanced by the increase in the working in Kobe, on 12th March.

expenses. As this has been necessitated by the larger number of active members now belonging to the Club, it cannot be taken exception to, but while the accounts show that the Club can pay lis way, it cannot materially reduce its debt without special Income, and the retiring Committee recommend to their successor the organizing of a Concert or Bazaar or other money-raising device for this purpose.

REDORT ON THE GROUND:—Despite the rather heavy wear the ground has experienced during the past season the same may be said to be in Very fair condition.

Several additions have made to Cricket, Football, and Basehall gear and everything is in good repair for the coming season.

CRECKET:—Owing to bad weather in the early part, and extreme heat in the latter part, of the Summer the Season on account of the small number of games has been a very disappointing one.

Two Matches were played against the Navy, one of which resulted in a draw, and the other in an easy win for the V. C. & A. C.

The Interport Match took place in Yokohama this year and was won by the home team by an innings and the summer of 1902 was in no they are tennis during the summer of 1902 was in no way diminished last season, and the courts were in almost constant use every evening.

The entries for the "Jackson" Cup, Singles Handicap and Doubles Handicap were again large, the first being won by Mr. P. A. Cox, whio met Mr. D. Barnard, the holder, was defeated by Mr. van Cleve during the heavy prevented any exception. The single heavy prevented any exceptions there is a purpose.

Artherics:—The annual Atbletic Sports were held on Saturday, 30th May. The ground being heavy prevented any exceptions there held on Saturday, 30th May. The ground being heavy prevented any exceptions three being in the previous tents.

A cross-country care was held on Saturday, 20th for Cups presented by Mr. Blad. There was quite a lot of interest evinced in this event, which was won in good style by W. B. Mason, Jr. H. W. Kilby being second.

The usual list of Club records fo expenses. As this has been necessitated by the larger number of active members now belonging to the Club, it cannot be taken exception to, but while the accounts show that the Club can pay lis way, it cannot materially reduce its debt without special income, and the retiring Committee recommend to their successor the organizing of a Concert or Bazaar or other money-raising device for this purpose.

year and was won by the home team by an innings and 13 runs, thus wiping out the previous year's defeat. The Y. C. & A. C. single innings total of 352 runs form a record in these games.

Centuries during the year were made by E. W. Kilby (not out), 113, v. H.B.M.'s fleet, and H. W. Kilby's 101 v. Kobe.

Mr. W. Y. Showler seconded and the proposal was agreed to.

On the motion of Mr. S. Wheeler, seconded by Mr. F. E. White, Mr. D. H. Blake was elected Captain of Cricket.

The Chairman said that of the Committee Mr. Bathgate was out and they were losing Mr. F. O. Struart thought it might be many tioned that Mr. W. B. White was was proven his (Mr. Stuart's).

A halfgreatly in bringing new material to the front. The usual number of games were played with nines from the American menof-war and Japanese schools, while the starting of the U.S. Naval Hospital's team

A fair supply of gear is on hand, though a quantity of suitable bats should be ordered for the coming season.

goal, H.M.S. Albion, 2 tries to nil. H.M.S. Ocean, 3 goals (15 pts.) to nil.

	Yokohama, February 17th, 1904.	

FRANK O. STUART,

Examined and found correct. L. R. BREMNER, W. B. WHITE, Yokohama, February 26th, 1904.

THE ELECTIONS AND THE DIET

The following have been returned for the Diet in Tokyo :- Messrs. Oishi Kumakichi, Hatoyama Kazuo, Minowa Shinjiro, Aki-yama Teisuke, Seki Naohiko, Taguchi Ukichi, Tsunoda Shimpei, Yebara Soroku, Kurizuka Seigo, Takanashi Tetsushiro and Fukuchi Genichiro.

The elections seem to have passed off on March 1st with great quietness throughout the country. The result of the polling in Yokohama was announced at noon on March 2nd, as follows:

	votes.
Mr. S. Shimada	1,060
Mr. S. Horiya	
Mr. I. Sudaumoto	289
Mr. N. Ito	81
Count T. Katsura	
Mr. T. Hara	
Mr. N. Hiranuma	Į.
Mr. S. Totsuka	I I
Mr. K. Onuki	1
Mr. S. Murata	1
The first two candidates were elected.	

According to official investigations, the political parties put up the following candidates in the general elections :-

Seiyu-Kai	205	
Progressists		
Teikoku-to (Imperialists)		
Chusei Club		
Doshi Kenkyukwai	17	
Koyu Club	17	
Liberals	45	
Liberals Non-party Party, not known	ПĎ	
Party, not known	59	

It is expected that the Diet will be convened for the 18th instant and officially opened on the 20th. This will involve a marked departure from the law which requires, in the first place, that an interval of quires, in the first place, that an interval of 20 days must be allowed after a general manager of a popular London theatre, and as a election in order that the members may signify their assent or dissent, and that an interval of 40 days must separate the continuous first performance. The big journal of the property of the continuous first performance. signify their assent or dissent, and that an interval of 40 days must separate the convening order from the date of assembly. The present circumstances, however, are quite exceptional.

As we go to press intelligence reaches us that an Imperial Decree has just been issued summoning the Diet for the 18th instant and fixing the duration of the session at 10 days.

MARCH MONEY MARKET.

Tables showing the amount of money required during the month of March to meet various calls are published by Tokyo papers:—

LITERARY GOSSIP.

It is interesting to learn how boys and girls in the Colonies and other places abroad regard the old country, says the *Globe*. The editor of *Chums* recently asked his readers who reside beyond the seas to indicate the twelve cities and towns in the British Isles which they would most like to visit. By means of voting it was made clear that the following in the order indicated were the favourite places:- 1, London, 2, Edinburgh, 3, Dublin, 4 Glasgow, 5, Liverpool, 6, Manchester, 7, Birmingham, 8, Belfast, 9, Oxford, 10, Aberdeen, 11, Portsmouth, 12, Brighton. Next in order came: -13, Sheffield, 14, Bristol, 15, Cambridge, 16, Cork 17, York, 18, Plymouth.

Some time ago the chief dramatic critic of The Times had a serious falling out with the supported its representative and for a while very strained relations existed. By the last home mail we find that Mr. Walkley and Mr. Bourchier have exchanged letters, buried the hatchet, and agreed to associate again on terms of intimacy. One of our London contemporaries has reduced the incident to rhyme, in the following fashion:—

"Dear Mr. Walkley—do you know— I'm feeling quite a yearning for you; I would have written long ago, Only I didn't like to bore you.

"I'm sorry if you thought me rude, Perhaps I was a shade sarcastic: But then I never dreamed that you'd Resort to measures quite so drastic.

"Forgive my quips: I stand confessed As 'volatile' as good Miss Mowcher; Resume the rôle of 'Welcome Guest,' Return to your distracted Bourchier!

"Dear Mr. Bourchier, say no more— I'm really not the least offended; Why, even when you closed your door, I knew your wrath was half-pretended.

"And now you've shown you can regard
The feelings of 'our leading journal,'
I'll gladly play in your backyard,
And yow a fellowship eternal." (Does so.)

There is much charming writing in Mr. Wymond Carey's new book, "For the White Rose," which will appeal to all lovers of English prose. Here is a passage referring to the peculiar stillness of the New Forest:—

The King of Italy has bestowed upon Mr. William Le Queux, the novelist, the cross of the Order of the Crown of Italy.

Miss Hannah Lynch, novelist and essayist, died in Paris last month. One of her best known books was The Autobiography of a Child. She wrote also a study of Mr. George Meredith, French Life in Town and Country, Prince of the Glades, Dr. Vermont's Fantasy, Through Troubled Waters, Daughters of Men, and other books and contributed to various reviews and magazines. Miss Lynch also acted as Paris Correspondent of the Academy.

With the February number of Knowledge a fresh development of its scope and contents is made by its directors. It has during its twenty-two years' career been chiefly devoted to astronomy and the natural sciences; but in future it will add physics, electricity, and applied science to these subjects. In order the more suitably to effect this alteration, Knowledge will be amalgamated with the Hustrated Scientific News.

It is interesting to learn how boys and girls in the Colonies and other places alread fround restoration of King Charles the Second. Away on the right lie the two fish-ponds, shimmering now a

TO LONDON AND BACK VIA SIBERIA.

This was the title of a very interesting lecture given on Friday evening at Van Schaick Hall by Mrs. James Walter before the members of the Yokohama Literary Society. The President, in introducing the lecturer, said that it was a common cause of complaint that persons who did interest-ing things were generally disinclined to talk about them afterwards. He had, however, per-suaded Mrs. Walter on her return to Japan last Fall to put some of her observations upon paper, and they would thus have that evening an oppor-tunity of travelling with her over a railway that at the present moment was occupying a cons able amount of the world's attention, and of listening to her account of a journey that five years ago would have been completely within the region of impossibilities.

Mrs. Walter began by describing the difficulties of getting into as well as out of Russia even with a properly issued passport and threw on the screen an illustration of this all-important document, showing the number of times it was vised during her journey to and fro. She then described the steamer Manchuria, on which she journeyed from Nagasaki to Dalny, and gave a lively description of her adventures in that town ere she finally managed to get seated in a railway car of the Chinese Eastern Railway. Many views of Dalny were shown and then some beautiful scenes on the shores of Lake Baikal and some equally notable sights in the big city of Irkutsk, the Urals, the Volga, etc., till Moscow was at last reached. the Voiga, etc., till Moscow was at last reached. Though the speed of the trains was slow, Mrs. Walter thought this had a compensatory side, for at the end of her trans-Siberian journey she felt far less tired and worn-out than she has felt in rushing across the United States in the fast American trains. Everywhere too the officials did all they could to help her, showing a courtesy rarely to be met with among a similar class of men in America, and though at times she found no one in America, and though at times she found no one who could speak anything but Russian, on the whole she got through the long journey without any particularly awkward inconveniences. The wonderful old city of Moscow afforded the speaker wonderful old city of Moscow anorded the speaker great delight, and some charming pictures of the Kremlin, the Church of St. Basil, the Church of the Saviour, and other sights in the ancient capital of the Czars were shown. Returning from London on her way back to Japan, Mrs. Walter encountered, early in October, a heavy snowstorm in Moscow, but this did not peculiar stillness of the New Forest:—

"Picture to yourself the head of a secluded valley enclosed in heathery slopes. The valley itself is rich pasture-land, and through it rambles a broad broad overhung with beech and poplar and alder. Just 179,000 long low-storied house, with attics dotted amongst the gables, a manor built of the warm red brick loved by the men who had grown to enjoy the peace of good Queen Bess, and mark everywhere the latticed windows with the Tudor mullions and copings. The Jake and Jake interesting style, held her audience thoroughly

engrossed.
On the proposition of the President, Mrs Walter was warmly thanked for her address and the many pretty pictures with which she had illustrated it. After a slight pause, some twenty snapshots taken on the Siberian railway by a recent traveller, which had been kindly placed at the disposal of the Society, were thrown on the screen. These were also thoroughly enjoyed. Miss Mendelson (piano), Mr. H. A. Poole (violin), and Mr. W. Karl E. Vincent (organ) then gave a series of Russian folk-songs, after which Mr. Brady brought a thoroughly enjoyable evening to a close with Chevalier's burlesque French chanson, "Tink-a-tin."

THE PASSING OF OLD SIR HARRY.

The wash of the waves on these hoary coasts, The salt-wind soaking the cliffs' white face, And the grey gulls wheeling like homeless ghosts Through the mist and the spray where the

cruisers race, And the long sad sob of the central deep---Grieve at the shores of lasting Sleep. The call of the waves can woo no more, The scent of the sea no more invite;

The grey old Admiral steps ashore, His flag is struck in the raven night, The waves fall back in the yeasty strife, And he stands sea-drenched at the Gates of Life Haply, he feels that the land is good,

Though never those coasts with ocean shake, For there at the Gates are Benbow, Hood, Frobisher, Nelson, Hawke, and Drake, And their hands are stretched in welcome sweet To the Admiral Father of England's Fleet. -- The Globe.

THE PRIZE COURT.

According to the Official Gauctle of March 1st, the Prize Court has notified that the following six Russian steamers are prizes of Japan and that those concerned with the ships must present their claims within thirty days, commencing on the day of notice :

day of notice:—

The steamer Rossia, captured Feb. 7th by the Imperial warship Tatsuta in the neighbourhood of Kyu-Tien-am, Korea.

The steamer Minkelen, captured on Feb. 6th by the warship Chinyen at Fusan, Korea. Consignees: Russo-Chinese Bank, one case containing tenthousand roubles; Messrs. Ahrens & Co., three cases of musical instruments, etc.; Messrs. Holme, Ringer & Co., several cases of sundry goods; etc.

The steamer Algun, captured on Feb. 7th by the warship Adauma off Yakko-po, Korea. 311 roubles. The steamer Nicholai captured on Feb. 10th by the warship Miyako, on the sea, north latitude 35.7 and east longitude, 129.15. Korean coins, 6.500 mom.

The steamer Michael, captured on Feb, toth by ne warship Mijako on the sea, north latitude 35.10 nd east longitude 129.20. Cargo, whale oil, etc. The steamer Alexander, captured on Feb. 10th

by torpedo-boat 17 at Idzuhara, Tsushima island. Cargo, whale oil, etc.

FIRES.

The Murayama Agriculture School, Yamagata Prefecture, was destroyed by fire on the evening of Feb. 24th.

Fire broke out early on the morning of Feb. 56th in the dwelling of a Chinaman, Lin-Chongden, No. 126, Yokohama, destroying a building which was divided into three tenements. A freman of the Kagacho police station was injured. The cause of the fire is reported to be sparks from a cooking range.

with the result that the room was destroyed and are to be invited for the construction of works the ceiling and roof of the adjoining office that will irrigate 300,000 acres. This is intended partially damaged. The cause of the outbreak as an experiment. If it proves a success the is under investigation, but it is believed to be 3,000,000 acres will be reclaimed. is under investigation, but it is believed to be due to defective stove pipes. Fortunately no business books or documents were injured, as these had not yet been taken from the strong room. The Bank's office was removed after the fire to the new building, which is almost completed, so that business was not interrupted in the slightest.

Mr. M. C. Fernando of No. 127, Yamashita-ho, where a fire broke out on the 22nd ult., bas been arrested by the Kagacho Police on suspicion of incendiarism

Fire broke out on the evening of Feb. 29th at the Ishikawajima Shipbuilding Yard, Tokyo, partly destroying a shed. The cause is believed

About 12.40 p.m. on Thursday fire occurred in the machine room of the Union Electric Light Company at Ura-Takashima-cho, Kanagawa, partially damaging the building. The machi-nery seems to have been injured, so that light throughout Kanagawa is expected to be suspended for a week or more.

Fire broke out on Wednesday, March 2nd, at 7.50 p.m. at Ashibiki-cho, Yokohama, burning down four houses. A hibachi was the cause.

AMERICAN TOPICS.

Mayor McClellan, of New York, has ordered President Darlington of the Board of Health and Police Commissioner McAdoo to close the following theatres:—Grand Opera House, Madison Square Theatre, Princess Theatre, Vaudeville Theatre, Hurtig & Seamans and the theatre part of Huber's Museum. He also served notice on nineteen theatres that unless certain alterations for safety were made he would order them closed too.

A bill has been introduced in Congress appropriating \$50,000 for a biological station at San Diego for the study of marine life and ocean currents on that part of the Pacific coast. The station is to be conducted by the University of California. One of the latter's professors and some of its students have been engaged in the work tentatively for some time past, the San Diego Marine Biological Association defraying the cost.

What will become of the vast estate of the late Mr. William C. Whitney on October Mountain, now that he is dead, is a question that is agitating Washington people. In 1896 Mr. Whitney bought over 12,000 acres of land adjoining Lenox and spent \$60,000 a year in making it into a grand shooting park. At great expense he brought there herds of buffalo, elk, moose and deer, flocks of angora goats and sheep, pheasants and partridges. The lake he stocked with bass and the brooks with trout.

It is said that A. W. T. Lawrence, whose father was at one time a wellknown newspaper man of St. Louis, has been informed by his broker, J. E. Wright of Kansas City, that he is \$40,000 ahead through the recent manipulations of the cotton market. Lawrence is now a convict in a Missouri penitentiary, where he was sent about a year ago for stealing \$1500 from the West End Hotel, St. Louis. Notwithstanding his incarceration Lawrence succeeded through his broker in playing the cotton market.

The gift of \$50,000 by Mr. John Hays Hammond of New York for a metallurgical laboratory at Yale has just been increased by him to \$100,000. In announcing this additional gift, Professor Chittenden, director of the Sheffield Scientific School, says it makes possible the construction of a laboratory of adequate size and with an equipment suited for all modern requirements. It is expected that the laboratory will be unique of

Sarah J. Lippincott, the former actress-writer, has brought suit against Harper Brothers for \$40,000 for libel. The action is based on a partly destroying asned. The cause is defleved \$40,000 for fidel. The action is based on a to have been tobacco ashes. On the previous story in Julian Hawthorne's book, "Hawthorne day, the Shinto temple, Yose-Jinsha, Tsukui, and His Circle," in which the author published Kanagawa prefecture, was burned by fire. The extracts from the diary of his father, Nathaniel loss is estimated at about twenty thousand yen.

The cause is not known. of Charles Kemble, the actor, at a dinner given by him in London, at which were present a number of prominent people. According to the diary Kemble was reading a portion of the play "King Lear," when he broke down and wept. The scene, the diary says, affected Miss Green-wood also and she became hysterical and fell to the floor and shocked the diners.

> A New York physician claims to have dis-covered a lemon juice germicide for the bacilli of both grippe and pneumonia, which diseases have made extraordinary ravages in that city this winter. This physician says he has killed the germs of pneumonia in culture tubes with the simple application of lemon juice, and through its timely use, where symptoms of the disease were in evidence of the property of the symptoms of the disease were in evidence of the symptoms of the disease were in evidence of the symptoms of the disease were in evidence of the symptoms of the disease were in evidence of the symptoms of the disease were in evidence of the symptoms of the disease were in evidence of the symptoms of the disease were in evidence of the symptoms of the sy dence in patients under his care, the results obtained were highly satisfactory. The medicinal virtues of the lemon have been long recognized by the medical profession. It has been used successfully in London in cases of typhoid. If it is truly valuable as a remedy for grippe and pneumonia, the field of its usefulness will be greatly broadened and its production stimulated.

The Engineering and Mining fournal estimates that the gold production of the world in 1903 reached a total of \$327,049,750, this being the highest on record, and exceeding that of 1902 by \$28,106,552. The leading producers, in lorder were: Australasia including the commonwealth of Australia and New Zealand, \$88,170,909; the United States Transpara wealth of Australia and New Zealand, \$88,170,909; the United States, \$74,425,340; the Transvaal, \$61,527,231; Russia, \$24,000,000; Canada, \$19,500,000; Mexico, \$12,550,000; British India, \$11,118,120. No other single country produced over \$10,000,000 in value. This order is the same as in 1902. In 1901 and 1900, however, the United States led, Australia came second, and the Transvaal for down on the life. In \$80. the Transvaal far down on the list. In 1889 Australia was first, the Transvaal second, and the Australia was first, the Transvaal second, and the United States third. In 1898, the Transvaal headed the list, with Australia second, and America third. In 1903 the five leading producers —Australasia, the United States, the Transvaal. Russia, and Canada—together produced \$267,623,480, or 82 per cent of the total.

Major Charles L. McCawley, who gained the illwill of the members of the United States Supreme
Court by causing them to give precedence
to the foreign diplomats at a recent Presidential
reception, has charge of all social functions at the
White House. The position was formerly occupied by Colonel Symons, but he found his other
duties so exacting that he was allowed an assistant.
He chose Major McCawley, who has assumed the
social duties of his chief. The affair at which the
question of precedence came up was given in honour
of the Supreme Court Justices. When they were
about to be presented to the President, McCawley
ushered in the diplomatic corps, to the outspoken
disgust of the jurists. Meanwhile another little
trouble has arisen in regard to military escorts for
the diplomatic corps. It seems that a precedent
was established by the meeting of Governor Tafi
with a troop of cavalry and according to Mr. Root, Fire broke out on the night of Feb. 28th at Toyo-oka-cho, Oita prefecture, destroying seventy-three houses. The damage is estimated at over two hundred thousand yen.

On Wednesday morning, March 2nd, at about 50 Proceedings of the Supreme Court Justices. When they were universal to the President, McCawley ushered in the diplomatic corps, to the outspoken hood if the expectations of the engineers are fully realized. The land is now worthless owing to the lack of water. It is assumed that irrigation the lack of water. It is assumed that irrigation the diplomatic corps. It seems that a precedent will render one-half of the tract fit for the growing of Governor Taft suitable for grain cultivation and grazing. Bids

he left Washington. The same courtesy will be requested of the U.S. Government when the next new Ambassador is received in audience for the first time by the President. This is the custom observed in other countries and it is understood that American Ambassadors abroad have always insisted on full military honours.

The New York banks are lending \$94,000,000 more money to-day than they were a year ago, while their deposits are \$92,000,000 higher and cash is \$29,00 ,000 greater. The New York banks have cut down circulation in the last two weeks of January by over \$1,000,000. Deposits are \$13,000,000 above the highest on record: loans also broke all records and are \$44,000,000 higher. also broke all records and are \$44,000,000 higher than last February. In ten months the New York banks have increased their deposits by \$\$71,000, 000, and \$176,000,000 has been recovered in the last six weeks. The enormous dealings of the New York banks amaze all the financial centres, says the Boston Journal, and indicate that all financial roads There is little speculation. The iron trade remains quiet. Rail-makers will not sell at the price at which users of rails are ready to buy. There is anticipation of a decided improvement in business at the opening of spring and a hopeful feeling prevails. The recent expansion of loans amounting to over \$100,000,000 is due to large corporate borrowing as well as to investments in sterling and commission house time loans. money which has been pouring into New York of late is surplus circulation which has gone out to move the crops and come back again.

move the crops and come back again.

Mr. Grover Cleveland's tribute to the late Mr. W. C Whitney runs as follows:—

The news of Mr. Whitney's death has greatly shocked me. As I think of him, my mind, passing beyond recent years, dwells upon the day of my association with him in high official duty, and recalls the time when I had the opportunity to enjoy his unreserved intimacy and friendly companionship. Our relations have never changed, but the exigencies of life have forbidden recent close intercourse. Mr. Whitney had more calm, forceful efficiency than any man I ever knew. In work that interested him he actually seemed to court difficulties, and to find pleasure and exhibitation in overcoming them. His conquest over the obstacles he encountered in undertaking to build up our Navy afforded him greater delight than the contemplation of the Government. His judgment was quick, clear and astonishingly accurate, and when it was called into action his mental poise was so complete that neither passion nor irritation could lead him astray. While I remember all this with admiration and affection, I recall with more tender sentiment Mr. Whitney's devotion to his friends, his extreme consideration for all with whom he came in contact, his thoughtfulness for the ease and comfort of others, and his ready devotion to his friends, his extreme consideration for all with whom he came in contact, his thoughtfulness for the ease and comfort of others, and his ready impulse to help those who needed help. I mourn the death of a friend of whom it can be truthfully said that in his character were combined mental traits of a high order and loving qualities of heart that grappled him to his friends with hooks of steel.

THE LAW COURTS.

A CASE OF FRAUD.

R. Takahashi (no relation of the M. Takahashi, punished on Feb. 23rd by the Yokohama District Court), charged with fraud, was sentenced on Feb. 25th in the Tokyo District Court to three years' imprisonment with hard labour and a fine of wer to and six poorths' police surveillance.

of yen 10, and six months' police surveillance.

It may be remembered that the accused received money from a secretary of the Russian Legation on m promise that he would furnish military secrets and plans of the naval stations. This promise was discovered by the police before the delivery of the secrets, and there was not suffi-cient evidence to prove that he had possessed any secret documents. The man was accordingly punished for receiving money under false pre-tences from the Russian official.

against the Hochi, Yorozu, and Wiroku, came up!

again on February 27th in the Tokyo District

Court. C. Arakawa, nominal editor, and M. murder, was sentenced to death on Feb. 29th in Players we note a former member of the Yokohama Nagasawa, nominal publisher of the Yorozu, were the Osaka District Court.

The Hongkong A.D.C. have been giving the Gilbert opera His Excellency, and among the Players we note a former member of the Yokohama Nagasawa, nominal publisher of the Yorozu, were the Osaka District Court.

A.D.C., Dr. Norris. The China Mail says:—

sentenced to forty days' imprisonment with hard labour and a fine of yen 7, and fifteen days' imprisonment with hard labour and a fine of yen 5 respectively. The members of the *Hochi* staff were released. The sentence on the members of the Niroku was reserved till March 1st as they were unable to be present in Court.

PUNISHMENT OF NEWSPAPERS.

The Tokyo papers, Niroku, Miyako and Kei-zai Zasthi, which had been prosecuted by the authorities of the Navy on a charge of having published military movements without permission, were punished on Feb. 27th with fines of from yen 40 to yen 60 in the Tokyo District Court.

AH TIECK V. NORTHERN ASSURANCE. CO.

The hearing of this case in which plaintiff claims yen 4,945 with interest at 6 per cent. per annum, was resumed on Feb. 29th in the Yoko-

annum, was resumed on Feb. 29th in the Yoko-hama District Court before Judge Danno. Mr. H. S. Playfair, agent of the Commercial Union Assurance Company, was examined as a witness. He stated that he went on Oct. 31st to the godowns situated at Nos. 34 and 35 Yokohama, after these buildings had been destroyed by fire. He examined the district, as the Commercial Union Assurance Company were interested in the con-tents of the godowns. He first paid a visit to tents of the godowns He first paid a visit to returned on March 1st from Oiso, arriving at a godown marked E. F. with K. on top. There Shimbashi at 11.36 o'clock. were no such things as Chinese clothes, shoes, etc., there. He met Mr. J. W. Crowe, of Messrs. Strachan and Company, Agents of the Northern Assurance Company, in the compound, when the latter told him that the boxes covered with skin belonged to a Chinaman. The witness and Mr. Crowe went to a corner of the godown marked "E" where some things were stacked, in a pile; they had been damaged by fire. The witness explained in detail what he found in the godowns after which he stated that the debris was sold by from its Chicago branch to the effect that the tea auction by Mr. Hall.

Cross-examined, witness stated that the pro-perty belonging to the Chinaman was not sold by

Counsel having summarized the evidence, en-tered on a lengthy discussion, after which the case was adjourned till March 4th, when judgment will be delivered.

CLAIM ON SNAKE-GOURDS.

The hearing of the case instituted by Shimidzu, a snake-gourd dealer, against Messis. Winckler and Company, was resumed on Feb. 29th in the Yokohama District Court before Judge Danno.

Defendants' counsel introduced a business book as evidence, in regard to which plaintiff's counsel stated that the entries were made in several kinds of ink such as blue, red, etc., so that the books could not be proved to be perfect business books in accordance with the provisions of Commercial Law. He refused to admit the books as evid-

Defendant's counsel asked the Court for leave to examine the Japanese broker, Kabayama, as a witness. The Court decided to do so on March 7th.

INFRINGEMENT OF THE COM-MERCIAL LAW.

The hearing of the case brought against the Nippon Yusen Kaisha on a charge of contravening the Commercial Law, concluded on March 2nd in the Tokyo District Court. The directors—Baron Shibuzawa, and Messrs. R. Kondo, M. Kabo, S. Iwanaga, K. Sonoda, S. Aosada, H. Soda, and S. Ogawa-were sentenced to a fine of yen 5 each.

PUNISHMENT OF A ROBBER.

S. Takehara, charged with having strangled an old woman to death at Hayashi-cho, Honjo, mished for receiving money under false premodes from the Russian official.

LIBEL CASE.

The case instituted by Mr. Hofmann, Kobe,
modes from the Kirchi Vorgen and Night, come unlimited in consequence of his not being 20 years old when he had committed the crime.

" THE MODERNIAN."

The third number of The Modernian has progress both in numbers and in work accomplished. The notes by "Dimples" are interesting reading, though we think they would have been in better taste had they made no allusion whatever, either in prose or rhyme, to a recent controversy. The photographic illustrations are excellent, particularly to be commended being those of cliff scenery at Negishi by S. Vincent.

NEWS OF THE WEEK.

Captain Lea and Lieut. Boyle left Kyoto on March 2nd for Nagoya.

The Newchwang British volunteers of 1900 have received the China medal.

A telegram states that four foreign war correspondents left Moji on March 2nd for Korea.

Mr. Li Yong-ik, former Korean Minister of Finance, left Osaka on March 1st by the 2.28 p.m. train for Tokyo.

Y. Kashiwagi (19). Kobe, has absconded with 19th 17,000 belonging to his employer. He is believed to be in Tokyo or Yokohama.

Major-General Prince Louis Napoleon has arrived at Harbin, and is to command a Russian brigade against the Japanese.

market is brisk but prices are stationary.

N. Ito, who was one of the Parliamentary candidates in Yokohama, was arrested on March and on a charge of infringement of the Election

A coolie and his wife were arrested on March 1st at Shitaya, Tokyo. They had turned half sen copper coins into 20 sen silver pieces and circulated them.

The Governor of Niigata telegraphed on Feb. 20th that a case of small-pox had appeared at West Kambara, the patient being one of the fugitives from Vladivostock via Moji.

A telegram from Yamanashi announces that Mr. K. Mochizuki, a candidate for the House of Representatives, was arrested on Feb. 29th on suspicion of having infringed the Election Law.

A telegram from Wakayama states that several supporters of Mr. M. Nakanishi, a parliamentary candidate, were arrested on March 2nd. They are charged with an infringement of the Election

The nominal editor of the Yomiuri Shimbun was punished with a fine of yen 30 on March and in the Tokyo District Court. He published a report with regard to naval movements without the sanction of the authorities.

Captain Kaburaki, of the Navy, who was re-cently appointed attaché of the Japanese Legation in London, will leave on March 18th by the steamer Empress of Japan for Vancouver on his way to his post.

M. Takahashi, who was sentenced on Feb. 23rd by the Yokohama District Court to eight years' minor confinement on ■ charge of having been a military spy in the service of Russia, appealed on the 29th against the sentence.

Surgeon H. L. Norris, R.N., as Syndic, played his low-necked dress of clouded green, with purple part remarkably well, and his singing with Mr. W. J. Phillips (Dame Courtlandt) especially convulsed

M. Tsutsui, K. Oikawa, and T. Sakata, who were charged with having manufactured sake clandestinely in October last, were sentenced on Feb. 29th in the Tokyo District Court to a fine of yen 250, yen 100 and yen 70 respectively.

The funeral of Mr. G. McBain, whose death has been recorded, took place at Shanghai on Feb. 15th and was very largely attended. The local journals wrote in high terms of the deceased gentleman. The N.-C. Daily News said:—"One whose left hand rarely knew what his right hand did in the way of charity, was the late Mr. George McBain. Numerous instances of his kindly thought for less fortunate fellow-creatures were spoken of in various places yesterday."

K. Okada, who was connected with the textbook affair, and who was also charged with having attempted to obtain money from a mis-sionary of the Russian Church by means of fraud, by proposing to sell him Japanese military secrets, was sentenced on Feb. 29th in the Tokyo District For the former charge, the punishment was forty-five days' imprisonment with hard labour and a fine of ren 5, and for the latter, one year's imprisonment with hard labour, a fine of yen 20, and six months' police surveillance.

An Indian, C. Fernandez, No. 127, Yokohama, was examined on March 1st at the Kagacho police station and then removed to the Public Procurators' office of the Yokohama District Court. 'The charge is not certainly known, but some Japanese papers believe that the examination is connected with the fire which occurred on the night of Feb. 22nd in the main dwelling. Two Indian employees of Mr. Fernandez were also examined on the 2nd in the 22nd Court Court Court of the 22nd in the 22 in the same Court.

The Bank of Formosa held a general meeting on March 2nd in Tokyo and passed the accounts of the last half-year. The net income was yen 197,483.29. Out of that amount, yen 42,000 was set apart as reserve, to redeem losses; yen 5,000 as reserve for equalizing dividends; yen 5,000 as special reserve; yen 10,700 as bonus to employees; yen 90,000 as dividends for shareholders at the rate of 4½ per cent; and the remainder was carried forward to the new

Mr. Oura, Minister for Communications, pro mulgated on March 3rd in the Official Gazette regulations relating to postal letters and money orders for prisoners of war. According to the regulations, postage and other charges will be exempted on letters and money orders of prisoners; and on the envelopes must be written the words "Postal service of Prisoners" in Japanese or "Service des Prisonniers de Guerre" in French; and envelopes containing money orders must have the words "Prisoner's Draft" in Japanese.

Mr. J. N. Jordan, C.M.G., British Minister at Soul, occupies a position just now of no little delicacy, remarks a London paper. An Irishman by birth, he became a student-interpreter in China His knowledge of the Chinese language in 1876. led to his being appointed Chinese Secretary to the British Legation at Peking. His official con-nection with Korea dates back to 1896, when he appointed Consul-General and afterwards Minister. He was last home on leave in 1000.

An important art find, which is also of some An important art mu, which is also or importance in history has just been made by the art dealer, Herr Hulfemann, of Wiesbaden. The Paris correspondent of the Netwastle Chronicle Paris correspondent of the Netrocastle Chromite, states that up to the present, there has not been in existence any known portrait of Marie Antoinette, other than miniatures, though it was known that David had painted one in 1790, as a companion picture to his "Louis XVI. going to the National Assembly." This was smuggled out Paris correspondent of the Newcastle Caronitte, states that up to the present, there has not been in existence any known portrait of Marie And Tokyo Foreign Relief Association desire to emph. sise their appreciation of the valuable services rendered by Mr. J. P. Mollison as Chair man of the General Committee."

I have very great pleasure in forwarding to you this resolution, and beg to remain, Yours very sincerely.

Yours very sincerely.

(Signed) A. Bellamy Brown, Secretary.

It will be evident to everyone, that unless for occult proteintialities) and the effectual operation of the policy reasons best known that David had painted one in 1790, as a companion picture to his "Louis XVI. going to the National Assembly." This was smuggled out of France by an emigrant noble, who gave it in gratitude to m family in Westphalia, and it has now been traced and restored. It is a fine portrait of the hapless Queen, who is represented in a reasons best known to the Executive Committee of the Yokohama amicable settlement of the difficulties then threatening and Tokyo Tokyo Tokyo Tokyo Tokyo Tokyo Tokyo Tokyo Tokyo Parket and Tokyo Toky

The China Mail, of Hongkong, has opened a subscription list on behalf of the Japan Red Cross Society. It says:

Cross Society. It says:

While everyone will sympathise with the sick and wounded Russians, we think it may be stated with fairness that the conduct of the Russian officials in Manchuria and of the Russian Government has alienated the sympathies of most people, who admire the noble efforts of the Japanese to stop the wanton and unjustifiable aggression of Russia in Eastern Asia. The Japanese are fighting for more than appears in the recent negotiations respecting Korea and Manchuria. The suffering of the sick and wounded during the rigors of a northern winter must be great, and we now make this appeal for subscriptions in aid of the Japanese Red Cross Society, which is doing what it can to alleviate the sufferings of a patriotic people. Any subscription received will be forwarded to the proper authorities in Japan free of charge by the Yokohama Specie Bank.

To test the taste of the reading public a new paper representative called at a Free Library the other day, says the Globe, and submitted a list of books on Japan. He was unable to obtain one of these books. Every single volume bearing in any way on the history of Japan or dealing with the life and customs of the Japanese was "out."
Whether the same result would be obtained at all the Free Libraries it is not easy to conjecture, but the present case is at least instructive as indicating the taste of the public for literature other than ephemeral fiction. When any great subject occupies the public mind it is well known among publishers that there will be a demand for books dealing with the question. It is a curious reflection that one result of the present trouble in the Far East has been to make the English people better acquainted with the Japanese. One has only to glance at the popular journals to see how keen is the public interest in the life and customs of our Eastern ally. Prior to the present disturbance the general public knew very little of the romantic history of the Island Kingdom, with its curious religious evolution, its spirit of chivalry, and its practical light-heartedness in the busine of existence. Now, however, it would seem that England is as well acquainted with the Japanese as with India or Canada, and the result is a strengthening of the intuitive sympathy which exists between the two nations.

CORRESPONDENCE.

YOKOHAMA FOREIGN RELIEF ASSO-CIATION

TO THE EDITOR OF THE "JAPAN MAIL." Sir,—In your issue of yesterday I notice a para-raph with reference to myself, reading as follows:—

At a Meeting of the Executive Committee of the "At a Meeting of the Executive Committee of the above Association held on Tuesday it was unanimously resolved that:—"The Committee of the Yokohama Foreign Relief Association for Sufferers by the *War desire to emphasize their appreciation of the valuable services rendered by Mr. J. P. Mollison as Chairman of the General Committee." Committee.

I have also received a letter from Mr. A. Bellamy Brown, addressed to me as Chairman of the General Committee, Yokohama and Tokyo Foreign Residents Association for the relief of Sufferers by the War, of which the following is a copy :-

J. P. Mollison Esq., Chairman of the General Committee, Yokohama and Tokyo Foreign Residents Association for the relief of Sof-ferers by the War.

SIR.—I aministructed by the Executive Committee of the above Association to convey to you the information that at a Meeting of the Committee beld at the Chartered Bank on March 1st, it was proposed and unanimously carried that:—

"The Executive Committee of the Yokohama and Tokyo Foreign Relief Association desire to emphasise their appreciation of the valuable services rendered by Mr. J. P. Mollison as Chairman of the General Committee."

I have very great pleasure in forwarding to you this resolution, and beg to remain,
Yours very sincerely,
(Signed) A. Bellamy Brown,
Secretary,

themselves, the above resolution is superfluous and

wholly unnecessary. It is sufficient for me to feel that I have done my duty towards the kindly people amongst whom I have lived for nearly 40 years, by remembering them in their time of trouble, and doing my utmost to promote the success of a movement having for its object the relief of the wives and children of Japanese soldiers and sailors called to the front, many of whom may not return. Yours very truly, JAMES P. MOLLISON.

HONGKONG AND SHANGHAI BANKING CORPORATION.

The ordinary half-yearly meeting of the share-holders in this Corporation was held at the City Hall, Hongkong, on Jan. 20. Mr. A. J. Raymond was in the chair.

The Chairman said:— Jentlemen,—Your directors are very pleased to come before you with the favourable report which I have just read. I feel sure that all our shareholders, and more especially those at home, will be glad to find that, not with standing the uneasiness which has prevailed during the period under review, in consequence of the political situation in the Far East, we are able to recommend a dividend of £1.10 o. and a hour of 100, or share, and also the transfer and a bonus of 10/- per share, and also the transfer of \$500,000 to credit of silver reserve fund. As re-gards our sterling reserve of £1,000,000 your directors have deemed it advisable to make some adjustment of our investments in view of the serious fall in the price of all first class securities. You will observe in the balance sheet that our holdings of £570,000 2½ per cent. Consols have been written down to 85. The National War Loan of which we hold £225,000 is redeemable in 1910 at par and that hold £225,000 is redeemable in 1910 at par and that stock is quoted at about 97; we have therefore allowed it to remain unchanged in our books at 90, but the other sterling securities amounting to £325,000, all of them gill edged stocks, have been written down to £286,000, which is considerably lower than the present market prices. Then apart from reserve fund our investments appearing under the heading of Consols, Colonial and other securities, as \$8,784. Consols, Colonial and other securities, as \$8,784,467,89 have likewise suffered in the general depreciation and for these ample provision has also been made. We may reasonably expect to see all these securities recover in value in course of time, but I am sure it will be a satisfaction to every one interested in the welfare of the Bank to know that we are continuing along these safe lines of policy which have brought us to our present strong position.—(Applause.) I may mention that these securities largely consist of British Government stocks, we have such a big interest in the Far East in the ordinary course of our business that it has not been the custom to include that field in our separate investments to any great business that it has not been the custom to include that field in our separate investments to any great extent. Compared with the last report the other figures in the balance sheet do not present any very striking feature. Deposits have slightly increased, our note circulation continues to expand and bills payable stand at \$20,882,914.55 against \$12,273,075,78 last half year, but both these items are usually higher in December than in June. On the other side the amount of our cash and also of our bullion in hand and in transit is larger; bitls discounted, loans and credits show a decrease of about \$7,000,000, while in bills receivable there is an increase of \$11,000,000. All the writing down which I have mentioned has been effected out of current profits, so that the result of the receivable there is an increase of \$11,000,000. All the writing down which I have mentioned has been effected out of current profits, so that the result of the half year's working is really better than at first sight appears from the report; that result, gentlemen, bears better testimony than any words from me, to the efficiency of our managers and staff generally, and in order to mark our appreciation of their successful efforts we have voted them a bonus of fifteen per cent on their salaries, and this I trust will meet with your approval.—(Applause). I do not think that there has been anything in the general course of trade as reflected in our business which calls for special comment, unless it be the phenomenal rise and violent fluctuations in the price of cotton and this, I fear, will have an adverse effect on the import trade all over the East for some time to come. And now, gentlemen, in conclusion, one word on the political situation. In my speech at the last general meeting six months ago I ventured to express the hope that the efforts of diplomacy might prove successful in bringing about an amicable settlement of the difficulties then threatening the peace of the Far East. Unfortunately that hope has not been fulfilled. All that I can now say it is a supposed.

all. In the meantime you may rest assured that the management is fully alive to the gravity of the situation, and will use every endeavour to safeguard your interests. If any shareholder desires any further information I shall be glad to answer any questions. (Apulause).

your interests. If any snareholder desires any attricty information I shall be glad to answer any questions. (Applause).

There being no questions, the Chairman proposed that the report and accounts as presented be adopted and passed.

Mr. Marshall said:—Mr. Chairman, and gentlemen, I have much pleasure in seconding the adoption of the report and accounts as presented. The report before us combined with the able speech we have just heard from the chair cannot fail to meet with the utmost satisfaction from all shareholders. Gentlemen, such results as the report shows cannot be achieved without the most careful attention and thorough efficiency on the part of all responsible, and I think you will agree with me when I express great satisfaction that the ability and efficiency of our managers and staff is being recognised in a small way by the bonus we are asked to vote to them.—(Applause). The motion was carried.

carried.

Mr. Master proposed, and Mr. Humphreys seconded, that the appointment of Mr. C. A. Tomes to the Board of Directors in place of the Hon. R. Shewan resigned be continued, and that Mr. E. Goetz and the Hon G. W. Dickson be re-elected. Carried.

On the proposition of Mr. G. de Champeaux, seconded by Mr. McK. Ross, the Hon. C. S. Sharp and Mr. W. Hutton Potts were re-elected auditors.

and Mr. W. Hutton Potts were re-elected auditors.
Mr. Orange said:—Gentlemen, before we part I have pleasure in proposing a hearty vote of thanks to the Chairman, the Directors, the Chief Manager and staff of the Bank. The report which has just been passed to-day is an eloquent tribute to the ability and skill which they have displayed in the conduct of the affairs of the corporation.—(Applause).

KOBE TRADE REPORT.

The annual report of the Committee of the Hiogo and Osaka Chamber of Commerce has been published. From it we take the following as referring directly to the trade of the port :-

The Government statistics for the year give the total trade of the port of Kobe as yen 245,052,229. The last five years compare as follows:—

,	Imports	Exports.
	ven	yen
1899	120,289,524	75,320,884
1900		77.700,349
1901		74.748.143
1902	154,534,013	90,518,216
1903	15415541015	

1903........ 154,534,013....... 90,518,216
Compared with 1903, this shows an increase in Imports of yen 10,017,902 and in Exports of yen 15,770,073, and represents the largest trade since the opening of the Port. Raw Cotton still heads the list of Imports, but shows a falling off from last year of yen 9,723,295, the respective figures being yen 58,087,584 and yen 67,810,879. The next most important factor in Imports is Rice, which compares as follows:

yen
23.675.778
1902 23.675.778
This may seem somewhat anomalous, as the home harvest of 1903 was an exceptionally good one. But the crop is harvested in the Autumn and the importations during the year only about covered the short crop of 1002. crop of 1902.

As far as Imports are concerned, notwithstanding the increase, the year has not been a satisfactory one for what may be classed as General Imports, and only a very few lines have turned out profitably. Towards the end of the year the political situation was in such an acute state that the ordinary course of trade was a good deal interfered with.

As regards Exports, the large increase is mainly in Cotton Yarns, which represent a value of yen 24.391.337 as compared with yen 14,897,143 in 1902. Copper also shows an increase of yen 3,030,0968.

The variations and fluctuations of Silver Exchange

Copper also shows an increase of yen 3,030,968.

The variations and fluctuations of Silver Exchange have had their effect on Exports as usual, but not to such an extent as in 1902. Exports to China ports have been much less affected, and hence the improvement in the Yarn trade.

Last year we referred to the accumulation of money in the Japanese banks and the natural curtailment of the general business of the country. In 1903 this state of affairs has been much more pronounced. In the early part of the year the interest on fixed deposits in the leading banks was lowered from 6 per cent. to 5/2 per cent..., and towards the end of the year 5 per cent. was the rate. Interest on advances and loans was at the same time lowered by Japanese from about 7 per cent. to 5 per cent. At the close of the year, however, there was a slight reaction. The financial situation generally and the

GREAT FIRE IN THE U. S.

There has been a great fire in the business section of Rochester, New York; blocks of buildings are being dynamited to arrest the spread of the conflagration.

THE BALTIMORE FIRE.

Altogether three acres in the business section of Baltimore were destroyed by the recent fire.

RUSSIAN WARSHIPS SEIZE STEAMERS.

London, February 29.

It is reliably reported at Suez that the Russian warships anchored in the Gulf have seized the British steamers Ettrickdale and Frankby and the Norwegian steamer Mathilda, laden with coal.

FRENCH TROOPS FOR INDO-CHINA.

Le Temps states that 20,000 colonial infantry have been warned to hold themselves in readiness to sail for Indo-China.

IMPENDING DISSOLUTION RUMOURED.

There is much talk in political circles of the dissolution of Parliament within a few weeks. Repeated divisions have lately shown the Government majority to be gradually diminishing. It fell on Thursday evening to 14. Although this was a scratch division it is regarded as a symptom of growing indifference on the part of Ministerialists.

RUSSIA AND CONTRABAND OF WAR.

London, March I.

Russia has issued a war regulation declaring coal, rice and foodstuffs to be contraband of war.

THE RAILWAY CONGESTED.

The Trans-Siberian Railway is very much congested, and a locomotive has disappeared in the ice on Lake Baikal.

BRITISH ARMY ESTIMATES.

The Army Estimates are £8,900,000 (?) total number of men is 227,000, being a decrease of £5,600,000. The total number of men is 227,000, being a decrease of 8,761. Provision is made for a permanent garrison in South Africa of 21,500 men. The linked battalion system is abolished, and the old numbers will be resumed by resumed by samples. resumed by regiments.

London, March 2.

The three colliers seized in the Gulf of Suez have been released by order of the

ANOTHER SEIZURE.

The Liverpool collier Oriel, bound for Singapore, has been seized by the Russians in the Red Sea.

THE NAVY ESTIMATES.

Capt. Ernest G. Pretyman, Secretary to the Admiralty, in introducing the Navy Estimates, justified the increases on the ground that Great Britain must be equal to any two powers. Mr. (? J. B.) Roberts in an amendment urged that the Government should communicate with the other naval powers with the view of reducing armaments. Mr. Arnold Forster, replying, declared that the Government had gone as far as it could. The amendment was rejected.

ADMIRAL MAKAROFF.

London, March 3

Admiral Makaroff arrived at Port Arthur on March 1st.

RUSSIAN NAVAL MOVEMENTS.

The Russian cruiser General Admiral has arrived at Ponta Delada (Ponta Delgada, a port on S. Miguel Island, Azores).

The cruiser Dimitri Donskoi has applied

for leave to remain at Suez for repairs, which be taken out of her, the matter is still under will probably occupy a fortnight.

Five Russian torpedo boats have left Port Said for Algiers. It is reported that they have been directed to waylay and search vessels in the Mediterranean for contraband of war.

KUROPATKIN'S DEPARTURE General Kuropatkin is to start for Manchuria on March 12th.

THE CAPTURED COLLIERS.

The Rusians detained the captured colliers ten days before releasing them.

THE "SADO MARU" STARTS FOR HOME.

The Japanese (Nippon Yusen Kaisha) steamer Sado Mara, coal laden, sailed from Cardiff on Feb. 29th. She will probably go via the Cape.

(From the "Jiji Shimpo.") THE RUSSIAN NOTE.

London, February 25.

In reference to the Note circulated by Russia among the Powers, the general opinion is that the document tends to show that Russia was really astonished by the superior and prompt action of Japan.

RUSSIA AND KOREA.

Russia, it is said, intended Korea's neutrality to be applicable both to Japan and Russia, but it has resulted in inducing Korea to take up the cause of

THE RUSSIAN SQUADRON.

their way home,

The Earl of Selborne, First Lord of the Admiralty, said in the course of a speech delivered last night in the House of Lords that the Russian complaint with regard to Wei-hai-wei (Russia contended that the port was open to Japan as a naval base) was a piece of wicked hypocrisy. The Times strongly criticises the wicked and poisonous statements made on the Continent as to the neutrality of Great Britain.

The U.S. Government has approved the proposal to lay a cable between Guam and Japan.

RUSSIANS IN THE RED SEA

London, February 27 The Osliabya and other Russian warships stopped the Ombasa, a steamer belonging to the British-India Company, at Suez, having mistaken

FRANCE'S NEUTRALITY.

In the course of a speech, M. de Lannesan advised the French Government not to interfere in the present crisis.

RUSSIAN OFFICIAL REPORT.

With regard to the engagement at Port Arthur, last Thursday, the Russian official report says that the Russian cruisers retired into the inner harbour THE "MANJOUR."

The Manjour's armament has been handed yer to the Foreign Municipality in Shangai, and M. Lessar has given a pledge the superior force of
A FRENCH REPORT.

FIRST COLLISION ON LAND.

Seoul, February 28, 2.30 p.m. Several hundred Russians arrived yesterday at a place about four miles distant from Pyong-yang.

This morning at 9 o'clock, fifteen Russian scouts appeared seven hundred metres to the north of Pyong-yang.

After firing for some

minutes, they were repulsed by the Japanese.

KING EDWARD AND JAPANESE OFFICERS.

This morning the King gave audience at Bucking-ham Palace to Major Inagaki and other officers pre-vious to their departure.

JAPAN-KOREAN TREATY.

JAPAN-KOREAN TREATY.
With regard to the Treaty between Japan and Korea, public opinion in Great Britain regards the protocol as an effective reply to the note which Court Lamsdorff, Russian Minister for Foreign Affairs, lately circulated among the Powers, and on the other hand, considers the Russian political and military position in Manchuria to be irreconcileable with the meaning of the Russian note.

DEFICIANS CAPTILE STEAMERS

RUSSIANS CAPTURE STEAMERS.

The Russian squadron has captured the coal steamers Ettrickdale and Frankby and examined the Benalder and Pularuan at Suez.

RUSSIA'S NAVAL PLANS.

RUSSIA'S NAVAL PLANS.

The Oslabya and other warships are passing Suer, and are expected to proceed to the Baltic. A new squadron will be thus organized in the Baltic consisting of these and the battleships and cruisers lying in those waters. The fleet will leave in June and arrive in September at Port Arthur. According to a despatch from St. Petersburg, Russia intends to avoid serious fighting till April and will endeavour to include Japan to tire herself out with wearisome work.

(FROM THE " ASAHI SHIMBUN.") THE CHILIAN WARSHIPS.

In reply to a member, Mr. Austen Chamberlain, Chancellor of the Exchequer, stated in the House of Commons with regard to the purchase of two Chilian warships, that had another Power purchased them it was feared that the balance of power would be lost and the British Government bought them so as not to interfere with that balance. Mr. Ritchie exchancellor of the Exchequer, endorsed the view that the purchase of the warships was unavoidable.

RUSSIA'S INTERIOR AFFAIRS

RUSSIA'S INTERIOR AFFAIRS.

London, February 27 In the principal towns of Russia, the influence of the revolutionists has remarkably increased. The Caucasus is involved in great ferment. local police are endeavouring to put down all The Ressian squadron.

The Osliabya and other Russian warships are on leir way home,

A train ran yesterday over the ice on Lake Baikal.

RUSSIANS IN THE RED SEA.

THIRD ATTACK ON PORT ARTHUR.

A Yin-kow correspondent of the Daily Telegraphe on the 29th ultimo that on the morning of the 25th, the Japanese squadron seriously attacked Port Arthur for an hour. The Askoda, Bayan, and Novik returned the enemy's fire. The result was that the Askoda was nearly sunk, the Novik seriously damaged, the Ketvisan (i Bayan) retired with heavy injuries, and a torpedo-boat was sunk.

(FROM THE " N.-C. DAILY NEWS." THE TRANS-SIBERIAN RAILWAY.

London, February 15.

JAPANESE FORCES AND MOVEMENTS.

Great secrecy is being observed, the troops being removed at night.

London, February 16.
Information has reached Washington that nearly twenty thousand Japanese were landed at Chemulpo on the 14th instant.

It is stated at St, Petersburg that a large movement of Japanese troops covered by cruisers is proceeding in the Gulf of Liaotung, with the object of cutting the railways near Port Arthur.

MORE RUSSIAN REINFORCEMENTS.

MORE RUSSIAN REINFORMENTS:

London, February 18.

Six Russian men-of-war passed Gottland, Sweden, on the 15th instant, going South.

The Czar, reviewing a Siberian regiment proceeding to the front, stringly addressed the men, wishing them success, and invoking blessing on the Russian arms. He concluded by saying:—"Good-bye, my brothers!" brothers!

THE LOSS OF THE "BOYARIN."

London, February 20.

A telegram from Tientsin says that after the accidental blowing-up of the Yenizei by a mine, a violent storm occurred, whereupon the mines came to the surface and floated about in all directions.

Next day the Boyarin, sent to assist in securing them, was caught in the storm, driven on the rocks, and became a total wreck.

THE VICEROY TO WAIT AT PORT ARTHUR

London, February 21

Viceroy Alexieff has been ordered to defer his departure to Harbin until Admiral Makaroff (who is to supersede Admiral Stark) arrives at Port Arthur.

THE "TIMES" ON THE SITUATION.

London, February 21.
The Times says that Great Britain's sympathy with Japan is natural and legitimate, and sufficient, should the improbable emergency arise, to enable our Government to give effect to all the terms of our treaty with Japan. with Japan.

English sympathy is not merely grounded on th

fact that Japan is our ally. It draws strength and gratification from the knowledge that Japan is fighting the battle of all the civilised nations.

THE CREWS OF THE "VARYAG" AND "KOREETZ"

Weihaiwei, February 22. H.M.S. Amphibite has taken a part of the crews of the Russian ships Vuryag and Koreets to Hong-

Hongkong, February 22.
The Amphitrite has arrived at Mirs Bay with 140
Russians transferred from the Talbot from Chemulpo. Forty of these are seriously wounded and go to the Government Hospital.

The steamer Namsang has been chartered to convey the remainder to Colombo, and leaves

CONDITIONS AT PORT ARTHUR.

London, February 22,
Reuter's correspondent, by special permission, has
visited Port Arthur, which the Russians claim is
capable of two years' resistance.

BRITISH STUDENTS OF THE WAR.

In addition to Major-General Nicholson and Colonel Haldane, a dozen officers of all arms are being sent to watch the Japanese operations at various points, under the directions of General Nicholson.

AN AUDACIOUS FAILURE

At a court-martial on three Japanese disguised as coolies who were arrested when attempting to blow up the railway bridge over the Sungar river on the 21st instant, it was revealed that they were a Japanese colonel of engineers, a naval torpedo lieutenant, and a lieutenant of sappers, all belonging to the General \$166.

They are condemned to death and immediately hanged from the Sungari Bridge.

MANCHURIAN RAILWAY.

London, February 26.

An official report to the Director-General of the Chinese Eastern Railway states that the Manchurian railway is strongly guarded, there being at every mile approximately a high watch tower with thirty Cossacks.

(FROM THE "S.-C. MORNING POST.") ALEXIEFF'S INCAPACITY.

London, February 18.

Public opinion in Russia and even in the Services, is strongly against Admiral Alexieff.

The public accuse him of incapacity, and a strong movement is on foot which favours the immediate appointment of General Kuropatkin, the Minister of War, to the command of the army.

RUSSIAN PLAN OF CAMPAIGN,

London, February 18.

The Russians contemplate the abandonin Port Arthur, leaving there a garrison only sufficiently

strong enough to hold the town.

The remainder of their army will be concentrated

In this case only minor engagements between the opposing forces may be expected south of the Yalu, and a decisive battle will be likely to occur in the vicinity of Kirin.

CHINESE LABOUR QUESTION

Lord Milner, telegraphing on the 11th inst., gave as his opinion that the Boer attitude on the Chinese labour question was unaffected by the anti-Chinese letter for which Botha and Delarey are responsible.

The Boers are not unfavourable to the introduction of Chinese labour into the Transvaal.

of Chinese labour into the Transvall.

Mr. John Morley's amendment was greeted with cheers and counter-cheers.

Akhough Mr. Balfour and Mr. Chamberlain were absent, the debate was one of the most brilliant in

Parliament.
The Opposition consider that the position of the Government is seriously shaken.
Mr. Redmond declared that the Irish declined to

Mr. Redmond declared that the Irish declined to commit themselves at the present stage of the controversy; but as the amendment was a vote of confidence in the Government, and no Government refusing Home Rule could have the confidence of the Irish Party, they would vote against the Government.

RUSSIA'S MILITARY MOVEMENTS.

RUSSIA'S MILITARY MOVEMENTS.

London, February 21.

Russian is mobilising 120,000 troops at Moscow, Kieff, and Warsaw. Many of these are already en route to Manchuria, and the others are preparing to leave. They will most likely be concentrated in the neighbourhood of Harbin. The Russians are row devoting all their energies to the land operations. Strenuous efforts are being made to construct the railway round Lake Baikal. The railway was contracted to be finished at the end of 1901. Serious engineering difficulties are being encountered, and engineering difficulties are being encountered, and the tunnelling is bulging. It is neverthless, expect-ed that the railway round the take will be finished in two months. Trains crammed with soldiers are daily leaving the chief towns of Russia.

FROM THE "CHINA MAIL,"

BRITISH SOUTH AFRICA CO.

London, February 18.

The British South African Company issued the balance of their unalloted capital in four hundred thousand shares at 111 on the 16th inst. The move is made in consequence of the stagnation of trade in South Africa, unforeseen outlay, and diminished re-

London, February 17.

Negotiations have been concluded by Russia for the purchase of some large transports at Antwerp. REFORMING THE WAR OFFICE.

February 16. H.R.H. the Duke of Connaught has been appointed Inspector-General of the Forces, with Earl Roberts as adviser.

THE RUSSIAN BUDGET.

The details of the Russian Budget for this year show, says an exchange, that the Ministry of Ways of Communications still remains the largest spending Department of the entire bureaucracy, no less than 473,274,611 roubles being assigned to it for the year 1904, an increase of nearly 15,000,000 roubles over the amount assigned for the year just past, when everyone recognised that the enormous sums put down to the pacific purposes of railway construction and maintenance in reality CHINESE LABOUR QUESTION

London, February 16.

The Hon. Alfred Lyttelton, M.P., Secretary of State for the Colonies, announced in the House of Commons that protected Chinese will be stationed in the Transvaal.

Lord Milner, telegraphing on the 11th inst., gave Lord Milner, telegraphing on the 11th inst., gave Far East. The new railroad which stands forestime to the Page attitude on the Chinese rar hast. Ine new railroad which stands foremost this year is the Orenburg-Tashkend line, running through a perfect waste, and avoiding as possible any towns on the way. The total cost of the Siberian and Manchurian railways, together with the new harbour of Dalny, amounts together with the new harbour of Dalny, amounts to 845,400,000 ronbles. There has hitherto been practically no return for this vast expenditure of capital, and it appears from the report that no return is to be expected until Russia has a harbour in Korea. The late Tsar Alexander III. guaranteed out of his private funds a sum of 350,000,000 roubles for the Siberian railway. The War Ministry receives over 3½ million pounds sterling more than last year, an increase of the "expenditure in the Kwan-tung territory" accounting for about half a milion of this, and a of the "expenditure in the Kwan-tung territory" accounting for about half a milion of this, and a very largely increased "reserve credit" of over a million and a half pounds sterling being the principal items. The total assigned to the War Department reaches 38 million pounds sterling. The Navy has been assigned less this year than last, and, though the reduction is not very large, it is curious to note that it is the only decrease in any spending department. The total Budget of any spending department. The total Budget of the Russian Empire has grown since the amazing total of over two milliards of roubles, reached for the first time last year, by over 100 millions of roubles, and now stands at 1,178 millions of roubles (230 million pounds sterling).

UNDERGROUND LONDON.

An interesting article upon the new tube railway from Finsbury Park to the City, which has just been completed, appears in the London Daily Chronicle of January 14th, and we reproduce it

is made in consequence of the stagnation of trade in South Africa, unforeseen outlay, and diminished receipts for the past year.

(FROM THE "HONGKONG DAILY PRESS.")

THE QUESTION OF TIBET.

Singapore, February 19, The Russian threat with reference to Tibet has been treated in India with amused contempt. It has been treated in India with amused contempt. It has treated no sensation among the natives, who recognise the Russian collapse and are in sympathy with Japan. The Tibet Mission is passing forward.

[Note.—On Feb. 1st the Mission and 4,000 Tibetans were reported at Guru. The additional Tibetan reinforcements are said to number 1,700 men, and the force is said to possess a thousand firearms of various descriptions. The remainder are armed with bows and spears. A Phari rumour credits them with the possession of two long-range guns, which carry from four to five miles. The force consists only of tall, gaunt Tibetans, dressed in nondescript uniforms, and there are no Chinese. So far, there has been no hostile movement. In spite of alarms and rumours, the current of Chumbi-Tuna news reports all quiet. It is officially announced that, owing to the threatening attitude of the Tibetans assembled at Guru, it has been deemed necessary to stiffen Colonel MacDonald's force; therefore 200 Mounted Infanty, with British officers, left Umballa for Darjeeling; and two Maxims, with detachments, are to leave later for the same destination.]

RUSSIA PURCHASING MORE TRANSPORTS

London. February 19,

Chronicle of January 14th, and we reproduce it below:

London is gradually being undermined in all diections with deep level tunnels intended to promote the public convenience, and yesterday another of the remarkable electric railways was brought to such a stage of completion that it might be inspected by representatives of the public convenience, and yesterday another of the remarkable electric railways was brought to such a stage of completion that it might be inspected by representatives of the public convenience, and yesterday a

for it's so constituted that is further with the standard railway stock of the Great Northern Railway Company.

The spaciousness of the stations and tunnels at once impresses the visitor who is familiar with the older tubes. The South London, which was opened in 1800, has a diameter of 10th 6im, while the new tube is 16ft, in diameter. The style of the stations is similar, and the familiar white glaze bricks line all the walls, while it is declared that the line is absolutely fire-proof, though for greater security there is a fire-proof pathway between the rails in the tunnels, so that passengers in untoward emergency may make their exit in security.

The carriages, too, are spacious and comfortable, the seats being arranged crosswise, and there are for greater convenience doors in the centre as well as at the end. The design appears to be admirably suited for the rapid conveyance of large numbers of passengers. The standard trains will consist of seven; coaches, with seats for about 430 taxvellets.

coaches, with seats for about 430 travellers.

The line is three and a half miles long, and though the City terminus is fixed at present in Moorgate-street; it will ultimately be made at the Lothbury torner of the Bank of England. From Moorgate-street outwards the first station is in Old-street, and the next at Essex-road, close by the Agricultural Hall; a station is also being made at Highbury, a departure from the original plan, which will enable the line to cater for an important district.

At the fourth outward station, Drayton-park, the line comes to the surface, and there the repairing shops and carriage sheds have been established. It was originally intended to make a junction with the Great Northern lines here, but the difficulties in the way of the easy handling of traffic were too great;

Great Northern lines here, but the difficulties in the way of the easy handling of traffic were too great; and the line has been carried on by an underground extension to Finsbury-park, where a remarkable engineering feat has been achieved.

A large underground station has been built there, the roof of which is the permanent way of the Great Northern line, and this work has been done in a year, without interruption to the running of a single train. Broad stair-ways lead from the upper station to the floor twelve feet below, where vast lifts are erected to carry passengers to the electric trainsforty feet further down. These broad and easily-sloping stairs, by the way, are found at every station, so that the energetic passenger may ignore the lifts if so inclined.

it so inclined.

The generating station by the Regent's Canal is considered a model of its kind; it is constructed on a comparatively small area, and, as Mr. E. W. Moir, director of Messrs. Pearson and Sons, Limited, who has been responsible for the construction of the line,

has been responsible for the construction of the line, says, it is packed with machinery like a battleship. There are several novelties in the newly made line, which has been under construction for four years. The iron rings, for instance, which completely line the tunnels of the other electric railways, are in this case carried round for only a part of the circle, the lower part is composed of a vitrified brick invert, and this it is thought will lessen the vibration and diminish the noise made by the train as it travels. Another novelty is that two collector rails are used for the first time on any electric railway in London.

Another novelty is that two collector rails are used for the first time on any electric railway in London, one on each side of the track; that it is believed, will lead to greater safety and continuity of working. The fare for the whole distance will be twopence, with penny fares between certain intermediate stations, and there will be a three-minutes service at the outset, the journey occupying 13 ½ minutes, including four stops of twenty seconds each.

During the hours when the pressure is lower a similar service will be maintained, but with shorter trains. In this way it is hoped to carry at least 5,000,000 passengers every year for each mile of line, or altogether 17,000,000 from local traffic alone. This is regarded as a low estimate, for the Central London carry 7,000,000 passengers per mile.

Beyond the local traffic, however, there are the

30,000,000 passengers who are brought to Finsbury-park by Great Northern trains, and on the compu-tation that at least a third of their number will use the new line, the tube may have to carry 27,000,000 passengers annually.

The chief engineers of this great undertaking, which

will do much to relieve the congestion of London, are Sir Douglas Fox and Partners; Mr. Alexander Ross, chief engineer of the Great Northern Railway, and Mr. H. W. Sadler are the engineers of the section constructed by that company from Draytonpark to Finsbury-park.

The following particulars indicate the progress up-to-date in the provision of deep-level railways for London:—

UNIVERSAL BIBLE SUNDAY.

(COMMUNICATED.)

The arrangements for the observance of Bible Sunday on March 6th—the last day of the Bible Society's century—are now practically complete and in nothing is the universality of the British and Foreign Bible Society more emphasized than in the remarkable way it has been able to enlist the sympathies of all Protestant Churches in the

the drawing together of the Churches of other Gospel in the hands of the whole human

and Queen Alexandra will be present at Divine Service at St. Paul's Cathedral, on Bible Sunday, when the Lord Mayor, the Sheriffs and the Cor poration will attend in State. The Sermon will be preached by the Archbishop of Canterbury.

Among the earliest to endorse the suggestion that March 6th should be observed as Bible Sunday were the Archbishops of Canterbury and York; while the Bishops have, with hardly an exception, written letters commending it to the clergy in their respective dioceses. Cordial resolutions in favour of observance have also been received from every Nonconformist As-sembly and Conference which met last year, including the Baptists, the Congregationalists, the Society of Friends, all denominations of Methodists, the Moravians, and the Presbyterians. In Scotland, both the Established Church and the United Free Church are co-operating in the cele-

In the British Colonies the idea was greeted with universal approval. The Metropolitan of Rupert's Land and Primate of all Canada, the Archishop of Sydney, the Archishop of the West Indies, and the Archishop of Capetown, and nearly fifty Colonial and Missionary Bishops of the Anglican Communion, have written cordially endorsing the observance of Bible Sanday. The chief representatives of non-Episcopal Churches in the Colonies have responded with equal readiness, and the proposal has received the hearty sanction of the Synod of the Dutch Reformed Church in South Africa.

In the United States of America, both the chief Presbyterian Churches, the two Methodist Churches, and the presiding Bishop of the Episcopal Church, have cordially agreed to observe Bible Sunday in their various Churches throughout the States

All the great Missionary Societies, without exception, have joined hands to observe this day of common thanksgiving, many of them having generously arranged to forego their own sermons or meetings on March 6th. in favour of Bible Sunday. meetings on March oth. In layour of Bible Sunday.
That the suggestion would meet with enthusiastic support in the Mission-field throughout the world was a foregone conclusion.
Both to the Missionary and to the Native Church, God's Book often stands for more then we can possibly realize. To the preacher, then we can possibly realize. To the preacher, cut off from most that is helpful and invigorating in the Christian life, the written word takes on an added worth as a source of strength and in-spiration; while to the converts, the Book itself, even apart from its message, acquires a precious-ness from the fact it is frequently the first, and sometimes the only volume produced in their own

But the must significant item in this buge programme is the bringing into line of the Protestant Churches on the Continent of Europe, and establishing a link between those that may be used to be supported by the continuous significant items in the bug bug and establishing a link between those that may be used to be supported by sundered on minor points. Bible and establishing a rink between those that may be most widely sundered on minor points. Bible Sunday will be kept by hundreds of congregations, representing Lutheran, Reformed, and Waldensian Churches. The Archbishop of Upsala has written, in the name of the Bishops of Sweden, promising the cooperation of all their clergy. meeting of the Danish Bishops in Copenhagen passed a unanimous resolution in the same terms : passed a unanimous resolution in the same terms; while similar resolutions have been passed by the Consistory of the Protestant State Church in Saxony, and the Conventus of both the Lutheran Church and the Calvinistic Church in Hungary. Thus, throughout the world, thanksgiving will be made to Almighty God in all tongues and by all peoples on this memorable day.

lands, no less than those of England, in one great race. And this universal thanksgiving exemplication, all minor differences of race, language fies most forcibly one of the Society's ideals and sect being submerged in the great bond of which was voiced by Lord Berkley, its second our common heritage – the Charter of Salvation as contained in the Word of God.

In London, their Majesties, King Edward VII.

In London, their Majesties, King Edward VII.

A CENTURY-OLD WAR ODE.

At this time it is interesting to read the fol-lowing ode, written by Henry James Pye (Poet Laureate) which appeared in the London Globe on January 18th, 1809, when Europe was racked by the Napoleonic domination:—

Full-orb'd in equinoctial skies, When the pale moon malignant rides, And bids the howling tempest rise And swells the ocean's briny tides; Dreadful against the sounding shore, The winds and waves tumultuous roar, The torrent-braving mound in vain,
The stormy inroad would restrain,
The surges with resistless sway
Force o'er laboured mole their way;
Scorn every weak resource of human toil,
O'erwhelm the peopled town, and waste the cultur'd

But when, by native fences barr'd But when, by native tences barr'd From billowy rage, the happier land. And rocky cliffs for ever stand. To the wide-water'd coast a guard. Such as on Vecta's southern steep, Look down defiance on the raging deep; Such as on Dover's breezy down On Gallia's hostile borders frown. On Gaina's nosite borders frown,
The billows urging billows roar
And idly beat against the shore,
While from the heights sublime the swain
Mocks the vain efforts of the foaming main,
Till Nature bids the deluged surge subside
Hush'd is the tempest's voice, and refluent rolls the tide, »

So o'er Europa's ravaged plain We saw the torrent wild of war Resistless spread its fron reign. And scatter ruin wide and far: The embattled wall, the warlike band. The embattled wall, the warfike band vainly the tyrant's course withstand; Before the impious sons of Gaul The legions fly, the bulwarks fall; Yet Britain's floating castles sweep Iavasion from her subject deep. Yet by her rocks secure from harm. Securer by her patriot arm. Iberia turns the battle's tide. Berna turns the battle state. Resists the injurious tyrant's pride. While, freely floating in the ambient sky. Sacred to freedom's cause, their mingled ensigns fly.

A KEPPEL STORY.

In the course of an account of the career of the late Admiral Sir Henry Keppel, a London journal says the following incident respecting Keppel and his ship the Raleigh is recorded in the Hongkong journals of the time. If not literally true it is at least ben trovato:-

least ben trovato:—

One day, for some reason, the Admiral, Sir Michael Seymour, who was then on the flagship Calcutta, gave orders for the *Raleigh* to proceed to sea in face of a very strong S.W. monsoon. The *Raleigh* was to go out by the Lyeemoon, and return by Green Island. The ship was got under weigh, and went out in the ordinary way by the Lyeemoon, and sailed round the island. After some hours she came back by way of Green Island, with all plain sails and all studding sails set. At first this called for no special attention, except for the grand sight of a man-of-war under full sail. But the harbour was full of sailing ships of all nations, and as the *Raleigh* came near and threaded her way among them, the crews of the various ships became interested. When the *Raleigh* came near to her anchorage the order was quietly passed, and then, as if by magic—in came all studding sails; then in the same manner all plain sail; after that "Let go the anchor," and a running moor was made. Then came cheers from every sailor who had witnessed the manner urre, cheers that could be heard all over Hong Kong as it was then.

The Admiral was not pleased with this piece of

in the remarkable way it has been able to enlist the sympathies of all Protestant Churches in the organization of this world-wide Thanksgiving.

Considering the controversial trend of the times, it would have been sufficiently noteworthy to arouse comment had the united demonstration been limited to the various Christian communions in Lingland. But its unique feature is the God-appointed task of seeking to place the

and under these she went through the shipping to her unchorage, and then, "In all studding sails," and a ritining moor was made as before. And, if possible, the cheers were more veletient than before. What was the effect? Why, nearly half the sailors in the merchant ships wanted to join the Ruleigh. They could not be accommodated, but many were engaged and put on board the Sybil.

WILD WITH ECZEMA

And Other Itching, Burning, Scaly Eruptions with Loss of Hair.

Speedy Cure Treatment.

Bathe the affected parts with Hot Water and Cuticura Soap, to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Oistment freely, to allay itching, Irritation, and inflammation, and soothe and heal, and lastly take Cuticura Resolvent Pills, to cool and cleause the blood. A single set III often sufficient to cure the most torturing, disfiguring, itching, burning, scaly, pimply kumours, eczemas, rashes, irritations, and chafings, with loss of hair, when all else fails.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psorhasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurement, as in pimples and ringworm; the awful suffering of infants and the anxiety of worn-out parents, as in milk crust, tetter, and salt rheum, — all demand a remedy of simost superhuman virtues to successfully cope with them. Such are the CUTICURA remedies, the purest, sweetest, most speedy and economical curatives for the skin, scalp, and blood ever compounded. Mothers are their warmest friends.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT for preserving, purifying, and beautifying the skin, for cleaning the scalp of crusts, scales, and dandruft, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby reshes and chaftings, in the form of baths for annoying irritations and inflammations of women, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and many sanative, autiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, insteless, conomical substitute for the celebrated liquid CONTOURA RESOLVENT, as well as for all other blood purifiers and humour cures. Fut up in screw-cap pocket vinis, constaining of dozes.

COTTOURA REMEDIES are sold throughout the world. Australian Depot: R. Towes & Oo., Sydney. British Repot: 7.-68, Chartertouse Sg., London. French Depot: 5 Now do in Pall, Paris. Fortes Dang Arm Cress. Dor., Sole Props., Botton, U. S. A.

YOKOHAMA: SATURDAY, MARCH 12TH, 1904.

On January 27th, 1904, at Chalford, Gloucestershire, England, the wife of E. Hamulton Holmes, H.B.M.'s Consular Service, Japan, of a Daughter. China papers please copy.

SUMMARY OF NEWS.

A CASE of small-pox was reported on March 3rd at Seta, Gumma prefecture.

THE German steamer Pioneer, recently chased by the Japanese, has been re-named Kocho

Two cases of typhus are reported in the Tokyo Gassed Yarn Spinning Mill, the patients being female workers.

THE Chinese Prince Pulung will arrive on March 16th at Nagasaki by the steamer Korea from Shanghai.

OXFORD has defeated Cambridge in the inter-University Hockey match this year by one goal

Sea and was wrecked. The crew were all saved. Details are not yet known.

TORYO papers report that the Empress will return to Tokyo about March 20th from the Hayana Detached Palace.

PRINCE NASHIMOTO has left Paris, and is expected to arrive at Yokohama on April 4th. He had been studying at a military institution.

THE Russian Consul at Fusan, Korea, and his party, who had been staying at Nagasaki for some days past, left on March 5th for Shanghai.

THE Emperor presented a thousand yen on March 3rd to Marquis Tokudaiji, Grand Cham-berlain, who has been ill for some weeks past.

Two convicts of the Chiba Prison quarrelled on the morning of March 7th, the result being that one of them was severely injured with a spade.

MR. N. HIROMO, Osaka, has purchased the British steamer Glengyle and re-named her the Miyoshima Maru. She was built in 1886 at Glasgow and her gross tonnage is 3,355.

A san accident is reported from Tsu, Aichi prefecture. A girl, 13 years old, employed at a weaving factory, was crushed to death by the toothed wheels while working on the glossing

TWENTY-TWO Russians who were treated in the Japanese Red Cross Society's hospital at Chemulpo, left on March 6th by the Hakuai Maru. They are to be accommodated at the Matsuyama Hospital, Iyo province.

A snow slide occurred on the morning of March and at the Hashidate mine, Niigata prefecture. A house was thrown into the Nagajiri river, with the result that nine coolies employed at the mine were killed and four injured.

THE dead body of a woman, apparently about thirty years old, was found on the morning of March 8th under the pier at Yokohama. It was removed by the Harbour police who believe that she committed suicide by drowning herself.

THE nominal editor and publisher of the Nichi Nichi have been punished with a fine of yen 30 each on the charge of having published reports with regard to military movements, without having submitted the same to the inspection of the authorities.

A TELEGRAM from Nagasaki announces the repairs on the captured Russian steamer Man-churia were completed on March 3rd, when a trial trip took place. She will be taken to Saseho in a few days.

Considerable excitement has been created in German commercial circles by the announcement that Messrs. J. & P. Coats (Limited), of Paisley, are about to obtain a firm footfiold in Germany, by the acquisition of the Saxon sewing cotton factory of Messrs. Heydenreich & Company.

THE German steamer Jacob, chartered by the Osaka Shosen Kaisha, which was to leave Kobe on March th for Yuensan, Korea, refused to sail, the captain and the German Consul protesting that the route is not considered to be entirely

Fujita (53) and his wife, Toyo, were murdered, their heads having been beaten in with a large hammer and their daughter, Fuji (28), who was suffering from consumption, was very severely injured. The murderer is still at large and the cause of the crime is not known. The confectioner was one of the directors of the Keihin Bank and the Aikoku Life Insurance Company.

THE fiji states that the goods traffic on the Tokaido and Sanyo railways was to be resumed on March 9th and to be suspended on the 16th. Owing to the frequent suspensions, about 2,800 tons of merchandise for Tokyo only are lying at the Osaka station.

A YOUTH named T. Ishikawa committed suicide on March 7th on the railway near Uyeno station, Tokyo. The cause is not yet known. He had been employed by a soy manufacturer at Tansumachi, Shitaya, and left there on the previous day without the consent of his employer.

M. TAKAHASHI, the "Rotan," (Russian spy) who was sentenced on Feb. 23rd in the Yoko hama District Court to seven years' minor con-finement and who appealed to the Tokyo Appeal Court, withdrew his appeal on March 7th. sentence will thus stand, and he was to be removed to prison on the following day.

K. FUKANO was executed on March 8th in the Ichigaya Prison, Tokyo. On March 1st last he entered the dwelling of a farmer, D. Ogawa, in the village of Nakagawa, Kimitsu, Chiba prefecture, armed with a club, beat the farmer to death and stole a purse containing three yen. He was arrested in Tokyo, and sentenced to death,

THE steamer Haimun, chartered by the London Tines, arrived on March 3rd at Nagasaki from Wei-hai-wei and took on board eight hundred tons of coal. She was to leave for Korean waters. Mr. Fraser, a correspondent of the *Times*, was on board the steamer. Wireless telegraph apparatus is provided on one of her masts. Chefoo will be her base. The correspondent will take photographs of views of naval engagements. It is said that the *Times* will employ two more steamers for the same purpose. They will visit steamers for the same purpose. They will wei-hai-wei, Hongkong and Japanese waters.

In the Admiralty Division in London, a claim was made for salvage remuneration in respect of services rendered by the Liverpool steamship Shimosa to the Italian liner Sardegna in the Atlantic Ocean in June last in the course of a voyage from New York to China and Japan, The defendants admitted the services, but said the Sardegua was never in a position of material danger. The value of the salved property was danger. The savet property was £118,447, and that of the Shimosa, with her cargo and freight £265,580. His Lordship awarded the plaintiffs £6,400 in this proportion: £5,300 to the owners of the Shimosa; £400 to her master, and £700 to the crew.

THE new French armed cruiser Sully, which has been ordered to sail for the Far East, is still at Toulon, and it is announced that M. Pelletan has relieved Captain Farret of the command, and replaced him by Captain Guiberteau. This decision has caused great surprise. The *Temps* believes that the officer incurred M. Pelletan's displeasure by objecting to the Sully's hurried departure after she had met with an accident in dock, one of her torpedo tubes being bent, and doubts also existed as to the solidity of one of A PELEGRAM from Shimonoseki reports that the steamer Shimshu Maru, early on the morning of morning (about t o'clock) of March 3rd at been completed, and some of the guns had March 3rd, ran on an unseen rock in the Korean Nishino-kubo, Shiba, Tokyo. A confectioner, T. shown defects.

AFFAIRS AT PORT ARTHUR.

Friday, March 4

Admiral Togo sends some details of the attempt to block Port Arthur. From the that the Bushu Maru, as already reported, had her rudder shot away or her steering they hired for \$1,000, though the price in gear injured, and, losing her direction, went ashore at the base of Mantau-shan. The an island lying 22 or 23 miles westward of Hokoku Maru, under Commander Hirose, Port Arthur. This man alleges that the had nearly reached the harbour's months. command of the five steamers, it appears had nearly reached the harbour's mouth when she received a furious cannonade from the Retvisan. Her steering gear became useless and she took fire in the fore-part, so that finally she had to be beached under the light-house. The Jinsen Maru, under Lieutenant Saito, was just entering the harbour when in the immediate vicinity of the light-house, she came into collision with what seemed to be a sunken ship, and unable to move in either direction, was blown up by her crew. Thus the *Hokoku* and the *Jinsen*, though not entirely successful, proved of some service for the intended purpose. The Admiral sends these statements by way of supplement to his previous reports. He expresses great satisfaction that the danger-He ous operation did not involve more casual-ties than one killed and three wounded, which he describes as a wonderful escape.

Shanghai has received a telegram from London, dated the 2nd, saying that according to a report sent by the Daily Telegraph's correspondent in Newchwang, the Japanese Squadron on the 29th February (query 25th) attacked Port Arthur; that the Askold, the Bayan and the Novik went out to the defence; that the Askold was nearly sunk, the Novik badly damaged, the Retvisan again injured and a torpedo boat sunk, after which the Japanese withdrew. It is just possible that the Japanese squadron did make another attack on the 29th ultimo but no news of anything of the kind has reached Tokyo officially, and the details of the Daily Telegraph's story tally remarkably with those of the Paris report already received. The London journal's correspondent adds that the forts were silenced by the Japanese

From Shanghal news reaches the Asalu Shimbun that the scarcity of provisions in Port Arthur is felt more and more, and that in spite of the high prices offered edibles cannot be procured. Considerable stores of food stuffs have been purchased in Tientsin, but they cannot be passed on the railway. We should think that these rumours are

to be regarded with reserve.

Saturday, March 5.

The Novoye Vremya has an interesting article in which it takes for text an opinion said to be held in Russian social circles to the effect that the defeats Russia has just experienced at sea will have a wholesome effect in inculcating the necessity of reforms, and that her recent experiences at Port Arthur especially will be as useful to her as was her discomfiture at Sebastopol fifty years Therefore those imbued with a really patriotic desire for their country's good may patriotic desire for their country's good may not unreasonably welcome Japan's successes. The total strength at the present moment in this Such is the view said by the Russian semi-official organ to be entertained in influential quarters. But the Novoye Vremya thinks that the desired reforms might just as well be effected in the sequel of victory, and that there is no occasion to wait for defeat. "What we hope," says the St. Petersburg journal in conclusion, " is that the losses already suffered will not only reserve with 252 officers and 15,300 men; also one." The Novik had two shots below the water-fined part of patriotic desired to sea. The total strength at the present moment in this region consists, inclusive of the frontier or railway manner is still serviceable but she can occasion. The infantry, numbering 2,100 officers and 16,825 men. Consists in the first place of 32 regiments of the patriotic
encourage reforms but will also have a good effect generally.

In the Jiji Shimpa we find a note containing intelligence sent by that journal's correspondent from Chefoo. The authority for report of Commander Arima, who was in the facts stated is a Chinese subject, one of a party of 80 who arrived at Chefoo on the force now assembled at Port Arthur consists of the following :-

-	Men.	
The Ninth Regiment	700	
The Tenth	1,000	
The Twenty-fifth	2,400	
The Twenty-sixth	900	
The Twenty-seventh	1,300	
The Twenty-eighth	1,300	
Newly arrived troops	1,300	
Enrolled at Port Arthur	900	
Sanitary Corps	400	
Intendance	600	
Artillery	600	
Total	10.400	

According to the same authority, the men of the 25th Regiment hastened to the base of Hwan-kin-shan on the 9th of February at the time of the bombardment of the fleet, the idea being that a landing was contemplated by the Japanese. A shell from the attacking fleet fell among these men and killed or wounded 130. There are now killed or wounded 130. over 200 wounded men in hospital belonging to the navy and the army. The Russians are buying up all the cattle they can find, but they are taking provender for their horses without received for their horses without paying for it, and the inhabitants are consequently praying for the arrival of the Japanese. There are over ten thousand bags of flour stacked at the station. Guards are posted over all the supplies of coal in the shops and none is allowed to be sold to the people, who are consequently compelled to use wood only for fuel. Comcompelled to use wood only for fuel. modities are at least twice their ordinary No Chinese subjects or coolies are allowed to leave the place, and great dis-content consequently prevails. At present the number of ships actually undergoing repairs Railway are taxed to their uttermost, and is two. Six or seven are lying in the west that the despatch of troops by that route harbour. Since the attacks of the Japanese must prove a slow and unsatisfactory process. the military have lost heart, and are no longer disposed to use that boastful language previously employed by them so freely.

One point in the above detail of forces seems to us to be decidedly questionable, namely, the statement that there are only 600 artillery-men at Port Arthur. Such a force would be quite insufficient to man the batteries unless all the gunners are supposed to be on duty all the time.

In connexion with this question of Russia's immediately available forces, the Peking correspondent of *The Times*, wiring under date of January 21st, gives the following

The following corrected list of the Russian military forces in the Far East to date comprises all the troops east of Lake Baikal in Siberia and Manchuria, including those guarding the whole of the Manchurian railways and the railway between Vladivostock and Khabarovka, and those guarding the Amur River, and the troops on shore at Vladivostock, Possiet Bay, Dalny, and Port Arthur,

battalion and one company of fortress infantry from Nikolaievsk with 20 officers and 1186 men. The two battalions of Port Arthur fortress infantry recently two battalions of Port Arthur fortress infantry recently became the 20th Regiment, and the six battalions of Viadivostock fortress infantry became the 30th, 31st, and 32nd Regiments of East Siberian Rifles. The frontier guard infantry, 55 companies with 268 officers and 13,103 men, make up the total of the infantry. Of cavalry there are 148 squadrons, with 603 officers and 21,914 men, made up of six regular cavalry squadrons from Russia, 87 squadrons of Trans-Baikal Cossacks, and 55 frontier guard squadrons.

squadrons.

squadrons.

The artillery consists of 36% batteries, with 266 guns. There are 15 field batteries of eight guns each and one of six guns; four horse batteries of six guns each; two mountain batteries of eight guns each and one of six guns; one heavy battery of eight guns; one horse mountain section with two puns; also six batteries with six quick-firers each; also six frontier guard batteries of eight guns each. Each battery consists of six officers and 242 men. There are also two battalions of garrison artillery at Vladivostock and two at Port Arthur, consisting of 16 companies with 42 officers and 2,620 men; also one company at Nikolaievsk. The total artillery force is 264 officers and 10,567 men.

men; also one company at Nikolaievsk. The total artillery force is 264 officers and 10,567 men.

The engineers comprise 22 companies with 88 officers and 3,745 men—namely, two battalions of East Siberian Engineers, including a telegraph company; the 4th Trans-Amur railway battalion (not four battalions as reported); also the Ussuri railway brigade; also the Port Arthur engineer company, besides one submarine company at Nikolaievsk and another at Vladivostock; also a balloon section.

The supply transport comprises 60 officers and 5.423 men.

5.423 men. In reading these figures it is necessary to remember In reading these figures it is necessary to remember and to understand certain facts about the Russian position. First, the line of communications between Manchuria and Western Siberia consists of a single line of lightly constructed railway; secondly, the Manchurian Railway, which is somewhat exposed to wreckage, traverses for 1,555 miles an untriendly country whose people may possibly regard the Japanese as liberators; thirdly, the total strength given represents the full war strength and assumes that not a single man is sick or absent nor a single gun disabled.

All the Russian fleet, except four armoured cruisers

all the Russian fleet, except four armoured cruisers at Vladivostock, is at present at Port Arthur, wedged in a confined harbour, or rather basin, with only one

dock available for repairs.

London wires under date of the 3rd instant that whereas Russia had counted on sending all her provisions and munitions of war by maritime transport, she has now lost the command of the sea and is compelled to forward everything overland. The result is that the resources of the imperfect Siberian

Sunday, March 6.

The Jiji Shimpo's Peking correspondent learns from a foreign military officer who has just returned from Liaotung, that the Russians in Port Arthur are employing five thousand Chinese coolies daily on the construction of works to defend the land side of the place and that the guns taken from China are to be mounted there. The mines laid between Dalny and Talien Bay number 360, of which 32 have been carried away by the tide. The neighbourhood of Talien must be a very dangerous place if so many torpedoes are floating around.
The Nichi Nichi Shimbun

statement said to have been made by a naval architect who recently visited Port Arthur. The Tsarevitch was struck on the starboard side. She is now drawing 2 or 3 feet more than her normal draught and though able to use her guns, could not put to sea. The

line and is now in the dry dock. The Diana, though hit, was not seriously injured. The Boyarin is a complete wreck.

Monday, March 7. The Tientsin correspondent of the Shimpo says that a pressing request reached the Russo-Chinese Bank in that place from Port Arthur, in the sense that unless two hundred thousand roubles could be sent before the end of the month, great in-convenience would be felt. The Bank, however, owing to the run suffered by it on the outbreak of war, had no available funds nor had it any immediately available way of sending money. It managed with some difficulty to collect ninety thousand roubles in notes, which amount it entrusted to one of its employees, and sent him off disguised as a Chinese coolie. This fact taken in conjunction with the application for flour made by Port Arthur at the close of February goes to show that the place is poorly equipped for anything like a siege.

A message to the Asahi from Tientsin says that 30 Russian marines attempted recently to escape from Port Arthur, but that they were captured at the station and immediately shot.

Tuesday, March 8.

Shaughai reports that preparations are being made at Port Arthur to dock the Askold, but that the Tsarevitch has been virtually given up as hopeless. An expert in the employment of the Russian authorities, however, considers that she may be repaired, and it would seem that the same view is held with regard to the Retvisan.

What has become of the other Russian ships? We hear nothing now-a-days except about the Tsarevitch and the Retvisan in the matter of battle-ships, yet there should remain the *Poltava*, the *Petropaulovsk*, the Sevastopol, the Peresviet and the Pobieda, a formidable squadron of 5 first-class armour-

In this context the statement of a Chinese workman who has just reached Cheloo, hav-ing made his escape from Port Arthur, is pertinent and interesting. He alleges that before the war there were about a thousand artificers and a thousand coolies working at the dock, and that after the Japanese attack their wages were raised 50 per cent. Nevertheless they took their departure in such numbers that soon only 400 artizans remained and no coolies at all were available. The Russians were consequently obliged to draft Makaroff, the new Admiral proposed a pro400 marines for duty at the work. Since the gramme for attacking the Japanese Squadron fighting there have been two cruisers dock-The first was put in on the 12th or of that month, when her place was taken by another, which will be ready for sea about the Admiral's plan that it was finally decid-the middle of the present month. With ed to submit the question for the decision of regard to the other ships, 8 or 9 of them the Viceroy in Mukden. A clever Chinaare said to have received temporary repairs

and to be lying in the harbour.

The Jiji Shimpo has a telegram from Shanghai saying that the American and British residents of Port Arthur have been expelled under circumstances of great harshness, but that the Germans and Danes are allowed to remain "because the weather is unpleasant" for travelling.

RUSSIAN MILITARY MOVEMENTS.

Friday, March 4.

The Governor of Chankiakow is said to have reported that Russian troops are pushing southward. That is very vague. It would indicate a plan on Russia's part to menace China's north-western frontier, but the value of such a move or its rationale is not immediately apparent, unless we con-nect it with the Liao question, and with Russia's alleged menace to march against Peking from the Kalgan direction. She is They consisted of 781 cavalry and artillery, no Cadmus, however, to summon soldiers from the barren soil, and it is inconceivable that she can have any force in the neighbourhood of Chankia-kow, unless some enterprising Cossacks have organized bands of Mongolians.

Russian troopers are in Korea south of the Yalu. We need not weary our readers with northward of Kil-ju on the road to Sonchin. details on the subject, as it is plain that most of the published statements are more or less hypothetical. But we may note that 500 Cossacks are said to be at Chhang-song,

There is a rumour in Tokyo that on the the same authority it is stated that the 1st instant the sound of heavy guns was report of Viceroy Alexieff having been heard in the vicinity of Kyong-song, that is wounded at Port Arthur is true. heard in the vicinity of Kyong-song, that is to say, in the sea off the coast just below the mouth of the Tumen. Possibly there cavalry, 200 artillery and 2 battalions of has been a fight in Possiet Bay, where a infantry has reached Chan-kia-kow; in other considerable body of Russian soldiers seem to be stationed. They have apparently been transported thither by sea from Vladivostock, and if that is the case their communications with their base are in a very precarious

There is good authority for saying that a few days ago the Russian troops who were southward of Anju, have crossed the Chhong-chhong and retired north.

Saturday, March 5

A telegram from Tientsin reports that Viceroy Alexieff arrived in Mukden on the 22nd of February and made the railway station his head-quarters. It is stated that about three thousand men are reaching the city daily. Where are they quartered, we wonder, and whence do they come?

From Yuensan a report reaches the Jiji

that the Chinese—presumably the bandits—have captured Tsitsihar. Probably this is a distorted version of the attack said to have been made by 500 Tungses on the Russian

position at Haicheng.

Sunday, March 6.

The same authority says that there are 4,000 Russian troops in Liaoyang; that 300 are guarding the railway, and that there are 2,000 in Mukden. He further alleges that two bandit leaders at the head of 2,000 men, have seen the ship's search-lights. The conjecare lurking in the hills near Sing-min-ching ture is that the troops assembling at Possiet—a town on the west of Mukden—, waiting Bay are carried thither by sea, and that the -a town on the west of Mukden-, waiting for an opportunity to attack the Russians.

From Kiu-lien and Feng-hwang comes news that the Russians are seizing all the vehicles in the district and compelling the inhabitants to do forced labour, so that there is a general cry for the speedy arrival of the

Japanese army.

come rumours of the same nature as those arriving from Kiulien and Feng-hwang. In the case of Pyong-yang the story takes the form that the Russians are making forced purchases with almost worthless rouble say nothing of the risk attending model long line. Ham-heung, which is almost within striking attending to her regular duties.

A march from Possiet Bay to Yuen-san and is considerably south of Son-ching. Now comes intelligence form that the Russians are making forced a most arduous and lengthy undertaking, to that a body of sixty troopers appeared at purchases with almost worthless rouble.

The British and American residents of base between Vladivostock and Possiet Bay, investigations as to the presence of Japan-Pyong-yang send word that they are sufferbut also throughout its whole length along ese subjects, proceeded in the direction ing much discomfort and inconvenience, the sea-coast. It is rumoured that a Russian force of 750 words, threatens to invade China from the north-west viâ Kalgan. If this be true which we greatly doubt-Russia must have been entertaining for some time an extensive scheme of conquest.

Monday, March 7.

The Asahi publishes an apocryphal telegram said to have come from Weihaiwei to Chefoo. Its purport is that a conflict has taken place between Japanese and Russian troops at a point about a hundred miles from Vladivostock, and that the Russians fled, abandoning their arms and provisions. Our contemporary rightly observes that the news requires much confirmation. It has a Chefoo taint.

The news is confirmed that a detachment of Russian troops has reached Kyongsong, having crossed the Tumen. They are said to number only 70 and to be the advance guard of a thousand men of the Seventh Regiment of Siberian sharp-shooters who are now assembled at Possiet Bay. In connexion with this it is to be noted that the statements recently received from one quarter or another as to the Vladivostock squadron having left port towards the close of last month and being still at sea, are now supplemented by the reports of folks who Bay are carried thither by see, It ap-squadron is covering the operation. It apmay recall our readers' notice to the fact that the master of the S.S. Afridi, which carried away the main part of the Vladivostock refugees, reported that the ice-breaker Apanese army.

From the neighbourhood of Pyong-yang port service to Possiet Bay instead of attending to her regular duties.

owing to the fact that the citizens mistake sians has no serious element, and must be In this context it is regarded in the light of a diversion which is not them for Russians. In this context it is regarded in the ingritor adversion which is not alleged that although Japanese war notes at all likely to withdraw the Japanese from are no longer issued in Seoul, they were the prosecution of their main plans, whatever circulating freely in Pyong-yang until the latter may be. The same may be said Korean officials at the latter place began to in a modified degree as to the incursions discredit them by taking a heavy per-centage southward of the Yalu, modified because, as an investigation of although their significance as an invasion of Korea would be petty, they may have the collateral purpose of fortifying the line of the

A telegram to the Asaki from London says that a very distinguished Russian officer suggested, at a recent military council in St. Petersburg, that the wisest plan for Russia would be to abandon Port Arthur and concentrate her forces at some point more easily defended and less remote from her base. It may well be supposed that such a proposition was vigorously resisted and finally rejected. What arguments its op-From Mukden the Asahi Shimbun's Tientsin correspondent reports the arrival of news that Viceroy Alexieff has been resorting to all kinds of cajolery and many rejected. What arguments its opponents employed we are not told, but it may be assumed that they regarded Port Arthur as a fortress where the Japanese could be held until Russia assembles.

> remain at Mukden until General Kuropatkin reaches that place, and that General Line-vitch will continue in command of the Russian troops in Manchuria pending the same event. Quite a considerable lime has elapsed since Kuropatkin was appointed to the command-in-chief, and recent intelligence spoke of his arrival at Harbin. But the telegram we are now quoting suggests that he had not reached Harbin up to the 27th of February.

> > Tuesday, March 8.

The Asahi publishes a Paris telegram saying that the advance guard of the Fourth Army Corps, which Russia is sending eastward, have arrival at Hailar and will proceed to Tsitsihar, there to await the coming of the main body. The state of the line at Lake Baikal is said to constitute m serious impediment to transport.

The Koreans state that the Russians are sending troops by sea from Vladivostock to Ham-heung, using four transports for the purpose. Ham-heung is one of the principal towns in northeastern Korea. It is 47 miles north of Yuensan, being thus far to the southward of Sonchin. The towns between it and Yuen-san are all along the high road. It would be an almost reckless move for the Russians to adopt such a programme, as the column would soon find itself in danger. Curiously enough, however, news comes that the telegraph wires have been cut between Yuensan and Fusan, which would suggest that some move is being made in that vicinity.

It is rumoured that the Russians have in their pay at Talien and Port Arthur 700 bandits, and that they have increased the stipends of these men in order to prevent their joining the Japanese."

Wednesday, March 9.

It is extremely perplexing to know what
the Russians are actually doing on the
north-east coast of Korea. There was news on the 8th instant that they had landed at notes, to the great discomfiture of the people. of communications vulnerable not only at its visited the telegraph station and made certain

telligence that a southward move has again been made. Three thousand troopers are said to have made their appearance in Wiju, and after patrolling the district and effecting measures of defence in various directions, one half of their number moved south to Son-chon, which is near the coast at a distance of 49 miles from Wiju. Yet another account speaks of a general withdrawal of the Russian scouts towards the Yalu. Evidently the sources of this intelligence are untrustworthy. Of course the Japanese military authorities know precisely what the Russians are doing, but the public is excluded from military confidence and the only view we can take is that Russian troops are moving litter and thither probably as far south of the Yalu as Anju. Even further south than Anju, namely, at Suk-chhon, various outrages by Russian soldiers are reported to have taken place, and we even hear of collisions between them and the Korean soldiers sent to protect the inhabitants. But truly it would be rash to allege that the collisions are not between the Korean braves and their unhappy protegės, who with the Cossacks on the one hand and their magnificent protectors on the other are in a pitiable plight.

Newchwang states that the Russians have placed four mines along the coast south-east of that place in anticipation of a Japanese landing. It is also reported that the railway guards at Haiching detected some bandits in the act of attempting to blow up the line

The N. C. Daily News has received these notes from a reliable source in Moukden, capital of Fengtien province (Lower

den, capital of Fengtien province (Lower Manchuria):—

Manchuria):—

It is stated from various parts of the province that a great many Russian conscripts have deserted from that there are over 40 Cossacks in Kasam, which is some 16 miles north of Anju on the road from Pyong-yang to Wiju.

Japanese scouts are said to have found that there are over 40 Cossacks in Kasam, which is some 16 miles north of Anju on the road from Pyong-yang to Wiju.

Japanese scouts are said to have found that there are over 40 Cossacks in Kasam, which is some 16 miles north of Anju on the road from Pyong-yang to Wiju.

Japanese scouts are said to have found that every one knows that there are over 40 Cossacks in Kasam, which is some 16 miles north of Anju on the road from Pyong-yang to Wiju.

Japanese scouts are said to have found that one will certainly be that there are over 40 Cossacks in Kasam, which is some 16 miles north of Anju on the road from Pyong-yang to Wiju.

Japanese scouts are said to have found that one will place and the said to the provision of miles north of Anju on the road from Pyong-yang to Wiju.

Japanese scouts are said to have found that one will place and the store of miles north of Anju on the road from Pyong-yang to Wiju.

Japanese scouts are said to have found that one will place and the store and the said to the said of the provision of the said o

distance up the Tumen. Of course it is not impossible that there may be a steady advance along the coast-road from Possiet Bay simultaneously with a landing at a point further south, but except as a diversion the whole movement is inexplicable, and the perils attending it are obvious to the meanest intelligence. The Russians have no force at Vladivostock from which they could afford to detach an invading army.

From the direction of the Yalu comes intelligence that a southward move has again the suppose of the place where the Hunghutze were drawn up, the latter had to retire taking the fourth Japanese and the suppose of the probability of a Japanese landing at the probability of a Japanese landing at the probability of a Japanese landing at Newchwang.

Saturday, March 5.

Tientsin telegraphs to the Asahi under date of the 3rd that Russian troops to the regiment of infantry and some 300 cavalry encamped near the railway bridge. Scouts sent on to find out the truth soon returned with the sad news and a body of Russian cavalry being reported coming towards the place where the Hunghutze were drawn up, the latter had to retire taking the fourth Japanese and shutting up their houses; and the probability of a Japanese landing at the probability of a Japanese landing at Newchwang.

Saturday, March 5.

Tientsin telegraphs to the Asahi under date of the 3rd that Russian troops to the regiment of infantry and some 300 cavalry encamped the truth soon returned with the sad news and a body of Russian cavalry being reported coming towards the probability of a Japanese landing at the officer with them.

Thursday, March 10.

The Nichi Nichi's Peking correspondent telegraphs that there are about 8,000 Russian troops in and about Kirin, and that they are constructing a temporary railway from Kirin to Chang-chun, that is to say, a line to connect Kirin with the Harbin-Liaotung rail-They are also constructing forts and otherwise strengthening the position between Kirin and Ningtau The railways from Harbin to Vladivostock and from Harbin to Liaotung run nearly at right angles from Harbin, and the three towns above mentioned, namely, Chang-chun, Kirin and Ningtau lie on a line forming the base of right-angled triangle having Harbin for its apex. The town of Fan-hwa-ching is also spoken of as included in this scheme of fortification. It is stated that the Russians are forcing the inhabitants to labour, that they have deprived all the Chinese soldiers of their arms, that they are seizing provisions without payment and that they are treating the Chinese officials with rude peremptoriness. The Chinese General at Kirin is so enraged by these proceedings and so powerless to prevent them that he has had recourse to the only kind of protest and refuge under the circumstances—he has taken

to his bed.

The Russians appear to be still very busy

The Russians appear to be still very busy

Chefoo reports that anomalism the place, at Newchwang. Chefoo reports that another body of 2,000 have reached the place, and that by way of preventing a Japanese landing they have expended ten thousand dollars on the purchase of Chinese junks which are to be sunk at the mouth of the Liao.

Japanese scouts are said to have found that there are over 40 Cossacks in Kasan, which is some 16 miles north of Anju on the road from Pyong-yang to Wiju.

and that something like a panic prevails.

Dr. Morrison, who lately made a tour of inspection to Newchwang, reports that between Kinchow and Sing-min-ching there are no Russian troops, only an occasional scout making his appearance, and that in Newchwang there are only 500 infantry of the 15th Regiment together with about 20 gunners. This estimate was probably made before the arrival of the three thousand men mentioned above.

The Russians are now said to be desirous of restoring Newchwang to the status it enjoyed before they assumed military control of the place in 1900. Their reasons are that were Newchwang once more a perfectly open settlement and therefore neutral ground, it could be largely though surreptitiously used

as a basis of supply, and the danger of a Japanese landing there being also averted, the strain on Russia's slender military forces would be proportionately relaxed. Various measures pointing to that result are said to have been taken recently, but they have not met with any success. Nor is it likely that they will. People are not quite so foolish as to lend themselves blindfold to Russian ruses. Ever since 1900 Russia has been in military occupation of Newchwang, thus depriving the place effectually of its character as a foreign settlement where all the Powers have equal privileges, and throughout that period she has appropriated to her own uses the revenues of the Customs, to which she never had any valid title. Having thus blown hot to suit her own convenience in time of peace, she would now blow cold to suit the same convenience in time of war. But she has given such abundant proofs of her methods that every one knows what to anticipate: every one knows that should she emerge victorious Newchwang

BOMBARDMENT OF VLADIVOSTOCK.

Saturday, March 5.
There are rumours that the Vladivostock squadron has been seen in the neighbourhood of Yuensan, and there are also rumours that a Japanese landing has been effected at a place indicated by several asterisks. These stories come from very apocryphal sources. They seem to have their origin in the reported sound of cannon near the north-east coast of Korea a few days ago. subject Fusan wires to the Jiji that the Vladivostock ships have all been repainted black; that many of their men deserted after the recent return of the vessels from cruising in the Sea of Japan, and that the places of the deserters have been filled with Koreans who have accepted Russian nationality.

There are rumours that two Russian warships were seen in Ussuri Bay on the 19th meanwhile being that Vladivostock's story and the 23rd, but the story is vague

On the 13th of February the military Governor of Vladivostock issued a proclamation, the intention of which was to quiet the minds of the Chinese and Korean elements of the population and to prevent an exodus of workmen or artizans, who were promised high wages, and to ensure that in case of need all horses and forage demanded by the authorities should be given up at once

Sunday, March 6. There are renewed rumours that the four Vladivostock cruisers left that port on the 27th ultimo, with the idea of preventing a rumoured landing of Japanese troops or war stores at Yuensan or Sonchin. These are the ships that have been sighted in the offing during the past few days by inhabitants on the north-eastern coast of Korea.

Tuesday, March 8.
At this moment of writing—8 a.m., 8th instant—we are without any intelligence from Japanese sources as to the bombardment of Vladivostock, reported from St. Petersburg to have taken place on the afternoon of the 6th instant. It is expected that news will be received officially in the course of the day. The nearest point for effecting a communication by wire--supposing Yuensan unavailable-would be Hakodate, which san unavailable—would be riacoute, when as to require in the received. For the sound not general explanation is that whereas places have been reached from the squadron attacked from the sea are usually in direct until the evening or night of the 8th. telegraphic communication with their base so Vladivostock is a difficult place to attack that the enemy is in a position to transmit. from the sea-side, and the Amur Bay, on news quickly, the attacking squadron has to which the town lies, is a long narrow inlet send to its own base, probably far distant, or into the shore and taking a sharp turn to get in telegraphic touch with the capital. at a point about two-thirds distant from its Meanwhile it is observable that the Russians entrance. The Japanese ships, however, speak of lyddite shells and at the same time must be supposed to possess accurate plans allege that whereas 200 were fired no of the fortifications and if they were able to bombard at a range of 5 miles, it is scarcely use lyddite as an explosive, but if the Ruscredible that they did no damage. Very sians had reason to conclude that the shells different were the results of their fire against were loaded with that compound, it must Port Arthur at an even greater range. The silence of the Russian batteries also is not explosions, a fact difficult to reconcile with easily explained. The batteries must be the allegation that no damage was done. As heavily armed, and from their superior to the silence of the forts the reason assigned elevation their fire should be more formid-is that they waited for the Japanese ships to able than that from ships. When the posi-tions of guns are unknown and when it is desired to keep them unknown, the proper inconsistent with the conduct of the gunners game of an enemy is to refrain from reply- at Port Arthur, who "let off" all the ing to an unmasking cannonade, unless ordnance they could lay hands on, its effects are too destructive to be tamely whatever its calibre or ballistic capaendured. But that the guns of a par-cities. The probability is that the gunners could understand the conception of such manent fortification where there is nothing in the forts took refuge outside the zone of a manœuvre by Chinese strategists, but to conceal and whence a few well plant-danger or that the forts themselves were when a heavily armed Russian fortress reed shells might inflict serious damage quickly silenced. The forbearance claimed frains from returning the fire of a few Jap-

200 heavy projectiles are directed against the of the guns mounted at Vladivostock. batteries, is an unprecedented kind of strategy, nor do we think that as a warlike feat it is likely to secure much applause.

The statement that the greater part of the Japanese shells failed to explode remains to be verified. We have been hearing much of late about the Shimose explosive-not lyddite as the telegram erroneously statesfor which a rank is claimed second to blasting gelatin only in disruptive violence, and as blasting gelatin has never been brought under sufficient control to serve for artillery uses, the Shimose compound would thus stand at the head of the list. In every bombardment or battle there are many shells that fail to explode, but the record alleged by the Russians in this case is worse than the average and we await the Japanese report with interest, our conviction is considerably exaggerated.

According to a telegram received at the Foreign Office, Viceroy Alexieff reports that on the morning of the 6th, at 8.45, a Japan-ese squadron of 7 vessels was sighted from Vladivostock. It was then steering towards Askold Bay, which is on the east of Amur Bay, where Vladivostock is situated. After a time the ships changed direction towards Ussuri Bay, which is between Amur Bay and This was at about noon, forts and ships having made no reply Askold Bay. Askold Bay. This was at about 1000, and at 1.30 p.m. the vessels opened fire at a distance beyond the range of the shore guns. Among the Japanese ships the Japanese forts at Vladivostock must have 10-inch guns. and the Yakumo were recognised, but none

any part in the bombardment, it seems have 12 8-inch guns in their batteries. strange that the guns in the forts could not Why did Vladivostock submit quietly to

reach them.

The Naval authorities explain that the delay in giving out intelligence is never due to any unwillingness to instruct the public, still less to any tardiness in allaying the patriotic anxiety of the nation. It may happen, of course, that some points in a report have to be suppressed, especially when an attack is still progressing, and it may happen that other points are so obscure as to require further reference. But the -only 21/2 miles wide-running far up at any rate to some remote point, in order

silence throughout a bombardment when not be reconciled with the known potentiality

Wednesday, March 9.

According to the same journal a Japanese squadron of 7 vessels left a certain base on the 3rd instant to search for the Vladivostock squadron, which was supposed to be at sea. On the morning of the 6th one Russian ship was sighted about 50 leagues from Vladivostock. She steamed away at full speed toward that place and succeeded in effecting her escape but not without serious injury. It was in the sequel of the pursuit that the Japanese squadron bombarded Vladivostock. These incidents also have not been officially reported to Tokyo.

On Wednesday afternoon it was rumoured that the Japanese squadron sent to Vladivo-stock attacked the Russian squadron on the afternoon of the 6th and that news might be expected to reach Tokyo officially on the

evening of the 9th.

Thursday, March 10.

Russian official sources at Shanghai tell us that the ships which attacked Vladivostock opened fire at a distance of 6 versts; that nearly all the shells failed to explode; that one killed a woman and wounded 5 recruits; that the cannonade lasted 40 minutes; that the squadron put in an appearance the following morning and then withdrew, the Russian

and the Yakumo were recognised, but none at least, and at 4 miles the fre of a 10-inch of the other vessels could be distinguished.

The heaviest guns carried by the Isumo too, are thoroughly effective at that range, and the Yakumo are 8-inch. If they took and the Gromoboi, the Rossia and the Rurik be bombarded at such a range, and above all why does it boast of such a feat?

It appears that this bombardment of Vladivostock was an affair of altogether secondary importance, incidental to a cruise of a Japanese Squadron in the Sea of Japan, whither Vice-Admiral Kamimura went partly in search of the Russian cruisers and partly to disturb the continuity of Russian proceedings at Possiet Bay and on the Korean coast. There is a statement, apparently coming from a trustworthy source, that subsequently to the bombardment the Admiral called at a certain place whence telegrams could have been despatched, but he evidently did not think it worth while to report his doings, or perhaps he desired to conceal his whereabouts. London telegraphs that at the time of the bombardment the Russian squadron was not in Vladivostock. If that be true there may be an encounter in the Sea of Japan.

A message from London gives a Russian explanation of the silence of the forts at Vladivostock. It is an explanation to which we have already alluded, namely, that the forts did not wish to unmask their position. But it is a frivolous explanation, for the Japanese doubtless know exactly where the forts are situated, and besides such a consideration would not weigh for one instant against the advantage of dis-abling or sinking some of the Japanese ships. What are the forts for, anyhow? ships. What are the forts for, anyhow? Are they built for the purpose of hiding themselves? It is a quaint illustration of the spirit that animates the Russians. on the attacking squadron, should keep by the Russians is not usual in war, and can anese ships lest its position should be dis-

ed the squadron that recently operated in the Sea of Japan, has sent to Tokyo a telegram received at 2.30 a.m. on the 10th instant. It says:—" Passing through the ice on the morning of the 6th instant, as previously planned, the squadron reached the eastern entrance to Vladivostock. None of the enemy's vessels was seen outside the harbour. Steering so as to keep out of the line of fire of the forts on Cape Basarghin and in the Bosporus strait, we held a north-easterly course and approached to the base of the land forts. From 1.50 p.m. for a space of about 50 minutes, we maintained an indirect cannonade and after firing a few shots into the mouth of the harbour, we withdrew. I believe that our bombardment produced a fairly proportionate effect. Soldiers were seen in the land-forts, but they did not return our fire. At 5 p.m. smoke was seen eastward from the mouth of the bay, and there seemed to be a probability of the approach of one of the enemy's ships, but the smoke gradually grew faint in the distance. On the morning of the 7th we examined America Bay and Strelow (?) Bay but found nothing. At noon we again approached the eastern entrance of Vladivostock but there were no signs of the enemy's ships, nor did the forts fire on us. We then proceeded to Possiet Bay, but there also we saw nothing of the enemy.

It seems impossible to discover from the above account exactly where the Admiral placed his ships for the purposes of the indirect bombardment. Cape Basarghin, of which he speaks, stretches partly across the eastern entrance to the Bosporus Strait, but to cannonade Vladivostock from the eastern side of this Cape over the intervening group of hills seems out of the question. Besides the Admiral says that he approached the base of the forts, and soldiers were seen in them, and that they did not return his fire. certainly would not have returned it had his ships been steaming under the shelter of Cape Basarghin, for that position is completely masked from the shore-batteries. We can only conjecture that from a point along the coast northward of Basarghin Cape a position exists from which the town and its protecting forts are assailable at long range and by indirect fire. Even that conjecture, too, is inconsistent with the statement that shells were dropped into the harbour's mouth. At all events it is plain that no risks were taken, and that the bombardment was under circumstances which necessitated small results.

CHINA.

Friday, March 4.
The latest news from Peking is that the Chinese Government is resolved to send its forces beyond the Great Wall: in other words, that it will assert its title to the West Liao region. In pursuance of this resolve, Viceroy Yuan has posted 15 battalions (7,500 men) of infantry at Yung-ping, 8 battalions of cavalry at Sien-an, and 5 batteries of artillery at Wu-ming. But inasmuch as all these places are within the Great Wall we do not detect any practical evidence of Peking's resolve. The conflict-

stood to one another in the proverbial re-lationship of "lips and teeth" and that when confronted by an enemy they should render mutual assistance. Instead of adopting that juncture. The inhabitants of Manchuria, however, would judge more wisely and would endeavour to aid the Russians by providing forage for horses and other neces-saries. There need be no apprehension that the people would suffer anything at the hands of Russian soldiers: these, on the contrary, would protect them and should be welcomed as protectors. Therefore the inhabitants should assist in guarding the Russian lines of telegraph and the Russian railways. If these suffered any injury, the inhabitants of the district would be held responsible. The Russian troops would exterminate the bandits and secure tranquillity for law-abiding folk. It was therefore the latter's plain duty to give information as to the lurking places of the bandits. For the rest, any one attempting to harbour these outlaws would be severely punished. Finally, should any of the inhabitants venture to show hostility to the Russian soldiers, the Viceroy swore that such persons should be swept from the face of the earth.

It is stated that the Chinese Prince Pu-lung, son of Prince Tsai-chi, will visit Japan en route for the United States, and that he will spend 10 days in this country. These names will not convey much to our readers, so we may add the information that the young Prince is a grand-son of Prince Yin-chi, and therefore a great-grand-son of the Emperor Tao-kuang. His Highness is to proceed to the St. Louis Exhibition. He was expected to leave Peking on the 3rd or 4th and to travel thence to Shanghai, there embarking on the Amping and reaching Nagasaki about the 17th instant. In Tokyo he will lodge at the Shiba Detached Palace, and be the guest of the Japanese Court. He is accompanied by a suite of 6 persons.

Deception, cajolery and menace—they are freely employed by the Viceroy. He must have a supreme contempt for the intelligence of the people of Manchuria. Unhappy people. They are between the devil and the deep blue sea.

Saturday, March 5.

It is stated that there are 8 American ships-of-war in the river at Shanghai and that they are attracting the attention of all nationalities.

The Chinese Government, replying to M. Lessar's remonstrances with regard to the advance of General Ma's standards beyond the Great Wall, is said to have stated that the object of the movement is to prevent excesses on the part of the bandits and to preserve neutrality. The frequent apparition of Russian soldiers in the region immediately westward of the Liao River lended to disturb men's minds and prevent the tranquillization of the region, and Russia is requested to remove all her force to the other side of the River. Such is said to have been the Wai-wu-pu's answer. Will China

covered, somehow one is not prompted to marvel at the fine battle-craft of the performance.

Later.

Vice-Admiral Kamimura, who commands—set foot on Russian or on Chinese territory. He went on to say that Russia and China intend to enforce neutrality in the West Liao region or does she not. To evade that plain issue by pretexting that troops originally intended for the purpose of enforcing neutrality there have gone only as far as a place natural view, the Chinese Government had in Mongolia, is really contemptible. We signified its desire to stand neutral at this judge from this that China intends to shuffle out of the difficulty, and the suspicion is confirmed by news that whereas Viceroy Yuan had received authority to advance his lines to Kinchow, he has now been in-structed to "await a seasonable opportunity" inasmuch as such action at this immediate juncture might provoke a collision.

Tientsin telegraphs that the British Consul has ordered Mr. Cowen, editor of the *China Times*, to withdraw from that place inasmuch as his journal is calculated to disturb the public peace. It appears, according to this intelligence, that the Times is vehemently pro-Japanese and anti-Russian, and there is said to be much sympathy with the editor. The story as it stands is scarcely credible. Probably the Consul's action has been prompted by some reason quite apart from the general tone of the news-

Shanghai telegraphs that there are 3,000 Russian refugees in the Settlement and that many of them are suffering considerable privations, being without proper shelter or food and without means to obtain them.

The Chinese Government are said to be adopting England's cause in the Thibet

Monday, March 7.
The question of the West-Liao district

seems to be dragging on its weary length in Peking. The latest story is that the Russians have asked to be allowed to consider as belligerent territory a line 40 or 50 kilometers from the right bank of the river, their pretext being that such a space is necessary to the due protection of the rail-way on the left bank. What the Chinese have replied we do not learn, but probably they will accept the compromise.

The Asahi's Peking correspondent sends a quaint little story. He says that when the first detachment of Viceroy Yuan's troops from Paoting left the train at Lanchow en route for Yung-ping, Colonel Kornikoff(?) of the Russian army and other foreign officers were on the platform to inspect them. bearing, equipment and discipline of the men proving much better than these onlookers had anticipated, the Russian Colonel waited on Viceroy Yuan and having complimented him on the quality of the troops, urged that a couple of thousand of such men would be amply sufficient to send out for the purpose of asserting China's neutrality in the district near the Great Wall. Yuan replied by recalling the Colonel's statement, made some time previously; that Russia would pour half a million of men into Manchuria. Japan, said the Viceroy, may be expected to send three hundred thousand, and as that will bring the total belligerent forces in Manchuria to eight hundred thousand, it scarcely seems too much that China should be represented on the scene by ten thousand, or one eightieth of the total.

ing accounts of China's purpose are probably adhere to it or will Russia accept it?

On the 16th of February Viceroy Alexieff is said to have issued a proclamation to the inhabitants of Manchuria. His Excellency says that M. Lessar's protest about the cently attempted to escape by train to

had subsequently to make their way on foot beginning to work languidly. to another station where they were allowed to entrain.

It now appears, or is reported, that the four United States war-vessels at Shanghai are awaiting orders to convey Mr. Morgan to Dalny. A few days ago the story was that they were just about to start on that mission.

The Russian refugees at Shanghai are said to find no sympathy or succour, though

Peking Government to instruct Governor-General Tseng that vigorous measures must be adopted to prevent such mishaps, otherwise China's alleged neutrality will be illusory and she will have to bear the consequences of her neglect of duty. It need scarcely be said that the fiji's correspondent comments with amusement upon this extraordinary procedure. Prior to the present crisis Russia not only encouraged the bandits for her own purposes, but even induced respectable citizens to join their ranks. To-day she strenuously denies China's right to send any troops beyond the Great Wall. Yet, at the same time, she requires China to quell disturbances with which a strong force of troops. to them. For our own part, we can not neutrality and deliberately gathering all the credit them. Great as is the ridicule Russia illegal advantages resulting from such dishas brought upon herself since this compli-regard. It does not appear to strike the cation entered the stage of arms, we find it Russians that in attempting to place the impossible to believe that a clever man like West Liao region beyond the neutral pale Lessar would make himself the mouthpiece of such silliness. To this Prince Ching to the prement to the saminated for one moment by the Chinese Government. To this Prince Ching to the prement to the such and attitude on Chinese Government. To this Prince Ching to the prement to the admitted for one moment by the Chinese Government. To this Prince Ching to the prement to the admitted for one moment by the Chinese Government. To this Prince Ching to the admitted for one moment by the Chinese Government. To this Prince Ching the prement to the samination and the latter under General Massians in the field nine years ago, the neutrality and that it will be better to allow things to take their course. Mean-while the field she is shrinkingly permitted to convert treaty ports into fighting according to he field use asserted by a purely arbitrary and forceful process. Now that Russia is in the field was asserted by a purely arbitrary and forceful process. Now that Russia is in the field she is shrinkingly exposed same time, she requires China to quell dis-lous and school-girl-like complaints of turbances with which a strong force of troops alone could cope. The correspondent alleges tions and the neutrality of Korea. But that the Chinese Government is quite the Liao problem may touch her closely, astounded by the unreasonableness of such for Russia seems bent upon magnifying demands and does not know how to reply it into an excuse for disregarding China's region during the period ended on Oct. 8th, 1902, was a mere farce. The fact is that in all cases they pursue their present purposes without any regard to past events and with corresponding indifference to good faith. This plan of drawing a sponge boldly over the record and starting altogether afresh requires considerable recklessness, and as-

sumes on the part of the public a singular complaisance of memory.

In the context of the above it has to be noted that the Russian troops are said to accounts of their violence to peaceful inhabitants must be taken with reserve as coming from hostile sources of intelligence, but even plied, there remains enough to show that they are cruel first and tactful afterwards. Kinchow is an important city at the north-western corner of the Gulf of Pechili. The Newchwang railway runs westward along the shore of the Gulf as far as Kinchow and

Tientsin, were stopped at the station, and ever, the machines of the canard factory are the whole of the West-Liao region along the Gulf of Pechili and that China's pretence of preserving neutrality there has been treated with contempt. Newchwang now. Thursday, March 10.

The West-Liao question continues, it is distinctly in the belligerent zone, and would seem, to be vigorously discussed and is liable to be attacked by the Japanese threatens to assume large dimensions. Heet at any moment. History will write it Yuan is said to have made a very strong representation in the sense that the story of nations that the great Powers of Russia's refusal to recognise as neutral the sense while Russia treats their subjects and

THE " MANDJUR."

Friday, March 4.

The Mandjur question remains open. Russia is snapping her fingers in China's face. She ought to be tired of the futile amusement by this time. And for what a paltry object do her misguided officials cover her with the reproach of deliberately defying the law of nations! A little gun-boat is the whole corpus vile. Russia values her reputation very slightly.

Saturday, March 5. The Mandjur question seems to have been at last settled. Her armament was to be transferred to the Customs Warehouse on the 5th instant. M. Lessar may be a clever diplomatist. He has the reputation of being. But we must frankly say that he has made a poor figure in this business. He must have known that the disarming of the Mandjur was quite inevitable, and that to defer the operation by paltry pretexts and frivolous objections was at once undignified and unmanly.

Monday, March 7.
Probably the Mandjur is by this time disarmed. It would seem that Japan did not think it worth while to make any international protest about such a paltry matter. The laugh is now wholly at Russia's expense.

Tuesday, March 8. The Mandjur's disarmament continues to be a matter of discussion. It will soon, and indeed it is already, one of the big-gest jokes conceivable. The action of the Russian officials with regard to this petty little craft establishes a record of pragmatical fussiness.

Thursday, March 10.
That stupendous problem the *Mandjur* appears to be still a subject of discussion. Some accounts say that her disarmament has already commenced; others allege that it has been delayed because the Shanghai Municipality declines to have dumped down in the model settlement a party of Russian marines who are most unlikely to prove themselves eligible neighbours during a long period of enforced residence. Probably the

KOREA.

Friday, March 4.
The Russians continue their futile activity in the neighbourhood of the Tumen. Those that were reported on the 2nd instant as having penetrated into Korea as far as Ungkwi Bay, are now said to have withdrawn, and others have made an excursion up the Tumen as far as Onjo. Somebody probably feels the effect of these movements, but their object can not be very serious.

There are new estimates of the number of Russians gathered on the northern frontier Korean Government in very strong terms of Korea. Yesterday rumour said that about the bomb outrage, insisting that vigo-Kiulien was not garrisoned; to-day two rous measures must be adopted by the police. thousand men are assigned to it. One can vicinity of the Yalu,

The pro-Russian anti-Japanese party in Seoul have had recourse to dynamite. Two bombs were thrown into the houses of the Minister of Foreign Affairs, Li Chi-yong, the case of the Minister's house, and be-sides the Minister was absent. At the Secretary's residence no one was hurt: some furniture alone suffered. These acts are supposed to have been perpetrated by mem-bers of the Peddlers' Guild which was lately disbanded by order of the Authorities, but the instigators are believed to have been Kil Yong-chu and his fellow-thinkers. Five of the Guild were arrested by the Japanese police, but there being no conclusive evidence against them they were released.

Later telegrams say that the plot of Li Yong-in, Vice-President of the Privy Council, has signally failed, and that public opinion is now unequivocally inclined towards Japan. The Kokunin Skimbun affirms Japan. And Administrate Similar anims that it would be a mistake to interpret these doings as having any political significance. They are merely the results of struggles for office. The Koreans probably believe that the Japanese contemplate radical changes such as were essayed after the war of 1894-5, and are therefore solici-tous about the distribution of offices under the new regimen.

Tokyo journals allege that Viscount Aoki is likely to proceed to Seoul as adviser to the Korean Government under the terms of the new Protocol, and that he will discharge functions similar to those undertaken by Count Inouye in 1895. If that the Ru Viscount Aoki undertake this task, it will out on top. be very fortunate for Korea and for Japan

It is alleged that the United States Representative in Seoul has applied to the Korean Government for permission to send sixty American marines to guard the pro-perty of United States citizens at Unsan. This news appears in the Asahi, but we

hesitate to attach any credit to it.

The Nippon has a telegram from Seoul saying that the Korean Government have placed at the disposal of Japan until the close of the war the line of telegraph between Pyong-yang and Seoul.

The same paper says that work will soon be commenced on the Seoul-Wiju Railway, but the assertion is surely premature.

Mr. Hayashi is said to be pressing for the final steps with regard to the opening of Wiju, and the English Representative is pointing out that unless Yong Am-pho be included in the limits of Wiju, it can not be said that trade has been made free on the Yalu line.

On the 4th instant Mr. Hayashi proceeded from thence any British subjects that may to the Palace to tender thanks to the Emperor of Korea, the Crown Prince and Prince Yong for contributing 180,000 yen to the Soldiers Relief Fund.

Saturday, March 5. It is stated that the Russians are keenly on the alert along the north-east frontier of Korea, and that they are watching the coasts of Possiet Bay and Ungkwi-wan in consider-

Mr. Hayashi is said to have addressed the

The German Minister in Seoul, of whom not tell what to believe. The most extreme little has been heard of late, is reported to estimate, however, does not give Russia be now seeking an audience of the Emperor, more than a few thousand men in the and to be pressing for assent to his low. and to be pressing for assent to his longago-preferred request for a gold-mining concession.

It is denied that the United States Minister in Seoul has made any proposal in the sense of despatching American troops to and his Secretary at 1.30 a.m. on the 2nd Unsan, where the mining property of his Tadong having broken up a few days ago.

The bomb failed to explode in nationals is threatened, or has been seized,

There is a report that the telegrap

Sunday, March 6.

The Emperor of Japan has conveyed through Mr. Hayashi a warm acknow-ledgment of the generosity of the Korean Court in contributing a sum of 180,000 yen to the Soldiers Relief Fund. When the Japanese Representative proceeded to the Palace to deliver this message, the Emperor of Korea is said to have taken the opportunity of expressing his satisfaction with the new Korean-Japanese Protocol.

The Korean Representative in St. Peters-burg having been ordered to withdraw, inasmuch as Korea is now Japan's ally and therefore Russia's enemy, has retired to

the anti-Japanese agitation. Mr. Hayashi has been obliged to make a representation to the Korean Government. The present idea is that these bomb-throwers were seeking merely to create an impression that the recently concluded Protocol was not liked by the Korean public and that Japan forced it upon Korea against the latter's will. This by way of precaution against the contingency that the Russian dog may ultimately come

The 24 wounded Russians who have been undergoing medical treatment at Chemulpo, were sent away in the hospital ship Hakuai Maru on the 5th instant. They are to be transferred to the hospital at Matsuyama in Iyo. It appears that five of these men were despaired of by the ship's doctors, but their lives have been saved by skilful operations.

A British man-of-war put into Yuen-san on the 5th en route for Sonchin, where she

goes to carry away the missionaries.

The Jiji Shimpo has a telegram from Seoul saying that the leaders of the anti-Japanese party, Li Hakkenn and Kil Yongchu, are endeavouring to incite the Korean soldiers in Pyong-yang to lend their aid for a coup d'etat against Li Chi-yong, the present Minister of Foreign Affairs.

The ice on the Tadong broke up on the 4th instant, and the river became navigable, so that Chin-nam-po is now accessible to

The Talbot is said to have left Chemulpo for Sonchin with the object of carrying away

desire to withdraw.

Rumours continue to arrive that Kil Yong-chu and Li Hak-keun are inciting the Korean soldiers in Pyong-yang and the Peddlers' Guild to make some violent demonstration against the party responsible for the Protocol recently concluded. On the other hand, news comes that in reply to Mr. Hayashi's application for stronger measures to protect life and property, the Korean Government has stated that the arrest of Kil Yong-chu and his accomplices has been ordered, and that they will be dealt with

Tuesday, March 8.

It is stated that work will be commenced on the Pyong-yang section of the Seoul-Wiju railway by the 10th of this month, and that the work will probably be finished before the close of the year. Presum this first section is to be a military line. Presumably

Steamers are now busily plying between Chemulpo and Chinampo, the ice on the

There is a report that the telegraph petween Fusan and Yuensan has been cut.

It is alleged that the Prince Imperial of Korea desires to pay a visit to Japan. He has asked the Emperor for permission and is likely to receive it. This is from the Nippon.

Wednesday, March 9.
It appears that the Korean Government is showing marked reluctance to publish in the Official Gazette the text of the new Pro-tocol, and that Mr. Hayashi is urging the necessity of a step without which the officials of Korea can not learn authoritatively the terms of the new convention. This we take from the Nippon with all reserves of credence.

The Emperor of Korea has addressed to all local officials throughout his dominions a taking sufficiently vigorous measures to protect the officials who were recently attacked with bombs, or to arrest the last state of the sufficient st and never find their way to the owners of the goods. Such a practice is denounced by His Majesty, who announces that any one convicted of it shall be severely punished.

It is stated that two Koreans, Messrs, Min and Li-names which signify very little -have been arrested at Chemulpo when en toute for Shanghai, there to confer with M. Pavlow. We begin to understand why M. Paylow has remained at Shanghai. It would have been better for the peace of the East had he continued his journey westward.

Undoubtedly the Korean Government has a peck of troubles on hand at present. A list is given by the Nichi Nichi. the opening of Yong Am-pho; the con-cession for the Seoul-Wiju railway; the promulgation of the Protocol; the circulation of Japanese war-notes; the bomb outrage; the compensation to Mr. Asada for the destruction of his store at Chemulpo; the solatium for the family of Mr. Kubo Goichi who was murdered at Kaisong; the question of com-pensation to the Seoul Electric Railway Company, and the applications for mining concessions by the French, Belgian and Italian Ministers. Our contemporary says that these matters are all under considera-tion, and that the questions concerning Japanese subjects or Japanese interests are likely to be decided favourably. That is probable.

It is again stated that work has been actually commenced on the Seoul-Wiju linemilitary work, of course

The expectation is that Marquis Ito will

set out before the middle of the month. He will be accompanied by Mr. Tsuzuki about Keiroku, Chief Secretary of the Privy Council; Major-General Usagawa, Reat-Admiral Sakamoto, Viscount Higashizono, Imperial Chamberlain; Mr. Kokubo, Second Secretary of Legation; Mr. Sakata Jujiro, Councillor of the Foreign Office, and Mr. Furiya, Private Secretary of the Imperial Court Investigation Bureau. Tokyo newspapers state that this mission resembles that entrusted to Marquis Saionji at the time of the China-Japan war, and that the Marquis will not remain more than a week or ten days in Seoul. The Nichi Nichi does not think that the mission has any special administrative significance, but that it is merely an expression, as emphatic as vessels 34; out of which the ships no longer possible, of the relations that the Emaphatic as able to take their place in the fighting line peror of Japan desires to establish between his country and Korea. The first besides 4 with a displacement of 26,676 tons sween his country and Korea. The first subject in this country is despatched to show which have been injured but are still capable the importance of the embassy. The Chuo, whose editor is very close to Marquis Ito, is persuaded that His Excellency's presence in Seoul will be taken as an opportunity for ships with a displacement of 36,300 tons.

President of the Privy Council.

It appears, according to the Jiji's intelligence from Korea, that the three members as follows:—
of the Peddlers' Guild arrested in connexion SUNK OR INJUR with the bomb-throwing outrage, have con-fessed that they were virtually compelled to make the attempt by Kil Yong-chu and the pro-Russian party. Of course in speaking of pro-Russians in this context we do not mean to suggest for a moment that any Russian inspiration was at work. The truth seems to be that this affair is merely another illustration of the tendency of political intrigues in Korea. Kil Yongchii and his friends found themselves thrust out into the cold and in danger of worse things—as they supposed—, and therefore they plotted a step which might terrorize their rivals into less drastic procedure. A complication is that the present chief of police is the man under whose directions An Kyensu, the leader of the pro-Japanese party, was done to death by torture in 1902. It was in fact for that exploit that he received the appointment of chief of police. He now declines, or shows reluctance, to proceed against the implicated members of the Peddlers' Guild, and his removal from Peddlers' Guild, and his removal from office will therefore be the next step in the drama. But, characteristically enough, that reform is to be deferred until after the 15th instant, when the obsequies of the Empress-Dowager are to be the same category; and out of the second-performed. In Korea the course of justice class cruisers, I—the Novik—has been and the preservation of public order are injured, and the other—the Boyarin—has considerations subservient to the regularity Court etiquette and State functions. Really it seems that the little empire has not made the slightest fundamental progress during the past twenty years. The evil is not quite as prominent as it used to be, but the concealing cover is very thin. Marquis Ito will have his hands full if he really intends to stretch them out for Korean as sistance. We trust that he will be radical. Patchwork is evidently of no manner of use. The Marquis has achieved great things in his own country, but then he had excellent material to work with. Perhaps his perspicacity may enable him to discover some good material in Korea also, but that is a slender hooe.

The Shogyo Shimbun says that the ice on the Yalu recently began to melt.

Marquis Ito is expected to leave Tokyo about the 12th or 13th and to embark at

The two Koreans arrested at Chemulpo when en route for Shanghal to confer with M. Pavlow, have been released on taking the oath of fealty.

RUSSIA'S NAVAL FORCE IN THE FAR EAST.

The Kokumin Shimbun publishes a statement said to have been compiled in a most trustworthy quarter with regard to Russia's naval force in the Far East. We learn from this statement that, torpedo-craft excepted, the total displacement of the squadron was originally 206,173 tons and the number of vessels 34; out of which the ships no longer Seoul will be taken as an opportunity for ships with a displacement of 36,390 tons, definitely fixing Korea's future policy.

Four members of the Korean Cabinet are material. It results finally that the ships

The details of the above calculation are

SUNK OR I	NJURED	SO	AS	TO	BE			
							Tons	i.
Retvis	<i>m</i>					*******	12,90	2
Tsarer	itch			****			12,91	
Pallad	a						6.73	1
Varya;			,				6,50	10
Fenise	i						2,59	ю
· Koreet	8					******	1,21	0
								_
	Total 6	shi	ps.				42,84	8

To these must be added the Sevastopol (10,960 tons), which appears to have met with some accident incapacitating her:—

HPS INJURED BUT STILL CAPABLE OF	F FIGHTIN Tons.
Pollava	
Askold	5,905
Novik	
Diana	6,731
Totals 4 ships	26,676

To these should be added, according to Viceroy Alexieff's report, the Petropavlovsk (10,960 tons) and the Boyarin (3,200 tons).

Putting the matter otherwise, out of the battleships in the Russian squadron when hostilities broke out, no less than 5-the Retrisan, the Tsarevitch, the Sevastopol, the Poltava and the Petropavlovsk-are either wholly or partially crippled; out of the 9 first-class cruisers, 4—the Pallada, the Varyag, the Diana and the Askold—are in either gone ashore or been torpedoed.

It would result that Russia's first-class fighting force is now reduced to

AT PORT ARTHUR:

2 Battle-ships-the Peresviet and Pobieda, sister-ships of 12,674 tons displacement—, and one armoured cruiser, the Bayan (7,800 tons).

AT VLADIVOSTOCK

Three armoured cruisers—the Gromoboi (12,336 tons), the Rossia (12,200 tons), and the Rurik (10,940 tons)—, and one protected cruiser—the Bogatyr (6,750 tons).

In other words, out of a squadron of 18

line-of-battle ships and cruisers, there now the Liaotung peninsula. The principal of remain fit for the fight 2 battle-ships and 5 these islands—which on foreign maps are cruisers; the Port Arthur detachment being marked as the Elliot Group—is Haiyun,
2 battle-ships and one cruiser, and the in which is situated Thornton Harbour. The Vladivostock detachment 4 cruisers,

WAR NOTES.

Friday, March 4 It is stated that work has been finished on the line-of-battleship Alexander III; that the Borodino will be finished in July; the Orel in August, and that the Knias Suvaroff can not be ready for sea before next year. It would thus appear that in September next Russia will be able to send out three of this group of fine ships.

The Vladivostock Eastern News of the 10th instant seems to have published a wildly abusive and childishly contemptuous article about Japan. It calls her a mad idiot, alleges that she is a mere monkey knowing nothing of foreign intercourse except its superficialities, talks about solemn declarations of war and such stuff, and altogether betrays the frantic intemperance

structed—to be injurious to its country's interests, has been excluded from the Naval Department in the matter of subscriptions

Sunday, March 6. In the Chuo we read that the Manchuria and the Mongolia are now in dock at Nagasaki and that their repairs are almost fully completed. The Chuo says that they have become prizes and will be at once used in the public service of Japan. They are both fine steamers of nearly 4,000 tons, the property of the East Chinese Railway Company, but we question the accuracy of the Chuo's statement as to their being now in dock at Nagasaki.

Monday, March 7. It is expected that the Prince Imperial will join the Imperial Head Quarters when His Majesty moves to Kyoto, and that Vice-Admiral Prince Arisugawa, whose health does not warrant him in taking active service, will also be a member of the Head Quarter

It would appear that the news of Japan's successes has aroused great enthusiasm at Singapore. With the exception of the French element of the population the rejoicing is universal. The Jews pray every morning in their synagogue for Japan's victory, and in the theatres a piece representing the night-attack by the torpedoes is vehemently cheered.

A Japanese steamer reports that on her way northward from Hongkong, at a distance of 80 miles out, she was brought within the field of an English destroyer's search-light,

At Hongkong there has been a fancy dress ball where Port Arthur incidents found ponrtrayers, to the great satisfaction of onlookers

A London telegram, dated Feb. 24, which appears in the Hongkong Daily Press, says:—Seventy miles of railway and bridges between Harbin and Vladivostock have been destroyed. In Japan the length was put at 2 kilometers.

The Kokumin Shimbun says that on the 26th of February the Fuji, the Yashima, the Chitose and the Takasago received orders to take possession of the small islands lying on the north-east of Talien off the coast of the ships proceeded thither on the 28th and

landed a party of marines at ■ a.m. They found the inhabitants—some 500 people—much alarmed at this apparition of an armed force, but as for Russian occupation, the only traces of it were some signal flags and a quantity of coal, the Russians having withdrawn on the 23rd of the same month.

The commanders of the Asama and Chiyoda have presented to the Emperor some mementoes of the Varyag.

Tuesday, March 8.

It is now denied that Viceroy Alexieff has received any wound. Several foreigners recently saw him conversing with his countrymen on the platform at Tashikiao station, and observed that he was in his usual state of health

A certain consul who recently returned to Peking from Vladivostock, is represented as saying that some two thousand Japanese residents, having lost their opportunity of getting away by the Afridi or previously by sailing vessels, have been obliged to repair to Habarovsk where they are held prisoners by the Russians.

London says—we do not know on what authority—that the plan of the Russians is to draw the Japanese into the interior of Manchuria. Naturally the further inland the campaign is carried, the nearer it gets to Russia's base and the less trouble she has with her long line of railway. But it is difficult to reconcile such a programme with her tenure of Port Arthur and her excursions into Korean territory from the directions of the Yalu and Tumen.

The Asalii is informed from Peking that the Russians have great difficulty in getting the assistance of transport coolies in Manchuria. Even at largely increased rates of pay, the inhabitants are all refusing to serve.
They will probably soon get something in addition to pay. The same paper learns from the same source that Vladivostock is in great straits for provisions. How can such news reach Peking, we wonder. must be a strict censorate of all the wires communicating with Vladivostock.

H. I. H. Prince Fushimi has given his house in Tokyo for military use in the event of a certain mobilization, and the authorities have accepted the offer.

Thursday, March 10.
The Russian paper published in Harbin says that the Russian authorities have issued orders for buying up 20,000 poods of grain in the Amur region and the whole of the available supply in the Baikal district.

We extract the following from The Times Paris letter :-

"A leading article on the Russo-Japanese conflict in to-day's (Jan. 22nd) Republique Française, the leading Conservative Re-publican organ, contains the following, which it gives as a fact little known in Europe, but which has left profound traces in peoples' minds in the Far East. It appears that on the morrow of the Japanese victory over the Chinese the Russian admiral present in those regions proposed to Admiral de Beaumont, who was in charge of the French squadron, that they should attack and destroy the Japanese fleet, which owing to the hard work any serious resistance. The French admiral declined the proposed co-operation, having no orders, and perhaps also, adds the Republique Francaise, because such action appeared to him inconsistent with his duty and with his duty and with his duty and with the society hopes to meet. The prominent business men—

Messrs. Soyeda, Kato (Masayoshi), Asabuki have consented to act as the Tokyo Execu-

WAR AND PATRIOTIC FUNDS.

Subscriptions to the new War Loan commenced on the 1st instant, and had exceeded the amount required—100 million yen-in the first four days of the allotted 10-day period. From the returns it appears that 60 persons subscribed for amounts under 10,000 yen; 25 persons for amounts varying from 10,000 to 100,000; 14 persons for sums between 100,000 and 1,000,000, and 3 persons -Prince Shimazu, Prince Mori and Marquis Mayeda-for sums of over a million. The following are the names of some of the principal subscribers among the nobles:-

	Yen.
Marquis Tokugawa	300,000
" Asano	300,000
, Kuroda	200,000
" Hachisuka	200,000
" Matsudaira	150,000
_ Ikeda	150,000
Prince Tokugawa	100,000
Count Toda	100,000
Count Matsudaira	100,000
Viscount Matsudaira	100,000
Count Sakai	100,000
Prince Shimazu (junior)	100,000
Count Holta	100,000

Prince Shimazu (senior)	000,000,1
	1,000,000
Marquis Mayeda	1,000,000
us far the names of only or	

Thus far the names of only one Imperial Prince and one Imperial Princess appear for large sums: that is to say, Prince Arisugawa, 30,000 yen, and Princess (Dowager) Komatsu 50,000. The International Oil Company of Yokohama are subscribers for 100,000 yen worth at a figure above par (95).

The subscriptions for the new loan of 100 million yen reached 232,141,750 yen up to the 7th instant. The Emperor's subscription of 20 millions was made on the 9th.

It is stated that the war taxes will be on land, on incomes, on business, on sake, on sugar and on tobacco. There is also some talk of taxing salt and silk stuffs, but a decision has not yet been reached. amount to be obtained is put at 70 million yen, which has to be supplemented by a large sum—some say 50 millions—procured from postponements of public works; includ-ing railways. The effect of increasing the land tax will not be felt as much as might be supposed as there will be no corresponding increase of local land rates. The rate is now actually 3.3 per cent., and under the terms of the five-year-period law it would revert to 2.5 per cent, next month, when the total produce of the tax would be 36 million yen. The idea is to double this latter figure. The Treasury would then benefit to the amount of 36 millions, but the difference to the people would be only the difference between 3.3 and 5 per cent., namely 1.7 per cent. It is understood that no objection whatever will be made to the proposed increase, but there may be some dispute about the period, one view being that a number of years should be fixed and another that nothing definite should be settled.

THE IMPERIAL SOLDIERS RELIEF SOCIETY (Teikoku Gunjin Yengo-kwai).

The object of this Society is to assist the families of military men killed or maimed in

(Yeiji) and Masuda (Ko). The following are the largest sums that have thus far been subscribed: -

	Yen.
Prince Shimazu	30,000
Prince Mori	30,000
Prince Tokugawa (Senior)	10,000
Marquis Tokugawa (Owari)	10,000
Marquis Tokugawa (Kishu)	10,000
Marquis Mayeda	20,000
Marquis Asano	10,000
Count Matsukata	10,000
Count Inouye	10,000
Baron Iwasaki (Hisaya)	50,000
Baron Mitsui	50,000
Baron Shibusawa	10,000
Mr. Yasuda Zenjiro	30,000
Mr. Furukawa Junkichi	30,000
Mr. Sumitomo Kichiyemon	30,000
Mr. Okura Kihachiro	20,000

_	

Total of 19 subscriptions 420,000

The Gunjin Yengo-kai seems likely to institution. We prove a most successful institution. gave above a list of nineteen contributors who had put up a sum of 420,000 yen. On the 6th instant a meeting of the Society was held in the Mitsui Club, when Counts Inouye and Matsukata delivered addresses. Subsequently several new subscriptions were announced; as Mr. Masuda Ko, ten thousand; Mr. Asano Toichiro, ten thousand; Mr. Kondo Rempei, five thousand; Mr. Makoshi Kyohei, five thousand, &c. The contributions now exceed half a million.

The Prince and Princess Imperial have contributed 2,500 yen to the Aikoku Fujin-Kai (Patriotic Women's Association).

Japanese securities continue to fall in London. The five-per-cents are now quoted at £75 5s., and the four-per-cents at £65 5s. It is stated that certain shrewd German merchants of Yokohama see a good opening here, and are making arrangements to purchase these securities

The Emperor and Empress have presented League, and the Prince and Princess Imperial have given 2,500 yen. On the 27th of this month the Lady President, Princess Kanin, has summoned a meeting of all the local branches to take place at the Kanin Palace.

THE TOKYO DRAMATIC & MUSICAL SOCIETY. This Society, which has been inactive for some time, is rousing itself to assist the benevolent movement now so general. A theatrical performance is projected when, we learn, three plays will be given. In the first Madame la Baronne D'Anethan and Mrs. Marsh will take part; in the second, Mr. and Mrs. Clegg, Mrs. Marsh, Madame la Baronne D'Anethan and Mr. Laughlin; and in the third Mrs. Barclay and Mr. Brady. With her usual kindness Viscountess Aoki has consented to allow the rehearsals to take place at her house. There will be two performances, one in Tokyo at the Shoreikwai and one, a week later, at the Public Hall in Yokohama. Ladies of Tokyo and Yokohama are to be patronesses, and their names will be announced at a later date. The proceeds are to be contributed to the fund for the wives and children of soldiers at the front; a cause that ought to enlist universal sympathy for many families,

Mr. E. J. Blockhuys
Mr. R. W. Irwin
Mr. W. H. Stone

Mr. R. Lehmann.

Intending subscribers to the Yokohama and Tokyo Foreign Residents' Association for and Tokyo Foreign Residents Association for the Relief of Sufferers by the War should take an early opportunity of sending in their names to either of the British banks, the local heads of which are Honorary Treasurers. There are reasons for suggesting that those who are in sympathy with this project should immediately signify their support of it. No doubt to some it has appeared that there has as yet been very little of such suffering as might justly call for extensive dreadful conflict can or will be carried on without the infliction of widespread sorrow and misery. The pressing need will arise all too soon and the work of rendering assistance will be much facilitated if before it comes the Honorary Treasurers have a substantial sum in sight, and a goodly list of names. It is hardly necessary to point out that the objects of the Fund will be with difficulty attained if everybody holds back until a great battle with its terrible casualty lists moves them to active compassion and loosens their purse-strings. In this case as indeed in all cases where succour is intended it is emphatically true that Bis dat qui cito dat.

THE U.S. AND CONTRACT LABOUR.

cases in which the provisions of the United States Contract Labour Law have been enforced with a rigidity that is singularly inconsistent with the claims made for the "Open Door" in other parts of the world, that citizens may have an equal share with The British employer, although he doubtless the peoples of all lands in commercial and has some regrets, is of too good stuff as a industrial privileges. A very little investi-gation has usually—indeed, it may safely be said, always—been sufficient to show that those objectionable enforcements were made at the demand of political demagogues who sought favour in the sight of certain classes of voters, rarely native-born; that they do not truthfully represent the feelings of the real citizen of the United States, who knows his civilization to be of stouter stuff than to be endangered by a little abrasion of underpaid alien labourers. An incident has lately come to our notice that tends to prove the correctness of that opinion, and, it is the early eighties twenty years ago, when to be regretted, evinces a spirit of labour owners of coal-mines were in the labit of union tyranny in England which for vindice engaging low-priced labourers, literally by tiveness is more repulsive than anything the ship-load, in Italy and Austria, and lately heard of. Certain of the facts taking them to the United States to supplant were mentioned some time ago, but the details have recently been received. Stour-bridge, in Worcestershire, is the birthplace and present home of the English flint-glass industry, which was founded there some four hundred years ago by Hungarian The Stourbridge glass-blowers were said to have wrested the palm from their Bohemian fellows, just as the latter Philippine Islands case, tends to show this; had stolen it from the Venetians. But, with but it likewise shows how easily a law that the facilities afforded by the natural-gas is fundamentally unrighteous can be made in Japan, as well as in the Official Gasette.

Supply of fuel in certain sections of western New York and Pennsylvania, eastern Ohio.

Stourbridge glassworkers, the immigration some persons into the error of supposing West Virginia, etc., coupled with the case with which raw materials of superior quality are obtained in that district, the palm of needed, but the British Glassworkers' Friend-that it will have to be repeated in two foreign

who in the United States would earn five to ten dollars a day, are and have been for months earning for their families only ten shillings a week.

Under these circumstances, twelve of the

more ambitious of the Stourbridge glass-workers determined to try their fortunes in the United States. Their objective point was Corning, N.Y., where one of their fellow townsmen, who had left Stourbridge only a few months before, was general manager of the Steuben glassworks. wrote to his home that skilled flint-glassblowers were difficult to get in the States. and promised to employ all twelve at wages beyond their wildest dreams, and not only that but he could guarantee full time and constant employment. It must be remembered that the obnoxious Contract Labour Law is understood to make exception of such skilled, technical labour as cannot readily be found among citizens of good standing in the United States, and the fact that the general manager himself had been permitted to take his first job, is strong evidence in favour of that understood construction of the law. Now, one would naturally suppose that the fellow workmen of those twelve glassblowers at Stourbridge would have been very glad to see them go, from purely selfish mo-tives, if they did not rejoice at the good prospects of their friends, because it would be logical to say that the fewer workmen there were, the more work there would We are not unaccustomed to hearing of be to divide up among the remainder. If ses in which the provisions of the United anyone were to object, it would appear to be natural that the employers should be the ones to do so, seeing their supply of skilled labour lessened. But in this case the probabilities of common sense were reversed. rule to put a stumbling block in the path of a workman who starts out bravely to better himself. The fellow-workmen, however, the Glassworkers' Friendly Society, to which all twelve belonged, of necessity not from choice, instead of rejoicing at the good luck of their fellows, resented the leaving of those men, resented it with a malignant perversity that suggested the placing of every possible obstacle in the path of the emigrating workmen. The weapon which the British with the British the suggested that the path of the control of the state of the second that the british the british that the second the second that the second th union chose was the alien contract law of the high-priced, assertive resident workmen; but the law has always been a dead letter when it is evident that the imported labourers will not supplant workmen already in the country, are not intended to be used for breaking the market price of labour, or are of a class such as cannot be obtained in the these skilled workmen who were actually

England, while the Stourbridge glassworks, giving a minute personal description, inlike so many other British industries, limp cluding colour of hair, eyes, etc., such as
and halt and languish on half-time and would makedetection of the immigrants easy. and halt and languish on half-time and would make detection of the immigrants easy. half-pay. Workmen of the highest skill, The president of the American Society turned over this information to the immigration officials of the Department of Commerce and Labour, and supplemented it with gross perversion of facts—setting forth that these immigrants were intended to deprive other workmen of lucrative employment, etc., and the twelve workmen were stopped at the frontier. After a futile appeal to Secretary Cortelyou, their deportation was ordered; yet when the facts became publicly known there was a howl of indignation that will probably go a long way towards helping to secure readjustment of the present humiliating conditions. On both sides of the Atlantic, newspapers are expressing the indignation which naturally all feel at the inhuman act of the British Friendly (?) Society, and at the sniffling shrewdness of the American Union officials, all of whom seem to be commending themselves for having done a bit of detective work equal to the best article that Sherlock Holmes could show. The officials of the U.S. Immigration Bureau are to be excused in this case, for it is admitted that they tried to read the law liberally not literally, but the result of the episode shows up Labour Unionism in its worst possible phase. seems that the persecution of the twelve glass-workers who went to the United States, is on just the same lines as similar instances in which various labour unions have sought-and successfully -to prevent workmen from leaving their places without consent of the district labour organisation, in order that the labour leaders might control absolutely the supply of all kinds of labour. The alien contract law of the United States is

blot on the statute books of any country, and until, it is repealed, will stultify all claims to freedom and the inalienable rights of man; but the fact that it cam be used, as it appears to have been used in this case, to help resuscitate the condition in England of the Middle Ages, when peasants were whipped, branded, or even hanged for leaving their parishes without permission, must tend to bring it into such contempt as shall ensure its repeal.

THE PRIZE COURT.

The Official Gazette of the 1st instant contained, as our readers are aware, a list of ships and their cargoes which the Japanese Prize Court had declared to be prizes of War, in accordance with the provisions of the Prize Law of 1894. At the same time, it was notified that any interested parties who might have cause for protest in con-nexion with the Court's decision, were in-vited to lodge their protests within 30 days from the date of the notification, namely, the 1st instant. On the following day, that is, the 2nd instant, there was promul-gated an Imperial Edict amending the Law States. The final outcome of the recent of 1894, in the sense that public announcement of ships and cargoes confiscated should but it likewise shows how easily a law that be made in two foreign journals published Stourbridge glassworkers, the immigration some persons into the error of supposing officials had no intention of interfering with that the notification made in the Official Gazette of the 1st instant was not valid, and th efint-glass manufacture passed still ly Society wrote to an affiliated body, the newspapers, the period of 30 days counting farther westward. American factories cannot fill their orders: French and Belgian competitors steal the colonial trade from the departure of their fellow-workmen, and authorities are understood to hold that the

the old law is valid and binding.

The crews of the nine Russian steamers made prizes by Japan since the outbreak of war have been taken from Sascho to Nagasaki and there set free. They consist of 252 Russians, 11 Germans, 162 Chinese, 10 Koreans, 3 Norwegians, 5 Danes and 15 Japanese Presumably the Japanese were set free at Sasebo.

OFFICIAL STATEMENT.

The following statement has been officially published :-

The Imperial Japanese Government are given to understand that the Russian Government have recently addressed a Note to the Powers, in which the Government of Japan are charged with having committed certain acts in Korea which are considered by Russia to be in violation of Inter-national Law, and all future orders and declarations of the Korean Government are declared in that

Note to be invalid.

The Imperial Government do not find it necessary in the present instance to concern them-selves in any way with the opinions or declarations of the Russian Government, but they believe it to be their right and duty to correct mis-statements of fact which, if permitted to remain uncontradict-ed, might give rise in the minds of neutral Powers to incorrect inferences and conclusions.

Accordingly the Imperial Government make

the following statement respecting the five acts, which, in the Note referred to, are declared to be fully proved and confirmed facts.

1. The Imperial Government admit that Japanese troops landed in Korea before the declaration of more wear wear insured by the respective to the second by the second se

of war was issued, but not before a state of war actually existed between Japan and Russia. The maintenance of the independence and territorial integrity of Korea is one of the objects of the war, and the despatch of troops to the menaced territory was a matter of right and necessity, which had the distinct consent of the Korean Government. The Imperial Government draw a sharp distinction between the landing of Japanese troops in Korea in the actual circumstances of the case and the sending of large bodies of Russian troops to Manchuria without the consent of China, while peaceful negotiations were still in

progress.
2. The Imperial Government declare that the allegations under this number are untrue. The Imperial Government did not stop the delivery of Russian telegrams by the Danish cable, neither did they destroy the Korean Government's tele-graphic communication. Regarding the alleged sudden attack, Feb. 8th, on two Russian men-of-war in the port of Chemulpo, it is only necessary to say that a state of war existed and that, Korea having given her consent to the landing of Japan-ese troops at Chemulpo, the harbour of Chemulpo had ceased to be a neutral port, at least as between the belligerents.

3. The Imperial Government have established Prize Courts with full authority to pronounce finally upon the question of the legality of seizures of merchant vessels. Accordingly, it would manifestly be out of place for the Imperial Government to make any statement regarding the assertion under this number.

4. The Imperial Government also declare the charge under this number to be absolutely and

charge under this number to be absolutely and wholly without foundation in fact.

5. The Imperial Government deny the accuracy of the statement under this number. No demand either direct or indirect was addressed by the Japanese Government to the Russian Minister to retire from Korea. On the 10th Feb., the French Chargé d'affaires called on the Japanese Minister and informed him, as he did afterwards in writing, that it was the degree of the Russian Minister to Chargé d'affaires called on the Japanese Minister and informed him, as he did afterwards in writing, that it was the desire of the Russian Minister to leave Korea and asked the opinion of the Japanese Minister on the subject. The Japanese Minister replied that if the Russian Minister would withdraw in a peaceful manner, taking with him his staff and Legation guard, he would be fully protected by Japanese troops. He did so withdraw of his own free will on the 12th Feb., and an

far as Chemulpo.

In this connection it may be remarked that the Russian Consul at Fusan remained at his post as late as 28th Feb. It is reported that he was compelled to stay so long in the absence of instructions, which the Russian Minister apparently did not care to give his Consul before his departure. When it was made known that the necessary instructions had at last reached the Russian Consul and that he desired to leave Fusan as soon as possible, the Japanese Consul in the same port

CONCERT IN TOKYO.

A concert was given at the Academy oi Music in Tokyo on the afternoon of the 5th proclaimed to the Army and Navy, but in

Madame d'Ambro. Madame Melegari. Madame V. Erckert.

Lady MacDonald. Madame de Freitas. Mrs. Wood.

The room was crowded to over-flowing and warm applause greeted each number; well deserved applause, for both the singing and the instrumental music were of the highest quality. We append the programme:-

" KANJO KISOKU."

In old-time Japan there used to be a custom of handing to samuai on the field of battle or immediately afterwards a document called Kanjo. This was done only in

notification made under the provisions of escort of Japanese soldiers was furnished him as taught them what a powerful incentive tr as Chemulpo. was thus furnished to the brave and In this connection it may be remarked that the the strenuous. There exists to this day a well known book called Bushô Kanjô-ki, wherein are inscribed the names of those that obtained this distinction, together with facsimiles of the Kanjô themselves, and very interesting reading the latter are. This custom has now been revived. A series of rules called Kai-Riku Kanjō Juyo Kitei have been published. The first says that offered him every facility for his departure and any independent commanding officer, whathis passage to Shanghai through Japan was ever his rank, may bestow a Kanji on any arranged by the latter. person under his command when such person has shown exceptional merit in the face of the enemy, and when his conduct is of a nature to constitute an example to military men. When a Kanjo is granted the event is to be Music in Tokyo on the atternoon of the in aid of the Ladies Nursing Association of the Red Cross Society. It was under the patronage of H.I.H. Princess Kanin, and of the following foreign ladies:

Baroness d'Anethan. Madame Harmand.
Madame d'Ambro. Lady MacDonald.

Madame d'Ambro. Lady MacDonald.

The event of subsequent misconquet the event of subsequent misconqu be retrospective so far as concerns the present war. It may be assumed, therefore, that the leaders of the torpedo squadrons and the officers and petty officers in command of the blocking steamers will be thus distinguished.

DEATH OF FIELD MARSHAL COUNT VON WALDERSEE.

We regret to announce that according to telegrani received at the Imperial German Legation and kindly communicated to us, Field Marshal Count von Waldersee expired on the evening of Saturday the 5th instant. He was, we believe, in his 68th year. His death is a great loss to Germany, and will be widely mourned by many men of all nationalities to whom his tact and kindly courtesy endeared him during the period of his command-in-chief of the allied armies in China.

NOTES ON CURRENT EVENTS.

Mr. Kurino, former Japanese Minister at St. Petersburg, left Stockholm on March 3rd and will embark on March 16th at Genoa for Japan.

The Asahi says that the Nippon Yusen Kaisha has chartered 18 foreign steamers aggregating 53,000 tons, for the purpose of carrying on services which were interrupted owing to the diversion of the regular steamers to public purposes. The foreign services in question are the Kobe-Korean, the Yoko-hama-Shanghai and the Kobe-Kelung; and the domestic services are on the east and west coasts. It need scarcely be said that Tokyo journals rejoice at this resumption of the duties of the mercantile marine. The Nicht Nicht notes that the trade between Japan and China received a great impetus from the war of 1894-5, and predicts that the same result will follow from this war. Japan has acquired the mastery of the sea and is able to restore several of her services, whereas all the Russian lines in the Far East are suspended.

hard way to be trodden, no difficult lesson to be learnt. All is to be made easy. They are dressed up and flattered and caressed until the result in the future may easily be The spoilt child becomes the selfish woman, the unhappy wife, the bad Small girls whose pictures appear in the illustrated papers as the charming daughters of the beautiful Lady So-and-So, are bound to grow vain and frivolous, and to think themselves little pivots of the universe. If mothers only realised it, children are far happier treated as children and not as grown people or dressed-up dolls. If a child is healthy it is perfectly natural, and shams and show are abhorrent to it. The children of the poor have not enough pleasure in this world; the children of the rich have far too much.

The Egyptian Government has ruled that war-vessels of the belligerents are interdicted from taking their prizes not only through the Suez Canal but also into any of the harbours of Egypt, as Port Said or Suez. In these circumstances it is difficult to see what the Russians can do with any ships captured by them in the Red Sea. They must apparently send them round by the Cape of Good Hope.

General Dragomiroff (or Dragoumirow), whose views as to the abandonment of Port Arthur in order to avoid further reverses are reported by telegram to have been rejected by his colleagues, was one of the most distinguished officers in the Russian army during the Russo-Turkish war, and is the author of a well-known manual on the preparation of troops for battle. He was in command of the advance guard at the passage of the Danube in 1877. He is reported to have strong French tendencies and at the French manceuvres of 1895 was in close attendance on Generals Saussier and Boisdeffre.

Rear-Admiral C. D. Lucas, R.N., whose name has been mentioned in connexion with the forthcoming forty-eighth anniversary of the institution of the Victoria Cross, enjoys the distinction of having been the first recipient of that much-coveted honour. The act of conspicuous bravery, on June 21, 1854, by which he secured it consisted in throwing overboard during the campaign in the Baltic a live shell which had fallen on board the Hecla. The V.C. had its origin during the Crimean war, when Queen Victoria felt that some recognition of the personal daring and heroism of her soldiers in that terrible struggle was needed; and it is said that the designs for the first Cross were made by no less a person than the late Prince Consort. Both the Cross and its bar are made from bronze which formerly formed part of Russian guns captured in the Crimea. It may not be generally known that at one time the award was not confined to service time the award was not connice to service in the Fierma Kingdom and Visited Scotti, in action. An instance occurred in 1866, Fusan, Chemulpho and the other treaty when a private in the Rifle Brigade was ports, including Masampho and Wonsan; granted the Cross for heroic conduct at a fire the monasteries of the Diamond Mountains in Canada, while a London policeman was and the fishing villages of the west coast. among the first batch of recipients decorated He used his opportunities well and his by the late Queen in Hyde Park in 1857. By a change made in the warrant in 1885, it contains giving a very good idea of the however, the Victoria Cross can now be present state of affairs in Korea. Of course earned only by service in the field. Another fact not known to all, perhaps, in connexion with the V.C. is that when it was first instituted the decoration was viewed with anything but favour by many soldiers, who

officer's blunt way of putting it. Nowadays outbreak of war is not flattering to the Rusdistictions.

It is expected, says the Nichi Nichi Shim bun, that their Imperial Highnesses Prince and Princess Arisugawa will visit the St. Louis Exhibition, the Emperor being anxious to mark his sense of the importance of American friendship.

We learn from a London telegram dated Feb. 19th that the Royal eulogy of Lord Roberts contained in the special Army Order issued on the previous evening, in which the King took leave of Lord Roberts as Commander-in-Chief of the Army, was commented upon as another instance where the tact of His Majesty rescued Ministers from an awkward dilemma. The exceedingly an awkward dilemma. curt manner in which the War Office dismissed Lord Roberts deeply incensed the late Commander-in-Chief, and this feeling was shared by the public to such an extent that it threatened to lead to a serious attack on the Government. The King's first intimation of his disapproval of the War Office treatment was to invite Lord Roberts to Buckingham Palace, where marked attention was shown to the Field-Marshal. This has now been followed by the Army Order, which was sent out by the King personally, not, as usually, through the War Office.

THE WAR AND THE BOOKMEN.

It is scarcely surprising, human nature being what it is, that the English and Amebeing what it is, that the English and American publishers should take immediate advantage of the present Russo-Japanese strife. Rising nobly to the occasion they appear to be bent on deluging the literary market-place with books dealing with the countries and nations of the Far East, many of these convinting old works in their entirety. of them reprinting old works in their entirety, or furbishing up others by adding chapters bringing them up to date; while others are bringing them up to date; while others are issuing new books by new writers; and each and all are advertising their product as the one and only work likely to adequately satisfy the public craving for knowledge and information. The last few mails from England have brought us several of the new books, among them being the following:-

Korea, by Angus Hamilton: London, William Heinemann. Japan: Aspects and Destinies: by W. Petrik Watson: London, Grant Richards.

Impressions of Japan; by G. H. RITTNER: London, John Murray. Japanese Physical Training, by H. IRVING HAN-COCK: New York, G. P. Putnam's Sons.

The Russian Advance, by Hon. ALBERT J. BEVER-RIDGE: New York, Harper and Bros.

These volumes are of very diversified interest, but each deserves attention at the present time. Mr. Hamilton, who writes on Korea, seems to have spent some months in the Hermit Kingdom and visited Seoul, book makes pleasant reading, the pen-pictures present state of affairs in Korea. Of course it is all light and elusive, redoleut of modern journalese in manner of treatment, and therefore calling for little labour in the perusal. Readers in the Far East will turn at once to the introductory pages, in which Mr. Hamilton tabulates the strength, naval journalese in manner of treatment, and therefore calling for little labour in the perusal. Readers in the Far East will turn

it is, of course, the most highly prized of all sians by any means. Of the Russian soldier he says:-

sians by any means. Of the Russian soldier he says:

The Russian is a phenomenal marcher; the actual weight of his equipment is 58 lbs. 202. One lent is carried in section between six men. Each soldier carries in his haversack two and a half days' biscuits. The ration in daily use for war consists of: Biscuit, tlb. 130x., meat 7 % 0x., proats, 4;0x., salt, fox., tea, "0x., spirits \$\frac{1}{2}\$ of a pint.

In the exigencies of active service it happens that the Russian soldier must forage for himself. Under any circumstances, however, he sustains himself on very little nourishment and relies in a great measure upon what he can find. The Russian aravalry is armed with sword, rifle, and bayonet. The latter is invariably carried "fixed," even when the weapon itself is slung. A few regiments only carry the lance. The field guns are steel breech-loaders manufactured at the Obukhov works. They are akin to the Krupp pattern; many, however, have the interupted screw breech and the de Bange obturation. At present there are many varieties of artillery with the Russian troops particularly in their fortified positions, to which places the Russian transported the seizures which they made from the Chinese during the Boxer crisis. These embraced French, German, and British examples of artillery. On land, the immense superiority of the reserve numbers of the Russians reduces the advantages which they made from the Chinese during were confined to the sea. At the same time, however, it should be remembered that the Russian troops are slow movers, and although they may exhibit magnificent endurance, and although they may troops are slow movers, and although they may exhibit magnificent endurance, and although they may be relied upon to fight well, the lack of individual initiative upon the part of the Russian officers robs the operations of that dash and address which is embodied in the spirit of the Japanese Army.

Regarding the Japanese fleet, Mr. Hamilton says :-

ton says:—

In case of war it appears that with one exception the ship comprising this (first) division are all British built. Designs, armour-plating, and armament follow the type and standard of our own Navy, and it in therefore obvious that we cannot fail to be stirred deeply by the results of any collision which may occur. Each nation possesses in Far Eastern waters ships supplied with the latest appliances which science and ingenuity have devised. To the people of this Empire, whose security reasts primarily upon the fleet, our interest in the engagements is naturally the higher, by reason of the similarity between the ships which will be engaged upon one side and those of our own Navy.

Turning to Korea, our author, points, out

Turning to Korea, our author points out how helpless she is in the present crisis, without means of defence or offence, and quite ready to fall into the arms of the tor whichever it may turn out to be. With regard to her internal condition he writes:

regard to her internal condition he writes:

At present Rorea is in a state of transition. Everything is undefined and indetermined; the past is in ruins, the present and the future are in the yough. Reforms are scarce a decade old, and, while many abuses have been redressed, the reform movement suffers for lack of support, comprehension, and toleration. The aspirations of the few are extending but slowly to the nation. Progress is gradual and the interval is tedious. The commercial phase of the movement is full of vitality, and the factories which have been established show the evolution of enterprise from aspiration. Foreigners are introducing education, while the present commercial activities are attributable to their suggestion and assistance. The small response which these efforts elicit, make the labour of keeping the nation in the right direction very difficult. The people can scarcely relapse into the conservatism of ancient days, but they may collapse altogether, owing to the unfortunate circumstances which are now making Korea an object of ironical and interested observation among the Western Powers. She may be absorbed, annexed, or divided; in endeavouring to remain independent, she may wreck herself in the general anarchy that may overtake her. take her.

The above extract refers to the country at large; of the capital, Seoul, Mr. Hamilton writes rather enthusiastically.

anything but lavour by many soluties, who held it to be superfluous and uncalled for. Mr. Hamilton tabulates the strength, naval and the runners before the chairs of the officials have for some time ceased to announce in and military, of the two belligerents, and strident voices the passing of their masters. Imas a soldier for being brave," was one famous his description of Port Arthur before the provements, which have been wrought also in the

its sanitary measures and its methods of communica-tion—have replaced these ancient customs. An ex-cellent and rapid train runs from Chemulpo; electric trams afford quick transit within and beyond the capital; even electric lights illuminate by night some parts of the chief city of the Hermit Kingdom. Moreover, an aqueduct is mentioned; the police force has been reorganised; drains have come and evil odours have fied.

Mr. Hamilton sees in all this reformation guiding hand of Mr. McLeavy Brown, the Chief Commissioner of Customs, and he pays eloquent tribute to that sorely tried official for all that he has managed to accomplish in the face of such baffling obstacles. It will come as a surprise to many, we fancy, to read of the high level of education prevailing among the women of Korea. They take delight in their ancient history, are well-versed in the popular literature of the land, and though their lives are rather circumscribed according to Western notions, the Korean women are very dominant factors in the life of the nation :-

Ornamental elegances, the tricks and traits of or drawing-room minxes, are ignored by the gentler classes, vocal music and dancing being the accomplishments of dancing-girls and demi-mondaines. The arts of embroidery, dressmaking, sewing, and The arts of embroidery, dressmaking, sewing, and weaving absorb their attention until they have gone through the gamut of domestic economy. Occasionally women of the upper class learn to play the kumungo, an instrument some five feet long and one foot wide, bearing a faint resemblance to a zither and emitting a melancholy and discordant wail. There is one other stringed weapon, the nageum, but the awful screech of this unhappy viol overwhelms me, even in recollection. The usual and most simple amusement for the middle-class is the gentle, aimless stroll, for the purpose of "look see." Swinging, rope-games, dice, dominoes, and dolls find some ing, rope-games, dice, dominoes, and dolls find some favour as distractions.

Regarding the Court and the principal members of the Emperor's entourage, Mr. Hamilton has much to say. First as regards the Emperor :-

gards the Emperor:

His Majesty is now almost a cypher in the management of his Empire. Nominally, the Emperor of Korea enjoys the prerogative and independence of an autocrat; in reality he is in the hands of that party whose intrigues for the time being may have given them the upper hand. He is the slave of the superb immoralities of his women. When he breaks away from their gentle thraldom, in the endeavour to free himself from their political associations, his exceedingly able and unscrupulous Minister, Yi Yong-ik, the chief of the Household Bureau, rules him with a rod of iron. It matters not in what direction the will of his Majesty should lie, it is certain to be thwarted with the connivance of Palace concubines or by the direct bribery of Ministers. If the King dared, Yi Yong-ik would be degraded at once. No previous Minister has proved so successful, however, previous Minister has proved so successful, however, in supplying the Court with money; and, as the Emperor dreads an empty treasury, he maintains him in his confidence.

Then, as regards the Lady Om :-

In m Court which is abandoned to every phase of Eastern immorality, it is a little disappointing to find that the first lady in the land no longer posof the Imperial baren. Her amours law man belong to the Emperor; yet one of these man to the Emperor; yet one of these may become the Emperor; yet one of these may become the Emperor; only two of her five conditions to the Emperor; her skin is of a saffron tint. * * * Her dominion over the Emperor is wonderful. Except at rare intervals, and then only when the assent of Lady Om to the visit of a new beauty, has been given, he has no eye for any other woman. Nevertheless, the Lady Om has not always been a Palace beauty; she was not always the shining light of the Imperial baren. Her amours lave made Korean history; only two of her five children belong to the Emperor; yet one of these may become the future occupant of the Throne.

In her maiden days she became the mistress of a

In her maiden days she became the mistress of a Chinaman; tiring of him she passed into the grace and favour of a Cabinet Minister. He introduced her to the service of the late Queen.

We refer our readers to Mr. Hamilton's book for the subsequent adventures of this clever fille de joie. They are startling. Of Hamilton has much to say, but we have no Irving Hancock sets out to describe the at Kotobuki-cho, Yokohama, damaging two build-space for a quotation here. Our author has received a function here. space for a quotation here. Our author has system of exercise, diet and general mode ings, comprising six dwellings.

conditions of the city—in its streets and houses, in not formed a very high opinion of the Japanits sanitary measures and its methods of communications who have flocked to Korea ese who have flocked to Korea.

There are some twenty-five thousand Japanese in Korea, and the Japanese settlement is the curse of every treaty port in Korea. It is at once the centre of business, and the scene of uproar, riot, and contusion. In the comparative nakedness of the women, in the noise and violence of the shopkeepers, in the litter of the streets, there is nothing to suggest the delicate culture of Japan. The modesty, cleanliness, and politeness, so characteristic of the Japanese, are conspicuously absent in their settlements in this country. Transformation has take place with transmigration. The merchant has become a rowdy. country. Transformation has take place with transmigration. The merchant has become a rowdy. The coolie is impudent, violent, and, in general an outcast more prone to steal than to work. Master and man allke terrorise the Koreans, who go in fear of their lives whenever they have transactions with the Japanese.

And again :-

Atto again:—
It is, perhaps, surprising that the animus of the Koreans against the Japanese has not died out with time; but the fault lies entirely with the Japanese themselves. Within recent years so much has occurred to alter the position of Japan and to flatter the vanity of these island people that they have lost their sense of perspective. Puffed up with conceit, they now permit themselves to commit social and administrative recesses of the point detestable character. strative excesses of the most detestable character. Their extravagant arrogance blinds them to the absurdities and follies of their actions, making maniabstractives and follies of their actions, making manifest the fact that their gloss of civilisation is the merest veneer. Their conduct in Korea shows them to be destitute of moral and intellectual fibre. They are debauched in business, and the prevalence of dishonourable practices in public life makes them in different to private virtue. Their interpretation of the laws of their settlements, as of their own country, is corrunt. Might is right: the sense of power is is corrupt. Might is right; the sense of power is tempered neither by reason, justice, nor generosity. Their existence from day to day, their habits and their manners, their commercial and social degradation, complete an abominable traverty of the civilisa-tion which they profess to have studied. It is in-tolerable that a Government aspiring to the dignity of a first-class Power should allow its settlements in a friendly and foreign country to be a blot upon its own prestige, and a disgrace to the land that harbours them.

Equally uncomplimentary are Mr. Hamilton's observations with regard to certain of the missionary bodies working in Korea, but our space precludes further quotation. The illustrations which accompany the text are very well-selected and give a capital idea of the beauties of a still comparatively little known land, and the design on the cover is very charming.

Regarding Mr. Rittner's "Impressions of Japan," much need not be said. object of the book is to induce the traveller "to penetrate beyond the modern life of the city into the remote country places, where the pristine life of old Japan still survives." In the cities, Japan has become sophisticat-ed, and Mr. Rittner echoes the cry we have heard time and again these dozen years or so "civilisation has not only destroyed much of its art, it has taught the nation dishonesty. Why are the Japanese a band of rogues in business, who will put their names to any document, enter upon any contract, and the next moment repudiate it and their signatures too? The answer is simple and contained in the one word 'civilisation.'" In the rural districts, our author affirms, with underlined emphasis, something of the old innocence survives, and there the *Geisha* are very different from the *Geisha* of the Treaty "The Geisha at Tokyo and other Ports. large towns are no real Geisha at all because they look on their performances from the point of view of trade, and have ceased to be artists, as they are inland."

On the whole Mr. Rittner seems to have enjoyed his visit to Japan and the pictures he prints show that he possessed an observant eye.

of living that " has made the Mikado's people the healthiest, strongest and happiest men and women in the world." He writes as an enthusiast and many of his propositions, we fear, will not bear the test of actual experience, they are all too much in the realms

The book on Russia's advance in Asia written by the Hon. Senator Beveridge is timely and contains much food for thought. Still the impression food for thought. Still the impression left on the mind is that he did not take full advantage of his opportunities. He saw only what the Russian officials wished him to see, nothing more. For all that, his work is worth reading. It contains a good many facts that may help us to understand the ideals of the Russian officials and soldiers in their gigantic visionary plan of making all Asia Russian. Mr. Beveridge has been brought into contact with Pobyedonostseff, Tolstoi, Witte, Admiral Alexieff, and other great men of modern Russia, and he has faithfully reproduced their views and aims. It is a pity that Senator Beveridge could not curb his passion for "purple patches": it spoils his book, making it read in places like a "Sun-day edition" of an American paper.

Mr. Watson's book we leave till another

FOOTBALL.

The final in the Y. C. & A. C. Association football Sixes competition took place on Tuesday in miserable weather and the attendance of spectators was not large. The match had to be re played as no definite result was arrived at on Monday, and resulted in a win for H. W. Kilby's VI by four goals to one. Both teams appeared one man short and so it was decided not to play a substitute on either side. Below are the sides of the VI's which took part in the

final round:—
Goal, J. E. Drummond; Backs, H. W. Kilby (Capt.) and H. Y. Irwine.
Forwards, F. O. Stuart, B. C. Foster and J. M.

Mollison. Goal, A. J. Correa; Backs, N. G. Maitland and W. B. Mason.

Forwards, S. R. Ford, S. Wheeler (Capt.) and W. J. Drummond.

The various matches resulted as below:-

H. W. Kilby's Six beat W. S. Moss' Six 2-0; S. Wheeler's six beat O. Strome's six 2-0; J. E. Moss' Six beat E. W. Kilby's Six 3-1; H. W. Kilby's Six beat J. E. Moss' Six 2-0; H. W. Kilby's Six beat S. Wheeler's Six 4-1.

We understand that the Y. C. and A. C. Association team in the Interport Match, to be played on Kobe on March 12th, will be composed as follows:—Goal.—W. J. Waddilove; Backs.—W. S. Moss and E. W. Kilby; Half-backs.—W. B. Mason, Jr., A. Kingdon and H. W. Kilby; Forwards.—J. F. Drummond, O. Strome, W. B. White, S. Wheeler and J. M. Mollison. The K. C. & A. C. will put in the field:—Goal.—C. H. Lightfoot; Backs.—Rankin and G. C. Allcock; Half-backs.—E. C. Jeffery, E. G. Fradgley, D. T. Weed; Forwards.—Guterres, McDougall, H. E. Green, S. R. Clarke and A. N. Other. ciation team in the Interport Match, to be played

FIRES.

About 9.10 o'clock on Friday morning fire broke out in a kitchen of the dry-goods dealer, S. Okushi, Isezaki-cho, Yokohama. The flames spread to the next house, but were put out before much damage had been done. The cause is re-ported by the Isezaki-cho police to be negligence.

YONG AM-PHO.

THE opening of Yong Am-pho is said to have been definitely decided by the this winter has not been at all a good one. have been definitely decided by the esspecially, seem to have been scarce, and many Korean Government, and the decision will localities where they were numerous last year, be announced immediately to the Powers. have yielded hardly any birds at all this season. We presume that Yong Am-pho is now in Every year sportsmen have to go farther and farther afield, and game seems to be getting quite exterminated in districts easily accessible from is practically a belligerent, the reality of this Yokohama. On the other hand, a great number opening must remain for some time unachieved. Morally, however, the measure is significant. It shows that the first use Japan makes of her authority in Korea is to throw the country open to the trade of the the world, thus acting in strict accordance with her declared policy, the policy of equal opportunities for all. Doubts have been cast by some publicists from time to time on the justice of charging Russia with a policy of exclusiveness. It has been contended that were she paramount in East find a freer field that they could hope for under any other conditions. There would be much satisfaction in entertaining that view were it tenable. But apart from the general consideration that Russia's experience of the results of open competition does not justify her in exposing her subjects to ship-wrights in plenty of time, as there is always the ordeal, there is the plain and incontrovertible fact that she has openly declared a programme of exclusiveness in Manchuria. She has actually announced that a cardinal deck measurement is approaching completion. concession obtained from China by the United States and Japan in their recently of the Club have concluded commercial treaties must be withheld; namely, the concession of forming the concession of forming of the concession of the conce settlements at the newly opened marts of Mukden, Tatung and Antung. It is unnecessary to point out that in a country like Manchuria the privilege of carrying on trade becomes quite illusory if it be not active. The entries for the Grand National Steeple-chase, to be run on the 23rd inst, number seventy-one, including practically all the best chasers in England and Ireland. His Majesty's trade becomes quite illusory if it be not active. companied by the privilege of establishing winners are included in the number. Manifesto, commercial warehouses and building re- be it noted, is now sixteen years old. sidences. Russia has thus placed on unequivocal record her resolve to withhold The fixed skeleton programme advertised by from foreigners in Manchuria the tradal doubtless commend itself to all owners. In the concessions already granted to them confirst place it removes a great deal of the uncertainventionally by China. Nothing could be the history provided for the different more emphatic. That the declaration was a second of the provided for the different more emphatic. favoured-nation clauses in their treaties with China, is a point requiring no elaboration. But the significance of Russia's act as a declaration of general policy does not been sold while yet in winning form, because their owners believed that no races would be provided in which they could run. In the seem to have been widely appreciated. freedom of commercial intercourse with the it starts. neighbouring continent is absolutely essential to her material expansion, whereas other class that should be encouraged as much as But unfort States, though some of them are most possible, and the three moes for this class only and are appropriately concerned stand in a lower rate of are calculated to induce owners to give their real thing.

DESULTORY NOTES ON SPORT.

Judging from all accounts, the shooting season difficult to approach, and no good bags have been

The commencement of training for the Spring Race Meeting this week has once more been an incentive to early rising to a number who have doubtless been enjoying the extra half hour or so in bed which the cold weather makes so desirable. The course between 6 and 7 a.m. in early March is rather a chilly place for any who are not actively engaged in training the horses, but the arrangements this year are much more comfortable for the onlookers, as the executive have thrown open for use the new tiffin room, where one can sit and watch the work on the course, Asia, foreign industrials and merchants would and at the same time enjoy a cup of coffee or tea, sheltered from the cold winds that sweep the Negishi heights.

> With a view to the approaching commence-ment of the yachting season, work is now pro-gressing on several of the yachts that have been gressing on several of the yachts that have been laid up in winter quarters. When anything be-yond the usual work of refitting is required, done so well when all the owners are in a hurry for their craft to be finished and put in the water. At Morita's yard a new boat of about 35 feet

deliberate insult to the United States of number of races owners will not be induced to America and Japan directly, and constructively to England and all States having favoured nation clauses in their treaties with second place, the fixed skeleton programme will Japan is the leader of the nations in protestinduce owners to keep over horses that are not ing against that policy; protesting against it quite in the front rank of their class, as by the sword in hand, and the position of leader "protected" classes can be at the mercy of a rightly belongs to her in this instance, for horse able to gallop away with any race in which

Horses at their second meeting:-This is a vitally concerned, stand in a lower rank of horses a chance of showing their worth even interest. It is becoming, therefore, that the if they have not won at their first meeting. K Sasaki, ex-head man of Tanaka village, opening of Wiju and Yong Am-pho should be among the first assertions of Japan's influence in Korea.

K Sasaki, ex-head man of Tanaka village, K Kagawa prefecture, who embezzled yen over; but encouragement is needed for those 1,500 belonging to the village office while on that have not gained winning brackets. In duty, and absconded, was arrested on March 8th the first place, horses good enough to win three

races at their first meeting, must go up into the "all subscription" class. Then the winner on the first day, is barred on the second, and so there the third day is a handicap, giving all horses a chance, if they are worth it. If course no handicap can really bring the worst and the best together, but all that can gallop at all have a chance of a win. But the laws in the advertised a chance of a win. By the bye, in the advertised programme, under the heading of the "Sydney Stakes," the winner of "Colonial Plate" is excluded. This of course should be "winner of Melbourne Stakes," and the clerical error is

It is perhaps a pity that the "Champions" still finds a place in the programme. A weight for age race, with no penalties, on the third day of meeting, is an anomaly that has been discarded in most places where the three day meeting twice a year prevails. It is seldom difficult to pick the probable winner at the close of the pick the probable winner at the close of the second day's racing, and often when a horse has won easily, in spite of penalties, in the previous races at a meeting, it is a farce to send out the same horses to be beaten by the Champion again with greater case because no penalties have to be carried. Of course, on the other hand, a winner at previous meetings may have been prevented from previous meetings may have been prevented from previous meetings may have been prevented from winning on the first and second days by penalties incurred, and the "Champions" may prove its only chance of showing superiority, but such does not often happen, and as a rule the field for the "Champion Stakes" is small, and the race itself uninteresting.

The races for "All subscription horses" are open to Country breds, whether subscription or open to Country breds, whether subscription or not. This leaves it open to any one sufficiently enterprising to bring down a really good animal from one of the studs, and it has been urged that such a lorse would be running at a great advantage as compared with subscription. Australians carrying a heavier scale of weights. Pure condition. ing a heavier scale of weights, plus penalties. The Nippon Race Club does not bear the old tag about encouraging the breed of horse, which was for many years considered the correct raison d'etre of Racing Clubs. But still, it is just as well to encourage as much as possible the local article, and if it is possible to get really good country bred racehorses, the Club are right in giving them every chance. No really good country bred has been seen on the course for many years, and it is very doubtful if the best that have ever raced here could hold their own against the best of our present walers. A few good specimens of the product of the Government studs would be welcomed.

In giving the "Ladies' Purse" to the subscrip-tion China ponies the Committee have moved in the right direction. It is impossible to devise any scale of penalties and allowances to bring together our subscription China ponies and those privately imported, costing in many cases big sums of money. And as this race is for gentlemen riders it should be rather for the small owners than for the long purses. An amateur, beginning the game, may pick up for a reasonable figure one of the subscription ponies at auction or private sale, and ride his own nomination in the Ladies' Purse. Such a beginner would have but a poor chance of even a mount in the race if were open for all comers, and this is the one race of the year in which novices should be encouraged. As a rule they are too heavy, with the big saddle necessary for their com-fort, to ever learn much of race riding on race horses. Therefore it is well to let them have one race at each meeting, and that a popular one. Much might be done for aspiring amateurs in the matter of "off days" if they would only come forward then and do their best. But unfortunately they want a deal of helping, and are apt to scorn gymkhanas, as being not the

SHICIDE ON THE BLUFF.

During the progress of a birthday party held at No. 26-D, Bluff, on the evening of Saturday and the morning of Sunday, a sensational occurrence took place, one of the guests, a young gentleman from New York named Daniel Bacon, junr, aged 25 years, shooting himself in one of the rooms. Dancing was going on about 2.30 a.m. when he suddenly left his companious and walking into an adjoining apartment, drew = revolver, pointed it at the right side of his head and pulled the trigger, the bullet passing downwards through his brain. Death was instantaneous. The police were summoned and Dr. Munro was sent for, but During the progress of a birthday party held vere summoned and Dr. Munro was sent for, but

will be held by the police this morning.

Mr. Bacon, who is very well connected in the
United States, had only been in Japan two weeks.

Further information obtained by the Bluff Police with reference to the suicide of Mr. D. Bacon, Jun., shows deceased was entertained by Miss Forrest, No. 26, Bluff, on March 5th at a dinner party to celebrate the birthday of that lady. Dancing commenced about ro o'clock and lasted till 3 o'clock the following morning, when a lady retired to an adjoining room accompanied by a Japanese female servant, Kuni Takahashi (28). When the lady entered the room, she found the deceased gentleman standing before a toilet glass, having a revolver in his right hand and holding its muzzle close to his right temple. Both the lady and the servant were much surprised, and the lady, according to the servant, cried "What are you doing?" at which moment the revolver was

Having summarized the various facts the police declare that the deceased was in the habit of drinking to excess and that he had told some of his acquaintances that he desired to die. He arrived here on February 18th by the ship A. G. Ropes from New York, and stayed at the Club Hotel, No. 5. His father is a wealthy merchant in New York and one of the shareholders in the Standard Oil Company. The following is the certificate of Dr. N. G. Munro:—

holders in the Standard Oil Company. The following is the certificate of Dr. N. G. Munro:—
March 7th, 1904.—This is to state that D. Bacon, aged about 23 years, was examined about an hour after death, by me at 4 a.m. on March 6th, 1904. He was identified in my presence by Miss Forrest of No. 26 Bluff, in whose house the deceased was lying. There was a gunshot wound of the anterior temple on the right side, measuring nearly an inch by about half an inch. The brain was singed and the skin discoloured from the blast of the gunpowder.

The right hand was stained with blood and there was also blood on the right side of the pistol.

I am of opinion that the said D. Bacon died by his own hand and that he placed the muzzle of the pistol close to the head before firing. This is borne out by the size of the wound of entrance and the staining and burning of the tissues. As blood escaped into the pharynx I am of opinion that the bullet passed downwards through the base of the brain."

On Sunday the tragical news was telegraphed to Mr. J. W. Copmann, agent of the Standard Oil Company, No. 8, who was at Dzushi. He returned immediately and communicated with the family of the deceased and was awaiting an

family of the deceased and was awaiting an answer yesterday.

CUSTOMS DECISION.

The Superintendent of the Yokohama Customs gave, on March 5th, his decision on protest lodged by Mr. A. Oestmann, No. 74, Yokohama. It seems the protestor imported rubber tubing on It seems the protestor imported rubber tubing on which the appraisers imposed 20 per cent. ad valoren duty in accordance with No. 412-c of the general statutory tariff. The importer held that the article should come under No. 412-R, and insisted that the goods in dispute were raw material of the nature of manufactures and could be immediately put to actual use. The protest was rejected on the ground that No. 412-R provides only for where sheets but No. 412-R provides only for rubber sheets, but No. 412-C is for manufactures not otherwise provided for, and the rubber tubes in dispute can be employed in connection with implements.

A NEW ORIENTAL HOTEL IN KORE

At an extraordinary general meeting of share-holders of the Oriental Hotel, Ltd., Kobe, on Saturday, March 5th, (Mr. A. H. Groom in the chair) at which 1,192 out of 1,490 shares were represented, a proposal to empower the directors to erect a new and up-to-date hotel on a site, No. 6 Bund, recently acquired by the company was considered.

In reply to questions, the Chairman said the question of debentures might be left to the future. They had one set of plans by Mr. Shimoda, who was constructing the new premises of the Hongkong and Shanghai Bank at Nagasaki, but they were summoned and Dr. Munro was sent for, but king and Shangiai bank at ragasaki, but they the unfortunate gentleman was, as we have said, had not yet seriously considered the question of the building. He said that the directors had, several persons were present when the affair occurred but so rapid were Mr. Bacon's actions sion that the present building was quite out of that no one had time to stop him. An inquest to keep the first place in Kobe it was necessary to build. They had therefore carefully considered the new scheme and the result was they had come to the conclusion that it was useless to recon-

building and he was sanguine enough to believe that they would be able to earn a good profit in the present premises while the work of reconstruction was going on.

The proposition was adopted unanimously. The Chairman said that respecting the propositions which the Directors had to make regarding finance he thought it might be well to make this statement. Certain new shares would positions which the Directors had to make regarding finance he thought it might be well to cussion, does not regard Mr. Diosy's strictures make this statement. Certain new shares would be issued and every holder of a share at the present time would be offered one at par, viz. fifty sent time would be offered one at par, viz. fifty sent time would be offered one at par, viz. fifty set, along one of the present time would be offered one at par, viz. fifty set, along of the mr. Longford proceeds to offer a few that taking up of a thousand shares. Anyone or titioner of his own of the mr. yen. Already guarantees had been received for the taking up of a thousand shares. Anyone holding ten shares would be offered ten other new shares, to rank with the old ones at par. There might be a few put on the market later,

Tree was told that The Darling of the Gods owed a great deal to The Mikado, and was much influenced by it, he would probably treat the suggestion with scorn. (Laughter.) Nevertheless, it was quite true. The young ladies who ran about the stage at His Majesty's with the steps of a frightened little mouse, violently agitating little fans, were the "Three Little Maids from School" multiplied by 30. (Laughter.) As to Mr. Tree himself in his part, he was "Poob-ba." (Laughter.) Custom seemed to compel the actors to behave in the same way, whether in the Gilbert and Sullivan opera, The Geisha or Messrs Long and Belasco's play. It was a regular Buddhist succession of reincarnation. The Darling of the Gods had brought him to the fulfilment of his ambition. (Laughter.) Anything more like stage Japan he had never seen. The costumes were, in the main, correct, and the scenery, which was very beautiful, was also in the main correct. The movements and deportment had been superintended by a Japanese painter, and yet silence was the best explanation of one's feelings. It was stage Japan smelling of the stage carpenter's glue, because the piece was hopelessly un-Japanese.

Mr. H. Beerbohm Tree has written a letter in

Mr. H. Beerbohm Tree has written a letter in reply to the above in the course of which he

struct the present premises and that undoubtedly nine out of ten would consider a fine hotel on the Bund more attractive to the public than any building on the side street. So, having an opportunity of securing a fine site on the Bund, the directors had decided that it would be advisable to acquire it. The Company would take possession of the property on April 1 st and make arrangements to build afterward. Briefly, the Board had come to the conclusion that if they were to keep the first place it was necessary to secure another site and build on it a first class Hotel, a hotel second to none in the East. Of course that would involve an increase of capital to 19 500,000 and so far as raising funds went the Directors had no qualms. A great part of the additional stock had already been taken up and it was doubtful if it would be necessary to put any stock on the market. The company would be able to carry on their regular business without interruption while rebuilding and he was sanguine enough to believe that the subset of the property of a pool of a cosmopolitan globe-trotter and a scholarly native of Japan, I have concerns that wonderful land, but called upon therefore to decide between the opinions of a cosmopolitan
globe-trotter and a scholarly native of Japan, I have
the audacity to choose the latter. And I am proud
to think that in the opinion of such a redoubtable
authority as Mr. Koike, I am enabled to give to those
who are ignorant of Japan a sense of the life of that
great little nation of great little people.

holding ten shares would be offered ten other new shares, to rank with the old ones at par. There might be a few put on the market later, otherwise he did not think there would be much change.

JAPAN ON THE LONDON STAGE.

The new play of Messrs. Long and Belasco, now being produced by Mr. Beerbohm Tree at His Majesty's Theatre, London, has given rise to widely different kinds of criticism which it is quite interesting to read. Lecturing on Jan. 17th at the Hotel Cecil before members of the Playgoers' Club on "The Japan of the Stage," Mr. Arthur Diosy thus spoke of "The Darling of the Gods":—

In the latest production dealing with Lance Cell. more resembled the whinnying of a lot of young fillies. All the movements of Japanese gentlemen of the old school were invariably characterised by the most impressive dignity and stateliness, in no way resembling the ungraceful and uneasy shuffling of the guests at the "Feast of the Thousand Welcomes" (a feast never heard of in Japan). The salutations with the swords of the Samurai about to die would not be recognised in any Japanese school of fencing. Was there no one among Mr. Tree's advisers who could have told him that, when a gentleman committed harakiri, he invariably fell forwards, never on his back; that the pronunciation "Yæ-shéa-key," "Na-guu-yah." and "Sige-yun-nara" very ungracefully misrepresents the original words; that the last is not one that would have come naturally to the lips at the moment of death; that Napoleonic addresses, in a voice elevated to the highest pitch, to Samurai, are quite of the Gods":—

In the latest production dealing with Japan of the stage the botanical wonders had been brought under our notice more strongly than ever. (Laughter.) It was quite a botanical and horticultural education to go to His Majesty's Theatre at present. (Laughter.) One saw the cherry blossom pink in colour, whereas really it was of an iridescent hue impossible to reproduce; and in one scene the peony was displayed with the wistaria, when in reality it bloomed a couple of months later. (Laughter.) Mr. Gilbert, in touching on many of our follies, chose as a medium for his play a fanciful land of Japan. He never intended that the play should be supposed to take place in Japan. The Mikado was nearly prevented from seeing the foolights because the Japanese Legation was much upset at the title, and tried to change it. Therefore Mr. Gilbert added, "Or the Town of Titiput." That fanciful Japan had exercised a very strong influence upon the Japan of the stage. If Mr.

applied by the speaker to him or herself? I had, unfortunately, no pencil when I witnessed the performance, and can, therefore, only quote these incidents from memory, but they are only some among many. The inaccuracies in scenery—the famous Italian Abbey of Montecassino, has just brought to light certain ancient parchments of Lake Hakone, of a huge figure of Ojin in a gentleman's reception-room, the mixture in one scene of flowers that bloom at widely-separated period—may well be excused for the sake of the beautiful results. But will the Japanese be impressed by our knowledge and bearing upon the period of the struggle. well be excused for the sake of the beautiful results. But will the Japanese be impressed by our knowledge of the geography of their country when they hear that Kara and his companions, who were apparently in hiding in the Hakone Mountains, were daily fed, before the existence of railways, by carp (a freshwater fish) caught in the Inland Sea, the nearest part of which is over 300 miles away. Of 32 characters named in the bill, there are only seven whose names bear any similarity to those in ordinary use.

LITERARY GOSSIP.

bought in at Sotheby's for £5,000.

Lord Rowton, whose estate is valued at £183,612 gross, and £103,960 net, left instructions in his will for the arranging of the Beaconsfield papers and their delivery to the person entitled to the custody of them.

The following paragraph appears in the Times Literary Supplement :

"Jonson still awaits his editor," wrote Professor C.

H. Herford in his life of the dramatist in the "Dictionary of National Biography." This was in 1892, and not long afterwards Professor Herford was collaborating with Mr. Nicholson in editing the best plays of Ben Jonson for Mr. Fisher Unwin's "Mermaid Series." It is now announced that the delegates of the Orderd University Press have long contemplate. maid Series." It is now announced that the delegates of the Oxford University Press have long contemplated a standard edition of the complete works of Jonson and that they have secured the co-operation of Professor Herford and of Mr. Percy Simpson. The edition will be printed uniformly with the editions of Kyd and Lyly recently issued from Oxford, and will probably fill nine volumes.

"We can" (writes Dr. A. Masson, in his new book, "La Sorcellerie et la Science de Poisons au 17e Siècle") "form an idea of the way in which history was written under the reign of our kings, by the manner in which the Empress of China by the manner in which the Empress of China relates in her own way to her subjects the official history of the late campaign. Even to this day the Sultan is ignorant of the tragic death of McKinley, and believes that the President of the United States died of a cerebral congestiou 'while visiting the Buffalo exhibition.' In Turkey, the death of King Humbert was reported in the official papers: 'The King of Italy died suddenly while bowing to the crowd.' When the late Shah of Persia was assasinated the Turkish papers simplified the news and published. Turkish papers simplified the news and published the following information: 'The Shah felt slightly indisposed in the course of the afternoon, and his body was sent to Teheran.'"

It is now nearly thirty years since Gregorovius published his "Lucrezia Borgia," but Mr. J. L. Garner's translation of this celebrated biography (Appleton) is not open to criticism on the ground that the original has become obsolete. Lucrezia Borgia (the Nation points out) would probably have attracted little attention but for the fame of her father and brother. Gregorovius styles her "the most unfortunate woman in modern his-tory." The innuendoes of Guicciardini, made current by Victor Hugo and a host of minor writers, are such as to blacken any character and create a zero point of moral turpidity, if only they are true. Roscoe, however, believed in they are true. Roscoe, however, believed in Lucrezia's innocence; and Geogorovius, follow-ing up the inquiry with a much fuller grasp of

historical matter of importance interest unknown and bearing upon the period of the struggle between Gregory VII. and Henry IV., of whom Bruno was a contemporary. The Abbot appears also to have left behind him a commentary on Isaiah, which has now been brought to light.

Matters are by no means yet settled between the Abbé Loisy and the Vatican. It is true that subsequent to the decree of condemnation, he has written a statement of submission, but it is viewed by the authorities of the Curia as par-taking too much of the nature of an argumenta-The original manuscript of the first book of tive explanation. Accordingly, acting under in "Paradise Lost," together with a long autograph structions from Rome, the Archbishop of Paris has letter from Jacob Tonson to his nephew, was summoned the Abbé before him, and has placed before him the following conditions: to give a simple retractation, formal and complete, acknowledging the error of his critical method, disavowing his writings, discontinuing his lectures at the Sorbonne, and undertaking to publish no theolo-gical writings for the future without the previous consent of authority.

> Mr. Fredk. G. Jackson, 8A, Park Lane, Leeds, in the Leeds Mercury, questions a statement by Rev. A. Donovan that Norwich is the original of Eatanswill. "I have," he says, "always understood that that honour—if honour it be—rested with Ipswich. This is the more likely, because at Ipswich, Dickens, representative of the Suffolk Chronicle (now merged in the Suffolk Times and Mercury), had actual experience of an election, while he had none at Norwich.
>
> Donovan is right to this extent—that Norwich might have been the original of Eatanswill." Rev. Alex. Donovan, Garton Vicarage, Hull:
> "The identity of Norwich with Eatanswill is
> indicated by Mr. Pickwick himself. 'In Mr.
> Pickwick's notebook we can just trace an entry of the fact that the places of himself and followers were booked by the Norwich Coach' (chap. xiii.), called 'The Eatanswill Coach' (chap. xii.)."

> Some interesting revelations of the literary tastes of prominent American politicians are made tastes of prominent American politicians are made in a recent report of the expenditure of the United States Senate. For their own convenience members of that body may order books through its "document room," the sums expended being deducted from their allowance and consequently made public later in the official accounts. "Smith's Dictionary of the Bible" was obtained in this way for Senator J. K. Jones. Senator Daniel refreshed himself during the debates—or at any rate obtained the means of refreshment at any rate obtained the means of refreshment— by the purchase of "Marcus Aurelius" and "The Charm of Birds." An even more remarkable selection was that of Senator Morgan of Alabama, who is reported in this list as having acquired, by way of the document room, a publication described as "four volumes, Apollo and Keats, Lanier." This book, which must surely be a rarity, cost the Senator only four dollars and eighty cents.

Many will peruse with special interest the tribute paid to Mrs. Grimwood in Brigadier-General Sir James Willcocks' new book, "From Kabul to Kumassi." Sir James joined the force that avenged the massacre at Munipore (or Manipur) in 1891. He writes:—"Among the now shattered remains of the retreating troops was a lady whose name was then on every tongue; Mrs. they are true. Roscoe, however, believed in Lucrezia's innocence; and Geogorovius, follow-ling up the inquiry with a much fuller grasp of the documents, acquitted her of the fatai, the damning accusations. The evidence against Alexander VI. is conclusive, but the stories most unfavourable to Lucrezia sprang from political hostility or from the unpleasant gossip of the Renaissance. She grew up in a society where epicureanism flourished and the Decalogue was neglected. Like the rest of the Romans, she had her failings and deserves reproach, but that is a

Viscount Inouye Katsu left Shimonoseki on March 9th for Korea.

It is officially reported that Prince Pu-lung left Tientsin on March 6th for Shanghai,

The *Jiji*, Asahi and other leading papers in Tokyo were prosecuted on March 9th on the usual charge with regard to military affairs.

Mr. Oya, Osaka, has chartered two British steamers, the Royal and Victoria, to be employed on the line between Kobe and Hokkaido via ports. The line opens at the end of this month.

The Kwansei Railway Company, Osaka, will hold a meeting on March 22nd to discuss proposals to purchase the Kiwa Railway for yen t,093,440 and to raise a loan of yen 900,000 with interest at 6 per cent, per annum to carry out the transaction.

It seems that, having recovered completely from the walking craze, London has taken up wrestling with equal eagerness. A writer in a weekly paper mentions a curious scene on a platform, where a gentleman, waiting for his train, was endeavouring to instil into a friend the difference between the Græco-Roman and catch as-catch-can styles.

The Asahi states that a Korean who is suspected of being a spy employed by Russia has been found among the seven Korean refugees from Vladivostock to Hakodate. His name is Li Yeng. kin. He was to leave there on March 9th for Tokyo.

Viscount Matsudaira Nobuyasu, who was re-cently arrested in Tokyo in connexion with the mining frauds and removed to Utsunomiya, has been deprived of his right to be treated as meer, in accordance with the and clause of Art. 15 of the Peers' Regulations.

Forty officers and four hundred and one men of the nine captured Russian ships—Russian, 250; German, 11; Chinese, 162; Korean, 10; Norwegian, 3; and Danish, 5—who were detained at the Saseho Naval Station left on March 9th by a transport for Nagasaki, where they will be released. Besides, fifteen Japanese had been engaged on board the ships, and they were also

On Friday night when Mrs. H. J. Sharp was returning to No. 60 from the Public Hall, she was thrown violently from her jinrikisha, the drawer of which had turned the corner at Ewata's store too abruphly and brought a wheel up against the telegraph post. Mrs. Sharp sustained several nasty cuts and bruises. On Sunday she was, we are glad to say, progressing favourably.

A surprise, says the Straits Times, awaited the masters of the two vessels which arrived at Singapore from Europe on the 14th Feb. One vessel had 5,000 tons of Cardiff coal for Port Arthur, the other had a large quantity of explosives for the Russians from Germany. The position of affairs was explained to the commanders, and the dealed that their volume to the East might. they decided that their voyage to the East might end at Singapore. The coal was landed, and it is probable that the explosives also will be received at Singapore.

Deep sympathy will be felt for Lord and Lady Ribblesdale, who have suffered so sad a loss by the death of their elder son in the recent action in Somaliland. Captain Lister, while serving in South Africa, was mentioned in Lord Kitchener's despatches for "conspicuous coolness and gal-lantry under fire with Colonel Alexander's column in Cape Colony." Captain Lister got his rank in Cape Colony." Captain Lister got his rank five years after joining, two years sooner than his father obtained a captaincy in the Rifle Brigade with which he served in India and Gibraltar. The tale of heirs to British peerages who have fallen in action during the last few years has been a sad one. Among others, Lord Roberts, the late Lord Dufferin, Lord Thurlow, Lord Rathdonnell, and the late Viscount Frankfort de Montmorency heave all enforced loss in this way. have all suffered loss in this way.

THE LAW COURTS.

AH TICK v. NORTHERN ASSURANCE CO.

This case came up again in the Yokohama. District Court before Judge Danno on March 4th, when judgment was delivered ordering defendants to pay plaintiff yen 9,945 and interest at the rate of 6 per cent per annum from Nov. 1st, 1902, till the execution of judgment. Plaintiff may temporarily seize the property of defendants on depositing yen 1,500.

THE ALLEGED CHEQUE FRAUDS.

The preliminary examination in the case in which one Frenchman and five Japanese—Henry Fouque, Y. Anzai, K. Soga, Y. Mune, K. Fusamura, and S. Uwosumi—are involved, having been concluded in the Yokohama District Court before Judge In the XOKOBAMA DISTRICT COURT DEFORE Judge Tanikawa, decision was delivered on March 5th committing Fouque and Anzai for trial and releasing the other Japanese on the ground that the evidence against them was not sufficient.

According to the decision, the accused borrow-ed in October last yen 310 for the purpose of using the money to carry out a fraud, and deposited the amount in the Russo-Chinese Bank under the false name of H. T. Bremer, receiving a the laise name of 11. 1. Dreiner, receiving a cheque-book containing twenty sheets. On Dec. 6th, 1903, the accused made out a cheque for yen 670 payable to Mr. P. Dourille, No. 164, Yamashita-cho, Yokohama, and one of the accused received the amount from the Chinese exchange shop. No. 72. On Dec. 11th the same year. shop, No. 72. On Dec. 11th the same year, S. Uwosumi purchased a cheque for yen 33 from a Japanese, M. Nakamura, Motomachi, Shi-chome, who had received it from a British gentleman at No. who had received it hom a prinsing entireman at No. 35 (Mr. G. G. Brady). Uwosumi transferred the cheque to Fouque and Anzai. The latter altered the cheque to yen 2,125 and drew the amount from the Specie Bank. Fouque and Anzai also purchased on Dec. 12th the same year a cheque for yen 12 from S. Hugangi Anzai also purchased on Dec. 12th the same year a cheque for yen 12 from S. Uwozumi, who had received it from Mr. J. Kuhn, No. 37, on account of bric-a-brac goods sold to the latter. Fouque and Anzai changed the cheque to yen 13,500 and attempted to cash it on the 14th at the Russo-Chinese Bank, where they were found out but the staff of the hank. On the form

Viscount Matsudaira Nobuyasu was arrested on March 4th in Tokyo and removed to Utsunomiya. March 4th in Tokyo and removed to Utsinomiya. The charge is stated by Tokyo papers to be connected with a case of fraud which is under pre-liminary examination in the Utsunomiya District Court. S. Kamishimo and two others had received yen 24,000 from a farmer, G. Kurosaki, in the village of Takanesawa, Hoga, Tochigi prefecture, as the price of the Tabikawa silver mine, which did not belong to them, and the Viscount is alleged to have assisted them in the business.

The ground of the charge was that previous to the general election, the accused printed about two thousand anonymous postal cards in which he vilified S. Horiya, another candidate, and cir-culated the cards among the electors with the purpose of preventing the other's election.

TAMAMURA v. ALLEN.

A case instituted by K. Tamamura, photographer, against Mr. G. R. Allen claiming yen 97.60 and interest came up in the Yokohama Local Court before Judge Iyeiri on March 10th.

Plaintiff's counsel stated that Mr. Tamamura

Plaintif's counsel stated that Mr. Tamamura sold to defendant on Sept. 22nd last 2,500 collotype illustrated postal cards and 300 bromide illustrated postal cards for yen 50 and yen 45 respectively, and on the 17th of the same month 80 bromide illustrated postal cards for yen 9,60, and on the 3rd of the same month, 3 illustrated cards for yen 3, making together a total of yen 107,60. A discount of 2 per cent, was to be allowed on the lot of 2 seo cards and 20 per allowed on the lot of 2,500 cards and 20 per cent. on the lot of 300, which altogether amounted to yen 10.

Defendant contended that he did not buy the 300 bromide postal cards among the several lots identified by plaintiff, but the former received it from the photographer on consignment. Defendant sent it to his customer in America, but it was rejected by the latter which information the former received by the last Tacoma mail, about ro days ago. Defendant refused to accept the

claim of yen 45 for the lot of 300 cards.

Plaintiff's counsel further stated that defendant had ordered the photographer to make 300 bromide postal cards. After the work was finished, it was found that the cards differed from the specimens given by defendant, so that plaintiff made another lot which were an exact reproduction of those ordered by defendant. When all the work was finished the spoiled lot was also offered to defendant on consignment. Of course, plaintiff was not claiming for the latter.

which the hearing concluded, and judgment was reserved till March 12th.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

A few months ago Mr. Ebina Danjō's "Life of now Christ" reached its seventh edition. What this may mean it is impossible to conjecture, as in this country an edition may mean anything from 100 copies to several thousands. But in the preface to the seventh edition Mr. Ebina says that the circulation of the work has been quite twice as large as he anticipated. He gives two reasons desired. as large as he anticipated. He gives two reasons for the favour which the book has received, one being the comparative paucity of lives of Christ found out by the staff of the bank. On the foregoing facts, they must be dealt with in accordance with the first clause of Art. 209, 1st and 2nd a desire to find out wherein Christ was superior clauses of Art. 390, and also Arts. 397 and 394 to all other men. In Mr. Ebina's "Life of of the Penal Code. in this country and the other being m wide-spread feeling of dissatisfaction with existing ideals and be likely to be of special interest to foreign readers. It is principally historical, the details given being culled from the four Gospels. Certain controversial questions, such as the comparative authority of the four gospels, the interpretation to authority of the four gospets, the interpretation to be put on certain passages, and the claim of the records to give the actual words of Christ, he treats in a cursory manner. His view is that Christ, though not God, is more than man. He says on p. 21 of his new preface, "Let us leave of the control of t off trying to determine exactly what place Christ occupies in the superhuman world and concentrate our attention on the fact that He was in God and God in Him." The tone business.

INFRINGEMENT OF THE ELECTION LAW.

N. Ito, one of the parliamentary candidates in Vokohama at the last election, who was charged with infringement of the Election Law was sen
business.

In the supermunan world and concentrate our attention on the fact that He liness shown towards her by England and America was in God and God in Him." The tone of this remark and of some others in the volume two countries that Japan has adopted all that is before us betrays a feeling of weariness caused with infringement of the Election Law was sen
business.

cocupies in the supermunan world and concentrate our attention on the fact that He liness shown towards her by England and America is the fact that it is fully recognised in these two countries that Japan has adopted all that is before us betrays a feeling of weariness caused by profitiess theological controversy. The

the Pari Mutuel has reached four figures. Such are the vicissitudes of "having something on the race."

Deep sympathy will be felt for Lord and Lady Ribblesdale, who have suffered so sad a loss by the death of their elder son in the recent action in Somaliland. Captain Lister, while serving in South Africa, was mentioned in Lord Kitchener's attention is not attracted by Mr. Lolina's method of stating the events which are given to us in the Four Gospels. Neither Professor Seeley's Ecce Homo nor Renan's Life of Christ do more than present a certain side of Christ's character, but they do it in a most fascinating manner. their special line these books have never been surpassed. But Mr. Ebina's work in Japanese carries no such literary charm with it. After reading the work through, a scholar observed to us a few weeks ago Shumi nashi, "It lacks flavour." Mr. Ebina has written many better things.

In an article on "Theological Colleges" the Kirimtokyō Sekai says that it is getting to be universally recognized in the United States that Christian ministers must be highly educated men. In that country for a very long time the great universities have been largely utilized for training ministers; and more than this, most of these universities had a Christian origin. In some churches it is imperative that candidates for the ministry should be graduates of a university. They are afterwards required to undergo special theological training for three years. The Methodists and Baptists were formerly rather fond of pointing Baptists were formerly rather fond of pointing the finger of scorn at high education for ministers. But in recent years their views have greatly altered in this particular. In America the Moody Institutes, which make a specialty of hasty preparation of evangelists are gradually losing their popularity, it being said that they turn out very inefficient men. Quick education is felt to be in most cases defective education. It is realized that a theological specialist should bear the marks of having been as carefully trained as a marks of having been as carefully trained as a scientific specialist. Ministers can only lead public opinion when they show themselves to be thoroughly abreast of the times. An ignorant pastor brings reproach on the cause he seeks to further. Japanese Christian pastors do not receive anything like the amount of respect as also offered to defendant on consignment. accorded to ministers in the West. In many f course, plaintiff was not claiming for the latter. cases they are held in the same contempt as The parties introduced their evidence, after ignorant Buddhist and Shinto priests. If we ignorant Buddhist and Shinto priests. If we aim at making our churches entirely independent of foreign missionaries, says the Kirisuloho Sekai, it goes without saying that the status of the Japanese Christian pastor must be raised to a higher level and this can only be done by giving him a higher education. We are now contemplating sending Japanese missionaries to China, Korea and Siam. It would be a shame to us not to send well educated men. a shame to us not to send well educated men. We want a new kind of theological education We want a new kind of theological education here—an education that shall break away from Occidental precedents and be based on Oriental philosophical and religious notions. We do not desire to send to neighbouring countries mere copy of the Western Christian minister, but a man copy of the Western Christian minister, but a man who shall show signs of having been east in an Oriental Christian mould. This it is that will give to our evangelistic efforts in the adjacent continent a guarantee of success of primary importance. Can not our churches by a judicious selection of materials and methods devise a system of theological training suited to the east in which of theological training suited to the age in which we live and to our position in this Far Eastern part of the great world?

Writing on the war, the Kiristokyō Sekai says that Japan must resolve that from beginning to end this war shall be carried on in a highly civithe end this war shall be carried on in a mighty cruised way. There are, says this organ, a certain class of Japanese who fail to see that Japan. He has anything to do but fight and win. But the moral responsibilities of Japan in this war are by no means few. Japan has always to remember that the principal reason of the friend-

is to show to the Orientals with whom she is brought into close contact what the civilisation religious doctrines appear intensely silly. To all which she has so recently adopted actually is, ordinary men in most countries death has been which she has so recently adopted actually is. There will be numerous opportunities for doing this. Some people may say, continues The Christian World, that the Russians are Christians and we are not. In name this is so, but if actions and principles be considered, the Russians are not Christians, while the Japanese nation, though professing no Christianity, acts in a Christian way. At this serious crisis in her national life, Japan must remember above all things that she is fighting for justice and fairplay, and in the cause of humanity and enlightenment. It she is fortunate enough to establish her supremacy in the Far East, then she must be prepared to use her new position in a manner that shall win the approbation of the most advanced Western nations.

The Kirisutokyō Sekai is publishing long accounts of Mr. Gladstone, whose striking per-

sonality and religious zeal have attracted much

attention in this country.

This organ highly approves of the attitude of Bishop Nicolai and the leading Greek Christians in the present situation. It considers that Christians of other denominations would do well to imitate the Greek Christians in refusing to mix Our gentle-folk quietly put up with existing reli-up politics with religion. All Christians should try to allay rather than increase the hostility felt where. To think there can be no real goodness towards the Russians as a nation.

The new Christian Hymnal published by the Methodist Publishing House is reviewed at so length in the Kirisutokyō Sekai under the title Kasei Sambika wo Yomu. The notice is still incomplete. Exception is taken to some of the the subject here.

* * *

Several Christian organs condemn the attitude of the Socialists to the present war. The Heimin Shimbun and other socialist organs denounce war in the abstract as an outrage committed against humanity, and certain writers have gone as far as to say that rather than allow their children to be to say that rather than allow their children to be employed as soldiers they would subject them to any penalty that might be imposed. In a speech delivered by Mr. Ibuka on "Christian Ethics," which is published in full in the Fukuin Shimpō (No. 451), the attitude of modern Christians to war is discussed. Mr. Ibuka says that the Quakers are the only Christian sect that object to war in loto on principle. All other sects regard it as a necessary evil. As long as nations value their independence and claim certain rights, with the world constituted as it is, situations are bound to arise when questions can only be settled by an appeal to physical force, says Mr. Ibuka. To refuse to make use of physical force to put down evil on any occasion would soon mean that the world would be overrun with rogues.

world would be overrun with rogues.

In another part of the same paper, under the title Ryōshin Dohuritu (An Independent Conscience) it is pointed out that the Socialists are endeavouring to establish an unbearable state of thraldom of thought. It is the teaching the little country this over the overn, that man's will ing of the Bible, says this organ, that man's will has been purposely left free to choose what is to be believed and what rejected. The Socialists have no right whatever to interfere with the belief even of their own children. While trying to figure as the friends of liberty, they are doing their best to set up a system of despotism that savours of the middle ages.

In an article published in the February number of the Tuiyo from the pen of Mr. Omachi Keiof the Tano from the pen of Mr. Omachi Keigetsu on literature, there is a passage bearing on
the attitude of educated Japanese to religion
which is worth quoting in full. The title of this
part of Mr. Omachi's essay is Mushikyo Koku no
Bungei (Literature and Art in a Religionless
Country). Foreigners, says Mr. Omachi, when
told that Japan is without a religion are very
surprised and at once conclude that virtue can
put have been designed among us since in the West they regard religion as the chief means of developing virtue. Yet wisely Goethe has said :— freedom to go out alone to visit friends during "Those who have learning and a knowledge of art already have religion. Religion is for those who have not these things." It is the superstitious art already have meligion. Religion is for those with resolution. They regard death as of less inwho have not these things." It is the superstitious who need religion. To those who have freed even a subject of inquiry."

themselves from the trammels of superstition many regarded as a problem which demands thought and attention. There are in Western countries many great men even who have not been able to face death with resolution. But in Japan no education is needed to enable a man to meet death with a quiet mind. Nihon ni oite wa hippu to iyedomo, omoikiri yoku; isshi (... Æ) chiri yori mo karoku, hotondo mondai to narazu*. The Japanese needs no religion with its promise of a future life to enable him to meat death with resignation. To him life only appears strange, and death is regarded by him as a return to m former condition. This is all the Japanese needs to enable him to pass his life in freedom from care. Religion is, however, considered necessary at his funeral. And so it comes about that priests exist, who may be regarded as "burial agents." We may if we will call them beggars, as they live on charity. They may not be able to preach, they may be profligate, they may spend their time in shooting, but nobody is unreasonable enough to find fault with them as long as they conduct funerals. Our priests live on our charity. They are a race of beggars. without religion shows no little ignorance. With no God to worship and no immortal soul to think about, educated people can pass their lives very pleasantly in the enjoyment of all that nature and art have bestowed on them. For their incomplete. Exception is taken to some of the changes made. But we have no space to go into the solace and diversion of their minds their minds literature and art provide abundant material. For those who have got rid of superstition, to feel free to range about at will over the world of litera-ture is pure delight. To study in order to get pleasure only the first stage of the scholar's life. He passes on to seek wisdom from his teachers. He sits at the feet of the world's great thinkers. He examines with intense admiration the masterpieces of art and literature. What better teachers can he have than these? Of what use to him is the religion which satisfies the uncultured mind? He feels for the first time in his life that he is above it (Hajimete shākyō ijō no kōryoku arī). On the stage in front of which he sits tragic pieces end happily and the comedies afford him perpetual delight. So writes Mr. Ömachi Keigetsu.

> An Ethical Society known as the Teiyū (丁酉) Rinrikai, founded 18 months ago, publishes every month a series of papers on ethical subjects. These papers have all been read before the Society and discussed. The small volumes of Transactions which have been issued amount to 17. Glancing over the list of subjects treated, we find that quite a number of learned speakers have discussed the question of the relation of the sexes to each other in new Japan. That woman is destined to occupy a new position in this country is generally recognized by teachers of ethics, no mat-ter to what school they belong, but we find that few are prepared to admit that the American wife or even the English wife furnishes a suitable model for Japan to follow. The breaking down of the barriers that have divided the sexes from each other in the whole of the Eastern world, it is maintained, cannot be accomplished rapidly. Japan to-day is prepared to adopt many modifica-tions of her old regime in respect of the social intercourse men and women may have with each other, but it is stated that great evils have resulted from but it is stated that great evils have resulted from attempts to force the pace in this matter. Nos. 15 and 16 of the Transactions of the Society contain two long papers on the relations of the sexes to each other—one by Mr. Nakajima Tokuzō entitled *Danjo Kosai Ron* and the other by Mr. Shimoda Jirō entitled *Danjo no Kosai in Isakile*. We have no space to deal with these essays here.

*" In Japan the most ordinary people meet death

the day, and in company with male relatives or female companions at night. They also urge the importance of creating many new occupations for women in order to encourage the spirit of independence among them. But the general feeling seems to be that expressed by Mrs. Ōsuka in No. 16 of the Teiyū Rinrikai's Transactions. She says that, with Japanese sentiment as it is to-day, the indiscriminate mixing in churches or elsewhere of young men and young women and encouraging them to talk to each other are most unwise. In its inceptive stages the new departure advocated must be marked by extreme caution, says Mrs.

Among serious-minded young men who have made a special study of religion in Japan and in Europe, Dr. Anezaki Masaharu occupies a unique position. He is deeply in earnest. He realizes fully all the dangers that attend such an age of transition as that through which Japan is now passing, and it is his desire to be a builder rather than a destroyer. Dr. Anezaki may be said to be a product of the present age, and he bids fair to become a leader of thought among a certain section of soberminded young men, who greatly admire his talent, industry, zeal and quite aristocratic refinement of nature. For some years past Dr. Anezaki has, in articles contributed to the Tuiyo and other articles contributed to the Tayo and other magazines, frequently given indications that he has been searching for a moral ideal. He seems to have found it, if we may judge from a very interesting lecture delivered to the young men who attend the Teiyū Rinrikai meetings, published in Vol. XVI. of their Transactions with the Science was feed to the American Sections was feed to the vol. Young Men); although he does not make it entirely clear what this ideal is. As I was coming to this meeting, says Dr. Anezaki, I overheard a remark made by one of the students now listening to me. On being asked the subject that I was likely to treat, this student replied, "He is a man who is fond of discussing the true aspects of an ordinary subject (Heibon no koto wo shinmenmoku 真面目 ni yaru hito da). That is just what I intend to do, proceeded Dr. Anezaki, the outline of whose address we give below. This is an age in which men's minds are much confused by the number of conflicting ideas with which they come into contact. Some young men have no moral ideal at all. They fancy that it is enough to be loyal to their country and their rulers, or they aim at what they call "success in life," which is something very inferior in character and often disappointing when attained. Now, taking our human life as we find it, what is the proper way to look at it? It is quite certain that we must each one of us steer our own special course across the ocean of life with the help of such guidance as we can obtain. We can only adopt such of the teaching of other men as suits our special natures.

There is nothing that we should set a higher price on than our own individuality-that must be developed at all costs. If we cannot find what we specially need in one religion, we can seek it in another; and if no existing religion satisfies us, we can compile a creed for ourselves. What is all important is that we should have some kind of a creed, and that we should implicitly trust that creed. An ideal which we feel we can never realize in any tolerably satisfactory degree is not of much practical use to us. Men do not succeed have a real love for what they wish to follow. There is enormous strength to be derived from fixity of purpose. I can recommend no better model for your imitation in this respect than the career of Columbus. After much research and reflection he formed the idea that he lived to see realized. The whole world was against him, but it did not discourage him in the least. In these days there is much talk about the conflict between science and religion. But in the case of those convictions which all really earnest and serious-thinking persons possess, in reference to the deeper questions of life, nothing that science teaches can affect them. That which a man's own heart teaches him he will hold to through thick and thin. Let it be your ambition before

all things to have one definite object in life—to certain statesmen, Buddhism was relegated to a have a mission and to seek to fulfil that mission. Try to fill a place that no other man can fill so well as you. There is no joy in life like feeling that one's own special ideal has been realized.

In Nos. 13 and 14 of the Society's Transactions appears a very long essay penned by Mr. Yoshida Kumaji on "Progressive Morality." It discusses all the principal theories bearing on this subject and comes to the conclusion that accord-ing to the standard followed by the most advanced nations, morality has even in the past 50 years, to say nothing of earlier periods, made most distinct progress. The obligation to treat all human progress. The obligation to treat all human beings and even dumb animals with kindness, other by taking into consideration the welfare of the communities of which the individuals are component parts, that is this relation becomes organic and operates so as one unit is always assisting another. (3) A tendency to establish a system of morals on a basis sufficiently broad to serve for different nations and different races and even for the professors of different religions.

In the Kyōiku Sekai we find an interesting article by Mr. Inagaki Manjirō, Japanese Minister in Siam, entitled "Japanese Buddhism and Siamese Buddhism," the substance of which we give below:—I am of opinion that Japanese Buddhism is inseparably connected with our life in this country just as Siamese Buddhim is connected with Siamese life. But in the position the religion occupies in the two countries there is a wide difference. Every stage in the life of a Siamese is marked by the performance of a Buddhist ceremony. When a child is born a priest is sent for to offer up prayers and read portions of scripture to the household. At the age of 12 or 13 both boys and girls are supposed to reach their majority and the priest is again called on to perform a ceremony. In the case of marriages or of entering a new In the case of marriages or of entering a new house there is invariably a religious ceremony. Till this is over no feasting takes place. After death comes the solemn religious funeral. It is perhaps in consequence of all this that the priests in Siam rank even higher than the king himself. In that country even the king salutes the priests in a most humble attitude. In Siam, no matter how high a man's rank may be, he is expected to have his head shaved and to don the priest's dress for at least 2. and to don the priest's dress for at least 3 months during his early life. Even the king is not exempt from this rule, and the present king has already complied with the requirement.

Any nobleman who omitted to observe the practice would be deemed unworthy of the rank of a peer. The enormous influence wielded by a whole to condemn the class of writing referred Buddhism in Siam depends largely on the high to, it would stop. But the fact is that even position to which the customs of the country have among well educated and refined people in this exalted it. In order that religion may make itself felt in every department of political, business candal of all kinds, and it is constantly found and social life it must command universal respect in the way that Buddhism does in Siam. This may be said to be the case to a large extent with both Roman Catholicism and Protestantism in the West. There, too, all the great events of human life are celebrated by some kind of religious ceremony. In the case of most of our Japanese is impossible, says Count Itagaki. He goes on Buddhist sects there is none of this close connection with society. With the exception of the Shin to be developed in certain large sections of the sect the tendency is all in the direction of separa-tion. Our Buddhism makes too much of the next life and too little of this. If Buddhism aims at becoming one of the civilising and enlighten-ing factors of the twentieth century in the country, she must adapt herself more to the present spiritual needs of society generally. Mr. Inagaki next goes at some length into schemes for commemorating the conveyance of Buddhist relies to this country, advocating a plan of his own. He then continues thus:—I have a remarriage to propose, which is no other than that of our higher classes with Buddhism. When at the beginning of the Meiji Era, at the suggestion of

what was known as haibutsu ron (Anti-Buddhism) for a time carried everything before it and resulted in the severance of the connection which had previously existed between our upper classes and our Government with the Buddhist religion. In this we went too far, and I should like to see a reversion to the old order of things. An impar-tial review of Japan's progress in the Meiji era could not fail to notice the fact that in religion, art, literature, invention and charity we have not kept pace with the military and naval progress made. On account of our naval and military acknowledged in all highly civilised countries, is one conspicuous instance among many. The distinctive marks of modern advanced ethics Mr this. Is there not great danger attending a dedistinctive marks of modern advanced ethics Mr this. Is there not great danger attending a development that is so one-sided? The feeling of the nation in reference to this subject is displayed activity; a high regard for practicality and a dislike of mere empty ceremonial. (2) A desire to regulate the relation of individuals to each vernment as compared to those conferred on great other by taking into consideration the welfare of development we have won renown among the nations. But we ought not to rest satisfied with artists, writers, religious teachers and the like. There exists no national shrine (shokonsha) where the spirits of the great, peace-loving benefactors of our country are worshipped, and it is not on these benefactors that our highest titles or decora-tions are bestowed. We have no Westminster Abbey where lie the ashes of our Mustrious dead, Abbey where he the ashes of our flustrious dead. Many of our greatest heroes he buried in obscure corners of the country where their very names are in danger of being forgotten. In order to show that as a nation we appreciate the merits of the inventor, the artist, the moralist, the educationist and the author, let us collect money and erect a building worthy in every way of the noble object to which it is to be devoted, in which shall be deposited the remains of all men for whom be deposited the remains of all men for whom even a state funeral would prove an inadequate token of the honour in which they are held by their fellow-countrymen. We need as a nation to rise to higher ideals in respect to the relative merits of men. The divorce of religion from the State in my view was a retrograde step and I should like to see a reunion.

> In a recent member of his organ, the Ynai (Faternite) Count Itagaki uses very strong, but none too strong, language in reference to the iniquities of the yellow press of Japan. The name these papers have received in this country is Akutoku Shimbun, "Newspapers that trade on Vice." This is precisely what they do. The previce. This is precisely what they do. The pre-tence that in writing about vice they promote virtue deceives nobody, says Count Itagaki, since everybody knows that the persons who eagerly read the dirty paragraphs to be found in low-class newspapers are far more likely to be encouraged in their crooked ways by what they find recorded in these sheets than to be persuaded to reform their lives. Count Itagaki contends that the only way to stop this abuse is to educate the general community more attention than columns of useful information. Till this morbidity of taste is cured the extinction of the journals which trade on vice community. There is no compunction about dragging out to light the most revolting subjects. Napoleon's remark that a newspaper is more verful than a regiment of soldiers is quoted, and the Count records his conviction that in a large number of cases in this country the power of the press is used for evil namely, as a means of fanning the flame of those human passions that most need repression or lawful gratification; and while this is so, concludes the aged politician, the thorough reform of society may be regarded as away in the dim distance.

bas for some time past been publishing carefully prepared summaries of the views of great Western theologians and philosophers. Having discussed fully and with considerable insight the views of Spinoza, Mr. Ebina has passed on to Leibnitz. In the February number of the magazine the In the February number of the magazine the opinions of this great man on certain selected topics are stated in a very clear and concise manner. The subjects on which Leibnitz is quoted are:—(1) The Monad. (2) The foundation of religion. (3) The relation of Christianity to other religions. (4) The essence of religion. In reference to heading 3, Mr. Ebina says, Leibnitz knew little about other religions compared to a scholar like Lessing, but he hald that all ed to a scholar like Lessing, but he held that all religions alike are the results of the use of man's reasoning faculties, and so it comes about, says Leibnitz that where these faculties are the most highly developed there will be found the highest form of religious belief.* The foundation of religion he considers to be man's nature, which he takes to be considers to be man's nature, which he takes to be derived from the supreme monad or printive unity, the simple original substance, which he calls God. Men are all created monads, which approach the Divine monad in nature according to the measure of their perfection. After comparing the religious views of Spinoza and Leibnitz, Mr. Ebina goes on to show how in later ages religious development of an important kind was obtained by a combination of the two views of

obtained by a combination of the two views of man's relation to God.

When writing on the state of Japanese thought Mr. Ebina, like Mr. Matsumura Kaiseki, grows very pessimistic. An article on "School Ways and Parents' Ideas" in the February number of the Shinjin denounces modern educational methods and condemns the majority of students as flippant, idle and without an object in life. According to Mr. Ebina this is not the result of the Government education imparted, but of a variety of other causes into which we cannot go here.

CORRESPONDENCE.

POSTAGE TO NORTH CHINA.

To the Editor of the "Japan Mail."

Sir,—Please allow me to acquaint the public through your paper with the fact that a notification has been issued by the Communications Department to the effect that the transmission of the postal parcels destined for North China, viz. Peking, Tientsin and Chefoo, has been reopened since the 1st inst.

Yours faithfully,

Supt. of Foreign Mails. Yokohama, 4th March, 1904.

THE NEW "SAMBIKA."

(To the Editor of the "Japan Mail.") (TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Although we Japanese are thankful for what is done for our church singing, and although we greatly appreciate the trouble taken by the Committee appointed to revise the newly-printed "Sambika," might I call the attention of the Committee to the fact that there are, in the new book, a large number of very serious mistakes in harmony. I might say that in looking through the book I have found that the very first, the fundamental rules of harmony, have been broken. This is so in the following hymns;—66 (2), 65, 159, 765, 188, 191, 311, 313, 431, 440, 442, 444. Those in italies particularly abound in errors, in form as well as in harmony. The following have equally bad mistakes in harmony, and I find, on comparison, that this is different from the originals: 34, 48, 54, 82, 91, 126, 171, 183, 180, 195, 199, 205, 259, 260, 271, 274, 317, 321, 228, 346, 351, 418. In my opinion, also, the beauty of the original music has been lost more or less by alteration of the harmony of the following:—30, 60, 168, 175 (2), 213, 223, 264, 341, 372, 412, 419. I might add that among those so altered are "Pleyel's Hymn," "University College," and compositions by Dr. Dykes and Sir Arthur Sullivan!

I have taken some care to study music and have learnt to angreciate good harmony, and I recreet these

and Sir Arthur Sullivan!

I have taken some care to study music and have learnt to appreciate good harmony, and I regret these faults and changes more than I can tell. I therefore hope that more care will be taken next time the book is printed. We Japanese need education in good music as much as we do in other subjects.

With respect, I am, Sir, Yours truly,
Daito, March 4th.

KENRI.

THE SIX-ASIDE FINAL

(To the Editor of the "Japan Mail.")

(10 THE EDITOR OF THE "JAPAN MAIL.")

SIR,—With reference to the report of the "Final in the Y. C. & A. C. Association Football Sixes," which appears under the heading of "Football" in your issue of this morning, it is very much to be regretted that the so-called "Final" of this hardly contested "six-a-side" competition should be allowed to drift into a "five-a-side" practise game, played, with unprecessarily, in couring ratio of units unprecessarily. quite unnecessarily, in pouring rain on unfit ground.

PLAY THE GAME. Yours faithfully.

(TO THE EDITOR OF THE " JAPAN MAIL.,")

SIR,—May we be permitted to express our surprise at the appearance of such a letter as that signed by "Play the Game" in your issue of this morning. The meaning of the pseudonym employed can hardly be clear to the mind of the correspondent. Does he think that rushing into print on such a matter is compatible with the principles of the instincts of sport and fair play which have given rise to the adoption of the motto named?.

our mind, a much better understanding of "playing the game" in making the best of existing circum-stances than by falling back on the far too frequent

policy of indefinite postponement.

As to playing football in pouring rain, may we suggest that the Committee provide a stock of cheap but strong umbrellas for use in next season's matches whenever the clements are unfavourable! Yours faithfully, Yokohama, March toth, 1904.

THE LATE DR. HARRELL

TO THE EDITOR OF THE " JAPAN MAIL"

Sta,-The enclosed extract taken from the Baltimore American of January 22nd will be of interest to some of your readers. Dr. Harrell came to Japan in the year 1884 as a Missionary physician, connected with the American Episcopal Mission. In 1887, he with the American Episcopal Mission. In Tooy, he resigned his appointment and became a teacher in the Upper Middle School in Sendai. When his contract expired, he returned to the United States and lived in the State of Washington and later in New York. He went as a Surgeon to Manila during the war and after his return thence became interested in mines in Mexico.

J.T.C.

The funeral of Dr. F. W. Harrell, who died last Tuesday at the Waldorf-Astoria Hotel. New York, took place on Jan. 21 from the residence of his mother, Mrs. E. R. Harrell, 2032 Maryland avenue. The pall-bearers were Drs. Hiram Woods, Alfred R. Giles, E. W. Eilau, Herbert Harlan and Flannery, schoolmates of the deceased when studying medicine in Baltimore, and Messrs. William B. Nolting, J. R. Hageriy and Alddrich Young. Rev. J. G. Murray, assisted by Rev. D. Prescott Allison, of St. Michael and All Augels' Protestant Episcopal Church, conducted the services. Interment was made at Antonaci and All Angels Protestant Episcopal Church, conducted the services. Interment was made at London Park. Dr. Harrell is survived by his widow, who was Miss Carrie Elizabeth Ballagh, daughter of Dr. James A. Ballagh, of Tokio, Japan, and sister of Prof. J. C. Ballagh, of the Johns Hopkins University; two children, a sister (Miss Evlyn E. Harrell) and his mother (Mrs. E. R. Harrell). Dr. Harrell was manager and part owner of a number of size. and his mother (Mrs. E. R. Harrell). Dr. Harrell was manager and part owner of a number of silver mines in Mexico. He was taken ill on January 11 with a chill, and lived but a week, succumbing to double pneumonia, kidney trouble and heart complications. He was born in Suffolk county, Va., and was 45 years of age. He graduated from the University of Maryland and took a post-graduate course at the University of Pennsylvania. Among the floral designs received from friends of the deceased was an immense wreath from Mr. Frederick B, Rhodes, a nephew of the late Cecil Rhodes.

London, February 13.
All the commissioned and warrant officers of the All the commissioned and warrant omeers of the British Navy who have been retired, but are eligible for service, have been communicated with by the Admiralty Board. Test mobilisations are being made. Gun-practice is being held in all of the gun barracks. The main idea in the minds of those who are trying to explain this move on the part of the Government is that Great Britain anticipates in the of the motto named?.

Everyone knows how difficult it is to get even twelve men to turn up on a field at a given hour. Taking into consideration the limited time at the disposal of the individual members of the teams, the lateness of the season (the ground being, we understand, only open for football by special permission during March), the departure of certain members for. Kobe at the end of the week, and the unsettled state of the weather at this period of the year, it shows, to our mind, a much better understanding of "playing the best of existing richms." In making the best of existing richms. that such a trend of international relations is the possible prelude to a crisis, which may involve several other European Powers in the Far Eastern imbroglio. The general public views with satisfaction the determined stand that the Government seems to have taken with regard to the passage of the Russians through the Dardanelles, and the action of Egypt in probibiting war vessels from coaling in the Suez Canal.

Copenhagen, February 13.

The British Government has enquired if the Danish Government is prepared to defend Denmark's neutrality, especially the important sear routes. Denmark replied in effect: "We will defend ourselves." The replied in effect: "We will defend ourselves." The construction placed upon this inquiry here, is that Great Britain appreciates the danger of Russia occupying Danish fortresses in the event of complications between Great Britain and Russia over the Far Eastern question. In consequence of the possibility of such an outcome, the Danish War Department has ordered the Army Reserves to be ready for mobilisation thoroughout Denmark within twelve hours. All the regimental offices are open day and night.

One of the most serious bits of news at this moment is the confirmation of the statement that aboard the Japanese vessels of war attacking Port Arthur were a number of American Naval officers. This caused something akin to a feeling of consternation among the Russian officers. On Wednesday the Tsar summoned to the Winter Palace all the officers, even down to the subalterns of the Guards regiments now in St. Petersburg, and addressed them, saying:

"As unfortunately the country is at war it is expected the Guards will do their duty nobly and share the deprivations and trials and, it is howed the glosy.

the deprivations and trials and, it is hoped, the glory

No official publication has been made of Viceroy Alexief's telegram in reference to the damage to the

Alexieff's telegram in reference to the damage to the Japanese ships by the Russian fire.

The Tsar has himself issued the strongest orders that no news whatsoever be communicated through the Headquarters staff. Further, he is deeply annoyed at the attitude recently adopted by the Russian press of writing upon the political situation in a way calculated to raise enmity toward Russia by England, and also, very specially America. For instance, the St. Petersburg Gazette has been prohibited, not as generally is supposed for publishing false news about the war, but because of an accompanying article highly insulting to England. The Tsar wisely considers it the poorest policy to make bitter enemies at such times as these.

Grand Duke Cyril, a cousin of the Tsar, and Grand Duke Boris, the Tsar's uncle, are about to proceed to the seat of war.

to the seat of war.

to the seat of war.

In view of possible eventualities, it was resolved to place the whole country upon a war footing, so as to be able in case of need to meet any possible attack from three sides. All the Guard regiments, with the exception of those forming the First Division, have been ordered to hold themsives in readiness for active service. Parties of these have already left for the Far East and others will follow from day to day.

The avtillary of the guard have also received orders.

sidence. He killed three persons and wounded 25.
He tried to commit suicide, but was secured.
London, February 15.
The Home Secretary, Mr. Akers-Douglas, announced in the House of Commons to-day, that the mounced in the House of Commons to-day, that the British Government not only had not been approached with a suggestion that it should consent to the Russian Black Sea fleet passing out through the Dardanelles, but there was no reason whatever for supposing that Russia contemplated such a violation of her treaty obligations to the European Powers.

St. Petersburg, February 15.

An issue of 50,000,000 ruble credit notes secured by gold was made on February 15th. A comparatively small influx of circulating credit notes into the Treasury and the Imperial Bank and the increased withdrawals for the Far East are assigned as the reasons for this action. The total of the credit notes in circulation on February 14th was 680,000,000

rubles.

Captain Stephanof, who was blown up with the torpedo gunboat Yenesei, and who himself invented the system of laying submarine mines which is considered responsible for the catastrophe, had caused the Yenesea to be fitted with his device for the rapid laying of mines whereby a trolley line extended beyond the vessel's stern along which the mines slid out and dropped into their appointed places. This plan did away with the cumbersome work of laying the mines from small boats. The accident was due to the excessive strain on the Yenesei's anchor cables while the mines were suspended pending immersion. The two cables snapped and one mine collided with

another.

St. Petersburg, Feb 16.—The departure of Vice-Admiral Makaroff, the ice breaker specialist of the Russian Navy, and until recently Commander-in-Chief at Cronstadt, to take the place of Vice-Admiral Stark (in command of the Russian fleet at Port Arthur), was marked by impressive scenes.

Voluntary contributions to replace the place of the place

Voluntary contributions to replace the ships already destroyed by the enemy, are assuming large proportions, one man having given the sum of \$20.000. It was through m similar movement that the present yolundeer fleet was started after the Russo-Turkish

It was through a summa nor controlled was through a started after the Russo-Turkish War.

The text of the order of the day issued to the Russian troops by Viceroy Alexieff on Feb. 16th is as follows:—"An heroic army and fleet have been entrusted to me by His Majesty the Emperor, and now, when the eyes of the Tsar of Russia and of the world are upon us, we must remember that it is our sacred duty to protect the Tsar and the Fatherland, Russia is great and powerful, and if our foe is strong, this must give us additional strength and power to fight him. The spirit of the Russian soldiers and sailors is high. Our army and navy know many renowned names which must in this hour serve as an example to us. Our God, who has always unheld the cause that is just, is doing so now. Let us unite for the coming struggle; let every man be of tranquil mind, in order the better to fulfil his duty, trusting in the help of the Almighty; and let every man perform his task, remembering that prayer and service to the Emperor are never wasted. Long live the Emperor and the Fatherland. God be with us. Hurrah!"

frozen to death while marching across Lake Baikal, Eastern Siberia. The correspondent adds that the temporary railroad across the lake it not yet completed, that a large detachment of troops was sent on a 22 mile march over the ice-covered lake, and that it is presumed that part of these troops lost their way in a snow-storm and perished.

Washington, February 17.

Rear-Admiral Evans transmitted to-day to the American Navy Department a cablegram from Commander Staunton, of the gunboat Helena, now in dock at Newchwang, in which he says conditions there were greatly disturbed, and that he is vigorously investigating the report that Russian officials have delayed American and British merchantmen. In the event that the American Consulate is endangered, it is stated that Commander Staunton will land blue-jackets and marines. There is every wish on the part of the United States Government not to give the slightest cause for complaint, either by Russia or Japan of intervention, but the unalterable American policy of protecting American intests at all hazards will be adhered to.

New York, February 18.

A St. Petersburg correspondent, according to a cablegram to the Wireld from London 2005.

A St. Petersburg correspondent, according to a cablegram to the World from London, says: "I learn from official sources the news of a dramatic sequel to the Russian disaster at Port Arthur on February 9th. After the attack by the Japances, Viceroy Alexieff summoned before him the Russian Rome, February 11.

Admiral Candiani, who commanded, the Italian squadron in the Far East during the Chino-Japanese quadron in the Far East during the Chino-Japanese, War, and who is considered a most competent judge of the present situation there, has given an interview to the Giornale d'Italia. He said:—"It is reported that Port Arthur is provisioned for eighteen months and there are no civilians there, but this is doubtful. I believe Port Arthur to be lost to the Russian Count Dembsky became insane Russians, and that their fleet is destined to be affect in the crowd from the Guard regiments, with the exception of those forming the First Division, have became already left for Fortours of the Russian disaster at Port Arthur on active service. cutside the harbour."

London, February 18.

The belief is general in British diplomatic circles that Russia is about to defy the United States in almost a similar manner to that in which it involved itself with Japan. The note of Secretary Hay, by which it was designed to guarantee the integrity of China, has caused a profound sensation in St. Petersburg, and the charge is openly made there that for commercial purposes the United States is planning to become dominant in China. That Russia realises this, and that she will follow out her old-time diplomatic methods is shown by the intimation that she will soon send a reply to the United States note to the effect that, with certain "inconsequential" limitations, she accepts the position taken by the Government at Washington. This she did to Japan in the Manchurian and Korean negotiations, that terminated in the present war, claiming to have made concessions, while at the same time she had made none. So she will do to the United States, and hopes to hoodwink that Government. Russia will accept no line of procedure that can in any way be construed as assenting Government has any sovereignty over Manchuria. She will balk at the Hay plan, and, if necessary, will break with the United States before she will permit that nation to outline her policy in the Far East.

A military correspondent of the Times asks whether the Russian proclamation portends a repetition of Russia's policy of 1812, and the waging of a war of exhaustion. He thinks that this proclamation can have no other meaning, un'ess it was concocted deliberately for deception, or written with the knowledge that the Manchurian Raitroad is wrecked already. "Yet this seems madness" the correspondent concludes, "because, if the Russian army stood still while Japan was reducing the two great fortresses at Port Arthur and Vladivostock, Russia would become the lauwhing-stock of Europe, and the mock London, February 19 come the laughing-stock of Europe, and the mock of Asia."

THE NEW YORK SILK CASE.

Much fime was consumed on Wednesday, February 10th, at the trial of the defendants in the Japanese silk cases before Judge Thomas in the United States Circult Court, New York, in hearing about analyses made by B. B. Bonheim of samples cut from silks imported by A. S. Rosenthal & Co. Bir. Bonheim had voluminous tabulated documents which he said showed the invoice weights of Rosenthal & Co. and the ascertained weights which he had found by

Much of the merchandise represented by Bonheim's Much of the merchandise represented by Bonheim's samples had gone into consumption when the Government's analyst examined the official samples cut from the Rosenthal goods as they passed through the custom house. Former Judge Dittenhoefer, Frank H. Platt, and De Lancey Nicoll of counsel for the defence, attacked the competency of Bonheim's estimates. Examiner Bonheim's went into great detail in explaining how he had made his computations and arrived at his conclusions.

Although Rombeim was new on the stand by the

computations and arrived at his conclusions.

Although Bonheim was put on the stand by the prosecution as an expert witness, Judge Dittenhoefer appeared skeptical regarding the qualifications of the witness. Much of Bonheim's expert testimony was characterized by Dittenhoefer as "guesses." Judge Dittenhoefer also succeeded in bringing out the fact that many of the invoices involved in Bonheim's computations had not been introduced into the court as evidence, the invoices representing in some instances, entries made early in 1901 and also subsequent to Sept. 20, of the same year, while others, represented importations during 1902 and 1903.

It was claimed by the prosecution that it had the

It was claimed by the prosecution that it had the right to introduce invoices of the Rosenthal firm for periods not in evidence before the court, for the sake right to introduce any analysis of the court, for the sake of arriving at comparisons. This, however, was denied by Judge Dittenheofer, who told of the constant changes in styles of corded kaikas and that while the general term "kaika" applied to Japanese corded silks, it was nevertheless a fact that these goods, being intended for women's wear, were continually undergoing changes as to both styles and weights. "Therefore," said Judge Dittenhoefer, "It is not possible for the prosecution to introduce as evidence against our clients invoices of different periods."

judge Inomas inquired of Bonbeim whether the examiner was conversant with the packing of Japanese corded silks, and also whether the witness was competent to make allowance for tare in computing weights of silks from the official samples. On this point, Judge Thomas said: "A variety of things ought to be explained.

Questioned by Judge Ditterhance for the silver hards." Judge Thomas inquired of Bonheim whether the

to Bonheim, he was not a dyer, nor had he, as a matter of fact, ever seen any of the corded silks dyed. After further examination of Bonheim, Judge Thomas said he would strike out the testimony of the analysis and examiner regarding the returns on the samples of the Rosenthal silks. This was regarded as favorable to the defence.

was regarded as favorable to the defence.

The entire afternoon session was devoted to a cross-examination of Bonheim by Judge Dittenhoefer and De Lancey Nicoll, It developed that some packages of Rosenthal & Co. had only been examined in part by Bonheim. In reply to Judge amined in part by Bonheim. In reply to ludge Dittenhoefer, the examiner denied he had been offered a high salaried position by J. R. Simon & Co., rivals of Rosenthal & Co., in the silk business.

The principal witness next day was W. J. Harrison of Coles, Son & Coles, commission merchants of

London.

Harrison testified to transactions with the Rosen Harrison testified to transactions with the Rosenthal firm at Lyons and at New York. On the cross-examination by Judge Dutenhoefer, Harrison acknowledgedthat he had marked packages consigned to A. S. Rosenthal & Co., as "Chinese" silks, when in reality the witness knew the goods to be "Japanese" silks. Asked by Judge Dittenhoefer whether in his (Harrison's) opinion the marking of the packages as mentioned constituted false statements, and also whether the research and constituted false statements, and also whether their single plud consented to put false statements. ther Harrison had consented to put false statements on the cases, the witness answered affirmatively. Harrison also testified that he had advised his employers to demand \$5,000 of the United States for pioyers to demand \$5,000 of the United States for coming to this country to testify. He said his salary was \$5,000. The witness said he was living at the Hotel Spaulding, where Chief of the Secret Service Wilkie stays when in town. Replying to De Lancey Nicoll, counsel for Examiner Brown, Harrison said he regarded his trip to the United States as a "holiday excursion."

An important stipulation was agreed to by the Government, in which it was admitted that all the entries and declarations purporting to be signed by Martin L. Colin were signed in blank and that they were filled in over Cohn's signature, and further that Cohn did not see the papers for a year after they were filled in.

After having been engaged in the presentation of evidence since Jan. 20th, the prosecution on Monday, Feb. 15th concluded its evidence. Counsel for the defence stated that the cases against their clients would be taken up separately.

Former Judge Dittenhoefer made an argument that the correspondence between G. Goudchaux & Co. of Lyons, and Coles & Co., London, introduced Co. of Lyons, and Coles & Co., London, introduced into the case by the prosecution, should be stricken out as evidence by the court. The counsel said the acts of the Lyons firm were done without the authority or knowledge of the defendant, Cohn. After hearing what W. Wickham Smith, the special assistant Attorney-general, had to say in opposition to Dittenboefer's motion, Judge Thomas decided the Goudchaux letters were admissible as evidence.

THE FIRST BATTLE OF PORT ARTHUR.

On the 8th instant, at 11,30 p.m., we were lying in quarantine outside of the entrance. The Russian fleet was lying in three lines outside us, and on the eastern side of the entrance there were also a few neet was lying in tiree tines outside us, and on the eastern side of the entrance there were also a few ships, gun-boats, training ships and torpedo-boats cruising in the same line with ourselves, making a fourth line. Suddenly we felt a heavy submarine explosion, with two more in quick succession. The Russian fleet then began firing from the outer line with light guns, their drums beating to quarters, while the search-lights of every ship were turned on. Steam launches and torpedo-boats began rushing about, but in a few minutes the firing died down and we thought it was only some night manocuver. We were about to turn in again when the firing broke out afresh. Between half-past twelve and one o'clock the two Russian battleships passed in and took up a position right across the narrow entrance, while one of the larger cruisers took up a position close to the entrance under the lighthouse. It seemed to us a strange manocuver for such large ships at night-time, so we stayed on deck to house. It seemed to us a strange manœuvre for such large ships at night-time, so we stayed on deck to watch further developments. As it was cold, however, and things became a trifle slow, we turned in about 2 a.m. At 2.35 a.m. we were called out again as two very excited naval officers boarded us and in a mixture of French and English asked our names, etc. We got no news from them as they left in about a minute. At 5.30 a.m. another naval officer boarded us and we learned that the Viceroy had ordered that on ship was to leave or enter the harbour until further notice. After that I remained on deck with one passenger, and at daylight we made out that one of the battleships was all down by the head and another by the stern, while the big cruiser had a heavy list to port, all of them having, we learned later, been torpedoed and now lying aground. Turning Questioned by Judge Dittenhoefer for the defence,
Bonheim told how he had acquired the knowledge requisite for him to testify as an expert. According a ring of torpedo-boats, and farther out we saw some

of the Russian cruisers that we knew to the westward. while several masts showed on the horizon beyond them. These we judged to be cruisers looking for what had disturbed them the night before. Between them. These we judged to be crusers looking for what had disturbed them the night before. Between six and seven o'clock the inner cruisers came back and took up their old positions with the fleet, and those hull down came slowly into sight (they were three two-funnelled cruisers) and lay in line, stern on, about 6 or 7 miles off. Then we noticed numbers of men on the forts overhead, looking out to sea, while the decks of the stranded cruiser were crowded with men all looking in the same direction. About 7.45 am, the three cruisers turned and slowly steamed across the front of the Russian fleet, to the eastward, and probably about 6 miles off. At 7.55 I saw distinctly with the telescope that the Rising Sun of Japan was flying from their mast-heads and gaffs. It was like an electric shock to us and we understood all once the meaning of the night manceuvres, though we had been looking on for nearly two hours, thinking that, as the Chinese on board said, there had been a bad collision amongst the fleet the night before. The whole Russian fleet was now weighing slowly and clumsily, and by 8.20 were under way and steaming after the Japanese cruisers, but farther in shore, towards Dalny. In a few minutes the Japanese were out of sight to the S.E. ward and at 0.15 am, the Russian fleet returned to anchor, actually dropping the same great mooring anchors, although it had taken them so long to get them up before. They were perfectly certain, and said so openly, that the Japa would never dare to attack Port Arthur. Afterwards they sent a couple of craisers out scouting in the direction in which the enemy's cruisers had disappeared. At 10.50 a.m. we were cleared from quarantine and at the sume time one of the cruisers returned a great speed, firing heavily astern, the others having returned previously. We were then ordered to shift our berth for the training ship, but were not assigned to any special position. We started to weigh anchor and moved to the westward, close to the str. Ningoola, which had only just park took th six and seven o'clock the inner cruisers came back and any special position.

and moved to the westward, close to the str. Nimgoota, which had only just got in, having slipped in close in shore round the promontory, from the westward. At 10.55, or just as we took up our berth, we saw the Japanese fleet, sixteen ships in number, coming up full speed from the eastward. The battleships were leading, then came the armoured cruisers, with the remaining cruisers in the rear, all in single file. The Russian fleet were weighing anchor slowly, washing their chains and trying to get their great woodenstocked mooring anchors fished, instead of slipping them and getting their ships under command. It them and getting their ships under command. It was really amazing, the Japanese ficet being almost

them and getting their ships under command. It was really amazing, the Japanese fieet being almost on top of them.

About 11.15 the first Japanese shell—a 12-in, one—dropped among the Russian battleships right off the entrance and close to where 17 torpedo-boats were lying together, about one-third of a mile away from us. The torpedo-boats, training ship, and a small gun-vessel wheeled and went into harbour, while those on the big ships continued washing their chains and trying to get their anchors secured, the shower of shell in the meantime beginning to thicken. We started to weigh, having for pleasant companions a three-funnelled battleship and the small cruiser. Novik. The fonner, abreast of us, distant about 300 yards, was throwing beds and bedding and lumber of all sorts through her amidship gun ports as she got her headway on her, while we raced close in shore away to the westward abreast of us, but about a mile further out, with the Aronik a little ahead of her. mile further out, with the Novik a little ahead of her, while the forts were over our head. Thus being directly in the line of fire, the shells fell thick in the water around us, on the beach, the hill-side, and over

Looking back, the fleet were bunched together and fairly helpless, as until then, with the exception of our three-funnelled friend, only the cruisers had got properly under way, though they were all firing their heavy guns as they were able. A Russian Volunteer ship, armed as a cruiser, got under way as soon as any of them, and passing out through the battleships and half a-mile beyond, found things so hot that she turned and passed back inside them again, though how she escaped, while broadside on is a marvel.

Just then I saw a shell burst right at the stem of a Just then I saw a shell burst right at the stem of a battleship, when they were still washing the anchor and some twenty men were trying to drag a heavy fish-hook forward to the anchor. It blotted out everything in dense, black smoke, and before the smoke cleared away she was shut in by the next in line advancing, so we could not see the damage done. Then another battleship was struck broadside, abreast of hee forward funnel, and then another on her port quarter, and the cruiser Askold had her after funnel and main topmast carried away. These were all heavy shells bursting on the outside and atter tunnel and main topmast carried away. These were all heavy shells bursting on the outside and were plainly noticeable from the volumes of black smoke which they sent up. Of course we could not see those which penetrated and burst inside, though doubtless many that struck the water alongside must

have hit the vessels as well. The cruisers, strange to say, fought most of the time outside the battle-ships and on the wing, but retired on them towards the end of the action.

ships and on the wing, but retired on them towards the end of the action.

All this time we were racing along the beach to the westward, while the shells were falling thickly round us, but fortunately bursting in the water. One heavy shell that burst aft covered our stern with smoke and spray, so that looking from forwards. I thought our stern was blown away. A second later one burst under our bows and sent a shower up forward, and so things went on, the concussion taking away our breath and shaking the ship like a leaf. Looking ahead and astern, you could see the shells plainly going for the forts. One large shell that passed close over us must have been nearly spent, as it rig-tagged from side to side, changing its course as it went; but when it struck the base of the hill and exploded it shifted a pile of sand and stones. It was principally owing to the cruiser Novik that we came in for such a hot time, as the battleship returned to the rest of the fleet shortly after the fight began, and they never went out any distance, but

we came in for such a hot time, as the battleship returned to the rest of the fleet shortly after the fight began, and they never went out any distance, but floundered about, it seemed very much in each other's way, under the guns of their heavy forts. The commander of the Novik, on the contrary, handled his ship very pluckily, having advanced far outside the others to the westward along our line of retreat. He kept dodging at great speed backwards and forwards, while his guns were served well and quickly. I am afraid, however, they were too light to have much effect on the battleships they were opposed to, and at that end of the line, towards the finish, he drew such a concentrated fire from the heavy ships that he had to retire amidst a regular storm of shell, one of which burst right at the stern, but without apparently hitting the Novik directly.

It was lucky for us that the range was long and file lighter guns little used, or we could never have gone through it. At 11.43 we cleared the fire zone and by 11.45 the action had practically ceased, as the Japanase fleet had turned shortly before, every ship in her own place, and steamed across the Russian front, the cruisers then leading, with the armoured cruisers next, and the battleships bringing up the rear.

It was impossible to see what damage the Japa

It was impossible to see what damage the Japs suffered. It should, of course, have been heavier than that of the Russians, seeing that they were than that of the Russians, seeing that they were under the fire of so many heavy forts, as well as of the Russian fleet. Yet we saw nothing to lead us to suppose that they were badly damaged, and they left in the same perfect order as they came. Nor was any ship of the Russian fleet sunk during the time that we were present, though several sustained considerable damage. For the Japanese had failed to draw them from under the guns of the forts and the assistance that the stranded ships were able to give with their heavy guns.

The Russians had engaged: five battleships, five cruisers, and one Volunteer cruiser, and they had also the two battleships and one large cruiser aground. The Japanese fleet consisted of sixteen ships, rating unknown, but I think there were four battleships, three armoured cruisers, and nine cruisers.—N.-C. Daily News.

Daily News.

WEI-HAI-WEI.

St. Petersburg, February 11.
The Novoe Vremya makes the charge that Japan's attack on Port Arthur was made from Wei-hai-wei, on the northern coast of the Shantung Peninsula, and bitterly assails Great Britain.

and bitterly assails Great Britain.

"In allowing Japan the use of the harbour as a base of operations," says the Novoe Vremya, "Great Britain violated the fundamental principles of neutrality. Wei-hai-wei must be regarded henceforth as part of Japanese territory, and Great Britain has relinquished the right to participate in any deliberations over the eventual fate of the harbour."

The Novoe Vremya further holds that the case is analogous to that of the Alabamu, and says that Russia is entitled to demand compensation from Great Britain for the losses she has sustained.

London, February 11. It is said at the Foreign Office here this evening, that the assertion of the Navoe Vrenya of St. Petersburg, that the Japanese fleet, in its attack on Port Arthur, used Wei-hai-wei as a base, is absolutely

If the bitterness against Great Britain is assuming almost alarming proportions. The supposition that Great Britain evacuated Wei-hai-wei to give Japan a base, has called out the deepest indignation, which has been still further inflamed by the publication of me "blue book" on Thibet, containing the offensive language of Lord Lansdowne.

Referring in the House of Lord to-day to the Russian charges on the subject of Wei-hai-wei, Lord Lansdowne declared that the report that Great Britain had given Wei-hai-wei as a base for Japan-

founded, and so far as he could conjecture, was a "mischievous fabrication."

Lord Lansdowne added that he had telegraphed

to the British representative there in order to ascertain if any incident had occurred to give the slightest colour to the report.

St. Petersburg, February 14. In spite of the denial of Lord Lansdowne, it is still believed here that the Japanese fleet had its head-quarters at Wei-hai-wei. A courteous yet sharp note has reached the British Ambassador here, ask-him if the Japanese by some misunderstanding had been allowed to enter Wei-hai-wei. If so, England is requested to recount the place: otherwise here. been allowed to enter twei-hat-we. If so, England is requested to reoccupy the place; otherwise her failure to do so will be regarded as a hostile action by the Imperial Government.

Further the British Ambassador has received a note containing the formal protest of Russia against a British expedition to Thibet.

St. Petersburg, February 16.
A despatch has been received here from the Russian Minister at Peking, M. Paul Lessar, saying that upon his official inquiry, the Chinese Government informed him that Wei-hai-wei remains leased to

THE VLADIVOSTOCK AFFAIR

Further despatches from Viceroy Alexieff regarding the affair at Vladivostock say that the bombardment did not do any serious damage. There were no losses in the fortifications; in the town a woman was killed and some seamen were wounded. The enemy returned for a short time yesterday.

THE FISCAL QUESTION.

Mr. Balfour, speaking in the House of Commons, said that it was not intended to deal with the fiscal policy of the nation in the present parliament.

RUSSIA'S BEHAVIOUR IN THE MEDITERRANEAN.

Mr. Lawson Walton -asked in the House of Commons whether, in view of the use which Russian warships are making of the ports in Crete and in Egypt, the British Government would communicate its views to the neutral Powers concerned with reference to the duties of neutrals in regard to belligerents using neutral ports for the purpose of intercepting trading vessels of neutral Powers.
Mr. Balfour replied that this was a matter

of the utmost importance and that it was receiving the attention of the Government.

AMERICANS SYMPATHISE WITH JAPAN.

London, March 10. At a dinner of the Wisconsin Society of New York, General Wheeler referred to the Japanese naval successes as truly indicating Japanese greatness. This declaration was received with cheers.

Mr. Uchida, Japanese Consul-General at New York, declared that Japan was struggling for her national existence and only asked for fair play and straight dealing. the end of his speech, the company rose and cheered for some minutes

Mr. Pratt, Assistant-Attorney-General hoped as a private citizen that Japan would continue as she had begun.

Members of Congress and others all spoke in favour of Japan.

(RECEIVED AT THE LEGATION OF FRANCE.) RUMOURS CONTRADICTED.

Saigon, March 4.

The rumours of a debarkation of Japanese troops in the neighbourhood of Port Arthur, and of a new bombardment of the place, are denied in St. Petersburg.

ATTACK ON A RUSSIAN POST.

It is reported from Newchwang that 500 Tungsuses attacked a Russian post at Haicheng but were repulsed.

THE DREYFUS CASE

The Court of Cassation has commenced to examine the demand for the re-hearing of the Dreyfus case.

PORT ARTHUR.

Saigon, March 6.

Port Arthur reports that the Japanese squadron has remained invisible since February 25th.

THE FRENCH NAVY.

In the Budget Committee many deputies, In the Budget Committee many deputies, including Vice-President Etienne and M. Lockroy, former Minister of Marine, criticised the administration of the Navy and the insufficiency of colonial defences. M. list stated that Russia is incessantly labouring at the construction of fortifications at Hai-ping, Hai-ching, and Liao-yang.

Etienne insisted on the necessity of properly protecting Indo-China.

WAR NEWS.

St. Petersburg denies the debarkation of

DREYFUS.

Saigon March 8.

The Court of Cassation has declared that the demand for revision of the Dreyfus affair is receivable, and will itself proceed to the supplementary instruction.

COUNT WALDERSEE.

Hanover-Marshal Waldersee is dead. PORT ARTHUR.

Port Arthur-There is quiescence in military movements.

VLADIVOSTOCK.

St. Petersburg—Seven Japanese ships bombarded Vladivostock throwing about 200 shells, of which many did not burst. The Japanese The Russians did not reply. afterwards withdrew. No injury,

(FROM THE " IIII SHIMPO.") EGYPT'S NEURALITY.

London, March 4.

The Egyptian Government on February 12th prohibited the belligerent powers from taking their prizes

to Suez, or into Egyptian waters or ports. Con-sequently Russia has released the colliers which she had captured. The Egyptian Government has pre-sented a protest to Russia, whose ships have been lying at Suez and Port Said over the due periods of time, such actions being a breach of neutrality.

RUSSIAN TROOPS. The troops at the forts of Sveaborg and Viborg have been despatched by train in spite of their refusal to go on service in the Far East.

JAPANESE OFFICERS COMING HOME.

I.ondon, March 6.
Twenty-five Japanese officers who left here on
February 25th embarked in the United States yesterday for home.

RUSSIA AND THE DARDANELLES.

RUSSIA AND THE DARDANELLES.

It is said that Russia has again asked Turkey for permission to pass the Dardanelles with the Black Sea squadron, but the Porte has refused on the ground that the required permission could not be granted unless the Powers consent. With reference to this matter the Italian papers hold the opinion that Japan and Turkey bave a significant understanding. standing.

REVOLUTIONISTS IN RUSSIA.

The principal offices of the revolutionists at Moscow and St. Petersburg have issued a manifesto condemning the Government. They insist that the proposals of Japan were legitimate and they are inciting to outrage. Some of them have already been arrested. been arrested.

THE VLADIVOSTOCK AFFAIR.

London, March 7.
According to the Russians, the forts of Vladivo stock did not reply to yesterday's challenge because their gun positions would be discovered by the enemy.

FRANCE AND WAR.

M. de Lanessan has again advised the Govern-ment to refrain strictly from interference in the war. KING EDWARD.

The King of Great Britain entertained on the 5th the Ministers of State and diplomatic officials at a diuner party where Viscount Hayashi, the Japanese Minister, was also present.

MACEDONIAN AFFAIRS.

With regard to the proposed Macedonian Reforms, the Sultan has refused to accept the draft as to the Gendarmerie Organization.

JAPAN'S REPLY.

London, March o.

The British papers publish the Japanese note com-batting the Russian circular alleging that Japan committed a breach of International Law. The papers add that the reply of Japan is dignified and clear.

MARQUIS ITO

The newspapers of Great Britain declare that the visit of Marquis Ito to Korea is of great importance.

(FROM THE " ASAHT SHIMBUR.") RUSSIA'S TRANSPORTATION DIFFICULTIES.

London, March 3.

Russia's first intention was to transport provisions and other military necessities to Manchura by the sea route. As the result of her naval defeats, however, her plans have been altered, and she has decided to carry all goods by the railway. Trains employed for this purpose are leaving St. Petersburg every day. Inasmuch as the Siberian railway is still imprefact, the transportation of tracos is probable. every day. Inasmuch as the Siberian railway is some imperfect the transportation of troops is probably

NEW RUSSIAN WARSHIPS.

The Russian authorities are urging on the completion of work on the warships which are under construction in the Baltic.

RUSSIA'S WAR PLAN

London, March 6.
General Dragomiroff has been summoned to St. Council where he strongly condemned the present at the Imperial Council where he strongly condemned the present plans in the Far East and insisted on the evacuation of Port Arthur in order to avoid further defeats. His arguments were rejected by the Council.

BRITISH PAPERS ON THE RUPTURE.

London, March 4.

The Times laughs at the childish note of Russia and praises the reply of Japan which it declares to be right. It further states that the smart and gallant actions of Japan are appreciated throughout the world and that her hostile movements (opening of hostilities before the declaration of war) are in agreement with modern rules of war.

The Daily Chronicle says that the dissatisfaction of Russia appears to be me kind of terror and that her attitude is very weak so that there is not needed any reply from Japan. London, March 4.

any reply from Japan.

RUSSIA.

An official telegram under date March, and from Port Arthur has been published in St. Petersburg to the effect that the Japanese squadron had not been sighted since Feb. 27th off that port, though the Russian cruisers and torpedo destroyers were reconnitring to a distance of sixty miles from the port.

RUSSIAN PLANS.

It is said that Russia will withdraw her troops to points along the railway where she intends to overwhelm the Japanese, who will be enticed inland.

RUSSIA AND THE JEWS.

London, March 8. The local governors throughout the Russian Em-

pire are issuing warrants to the police to repress demonstrations of Jews showing sympathy with Japan. The Governor of Kiev having summoned repre-sentatives of the Jews in that city requested them to bear in mind the Kishinieff affair.

The Jews throughout the Empire have been per-emptorily ordered to subscribe large amounts toward the war fund.

General Kuropatkin has ordered the Jews living

FRENCH MILITARY AFFAIRS.

The scarcity of military necessities and the imperfect military administration of France have caused severe condemnation on the part of the public, navy especially has become an object of attack,

FOR BABY'S SKIN SCALP AND HAIR

Something for Mothers to Think About

EVERY CHILD born into the world with an inherited or early developed tendency to distressing, disfiguring humours of the skin, scalp, and blood, becomes an object of the most tender solicitude, not only because of its suffering but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz., THE CUTICURA TREATMENT.

Warm baths with CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, gentle anointings with CUTICURA ONT-MENT, to instantly allay itching, irritation, and inflammation, and soothe and heal, to hesality any learning, retrievely, at thanking the content heal, to be followed in the severer cases by mild doses of CUTICURA RESOLVENT PILLS (see below), to cool and closuse the blood, are all that can be desired for the alleviation of the suffering of skin-tortured infants and children and the comfort of worn-out, worried mothers. A single set is often sufficient to cure when the best physicians fail.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the cleaning the scale of cruets, scales, and shadruff, and the stopping of falling sorticing, whitening, and socialing red, rough, and red inflammations, or offensive purspiration, in the form of washes for incorative weakinesses, and a sanative, and sorphic purposes which resultly suggest themselves to women, elements and for all the purposes of the totale, lath, and currery.

CUTIOURA RESOLVERT PILLS (Chocolate Coated) are prepared to meet the valed text women, and sensitive children, and are pure, sweet, and tasteless. They only question the most successful blood purifiers and humour cures yet compounds.

PORT ARTHUR.

statements, coming originally from questionable sources, and being further tainted by the atmosphere of Chefoo, have to be Arthur and Dalny, after consultation with received with great caution. They say, the Chinese local officials, have begun to among other things, that kerosene oil has purchase the forbearance of the mounted been poured over a store of 15,000 tons of bandits. Over a thousand of these freecoal at Dalny, with the intention of firing it booters having made their appearance in the in the event of a Japanese landing; that a neighbourhood of Port Arthur, a sum of train is kept in readiness for the escape of fifteen thousand yen has been promised if the officers; that a most unreasonable re-quisition for provisions and forage has been three mouths, and Dalny has bought a made in Kinchow, and that all householders failing to comply are threatened with im- amount. What neither side could sell or prisonment; that during a thunder-storm on the 28th of February, a number of Russian mines exploded, and that as no one remembers a thunder storm at such a season, the people regard it as an omen of Russia's

According to the account of Lieutenant Endo, who was on board the Hokoku Maru when she went in and was sunk at the entrance to Port Arthur, the time from leaving the base of operations until the final sinking of the vessel was 40 hours, during which the officers and men-over ten in number—had very little to eat or drink and were exposed to piercing cold. The Lieutenant speaks with special enthusiasm of a stoker called Fujimoto, who had to take the main part in lowering the boat containing his comrades. He was wounded on the head and in the thigh, but though streaming with blood he never relaxed his hold on the tackle. Had he let go the boat must have been upset. Commander Hirose was des-cending the ladder to reach the boat when he recollected that he had forgotten his sword. He returned calmly through the enemy's fire and fetched the weapon. The seaman that had charge of looking after the steamer's anchor was so cool and collected that he carefully examined the cable to see whether it had not been cut by the Russian shells. He found that it had been severed, and by his timely discovery it was possible to splice the cable. Otherwise the lowering of the anchor would have been fruitless and the vessel could not have been sunk in the proper place. When the boat was cast adrift Commander Hirose stood up in the middle of the boat holding aloft a pole with a handkerchief attached. was to indicate to the torpedoers the position of the little craft. Another man who showed much presence of mind was chief stoker Kurita, who pulled off his boot and applied himself to baling out the boat amid a hail of bullets. All behaved with the utmost coolness, even finding leisure to admire the

enemy's display of deadly pyrotechnics.

It is stated that the Retvican has been brought into harbour, but the report requires confirmation.

Saturday, March 12. The Shanghai factory of Russian news announces that a strange phenomenon has harbour at 6 a.m. About an hour after-port and were steering for the above division taken place at Port Arthur. The Retvisan wards some of our torpedo-craft which of destroyers, when perceiving that the has spontaneously resurrected. Rising from the bottom on which she had reposed for just returned to port reporting that the they retired again into shelter.

a month, she set her own machinery in enemy's main body was approaching motion and entered the harbour. That is At 10 a.m. the Japanese ships opened fire on Friday, March 11.

The Russians are said to have bought learn, by way of climax, that having taken the enemy's torpedo-craft squadron, consist-quantity of cattle near Shan-hai-kwan, but up a comfortable berth inside, she quietly ing of 14 vessels, lay concealed behind the being unable to move them by train, they are went to rest on the bottom once more. planning some other route. It is further At all events if the factory be working paraning some other route. It is further At all events if the factory be working stated that the store of provisions in Port accurately the Russians have now the satisfaction of having retired all their ships from that no grain is allowed to be sold without the arena of immediate conflict. 'Tis a new Various stories reach Japan through the medium of Chinese refugees arriving at Chefoo from Dalny and Port Arthur. These any riposte, Port Arthur's modesty is at least consistent.

Tientsin reports that the Russians at Port similar respite by disbursing a third of the purchase, however, was mutual confidence. Either the bandits will have to wait for their money or the Russians for their security.

It is stated that 300 torpedoes have been placed by the Russians at Dalny and in Talien Bay.

Sunday, March 13.

There are two accounts of the operations Japanese and Russian torpedo-craft. It is troyers Asashio, Kasumi and Akatsuki closed are not given, but it is stated that at Port which the Russians retreated. Our destroy Arthur a powder-magazine was exploded On the Russian side, however, although the forts kept up a brisk fire they failed to inflict any damage on the Japanese ships. It is added that the killed, wounded and drowned detachment, however, remain fit for service. on the Russian torpedo-craft were very now went out and did their duty for the first fight lasted about an hour, and the enemy time, though not with much success ap- suffered heavily. One of his destroyers suc-

parently.

The other account is from Viceroy The other account is from Viceroy guschtchi, when endeavouring to obtain shelter Alexieff. It is dated at Mukden on the 10th, near the forts, was captured by the Sazanami addressed to the Russian Government, and under the fire of the land batteries. The Sacontains the following report sent to the zanami took her in tow, but she was making Viceroy from the officer commanding the water so fast, and the sea ran so high, that forts at Port Arthur:—" At 1 a.m. a signal it became necessary to cast her adrift. Her was given that several vessels resembling survivors, 4 in number, were rescued by the torpedo-craft were in sight. At 4 a.m. the Japanese destroyer. The Stereguschtchi sank various forts opened fire upon these ships, at 10.15 a.m. This division of Japanese des-Our torpedo-boats issued from the harbour at troyers suffered somewhat but not seriously. 4 a.m. and engaged the enemy's craft on the The Sazanami and the Akebono had two west side of Lao-ti-shan. After some time men killed; the Akchono had one officer and the Japanese squadron withdrew, heading 3 men wounded. Meanwhile the Russian south, and our torpedo-boats returned to cruisers Novik and Bayan had come out of

ing of 14 vessels, lay concealed behind the Laoti promontory.

That is the whole of the Russian officer's report so far as it has reached the public. He is ominously silent about the results, neither claiming to have inflicted any damage on the Japanese nor admitting to have re-ceived any himself. It must be assumed that the report, as it reached the Viceroy's hands, was much fuller, but the public is left to conjecture the contents of the portion kept from vulgar gaze. Probably before we go to press the Japanese official report will be to hand.

The official report of the operations at Port Arthur on the 10th instant was published in Tokyo on the forenoon of the 13th. It is from Admiral Togo, and was written on the 11th. It runs as follows:-" The united squadron, moving as previously arranged attacked the enemy at Port Arthur yesterday. At midnight on the Arthur yesterday. At midnight on the 9th two divisions of our destroyers proceeded to the harbour's entrance and scarched for ships of the enemy but found none. One of the divisions remained off the harbour, keeping watch, until daylight on the 10th. The other visited various previously fixed places and there laid down a special kind of mine. During these latter operations which took place at Port Arthur and Talien the enemy's forts fired from time to time on the 10th instant. One comes from at our craft, but did not succed in inflicting Shanghai, having reached that place from any injury. At 4.20 a.m. the division which Chefoo. It is dated at Shanghai on the had laid the mines engaged a division of 12th at 6 p.m. From it we learn that at about 6 of the enemy's destroyers on the dawn on the 10th instant a conflict took south of Lao-ti-shan. The fight lasted for place in the sea off Port Arthur between about 20 minutes at close range. Our deshave ended in the sinking of two Russian and opened a heavy fire on three or rous or the boats. In the forenoon of the same day the Russian destroyers. Among these latter it appeared that boilers were injured, fire broke ers also suffered more or less from the and that the docks and the fort were greatly enemy's fire. They had 15 killed and injured, while at Dalny not a building wounded; namely, 7 killed (petty-officers remained intact. The Japanese fired heavy guns and nearly all their shells exploded Chief Engineer of the Kassmi. The Akatsuki suffered most. One of her boilers was struck and the escape of steam scalded 4 men to death. All the destroyers of the With regard to the division on watch off the on the Russian torpedo-craft were very With regard to the division on watch off the numerous. Nothing is said of the Russian harbour's mouth, when about to leave its war-vessels, and the presumption is that position at 7 a.u., it saw two of the enemy's they lay quietly in the harbour throughout destroyers making for the port. It immedithe attack. The torpedo-craft, however, ately cut them off and engaged them. The ceeded in escaping, but the other, the Stere-

At 8 a.m. on the same day, the main squadron arrived off Port Arthur, and a division of cruisers at once steered direct for of congratulation to Admiral Togo. the harbour's mouth to assist our destroyers which seemed likely to be attacked by the enemy's cruisers. The main part of the rest of the squadron closed up and took a position under Lao-ti-shan, whence from 10 a.m. until 1.40 p.m. it bombarded the harbour, the forts and the town with indirect 2 Japanese engaged 2 Russian, and sunk able shambles fire. The results of this fire were noted by one of them. the division of cruisers immediately in front of the harbour, and it was observed that the resulting damage to the enemy was great,

Meanwhile another squadron of cruisers entrance to the Bay, bombarded and destroyed the buildings on the island. Further, the Takasago and the Chihaya searched the coast on the west of Liaotung promontory, but saw no sign of the enemy. They observed, however, the wreck of the destroyer Vrinshitelni. It was lying in Pigeon Bay with the funnel and masts above water, just as it had been sunk by the Japanese cruisers on the 25th February.

At 2 p.m. the various detachments ceased their operations and returned to their

rendezvous.

An officer of the squadron which bombarded Port Arthur at long range on the 25th of February says that the return fire of the forts was feebler than it had been on the occasion of the first attack. The Askold, the Novik, and the Bayan emerged from the harbour to fight, and a 12-inch shell from one of the Japanese line-of-battle ships burst on her main-deck. The explosion enveloped her in smoke and flame, and she immediately turned her head harbourwards and abandoned the conflict.

Monday, March 14. The Naval Department publishes telegrams from Chefoo dated the 12th instant saying that the forts Wei-yuen and Man-tze are greatly injured at Port Arthur, several of the guns being dismounted. A conflagration broke out—presumably during the bombardment—in the foreign quarter and seems to have attained very large proportions. The old town of Port Arthur is said to be wholly deserted. No soldiers are to be seen in the neighbourhood of the forts. Four Russian destroyers are lying inside the Retvisan, but they appear not to have steam up, and their crews are not visible. (This report sounds as though it were the result of actual inspection made on the 12th inst. If so, the conflagration was then still in progress.) The officer in command of the squadron of destroyers that fought the 6 Russian boats was Captain Asai, and the officer in command of the second squadron which sunk the Streguschtchi was Commander Tsuchiya. The officers in charge of the Akatsuki, the Kasumi, the Asashio, the Akebono and the Sasanami were Lieutenant Suyetsugu, Captain Oshima, Captain Matsunaga, Captain Kuzumi and Captain Kondo,

respectively.

The Stereguschtchi is a destroyer of 350 tons with a speed of 32 knots. She was built at St. Petersburg in 1902. Presumably she had a complement of at least 40 men, out of whom only 4 seem to have been saved.

The two forts Wei-yuen and Mantze are

both on the west of the harbour. What the third attack—24th and 25th February—reconnoitre. Encountering the Russian destroyers was suffered by the big fort on there were three, the Novik, the Bayan and destroyers, a fierce engagement took Hwan-kin-shan it would be very hard to the Askold. But a Japanese twelve-inch place. Both sides suffered, but the Rus-observe from the sea. observe from the sea.

subsequently at the entrance to the harbour, Port Arthur appears to be becoming a verit-

Admiral Makaroff's report also has been

This we think is a remarkable report for several reasons. First it is remarkable as suggesting, if not plainly showing, that the Russian naval commander-in-chief has only two cruisers available for extra-port operations out of his whole squadron. It is not altogether inconceivable that although he despatched a detachment of 6 destroyers into an arena where at any moment they might encounter a large force of the enemy, he nevertheless held no squadron of cruisers ready to assist them in case of emergency. That would be possible could we assume that the destroyers were merely on scouting duty. But no such assumption can be made. We have it on the authority of Admiral Makaroff himself, speaking through Viceroy Alexieff, that the approach of vessels appearing to be torpedo craft was signalled at the very outset and that the Russian destroyers were sent out to fight. Therefore every available ship should two cruisers failed to succour the Steregus-chtchi. The Admiral knew that she was badly injured; knew-we have it on his own anthority-that she was in imminent peril. In fact, she was sinking before his eyes, within range of his forts. Yet he did not within range of his forts. Yet he did not save her. Did he make any attempt that could be called an attempt to save her? Did he fire a shot? Did he expose the Novik and the Bayan to the smallest danger? It seems not. "All her crew were either drowned or taken prisoners," is what he tells his Government. Yet the unfortunate des-troyer continued above water for two hours after the Sazanami had cast her off. her crew were either drowned or taken pri-soners." She had from 40 to 50 men on board and the Sazanami could not take away more than four: that is easily conceivable. So some 40 wounded and dead doers doing in that interval. officers and men sank with the Stereguschtchi within sight of a Russian port crowded with Russian line-of-battle ships and cruisers. May it not justly be called a remarkable story ?

The Minister of State for the Navy ad- and she was temporarily disabled. Well dressed on the 13th instant a warm message she might be, though the Russian factory of news at Shanghai endeavoured to limit It would seem that the number of destroyers actually engaged on the Japanese wounded. At all events she has not apside was five. During the fight on the west of Laoti-shan 3 Japanese destroyers engaged Novik and the Bayan are able to peep out and routed 6 Russians. During the fight

What seems to have happened is this, The First Destroyer Division, consisting of received via Paris—his first report; a very 3 boats, the Asashio, the Akatsuki and the remarkable report. He says that 6 Russian Kasumi, went on scouting duty towards the destroyers encountered several Japanese mouth of the harbour, intending, doubtless, The enemy's forts occasionally answered our fire, but they did not inflict the smallest destroyers and cruisers; that the Stregustinjury on our ships. imminent danger; that thereupon he him-self, embarking in the *Novik*, went out with *Akebono*, went off on some special mineproceeded to Talien Bay, and from a posi-self, embarking in the Novik, went out with Akebono, went off on some special mine-tion near Sanshan-tao island near the the Bayan to the assistance of the destroyer; laying duty. In the early stages of the naval that he was unable to save her and that she operated that he was unable to save her and that she operated and, all her crew being either drowned or taken prisoners. The remaining five destroyers, he adds, came safely into port the giving as much rest as possible to his officers and men. Indeed we know that some cers and men. Indeed we know that some that he was unable to save her and that she operations a division consisted of 4 destroy-After remaining off the port for a considerable time the First Division steamed sea-ward towards Lao-ti-shan and probably went westward of the promontory. Shortly afterwards 6 Russian destroyers moved out and headed for the sea southward of the promontory. Sighting, or being sighted by, the Japanese First Division, they moved to the attack, and there ensued that fierce twenty-minutes fight wherein the Asashio, the Akatsuki and the Kasumi dashed into the closest quarters, and beat back the 6 Russians, so that the latter retired at full speed. Meanwhile the Third Division of two boats, having concluded its minelaying work, steamed towards the mouth of the harbour expecting to find the First Division. It arrived just in time to see the last two of the Russian destroyers making for port, and engaging them, it sunk the Stereguschtchi. This analysis of what occurred it borne out by the Emperor's have been ready to support them. Hence it seems that only the *Novik* and the *Bayan* were available. That is strange enough. But much stranger is the fact that these of the squadron, and the work done by the main body of the squadron, and the work done by the main body. message of approval to the Squadron, for His Majesty's language clearly distinguishes destroyers, fighting against superior force. It was certainly a most brilliant feat for the three Japanese boats to beat off six Russians, the quality and size of the vessels being practically identical on either side. This is the first instance of a genuine stand-up-fight between ships of the belligerents, and the result is the most signal triumph the Japanese have yet secured. Admiral Makaroff, as his writings show, is a great believer in the potentialities of torpedo-craft and advocates their use extensively. He appears to be following out his theory gallantly though not successfully. But where are his battleships and cruisers? What were they all doing during the many hours while the Japanese squadron lay quietly bombarding the forts and the town? And what were all the other Russian torpe-

Later news from Chefoo confirms the above but seems to be more or less exaggerated. The Japanese Squadron reached the Gulf of Chili, we are told, on the night of the It really does appear that only two of thand proceeded to the neighbourhood of cruisers remain serviceable out of the whole Port Arthur. Before dawn on the 10th a Port Arthur Squadron. On the occasion of division of Japanese destroyers went in to

ing injured, some sunk, and some escap-Subsequently at 10 a.m. the strongest ships of the Japanese squadron, separating from the cruisers, stood in to Lao-ti-shan, the usual material for weaving palliations. He and bombarded the town and the forts on says that before dawn on the 10th an engageand bombarded the town and the forts on Hwan-kin-shan and Tiger's Tail Promontory. In the Hwan-kin-shan forts many large shells exploded, as also in three of the forts on the riger's Tail promontory. The eight forts on Hwan-kin-shan, Tiger's Tail and Lao-ti vigorously replied but failed to inflict any injury on the Japanese. Several of the Japanese shells fell in the shallow water inside the Tiger's Tail Promontory, but a large number reached the town on the other side of the Tiger's Tail and Hwan-kin-chan, setting fire to the new town and causing great damage. The ships in the harbour, the dock and the powder magazines were the principal objects of the Japanese attack and they suffered severely, but the injury done they suffered severely, but the injury done to the ships is unknown. The greater part of the Chinese workmen had already fled from the place after the previous bombardments, so that no work of any consequence could be done. All that were left have now taken their departure, as also have most of the Chinese, inhabitants. The only one of the land forts that escaped unscathed was the Kinki-tung. This is the fort lying farthest eastward on the Hwankinshan promontory. It must have been almost completely out of the line of fire in a bombardment from the direction of Lao-ti-shan.

The correspondent of the Daily-Mail hired a steamer in Chefoo, a steamer named killed, independently of 40 or 50 that disthe Chefoo, and proceeded to Port Arthur at appeared with the Stereguschtchi; Plancon daylight on the 12th. His vessel went to puts the total casualties at 5 killed—within a mile—so he is reported to have including a barrister, two women and said—within mile of the *Retvisan*, yet no one Chinaman—and 6 wounded. Planattempt whatever was made to prevent him con is distinctly clumsy. As for the from entering. He observed three destroyers lying inside, but no smoke was issuing from their funnels. In the new town opposite the west harbour a fierce conflagration was merely made a bad shot. raging. He supposed that this was the raging. He supposed that this was the result of the Japanese bombardment on the 10th, but closer inspection convinced him that the Russians themselves were firing the place preparatory to retreat and that the Japanese bombardment had done them fatal injury. He further declares that ac-cording to the statement of the master of the Foxton Hall, a British steamer which had been under detention in Port Arthur since the 8th instant but which found herself able to leave the harbour without obstruction on the 12th, two out of four ships forming the Russian Squadron-were badly damaged, one was sunk and one escaped. Presumably this refers to the destroyers. The Nichi Nichi infers from this statement that the Russians have abandoned the administration of Port Arthur, but to us the whole story reads like an emotional exaggeration.

Another account says that the master of the FoxtonHall refused to say a word about Port Arthur affairs, he and two Danes on board his steamer having taken an oath to the Russians that they would keep silence. That rather takes the gilt off the other story. There are other versions of the Daily-Mail correspondent's account, but for how much of them he is really responsible we can not divine

A Chinaman is reported as affirming that three Russian ships were sunk, which result he attributes to an attack by torpedo-craft, an attack existing in his own imagination only.

That great injury was done by the bom-bardment seems to be unquestionable, but beyond that bare fact everything must for the present be left to conjecture.

Then there is the other side's account. Again we have to compliment M. Plançon, who sends from Mukden to the Shanghai factory ment between torpedo-craft took place with the result that one Japanese boat was sunk and the Stereguschtchi was injured; that Admiral Makaroff went out in the Novik to join the fight but had to retire before the Japanese Squadron; that 4 officers were wounded in the combat; that the Japanese squadron bombarded the place for an hour from the direction of Lao-ti-shan but did no damage worth mentioning; that a barrister (Russian), two women, one Chinaman and one sailor were killed, and that one officer, one workman, and four soldiers were wound-He adds that the fire of the Russian forts injured the Takasago.

Is it not a pity that M. Plancon neglects

the precaution of consulting with the Viceroy and the Admiral before manufacturing his stories? Some semblance of similarity would so greatly increase their probability. Alexieff tells of the sinking of the Stereguschtchi and the drowning or capture of all her crew; Plancon returns her as merely injured; the Admiral says that he went out in the Novik accompanied by the Bayan; Plancon carefully omits the Bayan; the Viceroy says that the bombardment lasted till 1.15 p.m.; Plancon puts the duration at one hour; Alexieff says that 6 officers and 21 men were wounded and 3 men Takasago, she was not under fire at all, having been despatched on a reconnoitering expedition, but in her case M. Plancon

Tuesday, March 15.

A Chinaman who left Port Arthur on the 12th and reached Chesoo on the same day, is reported as saying that the result of the Arthur the extravagant impression that the

Russians were abandoning the place.
The wounded (10) and the killed (9) in the same time, so as to keep open their avenue of retreat. The Japanese, however, moved up to close quarters and poured into their opponent's boats such a shower of shells that the Stereguschtchi was riddled like a honeycomb and her killed and wounded lay in heaps. Several of her crew jumped over-The Japanese who were in the fight could not but applaud the stoutness of their opponents.

The same informant alleges that when the Ine same informant alleges that when the proceed for. Telegrams can not reach them Sazanami approached within a few feet of from Japan—and who in Japan is in a position to telegraph?—, and it is impossible leaped on board the Russian boat, and was attacked by a man apparently of officer's china. The advantages of secrecy are rank, but the Japanese cut him down and

finally pushed him overboard. It turned out that the whole crew of the Stereguschtchi, except 4 men in the engine room, had either been killed or had jumped overboard. Many corpses were lying on the deck.

According to that informant there were 4 Japanese destroyers engaged against the 2 Russians in front of the harbour. That seem improbable. Only 5 destroyers alto-gether are mentioned in Admiral Togo's official report and the names of their commanding officers are given. It is quite incredible that any which took part in the conflict would have been omitted.

Chief-Engineer Minamisawa is not dead The statement that he had died of his wounds was a mistake of the Chuo Shimbun. He was the engineer of the Sasanami, and he distinguished himself in all attacks on Port Arthur

Moji circulates a report that with the exception of the injured vessels all the Russian ships have left Port Arthur. The number of the vessels that have put to sea is said to be three line-of-battle ships and three or four cruisers. Their plan is to try and effect a junction with the Vladivostock Squadron. That is the only chance now left for the Russians of recovering some measure of sea-power in the Far East. Certain observers, however, appear to infer that the alleged burning of Port Arthur by the Russians themselves on the 12th instant was preparatory to such a move on the part of Admiral Makaroff. That reasoning is difficult to follow. The depart-ure of the squadron would not effect the defence of the fortress on the land side, and could not require any destruction of buildings on shore. Besides the rumour is that Makaroff steamed out on the night of the 10th. If he did it must be admitted that he chose his time well. The bombardment by the Japanese squadron lasted until the afternoon of the 10th, and the night of the same day would necessarily have found Admiral Togo's men more or less exhausted. That would be just the moment for a bold dash, and most assuredly a bold dash Japanese bombardment on the 10th instant is the only means of partially restoring seemed to be only the destruction of 5 or 6 the situation. Was it made, however? We write on the morning of the 15th and we houses in the new town. He did not observe write on the morning of the 15th and we more than 50 or 60 Russian dead and have reason to know that in the opinion of wounded carried to the hospital. The Nichi the Japanese officers at the front on the Nichi publishes this news by way of set-off 13th instant nothing unusual was occurring, to the account given by the Daily Mail's certainly nothing so momentous as an at-correspondent, who carried away from Port tempt by Makaroff to reach Vladivostock with three line-of-battle ships and four cruisers, If he set out from Port Arthur on the night of the 10th he must have passed Tsushima topedoers' fight at Port Arthur on the inst., were brought to Sasebo on the night of the 13th. One of the wounded, who has been interviewed, speaks in the highest terms of the bravery of the Russians in the conflict at the mouth of the barbon. He saw that the mouth of the barbon. He saw that the mouth of the barbon. at the mouth of the harbour. He says that the enemy's torpedoers fought with the greatest determination, watching, at the enemy's shot and shell. Admiral Togo dumb battery constituting a target for the enemy's shot and shell. Admiral Togo is surely prepared for the contingency of a bold rush by Makaroff, and will spare no pains to frustrate it. If the attempt is to be made it should be made soon. The great difficulty of the movement for the Russians is that neither by means of scouts nor yet by intelligence from the outside can they learn anything of the Japanese fleet's movements. They do not know, nor have they any idea, where Togo is to be looked for. Telegrams can not reach them

We still hear of the doings of the Daily Mail's correspondent who visited Port Arthur early on the 12th. The conjectures suggested by his observations are that after the bombardment on the 10th the garrison got out of hand; that some made their escape; that others joined the bandits to fire the town, and that, in short, a general state of pandemonium ensued. Such silly exaggerations are probably inevitable at times of crisis. There are a hundred hypothesis all more probable than the above to account for a conflagration at Port Arthur on the 12th instant, and truly with the exception of a conflagration we do not discover any basis for all this wild talk.

Shanghai seems to be divided, greatly divided, in opinion about Port Arthur. read in the Asahi's telegrams of the 14th instant, and we read with regret, that the North-China Daily News appears to be insisting on the probability of the place having fallen, while the French journal is strenuously combating such an idea. There can not be much hesitation in endorsing the Echo de Chine's view. When has it been recorded that a powerful fortress was evacuated merely in the face of bombardment from the sea without the landing of a single soldier? Such talk is mere moonshine. If Port Arthur be assuming a desolate appearance or putting on the guise of a disabled fortress, it is for the purpose of betraying the Japanese into some rash essay. The policy hitherto pursued by the Russians has been to contrive a combination of landfire and ship-fire fatal to the enemy. Thev have not succeeded, but their failure is mainly due to the skill and prudence of Admiral Togo who has utilized every element of superiority possessed by his squadron and has carefully avoided venturing his ships into the area of equal, still less of inferior, potentialities. Could the Rus-sians once draw the Japanese ships within the full range of their shore and sea defences, a new face might be put upon the position. We ourselves believe that the moment has come for abandoning that policy; the moment for withdrawing what remains of the fleet. But if Admiral Makaroff does not think so, then nothing offers except to entice the Japanese into deadly peril. The Japanese will remain wide-awake, we trust.

The fact is that Port Arthur is the key of the position in the Far East. Did Russia abandon it now, she would have to recover it subsequently or retire from the contest. Japanese officers are said to remark that the Russian forts have cased the ussian forts have ceased their wild firing. Vladivostock preserved silence altogether. Port Arthur, on the 10th, showed itself comparatively reticent. Probably that is part of Makaroft's plan. He has still a fleet battle-ships of unknown number-we speak from the point of view of sea-worthinesscruisers of unknown number, 12 destroyers and 16 torpedo-boats. He has also a great reputation, and he has already shown that in his rules for conducting war discretion is the better part of valour. Probably he is husbanding his resources until Kuropatkin can organize that big movement which is to make an end of Japan in three months.

replied but they fired few shots and did no ed to have stated that they saw the *Chefoo* injury whatever to the Japanese ships. The anchored fully 6 miles off Port Arthur. The fact that their fire was feeble is attributed fact is that Chefoo is in its element. Canard to scarcity of ammunition, a fact confirmed by the Jiji Shinpo's Peking correspondent, who says that, according to news received in the Chinese capital from Port Arthur, the paucity of provisions is not so great as people have been led to think, but the scarcity of ammunition can not be concealed.

Japanese newspapers state that the cruiser squadron stationed off the mouth of the harbour during the bombardment signalled the results to the bombarding vessels so that the latter were able to correct their aim. That is more than probable, but it would appear that to follow such a programme intelligently the firing must have been very slow and deliberate. The officers of these cruisers are reported to have said that judging from the smoke and steam seen in the harbour either the boilers of some of the ships or the engines at the dock were struck.

the forts in reply, there is the obvious conjecture that the gunners are now well order for their detention was relaxed acquainted with their ranges and have consequently learned not to burn powder uselessly. It is said that on the occasion of all foreigners into Port Arthur has the first attack, and especially on that of the third attack when blocking ships were sunk, the forts fired wildly and continuously. stock of ammunition could have stood such draughts for any length of time. They are now more circumspect. That is a reason-But there remains the able hypothesis. other every probable explanation that they have been warned to husbana their stock of shells since the railway has occupation more important than the transport of projectiles weighing anything from a quarter to the neighbourhood of half a ton each.

It is explained by some of our Tokyo contemporaries that since the forts and town can be cannonaded at very short range from the front of the harbour, the Russians have devoted much trouble to protecting the approaches in that direction. Moreover, the approaches in that direction. principal forts, those of Hwan-kin-shan and Kikwan, which have 12-inch guns, stand so high out of the sea that to attack them at close range strains the artillery of a ship. Hence it was that the squadron chose a position westward of Liauti-shan, although the choice entailed a long range and indirect fire. But surely the true explanation is that the ships were thus enabled to be practically outside the zone of danger? Hwan-kin-shan could fire at them over the hills, but only in a tentative, uncertain kind of way.

There continue to be rumours of the retreat of the Russians from Port Arthur, and some authorities allege that what really happened was a hasty despatch of troops to Pitsuwo where the Japanese lauded in 1894, the apprehension being that Wednesday, March 16.
Shanghai learns, vià Chefoo, that there were rumours of the Russian squadron having left Port Arthur on the 11th and returned on the same day or subsequently. But these statements did not seem to have any solid foundation. It is further alleged that the damage done by the Japanese bombardment was very great, not only the forts and the town suffering, but also the

men-of-war and the shipping. Several big The story that the Chefoo, carrying a shells fell in the new town and in the height correspondent of the Daily Mail, steamed to of the confusion a conflagration broke out in within a mile of the place where the Retvisant the military quarter. A wholesale exodust is lying has probably been received with of inhabitants took place from the old town, considerable incredulity. It is understood which soon presented the appearance of to be now contradicted by the master and being completely deserted. All the forts the pilot of the Foxton Hall, who are report-

> were under detention at Port Arthur, are said to have been released on the evening of the 13th.

> A staff-officer in Port Arthur is said to have telegraphed to St. Petersburg that Port Arthur sustained great damage in the bombardment on the 10th instant. The Pallada was hit by two Japanese shells, and the place was thrown into much confusion. All are determined, however, to resist to the death.

It is reported that a thousand artificers have been sent from St. Petersburg to repair the Retvisan and the Tsarevitch.

The pilot of the Foxion Hall, who has ships or the engines at the cook were stated as seen to fall and burst within the enceinte of the 10th instant, several shells fell in the eastern harbour in the immediate vicinity eastern harbour in wessels anchored there, of four Norwegian vessels anchored there, and in consideration of this danger the order for their detention was relaxed and same authority says that the entry of all foreigners into Port Arthur has been forbidden, and that a shell burst in the dining room of a Russian barrister, killing him and his wife. This man is avowedly pro-Russian, but his account nevertheless suggests that Port Arthur is very dangerously exposed from the sea. The East Port is the position of the dock, and is also the part of the unchorage on which the Russians have expended most work.

WAR NOTES.

Friday, March 11.
There is a report that the Russian Govment has sent two sub-marines by rail to the Far East, one for Vladivostock and one for Port Arthur. The measure would be rather late in the day, but it is not inconceivable that the Russians may have obtained from French makers two of these engines constructed according to the latest designs. The only submarine belonging to the Russian navy, so far as we know, is the Peter Kochka, though others of the same type were thought to be proposed or in process of construction at the date of latest publications. The Peter Kochka belongs to the Baltic Squadron, but there was recently an idea among British naval officers that she, or another similar boat, had been sent to Port Arthur, and at Wei-hai-wei men said that a sub-marine from the Russian station on the other side of the Bay was supposed to have poked her nose above water inside Liu-kung-tao one fine morning last summer. It must be presumed, last summer. It must be presumed, however, that had the Russians possessed segments to be put together at Vladivostock or Port Arthur, where their presence might materially change the aspect of affairs.

The Hakuai Maru has arrived at Shimonoseki with 22 wounded Russians from Chemulpo and 82 sick Japanese. The former have gone in to hospital at Ehime. Seven of the Russians are severely wounded. Two have had their legs amputated at the thigh, and one has lost an arm. One of these men is said to have had 160 wounds, from which fact the minute shattering that a shell undergoes from the Shimose explosive may be inferred. In consideration of the kind treatment shown by the Japanese towards these wounded men, the Tsar has donated 2,000 yen to the Red Cross Society.

Although the steamer Helms, captured by the Japanese, had among her cargo a quantity of coal consigned to Port Arthur, the Japanese Government has decided to release her and restore her with all her cargo in consideration of the neutral State involved.

10th for home. It follows that there are no Russian men-of-war east of the Suez Canal.

It is stated that all the Russian scouts south of the Yalu have withdrawn to Wiju, and that they are taking steps to erect for-tifications for opposing the passage of the These breastworks are to operate in conjunction with the forts said to have been built at Antung.

Saturday, March 12. Concerning submarines it is thought that the two which Russia talks of sending out are probably those now in process of construction in St. Petersburg. Two others are said to be building at Port Arthur.

The Harbin journal affirms that the total

quantity of cereals carried over the Trans-Asian Railway to Manchuria in 1903 was 6,834,000 poods, being 2,202,000 poods more than the quantity in 1902. The kinds of cereals were wheat, peas, beans, millet, sorghum, oats and so forth. The cause of this great increase is set down as a failure of the crops in Manchuria, but something must also have been due to the large addition made by Russia to her military establish-

ment in Eastern Asia. China's only method of asserting her right to preserve neutrality in the West-Liao region in to order local officials not to permit any sales of animals or foodstuffs to the Russians. She is said to have taken that step, but of what efficacy can it prove? The local officials have no means of coercing the Chinese in the face of Russian menaces which, it is tolerably certain, would be con-verted into practical measures did the occasion become imperative. The whole incident illustrates the futility of any attempt no China's part to assert her sovereignty in the face of a Power like Russia which acknowledges only the law of its own convenience. Besides, Russia is not to be greatly blamed in this matter. She chooses what seems in her own eyes the lesser of two evils.

On the 11th instant the Mandjur was stripped of a part of her armament! She is dying by sections, and has struggled hard for her life.

The fiji Shimpo says that Russia has made a singular proposition. She originally declared her intention of respecting China's neutrality and she also announced her adby the United States Government on the territory in the direction of Soncmin, are now same subject. But she now asks that the retiring for concentration at Vladivostock. If they be taken pure the chief-Engineer Minamisawa who distin-special treatment. herence to the note addressed to the Powers

It is now denied that there is any and Kinchow, as well as the large quad-rangle having at its four corners having been hung by the Russians from the rangle having at its four corners having been hung by the Russians from the Newchwang, Mukden, Sing-min-ching and Kin-chow. It is not to be supposed for a have been circulated for purposes of intimiment that the Powers will consent to such an arbitrary arrangement. If the principle be admitted that Russia is free to assign to the arenas of neutrality and belligerence just what bounds are convenient for her own strategical purposes, there will be no finality to the process. But what will the Powers do? Nothing, of course. There is not one of them that will venture beyond the limits of a deferential protest. All are still paralysed by the Russian ogre, and well Russia knows it. If she maintains the The Dimitri Donskoi lest Suez on March farce of consulting them at all, it is be- the little isle known as Cap Island.

the Minister of State for Foreign Affairs a message from Sir Cyprian Bridge, Com-mander-in-chief of the British Squadron in attached to it.

East and that another will soon follow.

Sunday, March 13.
There appears to be no doubt that the Russians have occupied Shing-min-ching. They are said to have sent thither a hundred infantry and twenty troopers, and to have seized the telegraph office without a moment's delay.

It is stated that a Russian Major-General with five regiments of infantry has arrived in the neighbourhood of Newchwang. He has with him two 5-inch siege-guns which are to be placed so as to command the mouth of the Liao River, as soon as the ice breaks up, at which time the American and British gun-boats now lying there are expected to move out. On the other hand, the Jiji Shimpo's latest intelligence is that the Russians are withdrawing from Yinkow and that Russian refugees from the town are daily reaching Shanghai.

Monday, March 14.

It is stated that the Russian troops which had crossed the Tumen and entered Korean

France, Russia will be able to obtain some submarines and despatch them overland in segments to be put together at Vladivostock West, and thence northward of the West He had received the Order of the Golden Kite, Liao into Mongolia, shall be regarded as together with the Fifth Class of the Rising belligerent territory, the remaining area be- Sun and a step of rank, these honours being tween the above boundaries and the Great conferred under the new system without a Wall being neutral. This would place in moment's delay. It is to be hoped that the Russia's hands the whole northern littoral brave man lived at least long enough to

It is now denied that there is any truth in

The two corpses that came to the surface from the sunken Varyag were buried by the Japanese with naval honours on the 14th instant.

Wednesday, March 16. It is asserted that the Russians have posted a hundred men on an island, called Shan-ping-tao, 20 miles east of Port Arthur, and that they have established telephonic communication between the two places. We can not identify this island. Possibly it is

well Russia knows in face of consulting them at all, it is because she understands the inexpediency of too openly parading her contempt.

Prince Napoleon, commander-in-chief of the Russian cavalry in Manchuria, has arrived at Harbin.

It is thought by experts that there will not be any difficulty in raising the Varyag:

Two Tokyo journals, the Shogyo Shimpo and the Nippon, allege that on the 15th the Russian force at Chong-fu pushed rapidly southward, as far as kasan. They further say that 200 Cossacks approached the Chhong-chon River, and coming within view of an "obstacle"—that is to say, a party of Japanese scouts—dismounted and opened fire. The Japanese did not reply.

One of the Japanese refugees from Harbin recently arrived at Seoul where he is reportmander-in-chief of the British Squadron in ed as confirming previous accounts of the these waters, in the sense that the Admiral shockingly cruel treatment accorded to desires to place at the disposal of the Japan-Authorities for the use of Japanese sick the refugees reached Tiehling en route for the and wounded the British Naval Hospital at south, they numbered 133 women and 103 Yokohama and the services of the surgeons men. These were subsequently separated, the women being all sent round by New-The Novoye Vremya of December 24th chwang, and thence to Tientsin via says that a vessel fitted with machinery for Shanhaikwan. That this separation was distilling sea-water has been sent out to the effected there can not be the slightest doubt. Innumerable accounts concur in asserting the fact. It was an act of great cruelty, for although among the women there were some who had been living on the wages of sin, there were also many wives and daughters of the male refugees, and nothing could have been more heartlessly and uselessly inhuman than to sever these from their male protectors at such a time. The sequel of the story, as told from Seoul, accords with what previously been related, namely, that the 133 women were put every night into a species of jail where they found themselves the victims of the savage lust of Russian soldiers.

The Russian Mediteranean squadron is patrolling between Alexandria and Crete,

stopping and examining merchant vessels.
It is officially announced that the disarmament of the Mandjour took place on the 15th instant.

THE POLES.

At length the Mandjur has been stripped of her armament. Details are telegraph-cally given but it is enough to say that the greater part of her weapons and material of warm sympathy to the Japanese Government. This would be credible enough were it not linked with a statement that many Poles serving in the Russian ranks in Manchuria have secretly declared pro-Japanese sentiments, and have expressed a hope that if they be taken prisoners they will receive

BOMBARDMENT OF VLADIVOSTOCK.

Friday, March 11.

A telegram from Yuensan to the Jiji Shimpo gives some particulars of the Vladivostock affair. It appears that the wind was blowing half a gale and the sea running very high when Vice-Admiral Kamimura's squadron steamed for Vladivostock on the 6th instant. From 1.30 p.m. during a space of some 40 minutes, the ships bombarded the forts and the Russian vessels. These latter-how many or whether only one the ambiguity of the Japanese language as to plural etymology renders it impossible to divine from this report—were lying outside the harbour when the Japanese approached, but they immediately entered and took no part in the subsequent doings. On the 7th also they did not venture out though the Japanese squadron waited for them. Both the forts and these ships seem to have suffered. The cold was intense. All the ropes and Arthur not being too well supplied with top-hamper of the Japanese vessels were amountion, and being, at the same time, top-hamper of the Japanese vessels were coated with ice. The crews of the Japanese ships were in excellent health and spirits.

The Nichi Nichi's correspondence from the same place says that Kamimura's Squadron made three attacks, and advanced, on one occasion, to within 4,500 metres of the forts. This distance (4,921 yards) being less than 3 miles, it is almost incredible that the shore batteries did not open fire. The Japanese shells set fire to the town.

Another telegram to the same journal from Takeshiki contradicts the Jiji's intelligence. It denies that any Russian ships were seen outside the harbour. This message alleges that great surprise is felt among Japanese naval officers on account of the failure of the Russian vessels to reply to the cannonade. The only supposition is that the Russians were hidden deep in the harbour. Perhaps the ships were so hampered by the ice as not to be able either to emerge immediately or to train their guns conveniently, though the latter hypothesis is improbable.

The position taken by Admiral Kamimura's ships remains an open question.
From somewhat confused accounts published by Tokyo papers, we are inclined to think that as the whole of the inner part as weil as the northern part of the Bosporus Strait are frozen, the position taken was in the immediate neighbourhood of the island and any spray that broke over the decks lighthouse at the southern side of the strait, was frozen at once. To a distance of some That, however, would have involved firing at a very long range. One thing at all events is certain, namely, that until the ice breaks up, Vladivostock is tolerably secure from attack on the sea-side.

It is suspected by Japanese newspapers that the mention of lyddite shells in Admiral Alexieff's report is intended to suggest the rendering of some undue assistance by England to Japan. Lydditeisan English invention and its use is confined to the British service. Possibly the Russians may have honestly inferred the presence of lyddite in consequence of the violent character of the Japanese explosive. It will be remembered, however, that Admiral Alexiess's reopre about the torpedoing of the Pallada spoke of the wounded men being all unlikely to recover owing to the poisonous nature of the gaseous exhalations from the Japanese projectiles. Some American journals— the Asahi observes—concluded that melinite -concluded that melinite

spicuously yellow. The cause of that phenomenon remains to be ascertained. It could not have been produced by the gas from an ordinary torpedo, nor is there in the Shimose explosive, so far as we know, anything to account for the appearance.

Seoul telegraphs that 50 Japanese fishermen have been taken prisoners by the Russians on the left bank of the Tumen River and conducted to Vladivostock. It seems to be a rather needless performance. The Russians can scarcely be afraid of fishermen.

Saturday, March 12.

Takeshiki, speaking through the mouth of an anonymous naval officer, conjectures that Vladivostock's reason for not replying to the fire of the Japanese ships on the 6th instant was very simple, namely, inability. The explanation of that opinion is that Port the cynosure of Japanese attacks, drew upon Vladivostock's store, the result be-ing that the latter place is either completely denuded or has such a small stock remaining that to husband it is considered essential. There is another hypothesis, namely, that the position chosen by Admiral Kamimura rendered it extremely difficult for the Russian gunners to lay their artillery on him with even approximate accuracy. The Japanese squadron had a big mark. they threw their shells into the right quarter of the heavens they had a chance of hitting something valuable to the enemy. But they themselves may well have offered a comparatively small target.

On Saturday morning the Asahi Shambun published an extra containing an account of the doings at Vladivostock on the 6th and 7th inst. There were seven Japanese ships in the squadron. Leaving an unmentioned base on an unmentioned day, they proceeded up to the east of Korea, and then standing eastward, approached Russia's maritime provinces at the Askold Islands. It was then noon on the 6th, and steering south-east, the squadron reached the entrance to the Bosporus strait at 2 p.m. on the same day. The weather was piercingly cold, the thermometer registering 21° below zero. was dangerous to expose even the hands, 5,000 or 6,000 metres from the shore the ice extended thickly. Seen from afar the coast seemed to be encircled by white billows and viewed more closely the appearance was that of a huge lotus lake. The mountains were all white, the only dark spot on the horizon being the Askold lighthouse, which, but for this distinction of colour, would have been undiscernible. Breaking their way through the ice the ships stood slowly in Both sides of the strait were lined with batteries, but choosing the fort known to be the weakest, the squadron held a direct course for it, and passing twice backwards and forwards in front of it, bombarded the position. No sign of mounted guns could be perceived, however, though all the other appearances of a fort were present. The enemy made no reply to the ships' fire. Soldiers were observed in the battery, but whether they imagined that the squadron was not within range, or for some other

when they were carried ashore on the 9th of February, noticed that their skin was conreconnoitering. Presently one of the Japanese vessels signalled that this cruiser was followed by 4 other ships. By and bye the squadron, deeming it unwise to expose itself to torpedo attacks during the night, withdrew to an unmentioned place and remained there until dawn. On the morning of the 7th, at 6 o'clock, the Squadron separated into two divisions, one of which steamed slowly to America Bay—at the mouth of the Suchan River northward of the Askolds—and searched it, while the other, moving rapidly, made the circuit of the forts and of the sea between the Bosporus strait and the Askolds. The two divisions strait and the Askolos. The two control re-united near the Askolds at 9 a.m., and at re-united near the Askolds at 9 a.m., and at noon again approached the forts. These, however, gave no sign of life, neither did any Russian ship appear. Thereafter the squadron proceeded along the Russian coast westward of Vladivostock, visiting all the points of importance. At this time one of the Russian ships appeared a long distance astern, but she barely showed herself, and took care not to approach. The Squadron then steamed southward, calling at some places along the Korean coast. It may be mentioned here that one of the Japanese shells is said to have fallen in the Vladivostock dock and caused a conflagration, but this statement appears to be mere rumour.

> Sunday, March 12.
> Officers who were with the Japanese squadron which bombarded Vladivostock on the 6th say that the ships lay eastward of the forts and fired over the intervening hill. This would bear out the original conjecture that the position taken by the squadron was off Cape Basarghin. These officers allege that the ships were well within range of the forts, but as the latter did not reply, the squadron received orders to move closer. It then moved up to a comparatively close range. That shells fell in the town and inflicted damage can not be doubted. squadron lost one man. He belonged to the Asama and was a second-class stoker. When moving up the Korean coast on the 5th instant, one of the pipes connected with the machinery became clogged with ice and for a moment the crew were perplexed how to clear the pipe as the sea was running very high and wherever water fell on deck ice formed at once. At this juncture Hamazaki Kenzaburo came forward, and saying that to be alarmed by such trifles was not to know how to fight, he clambered down to the mouth of the pipe and broke the ice. Unfortunately just as his task was completed a heavy wave swept him away, and there was no possibility of tescuing him.

THE "NOVOYE VREMYA."

An extraordinary view is attributed to the Novoye Vremya. It is that, after all. the most advantageous plan for Russia might be to disregard China's neutrality, for if war broke out with China all the Powers would think it necessary to land troops for the protection of their nationals, and China would thus be so paralyzed as to be unable to cause Russia any inconvenience. It would appear, then, that the danger of China disregarding her neutrality and striking in at the right moment, is seriously regarded the Asam observes—concluded that melinite had been used. But melinite is a French monopoly. Perhaps the intention was to lay foundations for a subsequent charge against the Japanese. It is a curious fact, however, that an independent eye-witness, who saw some of the Russian wounded men afterwards a ship resembling the Bogatyr Novoye Vremya contemplate such a moment?

CHINA.

Wednesday, March 16.

It is stated that the directors of the Russo-Chinese Bank are about to sell the sites of their establishments in Tientsin and Peking.

Shanghai reports that the rouble notes put into circulation by the Russian military authorities in Manchuria do not pass current among the Chinese, and that China is not sending any hard money northward of Chill.

It is reported from Newchwang that the Russians have taken possession of the premises of an American firm's buildings and also of the buildings of several other firms. If that kind of thing commences there will

be trouble.

The Russians are said to be working day and night at the fortifications of Antung and Sun-wan-chwang.

With reference to Antung, which is now supposed to be an open port, the United States Minister is said to have addressed some kind of application to the Chinese

Authorities in Peking.

The people of the Yawata Maru report that their nationals showed supreme pleasure when the ship arrived in Shanghai, re-opening the Yokohama-Shanghai service. Rates of insurance which had previously stood at 21/4 per cent. fell at once to 1 per cent. All nationals evinced satisfaction at the coming of the steamer, except the Russians and the French, whose consuls are said to be circulating various rumours with the object of fostering an unquiet feeling. Thus on the eve of the Yawafa's departure a tale went round that four Russian ships were lying off Woosung, and the steamer was about to postpone her sailing when it was discovered that the tale had emanated from the Franco-Russian factory. Naturally the French are helping their Russian allics.

Thursday, March : 7.
The Colonel attached to the Russian Legation in Peking is said to have been much exercised by a rumour that General Ma's force, which recently proceeded towards the Manchurian frontier, included a number of Japanese officers. He followed the force to Tung-chow, in the first place, but being being unable to satisfy himself there, he continued the scrutiny as far as Jehol, where he had an interview with General Ma. There the story ends.

THE LOAN.

was 4,300 yen.

The subscriptions made to the War Loan by Japanese subjects in foreign lands are stated to have been as follows :-

	YEN.	
Hawaii	304,925	
San Francisco	216,450	
Tientsin	93,625	
New York		
Shanghai	40,000	
London	17,600	
Bombay	17,300	
Hongkong	10,000	
Total	848,875	

A few proprietors of prominent silk manufacturing factories in Kyoto left on March 16th for Tokyo to oppose the proposed increase in the tax on silk goods. Their views will be submitted in the Diet through the representatives of the city.

changes of portfolio-holders and other high chhon and Nyong-pyon.

The above array of names will not force, but it appears to be concluded that convey much idea to the ordinary reader, these changes have no genuine motive of in the Diet through the representatives of the city.

KOREA.

Friday, March 11.

It is stated that the Korean Government has signed the concession for the Seoul-Wiju

The Koreans seem to be greatly pleased at the prospect of Marquis Ito's mission. They regard it as a guarantee of the security of their Imperial throne and the preservation of the country's independence.

The latest news from Seoul is that the Russians seem to have abandoned the idea of holding Wiju. They are said to be evacuating the place, and to be burning all houses or buildings that interfere with gunfire from the defensive positions on the river.

Saturday, March 12.

It is stated that on the 8th instant Japanese and Russian seouts came within range of each other and exchanged shots between Kasan and Chonju on the Seoul-Wiju road. There do not seem to have been any casualties on either side.

It is noted that as a necessary consequence of the outbreak of hostilities all Korea's conventions with Russia cease to have bind-ing force. This applies to Korea's engageing force. ment with reference to the non-alienation of Masampo, to the grant of coal-mining privileges at Wolmi, and to the timber-felling concession in the Yalu Valley.

The retreat of Li Yong-ik to Japan is said to have been necessitated by his opposition to the conclusion of the new Protocol and his consequent disfavour at Court. Japanese journals say that he is now doing everything in his power to induce the Korean Repre-sentative in Tokyo to influence the Emperor by wire in an anti Japanese sense.

There have been three changes of port-

folios in the Korean Cabinet, not at the instance of the Japanese but because of the Emperor's desire to construct a ministry that shall be entirely sympathetic with Japan.

Major-General Yamane, who has been

laced in supreme charge of railway opera-His Majesty said that all his subjects, official or private, in the neighbourhood of the line, that they fully recognised the absolute inmaterial progress.

The Korean Court has been making many changes of portfolio-holders and other high chhon and Nyong-pyon.

favour with Japan. Mr. Hayashi has therefore addressed a warning to the Korean Government in the sense that such proceedings do not conduce to reform but, on the contrary, are calculated to impede it, and that he trusts the Korean Government will be guided by other considerations in conducting official organization.

The Korean Government has issued an order operative throughout the whole country that Japanese military notes are to circulate freely at a discount of from 8 to 9 per cent., this allowance being made in consideration of the cost of collecting.

On the 9th Instant news reached Seoul to the effect that a body of a thousand Russian troops had arrived at a point 25 miles north of Kyong-song, on the road from the Tumen to Kilju and Song-chin. These rumours are to be received with much reserve, for if bodies of a thousand Russian troops are moving down the Korean coast from the Tumen, they must be in maritime touch with Vladivostock, and no evidence of such a line of communications was discovered when Admiral Kamimura's Squadron visited Possiet and the littoral southward of it on the 7th instant and subsequent days

The high Korean officials appointed to receive Marquis Ito are to proceed to Chemulpo to meet His Excellency.

Tuesday, March 15 In the year 1900 a plot was formed by certain Koreans to kill the Emperor, set aside the Crown Prince, elevate Prince Wi Hwa to the throne and form a cabinet with the refugees in Japan. The principal person in this plot was Yu Kil-sun, then among the refugees. He had been a graduate of Keio-gijuku, and subsequently he held the portfolio of Education in the Kim Cabinet, when Kim was assassinated and the Korean monarch sought an asylum in the Russian Legation. Yu Kil-sun had to fly to Japan on that occasion and while here he concocted the above plot, his chief coadjutors being 15 placed in supreme charge of railway operations in Korea, was presented to the Emperor by Mr. Hayashi on the 10th instant. His Majesty said that all his subjects, official arrested, the other 8 effecting their escape. It appears that these 7 lay in jail until quite were instructed to assist the building and recently without being brought up for final trial. Judgment was not pronounced against dispensibility of railways as developers of them until the 11th instant, when all were condemned to death. Subsequently, how-All the rumours about the Russians having ever, after consultation with Mr. Hayashi enetrated to the neighbourhood of Sonchin and Major-General Ijichi, the Emperor decided to confine the death penalty to 3, commuting the sentence of the others to ever, that this act of clemency was afterwards The subscriptions to the loan totalled 452,235,625 yen. The amount applied for at prices over par was 33,000,000 yen, and the subscriptions for amounts under 200 yen are in the highest spirits. precipitate as the judicial proceedings had been dilatory.

The Asahi's intelligence from Seoul is to the effect that although the rumours recently and Japanese scouts on the 8th instant, it appears that there were 40 Russians and 4 planese, all mounted, and that the place of the encounter was Pak-chhon, which is pretty clearly defined. It is this:—Between about midway between Pyong-yang and Wiju. The Japanese scouts are said to have a superiority of numbers. They had one man built. Further south, namely, in Chonju, killed. The others returned, reporting that Kasan and Thai-chhon, there are tolerably killed. The others returned, reporting that the Russians were moving northward.

Kasan and Thai-chhon, there are tolerably strong bodies of cavalry, and these again. have thrown forward scouts as far as Pak-

of an area in northern Korea, having a base cult to believe that he has associated himself provisions as well as other warlike stores are of some forty miles on the river Yalu and with the Russo-phils, but such is the statement being freely requisitioned. Moreover the extending thence 57 miles southward to the by responsible Japanese journals—the fiji. Chinese have evidently weakened. Their river Pak-chhon, at the mouth of which lies the Asahi, the Nichi Nichi and the Hochi. troops are said to have been moved in Kasan, with the town of Pak-chlon to miles higher up and the town of Thai-chon several newspapers make the same statement, supposed, and no force has been stationed between the two. In fact they occupy the whole littoral region between the Yalu on same source. the north and the Pak-chhon on the south.

In the north-eastern region of Korea, however, the Russians who were recently pushing southward of the Tumen appear to have withdrawn to the north of the river. Vladivostock and others are concentrated at Novokievsk in Possiet Bay.

The funeral of the late Empress-Dowager took place in Seoul on the 14th instant. We read in Japanese journals that the Emperor and the Crown Prince acted as chief mourn-

ers, following the bier on foot.
It is stated that Prince Wi-yang (Li Chaikak) will be the envoy sent by Korea to Japan by way of returning Marquis Ito's

The Yomiuri has a statement, given on the authority of Mr. Omiwa Chobei, that the Emperor of Korea wishes to visit Japan.

Cho Pyong-sik has assumed the duties of Minister of Foreign Affairs temporarily, in lieu of Prince Li Chi-yong, who has been appointed Custodian of Imperial Tombs, an jects still in Vladivostock. This in office connected with the obsequies of the Empress Dowager.

Wednesday, March 16. Lt.-Colonel Nozu has been appointed military adviser to the Korean Government for a term of five years at a salary of 500 yen monthly, with 100 yen for house-rent.

It would appear that the idea of appointing Mr. Oye Taku to be adviser to the Court has been abandoned. Mr. Kato is expected to be transferred to that position from his present office at the Department of

Agriculture.
The Seoul Government is about to bestow orders upon Japapese subjects who have distinguished themselves on Korea's behalf. Marquis Ito is to be the first recipient, and Mr. Hayashi will be decorated at the same

Great preparations are being made for Marquis Ito's reception. He is to ride from Chemulpo in the Emperor's state rail-way carriage, and the road from the landing place to the station is to be reconstructed.

The commander of the Russian scouts at Nyong-pyong is said to have addressed to the Korean Government a note threaten-ing that if Korea violate her neutrality by supplying horses and provisions to the Japanese, Russia will regard her as an enemy. The man can scarcely be so silly. enemy. The man can scarcely be so silly. He is himself engaged in invading this so-called neutral country.

Thursday, March 17. The Korean Foreign Office gave an enter-

to Shanghai to consult with Mr. Pavlow, all the talk of maintaining neutrality in the that Alexieff has requisitioned St. Petersburg This Li Hak-keun is the man who visited West-Liao region has ended in moonshine for 100,000 troops to act as guards alone.

Bostwick, manager of the Seoul Electric Railway Company, and have taken ship for Chefoo, whence Li Hak-keun will proceed to Shanghai to consult with Mr. Pavlow

about 10 days.

CENSORATE OF TELEGRAMS.

experience the Government Departments concerned have drawn up rules relating to the censorship of press telegrams. They went into force on Friday week and we append the text :---

CENSORSHIP FOR PRESS TELEGRAMS

I.—Any one desiring to despatch press telegrams shall first obtain a "censor's pass stamp" by presenting the telegram to the proper authorities under whose province the contents of such telegram appertain: i.e. if the contents refer to foreign relations to the Foreign Office, or if they have relations, to the Foreign Office, or if they have any reference to military or naval matters to the General Staff or the Naval General Staff Office respectively.

II.—In case contents of a single press telegram have reference to matters appertaining to the provinces of more than one Authority, a "censor's pass stamp" shall be obtained from all the authorities concerned.

III.—Press telegrams to which a censor's pass stamp" has been obtained from any or all the authorities concerned, shall upon presentation at the Tokyo Post Office (Central Office) of Yedobashi, be sent without delay.

IV.—Press telegrams for which the sender deems it unnecessary to obtain a "censor's pass stamp" can be presented for despatch at any branch telegraph office in the city as heretofore. In this case, however, non-delivery or delay of such message shall be entirely at the sender's risk.

N.B.—Press telegrams for which a "censor's pass stamp" is desired shall be presented to the following effectives.

following officials:-

At Department of Foreign Affairs: KEIJIRO NABESHIMA, Secretary, JUMPEI SHINOBU, Secretary.

At the General Staff: Major BUNJIRO HORIUCHI, Captain Kunishige Tanaka, Lieutenant Shojiro Tanaka,

At the Naval General Staff Office: Captain (post) Gentaro Yamashita Captain Takarabe Takeshi.

LIFE ON JAPANESE TORPEDO-BOATS.

One of the officers commanding a Japanplaces. It is like striking at dough. As of those floating in the water, but their ship for the failure of the enemy's shells to hit was under the unceasing fire of the forts and

they did not expose themselves to variations of temperature as is the case with men in a big ship where cabins can be warmed and heat-generating processes employed. On a After consultation and in the sequel of destroyer or a torpedo-boat the only source of artificial heat is a brazier, and braziers have two serious draw-backs; one that in a little craft pitching and rolling badly, live charcoal is a dangerous companion; the other that as all apertures have to be closed to keep out the sea, the fumes of a brazier would be perilous There was nothing for it consequently, but to dispense with all heating appliances, and the men, living in a uniformly cold temperature, seem to have kept their health better than they would have done had means of generating artificial heat been accessible One great trouble was that the officers hardly ever got a quiet sleep. Their work was always at night, and the strain and anxiety of moving at high speed without lights, when every sense had to be keenly alert so as to avoid collisions and yet keep in touch with the other boats, were something that soon became scarcely endurable. It was not merely want of opportunity to sleep; what happened was that the long-sustained serious tension made sleep impossible. Drinking sake brought no re-laxation of the strain, and only by taking morphine could sleep be obtained in many cases. This was much worse than the actual Provisions were another great fighting. difficulty. It is of course out of the question to have good fare on board a torpedo.craft. But in very cold weather what a Japanese soldier or sailor desires above all things is plenty of miso-shiru (bean-sauce). Casks of this necessary were taken, but as there was no place to stand them under cover they had to be lashed on the deck, and so it happened that heavy seas constantly breaking on board carried away or smashed many of the casks, to the men's great chagrin.

THE " STEREGUSCHTCHI."

Admiral Togo's latest report explains the fact that only 4 men survived out of the whole crew of the Russian destroyer. The officer in command of the Sazanami, which cast her off owing to her leaky condition and the boisterous sea, states that the surviving correspondent of the *Jiji Shimpo*. He declares that this is a most dispiriting war. When the Japanese attack the Russians retire, and when the Japanese attack the Russians emerge from their hiding for the failure of the enemy's shells to hit anything, that is no longer manner of doubt. During the third attack the Russian torpedobate first sight of the enemy they hastened to confirst sight of the enemy they hastened to conteal themselves. On the other hand, the smaller vessels of the Japanese squadron have smaller vessels of the Japanese squadron have medical treatment on board one of the smoke more and more under its influence, the old occupations natural to women lost their charm for me, and were set aside. . . . But I could no longer smoke without medical treatment on board one of the smoke more and more, until at last it occur-

been long meditating. This account is to be One destroyer's crew may be said to have still more difficult to understand Admiral taken with reserve.

Sept under frozen snow, so thickly did the Makaroft's account of his own doings. He flakes penetrate to the men's bunks, and says that he went out with the Novik another had its compass frozen though and the Bayan to assist the Stere-Wednesday, March 16.

There is a wild rumour that a force of Chinese soldiers combined with Japanese has attacked the Russians near Yinkow (Newchwang). There is also a story that on the 14th instant Chefoo observed a great volume of smoke about 20 miles distant in the offing, and opined that it came from steamers heading towards Newchwang, where the ice is expected to break up in about 10 days.

another had its compass frozen though and the Bayan to assist the Sterenaction. Noth-guschtchi but that finding her surrounding but the high spirit of the men enabled by 5 Japanese cruisers, her retired by 5 Japanese cruisers, her retired by 5 Japanese cruisers, her retired to work through it all: people without striking a blow. It appears, how on shore can not form any idea of what ever, that the only craft within reach of the sinking destroyer was the Sasavolume of smoke about 20 miles distant in the offing, and opined that it came from steamers heading towards Newchwang, where the ice is expected to break up in the officer attributes this to the fact that Admiral Makaroff showed remarkable distance to the opined that it came from the officer attributes this to the fact that Admiral Makaroff showed remarkable distance to did not expose themselves to variations cretion, so far as can be seen at present, but cretion, so far as can be seen at present, but of course there may be in the story some element requiring fuller explanation.

SHOULD WOMEN SMOKE?

Madame Sarah Grand, the novelist, deals with this knotty question, in the columns of the London Daily Chronicle, from the point of view of a woman who once indulged in the habit but afterwards gave it up. She says :--Among the mass of opinion, conjecture, foreboding, and prophecy, I find no single fact for our guidance—no single example of the effect of smoking on a woman's constitution and character. . . I, personally, en-tered by accident upon the experiment of smoking. I was lunching with a friend at her father's house. Ourselves, her father, and two other gentlemen composed the party. After luncheon my friend suggested party. After function my friend suggested that we should go to the library and have cigarettes with our coffee. In the library she said to me: "Do smoke." But I don't smoke," I answered. "Well, but just to keep me in countenance!" Of course I took a cigarette and lighted it. This was between 1893-4, just after I hadpublished "The Heavenly Twins." Our published "The Heavenly Twins." Our companions were all three distinguished men; their talk was delightful, and as I listened I smoked without much consciousness of of what I was doing. The cigareste had no effect upon me whatever at the moment, either pleasurable or the contrary: But a few days later, while I was talking to one of my stepsons-who, by the way, was not smoking at the time-I was seized with an importunate craving for tobacco. "I should like to smoke," I said. "Welf, smoke, then," he answered, and handed me I have smoked, more or less—generally less—my average being from two to four eigarettes a day. I smoked at first, not because I cared particularly for the act, but in order to be sociable. It became my custom to have cigarettes brought in with the coffee at dessert, and to sit and chat instead of breaking up the party and separating, the ladies to yawn in the drawingroom, leaving the men to such ideas as more wine might engender. Thus, in my mind, smoking became associated with pretty still-life pletures of dessert on the dark polish of a Chippendale table, with shaded lights and flowers, with many a brilliant mind that gave of its best, and with the close sympathy of many | loyal heart that expanded under the gentle, genial influence. At first my cigarette was the toy of the dinner-table, but soon it began to creep in at other had a much more terrible foe to contend against medical treatment on board one of the smoke more and more, until at last it occurred to me that inhaling had made smoking cold has been intense and the sea boisterous. The above official statement renders it a pernicious habit to which I should become

a slave if I did not break myself of it at once. So I gave it up. And it was as if I had cast out an evil spirit which had been keeping all the better influences of my life at a distance. Plain sewing became a solace to me again. I delighted in my neglected em-broideries. After work, it was rest and refreshment to see that my house was spick and span, my household comfortable and happy. And, best of all, my music, which had left me, came back—"the sounds that cannot lie for all their sweet beguiling, the language we need fathom not, but only hear and feel." The result of my observation of women who smoke has been very much the same as my own experience of the habit. So long as the cigarette is treated as a plaything, taken up only at odd moments, and not missed when cast aside, it does no harm; but when it becomes a necessity it is dangerous.

THE "TEIKOKU GUNJIN YENGO-KWAI."

Among all the Societies-and they may be counted by tens—that have been organized for the purpose of affording relief to the families of soldiers and sailors serving at the front, one of the latest but by far the most important is the "Association for the relief of these serving in the Army and Navy." Its promoters appear to have Navy." Its promoters appear to have based their effort on the principle that a man must go for guidance in such matters not merely to his sentiment of charity but also to his sense of duty, and that if his age or his position exempt him from the necessity of actually taking his place in the fight-ing line, it becomes then an imperative obligation that he should assist his country with his purse. The Japanese recognise that in this war the stake is their national existence, or at any rate their existence as a nation with any expansive potentialities, and all classes are determined that nothing shall be wanting in the matter of goodwill and self-sacrifice. The association under consideration has only been a very short time in existence, yet it has already collected a sum of 661,918 yen, and there is every prospect of a very large amount ultimately reaching its coffers. Its statement of objects is as follows:-

ultimately reaching its coffers. Its statement of objects is as follows:—

At this sublime moment, when our soldiers and mariners are fighting in defense of our country against one of the great neighbouring Powers, nobody can deny that we are in the face of an extremely serious crisis, the magnitude of which is unparalleled in the history of our past. It is unquestionably a moment when the whole nation ought to stand up in the cause of the public weal. The young and robust are with the flag; they have to sacrifice all their personal interests for their country's sake. They can not attend to their aged and decrepit parents, can not nurse their sick and dying wives, can not lend ear to the cries of hunger of their beloved children. In there any one possessing the common feelings of humanity who can look with calm unconcern upon these pathetic scenes of heroic patriotism and self-sacrifice? The State must of course take steps to provide for those that sacrifice their family interests on the altar of country, and we learn with pleasure that the Government is now submisting suitable projects for the consideration of the competent authorities. But we have to take into consideration the fact that any measure of relief undertaken by the State must be subject to the restraints of rule and be governed by the general average of visible facts, so that account can not be taken of the special circumstance of each family and each member of a family. Besides, the amount thus granted in relief necessarily can not be superabundant. It might be enough for families with few members in remost willage regions, but it would be revidently insufficient for large families residing in populous cities. Hence the necessity of resorting to private initiative and of supplementing these insufficiencies, correcting these inequalities, and endeavouring to meet the heeds of each suffering family.

Compatriots, it is our duty to bok to the welfare their support.

of the weak who are dear to those that are spilling their blood and risking their all in defense of the their blood and risking their all in defense of the nation. Let us at least endeavour to enable them to face death in their country's cause with peaceful face death in their country's cause with peaceful hearts—assured that the spectre of starvation will not unenace the loved ones they leave behind. This is at once the duty and the privilege of their fellow-country-men, and we appeal to the public to cooperate heartily in the discharge of the solemn obligation.

We may add that though this Association has been founded in view of the present crisis, it may subsequently happen that the results of the work done may suggest the advisability of continuing the Association as a permanent institution.

As for the officers of the Association and its promoters, as well as the places for receiving subscriptions, the following list conveys information :-

THE FOUNDERS OF THE "TEIKOKU GUNJIN YENGO KWAL"

(Association for Relief of those Serving in the Army and Navy.)

Prince Shimazu.	Count Inouye.

THE LATE MR. WHITAKER WRIGHT.

Much obscurity hangs over the early career of the late Mr. Whitaker Wright. The following are the points of note as given in the Pall Mall Gasette:—

1847.—Born in Cheshire. 1868.—Arrived in America. 1878.—Member of New York Stock Exchange and millionaire

1889.—Returned to England. 1894.—Founded the West Australian Financial Corporation.

Amalgamation of the West Australian Financial Corporation and the London and Globe Finance Corporation.

and Globe Finance Corporation.
1900.—Failure of the company,
1901.—Winding-up proceedings.
1903.—The Autorney-General declined to prosecute Mr. Whitaker Wright at the expense of assets. Departure from Havre to New York. Mr. Justice Buckley's direction to prosecute. Warrant issued. Arrest, and return to England. Committed for fraud.

1904.-Trial, sentence, and death.

The following is a list of the companies promoted by Mr. Whitaker Wright or by the London and Globe Finance Corpora-

DOMESTIC POLITICS.

The Seiyu-kai held a general meeting on the 16th instant. They passed a resolution in the exordium of which they renewed their habitual declaration that the present Cabinet has not properly discharged its functions in the realm of either domestic or foreign policy, and that its acts are unconstitu-tional. Nevertheless, the resolution tional. Nevertheless, the resolution proceeded, the country being now at war, only one duty devolved on the legislature, the duty of providing ample funds, and laying aside all previous dissensions to secure after a time the prothallial tissue just like a in the country's cause the benefits of union. Marquis Saionji addressed the meeting much in the same sense, and declared at the close of his speech that he had entire confidence in the unanimity which the Party would show at this great crisis in the nation's

destiny.

He claimed that the successes hitherto gained by the navy must be regarded as in part due to the spirit animating a people ductive phase of its career. The changes with free institutions such as the Japanese which take place in the normal sexual reduc-

ing the same day. Their manifesto, adopted unanimously, was an elaborate document. Not its least remarkable feature was the expansion and vehement affirmation of the very doctrine that Marquis Saionji was simultaneously expounding to his Seiyukai followers, the doctrine that in this momenof an enlightened and liberal polity which constitutes an asset of immense strength as against the disheartening and unpremium. It seemed as though the against the disheartening and unnerving systems of Russia. The manifesto further undertakes to supply an alleged defect in the Government's procedure, namely, its failure to publicly proclaim the objects Japan has in view. These objects are to check Russian aggression, to insure the peace of the Orient and the safety of Japan, to obtain equal commercial and industrial privileges in Manchuria for all nations, and to join hands with the Powers in carrying true civilization into regions which otherwise be invaded by Russian barbarism. It need scarcely be said that fault is found with the Cabinet's manner of conducting the negotiations with Russia, but concerning supplies for carrying on the war the Progressists are solid.

Mr. Oishi Masami disfigured the proceed.

ings by a speech as foolishly bombastic as it was wanting in tact and taste.

CANCER RESEARCH.

Mr. Henry Morris expressed his conviction in his "Bradshaw Lecture" that there is reasonable expectation that a real advance has been made in our knowledge of the agencies which produce cancer. His optimism would appear to be well founded. a survey of the results of the researches under the Cancer Research Fund, presented to the Royal Society by Drs. Bashford and Murray, confirmation is found of the suggestions made in a previous paper addressed to the same Society last November by Drs. Farmer, Moore, and Walker. The latter gentlemen pointed out the resemblance exhibited continued "squeeze" much longer. Speakthrow no light on the cause of malignant

phenomena of reproduction and cell life."
An excellent illustration of the probable nature of the process of cancerous growth is given in an interesting communication by "A Correspondent" in the *Times* for January 22. The ripe spores of the fern fall on the ground and grow into little heart-shaped plants quite unlike ferns, and called prothallia. On these prothallia the sexual cells appear which after fusion grow up into ferns. If the fronds are pinned down on the damp earth, around the edges of the frond appear cancerous growth. Taking into consideration other facts, for which we must refer the reader to the communication in question, the conclusion is reached that the malignant growths in man are an exact counterpart of the abnormal production of prothallial tissue on the fronds of the fern. When the frond is fastened down, some unknown cause forces the normal tissue to begin the reprowith free institutions such as the Japanese which take place in the land same as the paralysing influence of a bureaucratic autocracy.

The Progressists also held a general meeting which the biologist will be able to give assistance of the highest value.

MEMORIES.

Do you remember, love, the day we met? It seems to me the birds sang sweeter then

It seemed as though the sky must always be As peaceful and as blue as on that day; I little knew that clouds would come-and stay:

I thought our love would ever cloudless be. I little knew that storms would gather fast To break upon us when we felt most sure; Sure in our love that should for aye endure-

So long ago it is, and yet it seems But yesterday we wandered side by side Through scenes where nature human speech defied,

But we had only met to part at last.

Where all was beauteous in our love's bright gleams.

Do you remember, love, the crescent moon That silv'ry rose amid the sunset glow, And how our steps grew slower and more slow?

We would not hasten what must come so soon.

And now that self-same moon no farther seems

Than you from me-nay, nearer, for I see The moon, while, searching through infinity, You I may see no more save in my dreams,

THE BUTCHERS' RING.

Once again within the space of two months, as a correspondent points out, the Butchers ring of Yokohama have raised their prices, this time by 61/2 per cent. and the question

ultimately found in "the disturbance of the do in self-defence, should not be a very phenomena of reproduction and cell life." serious problem for Yokohama, and we feel sure that if some one would take it up seriously the business would pay a fair profit. We append for comparison the price lists of Yokohama and Hongkong to demonstrate our point :--

At the present moment, when the	ነው የ <u>ለ</u> የድተና

At the present moment, when the foreign between the cells of malignant growths in man ing to a prominent Australian the other day house-keepers of Yokohama are seriously and those of normal reproducing tissue. It is clearly pointed out that these observations in Yokohama have now reached a point ing the extortions of the local butcher's ring, when the importation of Australian beef and the subject of frozen meat is uppermost in mutton is possible, leaving a good and their minds. The question as to who ingrowths. But they do indicate the direction in which fruitful researches may be undertaken. And they suggest that it is quite possible that the cause of cancer may be Shanghai, and Singapore had eventually to British Australasian. It is an industry—the

exportation of frozen meat from Australia and New Zealand—that has attained vast dimensions during recent years. Mr. Hogan claims that its pioneer was the late James Harrison, a veteran Victorian journalist, who conceived the idea in the early sixties, erected expensive refrigerating works, and in the end was "financially ruined by the unfavourable and unsympathetic conditions of his time." In the sister and rival State, New South Wales, the late T. S. Mort, of Sydney, is generally regarded as the pioneer. He was a wealthy wool-king, and is said to have spent no less than £80,000 on preliminary experiments before his first cargo of frozen meat was delivered in London. We understand that the question of cold storage in Yokohama has developed almost sufficiently far as to have become one of the possibilities of the near future. It will be a happy day for the long-suffering foreign resident when cold-storage does arrive.

THE PRIZE COURT.

The Japanese Prize Court has released all goods found on captured ships when such goods were clearly shown to have been destined for private individuals. It has also released the *Hermes* and all her cargo. This is a Norwegian steamer. She was employed by a Russian firm-Messrs. Ginsberg & Co. whose agents at Moji, the Uriu Company put 2,100 tons of coal into the ship and started her for Port Arthur on the 6th of February. She was captured on the 9th when nearing her destination. The Court has decided that she comes under the head of a neutral ship which, though employed by the subject of a belligerent and in obvious discharge of duties undertaken for the public service of such belligerent, was discharging those duties in complete ignorance that a state of war existed and in the absence of any sufficient reason for supposing that hostilities had broken out. Her seizure was of course quite legitimate as it took place after war had commenced, as she was em-ployed by the subject of a belligerent, and as she was carrying contraband of war.

NOTES ON CURRENT EVENTS.

At Uedaya's well known warehouse, No t5 Yariya-cho, Kyobashi, Tokyo, there will be on view until the 13th instant inclusive the magnificent piece of tapestry—representing the Mongol invasion—which has just been finished by Mr. Kawashima of Kyoto to the order of the Imperial Court. The weaving operations required four years, and there can be no second opinion that this is the finest specimen of such work ever produced in Japan. The Emperor has given his permission that the tapestry may be sent to the St. Louis Exhibition before it finally takes its place in the Palace. A visitor to Uedaya's will see, in addition to this tapestry, several examples of Japanese weaving and embroid-ery, the very finest of their kind. All are going to St. Louis.

The following notice has been circulated:

There is one common cause which all willingly assist. The foreign correspondents have chosen as their contribution to the care and comfort of the sick their contribution to the care and common of the six and wounded in the Russo-Japanese war the making of a unique volume to be called "In Many Wars." While the soldier serves in the campaigns of his own land, the correspondent, ranging the field of the globe, is an onlooker in every campaign. Men who met at Ladysmith, Santingo or Manila and again at Khartoum, the Indian frontier, or under the walls of Pathian, have been storping for weeks in the same Peking, have been stopping for weeks in the same winner with a bro-hotel. Out of their round tables has come the idea located shoulder!

of the book in which each contributor should embody some one of the most interesting in the range of the changing personal experiences which form the routine of his life.

routine of his life.

This volume will not only be memento of a history-making epoch, but the circumstances under which it is produced may give it a lasting value as a curiosity of literature. No copies will be gratis. Beyond the mechanical cost of production, all the income from the venture will go to the sick and wounded. A limited and numbered edition de luxe, artistically reinted and hound, with the signature of the standard point. wounded. A limited and numbered edition de luxe, artistically printed and bound, with the signature of each contributor, is offered at ten yen a volume, payable in advance. The Misui Bank is acting as treasurer in behalf of the Soldiers' Relief Association (Teikoku Gunjin Yengokai) which is to receive all proceeds. Subscribers will please remit to the Misui Bank or any of its branches or agents throughout the East. The bank will deliver all orders to the addresses given. Members of the Tokyo Club may give their subscriptions to the manager of the Club, who will turn them over to the Misui Ginko.

George Lynch.

GEORGE LYNCH. FREDERICK PALMER. Editors.

These are great days for Mr. Arthur Diosy. We find one London journal writing:—Mr. Diosy, besides being an extremely ing:—Mr. Diosy, besides being an extremely pleasant and accomplished speaker, is probably the greatest authority on things Japanese in this country; he is a thorough master of the language of that country, and, what is perhaps the most eloquent fact of all, he is very highly regarded by every Japanese regidant in England Japanese resident in England.

Marquis Ito left Tokyo at 12.30 p.m. on the 13th instant by special train for Kobe which he will embark on a cruiser for Chemulpo. It need scarcely be said that an immense crowd of high officials assembled at Shimbashi to see him off.

unforeseen circumstances may arise which would upset all calculations and the A.D.C. might be called upon to foot a heavy bill. tour are as follow: The guarantee is to be limited to yen 100, and any guarantor putting up that sum will have a prior claim to booking eight seats before the plan is thrown open to the general public; yen 50 entitles, in a similar way, to 4 seats; yen 25 to 2. Mr. Brady, we understand, will be pleased to receive the names of guarantors.

The China Mail wastes no heroics in relating the details of an accident which occurred on the Off Day of the Hongkong races. It says:

An unfortunate accident happened during the steeplechase on Saturday afternoon at the race meeting. After going round once Rex, who had been jumping well, and The Crow fell at the hurdle at the back of the course. Both riders were thrown, but immediately rem-unted and finished the race, Rex winning. When Mr. Johnstone, the rider of Rex, dismounted it was seen at once that he was injured. Sir Frederick Treves, the King's Surgeon, who arrived on Saturday, and Dr. Atkinson examined Mr. Johnstone in the Jockeys' room. It was found that, in adition to breaking his collarbone, his shoulder was dislocated. After being attended to, Mr. Johnstone was taken away in an ambulance.

Mr. Johnstone has many friends in Japan.

What a man, to remount and ride in a Henri Becquerel, on January 25th. Some winner with a broken collar bone and a dis-salts of uranium, he said, emit light continu-

It is officially announced that the funds of the Church Missionary Society for the cur-rent year show no sign of falling off, but the time has not arrived for the friends of the Society to hold their hands. Last year's available income was £317,997, but this year's expenditure is estimated at £371,000, and this, added to the deficiency with which the year began, means that the total required will not be less than £405,000. The Society will, therefore, have to contract its operations unless the receipts are greater than they promise to be. The shilling subscription which has been instituted has thus far produced £4,000 actually paid in, but it will doubtless yield very much more when the accounts are made up.

On the 15th instant the Prime Minister entertained the parliamentary leaders of the Seiyu-kai, the Progressists and the Peers and explained to them fully the Cabinet's financial programme. To-day His Excellency adopts a similar course with regard to the leaders of all the minor parties.

At the adjourned annual general meeting of the St. George's Society of Yokohama and Tokyo, held on Tuesday afternoon at the Masonic Hall, it was moved by Mr. L. J. Healing, "That in view of the present situation, the Society does not propose giving a ball this year on the 23rd of April, St. George's Day." This was seconded by Mr. H. M. Arnould and carried unanimously.

The China Mail has compiled a table showing the scores made in the four test The A.D.C. of Yokohama proposes to produce the musical play of The Run-lish team and the Australian elevens, and further says:—"What will the critics say when Mr. Warner's team reaches England with its magnificent record, that surpasses the production. To stage a musimatches played between Mr. Warner's Engloss on the production. To stage a musical play as the A.D.C. always stage their work involves the expenditure of a lot of money and at the last annual meeting of the Club it was decided to follow the example of Hongkong and Shangeight test matches have been played between England and Australia, in the old country hai and secure an adequate guarantee fund ere launching out on such an enter-prise. As the Committee point out, if and in the Commonwealth, and in the aggre-prise prise out out, if the commonwealth and in the aggre-prise out out. the play is performed four times to average matches. This will probably be increased audiences, there should not be any loss, but to five better the average the average the state of the s to five before the present tour is concluded." The total scores in the test matches this

double sulphate of uranyl and potassium, and there is a relation between the luminosity and the phosphorescence, since different preparations of this double salt unequally phosphorescent to light are also unequally luminous in the dark. The effects observed are so small that it is necessary for the observer to be in the dark for some time before attempting an experiment. the same meeting Messrs. Dewer and Curie dealt with the gases given off or occluded by radium bromide. According to these observers, a specimen of pure radium bromide was placed in a vacuum in connexion with a manometer; gas was found to be evolved at the rate of about 1 c.c. per month, which on spectroscopic examination proved to be hydrogen, most probably produced by the action of the radium compound upon a small quantity of water present. The same specimen, placed in a quartz tube, was heated to redness, any gases given off being removed by the mercury pump. These gases were drawn through tubes cooled down to the temperature of liquid air. The gas which passed through the tube cooled in liquid air was radio active and strongly luminous, spectroscopic examination of the light emitted showing the three principal bands of nitrogen. The quartz tube containing the radium bromide was then sealed off with the oxyhydrogen blowpipe. Twenty days later M. Deslandres found that the tube gave the complete spectrum of helium, and no other rays could be detected.

The Italian Admiral arrived on the China station by the German mail steamer Preussen on March 3rd, and immediately went on board the cruiser *Elba*, then lying at Hongkong. Admiral Sir Cyprian Bridge placed his launch at the disposal of Admiral Grenet, but the latter, after cordially thanking the English Admiral for his courtesy, declined to take advantage of the offer, preferring to use one of the Elba's launches. Admiral Grenet paid an official call on Admiral Bridge, and then returned to the Elba. returned to the *Elba*. Admiral Grenet has been in the Far East before, having held command of the China squadron for about a year some five years ago. Just prior to the Boxer rebellion Admiral Grenet left Eastern waters with his fleet, with the exception of one vessel. Had he remained at that critical period he would have been of great assistance to Admiral Seymour, when the advance on Peking was made.

Among the passengers by the P. M. steamer China on Thursday was Mr. Jas. W. Davidson, author of the book on Formosa which has been reviewed so favourably in all quarters, who is on his way to take up his duties as U. S. Consul at Antung, one of the newly opened ports in Manchuria.

MISS KAYSER'S CONCERT.

Miss Kayser has accustomed Yokohama con Miss Kayser has accustomed Yokohama concert-goers to programmes displaying a high standard of musical taste and culture, and on Saturday evening she did not depart from her policy by one jot or tittle. The Public Hall was filled with a large and keenly appreciative audience, and though the temperature was not much above the level of a frigidarium, despite the big fires kept going down below, the music was so good that the assembly's attention was only drawn to this uncemfortable fact during the intervals. All this uncomfortable fact during the intervals. All the performers, save Mrs. Sugiura, have been heard the performers, save Mrs. Suguira, nave been heard views were thrown on the screen, serving to the dwelling here frequently and we need only remark that they one and all did themselves full justice. In Mrs. Suguira we welcome a lady who is the happy possessor of a contralto voice of great depth and Mr. Petric at the close.

than would be expected from their radio-activity. The effects are best shown by the she graces a Yokohama platform again. Naturally she was heard to better advantage in the duet than in the trio. In "The Stabat Mater," (Rossim), she was heard to splendid effect though once or twice a slight hesitancy in attack betrayed the nervousness inherent on a first appearance. Mrs. Mollison was in beautiful voice and one regretted that her share in the pro-gramme was so slight. The beneficiare, who gave half of the proceeds to the Red Cross Society of Japan, was in magnificent form and went from Japan, was in magnificent form and went from triumph to triumph, till at the close the stage presented the appearance of a bower of flowers, so many were the floral tributes showered down by her delighted auditors. Prof. Heydrich made an ideal accompanist: indeed, we preferred him better in this than in his solo work, though that also was of a high order. Of the other instrumentalists, Miss Poole was charming as the accompanist of the violin and 'cello solos; Mr. Schmid as sympathetic and as masterly as ever on the 'cello; and Mr. H. A. Poole excellent on the the 'cello; and Mr. H. A. Poole excellent on the violin. Programme:-

YOKOHAMA LITERARY SOCIETY.

"Siam, the Land of the White Elephant," formed the subject of a paper by Mr. T. Petrie, read before the fortnightly meeting of the Yokohama Literary Society on Friday evening. Mr. Petrie began with a description of the sacred white elephants of Siam—a specimen of the breed he said was to be seen at Uyeno Park—and then passed on to a brief historical account of Siam. He noticed the early arrival of Japanese travellers and merchants in the kingdom, spoke of their settlement in Siam and of the fighting legion which they turnished to one of the Siamese dynasties; then they furnished to one of the Siamese dynasties; then of their expulsion from the kingdom and their reappearance in the latter part of the nineteenth century. After a brief description of the rise of the reigning family of Siam, Mr. Petrie paid a warm tribute to the present king for the active share he has taken in raising the moral, intellectual and material standards of his country. The attempts of Louis XIV. of France to convert the King of Siam of his day, and the subsequent dealings of France with Siam right down the dealings of France with Stam right down the large research of the state of the occupation of Chantaboon also came under the lecturer's notice. Then, turning from foreign politics, Mr. Petrie described the appearance of some of the royal residences, the most famous of the many wonderful temples which famous of the many wonderful temples which study the land; some notable religious processions which he saw; and the life of the streets and water wave of Backers. water-ways of Bangkok.

Before the musical programme was taken up, the President announced that the Committee had fixed the date of the musical competition. It would take place on Saturday, April 9, at Van Schaick Hall, and in view of the fact that this was still a month hence, the committee were prepared to receive the names of further candi-

THE SILVER LINING TO THE CLOUD.

'Tis hard to think

That though dark low'ring clouds may hide

the sun, Yet still the sun is there;

That when the raging of the storm is done, The morn breaks bright and fair;

That though the moon and star be hid from

Of human sight so poor, Those clouds look silv'ry when the moon breaks through,

That were so dark before.

And so in life our sorrows ne'er would be As crushing as they seem,

If, in our saddest moments, we could see The fast-approaching gleam

Of happiness that comes to wipe the trace Of mournful hours away;
To bring us naught but gladness in their

And turn our night to day

THE CINEMATOGRAPH.

The Signori Dentici are to be congratulated upon the eminent success which attended the upon the eminent success which attended the cinematograph entertainment given by them at the Public Hall on Wednesday evening under the patronage of the Italian Minister, Signor Meregalli, and H. E. Governor Sufu. There was a good attendance and the pictures were capitally reproduced. The pantonimes of "Robinson Crusoe"
"The Sleeping Princess" and "All Baba" were
greeted with mirgled cheers and laughter; while a warm welcome was accorded Hans Andersen's immortal fairy tale of "The little Match Girl." The Bible story of "Samson and Delilah" was not in such good taste as the rest, while the attack on an infantry square was too obviously "made to order." The best piece of all was the long roll of views taken from a mountain railway. Some of the landscapes disclosed in this were gens of art. We would suggest to the Signori Dentici that they would be conferring a great treat on the little folks of Yokohama if they could arrange to give their entertainment at the Van Schaick Hall

At the close of the lecture some forty lantern views were thrown on the screen, serving to the dwelling of a painter, T. Kawachi, Ishikawa, bring before the audience some idea of Siamese Yokohama. It was put out before the flames had architecture, native as well as hybrid, types of spread far. The painter, who was very ill at the the people, etc. A vote of thanks was accorded time was burned to death. The cause is reported to be a defective fire-box.

THE CHEMULPO AFFAIR.

A VERY interesting account of the Chemulpo affair appears in the Korea Review. Several interesting accounts have appeared, ese behaved chivalrously. It is not yet for the matter of that, and it is to be feared certain exactly how many ships Rearthat we shall have no such record of the things that occurred on much more important occasions at Port Arthur. There are one or two points, however, which seem either to have escaped the attention of the writers of these accounts or to have been regarded by them with indifference. The first relates to the fate awaiting the Varyag and the Koriets when they steamed out of Chemulpo at a few minutes before noon on the 9th of February. Great eulogiums have been pronounced on the bravery shown by the commanders of the two Russian ships, and we do not wish to dissent in any degree from the applause. They made a gallant choice when they decided to leave the shelter of the port and they acted gallantly on their decision. But the query is, what did they anticipate Remember that nothing whatever was known of the qualities likely to be displayed by the Japanese in a naval action. They had beaten the Chinese, it is true, nine or ten years previously, but to beat the Chinese had come to be regarded like trying the mettle of a sword on a lump of dough. To thrash the Chinese twenty times did not constitute any sort of title to be called formidable from a European point of view. Further, among all European nations it is probable that not one entertained such supreme contempt for the fighting capacity of the Japanese, nothing like such supreme contempt, as the Russians entertained. It was due of course to ignorance, but whatever the cause the fact can not be disputed. Now let us suppose that two English ships, one of them a splendid one ship and ■ whole squadron of enemies. cruiser, were hemmed into Chemulpo by half a dozen Chinese vessels of sorts, and suppose that the English commanders had to choose between remaining at anchor to be cannonaded and going out to fight in the open with the road to safety open beyond injury. Finally, the accounts in question the cordon of Chinese war-vessels. Does seem to overlook the Korietz altogether any one doubt for an instant what choice But the Korietz had two 8-inch guns; two the Britishers would make? And does any one doubt for an instant that they would go out with hearts not only stout but cheerful; with a good wholesome spirit of give and take, but with m conviction that the giving would largely outbalance the taking, and that the Chinamen would ultimately be left gaping after their intended prey? We should be sorry to admit the smallest hypothesis of any other course or issue. Well, our belief is that the commanders of the Varyag and the Korietz looked forward to precisely such a prospect as the Englishmen would effectually to be a neutral port at 4 o'clock anticipate in the face of Chinese enemies. The notion of quailing before an Oriental three Japanese transports entered the harfoe never occurred to them, and the notion bour escorted by cruisers and torpedo-boats, of being worsted by such a foe was even The Russian commanders were looking on. more remote from their forecast of probabi- They knew perfectly well what such doings lities. They went out to escape, and they meant.

looked to be safe in Port Arthur before many hours had passed.

The second unnoticed point is that if the Russians behaved bravely the Japan-Admiral Unyu had under his command, but we may safely assume five or six as the minimum. All accounts agree, however, that he employed only two against the Russians. It is the first business of a commanding officer to bring a big force against his enemy. The greater the discrepancy of force he can contrive, the better he has discharged his strategical duty. Had the Varyag, or the Korietz, or both, escaped through Unyu's sentimental repression of his superior strength, every naval expert in the world would have ridiculed his incompetency. He took that risk rather than begin the war by a butchery.

The third point is that much stress has been laid on the superior armament of the Asama and on the Varyag's difficulty in getting within effective range of her own guns. Now the Asama has four 8-inch guns and fourteen 6-inch guns; the Varyag has twelve 6-inch Certainly there is a discrepancy, but as to the Russian ship not being within her own effective range of the Japanese, everything goes to show conclusively that nothing of the kind was the case. On the other hand, what is to said of the Chiyoda? The heaviest gun on the Chiyoda is a 4.7-inch. If the Varyag's 6-inch pieces could not reach the Asama effectively, then most assuredly the 4.7-inch pieces of the Chiyoda were powerless against the Varyag. So, according to the showing of the accounts we are quoting, the affair resolved itself into a duel between two ships, not between A duel with a very strange feature, too, for it appears that during 45 minutes' fighting, the twelve 6-inch guns of the Varyag never managed to hit the Asama once; or at any rate never managed to do her the slightest guns as powerful as any piece on board the Asama. In short, the Varyag and the Korictz between them had two 8-inch and thirteen 6-inch guns against the Asama's four 8-inch and fourteen 6-inch; not by any means a serious discrepancy. It remains a mystery how the two Russians failed to hurt their adversaries in the smallest degree.

The last point is that the commanders of the Varyag and the Korietz can not possibly have laboured under the hallucination attributed to them; the hallucination that Chemulpo was a neutral port. It ceased on the afternoon of February the 8th when and when Japanese troops began to land

GENERAL KUROPATKIN.

ENERAL KUROPATKIN'S aide-decamp, if rightly reported, is either indiscreet or simple. Were it possible to suppose that he deliberately gave away his chief's plans, the former conclusion would be necessary. But of course, unless he be colossally foolish, he did nothing of the sort. When he spoke of recalling all the Russian troops from Korea, he evidently predicted exactly what KUROPATKIN does not intend to do. For that would be a defensive measure, and the Russian commander-in-chief is not going to undertake his campaign on defensive lines, still less is he going to publicly announce any such purpose. The difficulty of forming a programme from Kuropatkin's point of view is that as yet there are no determining data. It is by the Japanese that such data must be furnished. Until the Japanese strike, the Russians can not locate the point of danger-that is to say, so far as Manchuria is concerned. There are several schemes any one of which may be adopted by Japanese strategists. Possibly two or three different schemes may be adopted simultaneously. All these things are still in the lap of an absolutely obscure future, and until the obscurity is dispelled the Russians must defer their decision. But there is one line of action possible to them and it offers the great temptation of being the only line which, if successfully pursued, must lead to a speedily decisive result. That line is to stand strictly on the defensive along the littoral of the Gulf of Pechili and the Yellow Sea, and to strike at Korea with all available offensive strength. Could the Russians drive the Japanese out of Korea totally and wholly while preventing them from gaining any stable footing in Manchuria, the struggle would be over. Now it will be observed that KUROPATKIN'S aide-de-camp is reported to have spoken of withdrawing all Russian troops from Korea and yet finishing the contest within three months from May. Nevertheless he must know with absolute assurance that only by an overwhelmingly strong invasion of Korea can a quick finale be anticipated. So when he talked of retiring from Korea and yet making an end with Japan in three months, he was simple enough to suppose that the public would swallow his programme with his bombast. No profound knowledge of strategy is required to see that although the Russians have lost the command of the sea, they have not lost the capacity of invading Korea. Their invasion can be made from two bases; from the Yalu district and from Vladivostock. In other words, they can march southward by the Seoul-Wiju road, and southward and westward by the Pyongyang-Yuensan-Sonchin road. Both operations would be perilous and would require an exercise of great military force-such an exercise that the possibility of making preparations for it within the course of the next month or six weeks is almost inconceivable. But if the effort can be made on any adequate scale, it

has the great advantage of being independent of maritime communications and of possessing already established bases. Unless Kuropatkin contemplates something of the kind and believes in his own capa-Of course the monies taken from the special city to consummate it, his talk of ending accounts must be restored eventually. the conflict by July is pure persiflage. But Hence it appears in fine that the total of we have omitted one supposition, and we bonds floated must be 461 millions of yen; really believe it to be the most rational namely, 100 millions already issued; 81 supposition after all. It is that KUROPATKIN millions taken from special accounts or regards Japanese military competence with obtained by Treasury notes, and 280 millions just the same contempt that the command- to be further issued. ers of the Varyag and Korietz entertained for the Japanese navy when they steamed above statement are an interesting item. out to meet Admiral Unyu's squadron on the Under the heading of Ordinary Revenue a 9th of February. Kuropatkin thinks that sum of 35 millions appears, and under that of the business. Russia has been greatly asset. If so, then when the whole debt mistaken in many matters and it looks as if has been incurred, the Treasury will find she meant to add to her list of errors.

FINANCE.

THE Prime Minister has informed the leaders of the House of Peers and of the political parties with regard to the Government's financial programme, which will be submitted to the Diet in the session now about to open. Speaking broadly, the official calculation is that the war will cost 576 millions of yen, or, at any rate, that provision must be made for that amount of expenditure. Out of the aggregate sum the outlays on account of the Army and the Navy are put at 536 millions and a reserve of 40 millions is provided for emergencies.

With regard to the means of finding the above money, 46t millions are to be obtained by issuing bonds or floating temporary loans; 68 millions will accrue from increased taxation; and 47 millions from surpluses of revenue. Such are the facts in brief. Further details are as follow:-

Last month an Imperial Ordinance was issued authorizing the diversion of certain sums from the special accounts and the floating of short-period loans. The steps taken under that Ordinance have been :-

Diverted from Special Accounts Treasury Bonds	YEN, 25,000,000 31,000,000 100,000,000

·Total...... 156,000,000 50 to 60 millions, so that about 100 millions coach, and he takes as his starting point the fall remain available for immediate needs. We two volumes will carry the story down to the may add that in this account the Army is year 1855; the second begins with the treaty of expected to absorb 108 ½ millions and the Paris, and terminates with the close of the Palmerstonian era in 1865. The provision of a separate index for each volume will be an interesting in provision. Finance Department rounds off the total.

Deducting the above (156 millions) from Deducting the above (156 millions) from Dr. Magnus Maclean, whose "Literature of the grand estimate (576 millions), there the Celts" received a good deal of attention last

Increased Taxes Surplus of Revenue From Special Accounts Loans	47 millions.

Total 420 millions.

The surpluses of revenue set down in the itself with a sum of 115 millions yearly for the service of a debt of 461 millions. But if the surpluses of revenue be only temporary, then the sum available for the service of the debt will be simply the proceeds of in the Atlantic: increased taxation, or 68 millions. Either hypothesis shows an entirely sound position, for the interest of the debt would be only 23 millions yearly, and there would be from the outset some 45 millions to form a sinking

The taxes involved and the sums to be obtained from them are these :-

1 10	YEN.	
Land Tax	25,943,918	
Income tax	5,287,315	
Business	5,036,199	
Sake	178,484	
Soy	1.138,952	
Sugar	7,402,317	
Mining	79.115	
Tax on Exchanges	532,846	
Okinawa Sake Export Tax	5,398	
Customs Taxes	1 779,010	
Salt Tax	2,836,791	
Silk Stuffs	4 183,885	
Woollen Stuffs	2,138,661	
Kerosene Tax	1,115,875	
Stamps	3,652,749	
State Monopolies	7,061,925	

Total 68,373,440 What the increase represents in each case we shall show in a subsequent table.

LITERARY GOSSIP.

Messrs. Macmillan & Co. have ready for early publication the first two volumes of Mr. Herbert Paul's "History of Modern England," which is Out of this total the sums actually expended to be completed in five volumes. It is the author's up to the present, inclusive of the cost of the view that Modern England may be said to date Nisshin and the Kasuga, have been from coach and he takes as his starting point the fall ing innovation.

brief account of the Gaelic literature of the Highlands after the '45—the golden age of Highland poetry. It will be news even to many Highlanders that their land has produced in comparatively modern times a not inconsiderate body of poetric literature. of poetic literature.

Messrs. Sotheby, Wilkinson, and Hodge, at their auction rooms in Wellington Street, London, recently sold several interesting Shakespeare relics. Among them were an armchair and inkstand made from the wood of the mulberry tree planted by the great dramatist in his garden at Stratford on-Avon, a casket made from the wood of the mulberry tree before mentioned, presented by the corporation of Stratford-on-Avon to George Keate, in recognition of his services to the memory of Shakespeare, and a portrait of Shakespeare carved from the wood of the same tree. The lot that attracted the most attention, however, was "The Unknown Portrait of February. Kuropatkin thinks that sum of 35 millions appears, and under that his own appearance on the scene will be closely followed by a veni-vidi-vici panorama, so he talks of July as the date for the end may this be regarded as a yearly accruing the prices realised the "unknown portrait" attention, however, was "Ine Unknown Fortrait of Shakespeare, painted on a panel of oak, believed to be the identical portrait hurriedly painted when the poet was on his death-bed." Among this be regarded as a yearly accruing the prices realised the "unknown portrait" casket made from the mulberry tree £120, an autograph of the Earl of Southampton (Shakespeare's great patron) £70, a copy of Shake-speare's plays from the library of Thomas Gray, the poet, sold for £120, and a rare issue of the fourth folio edition for £215.

Mr. Clinton Scollard has the following verses

I love a book, if there but run
From title-page to colophon
Something sincere that sings or glows,
Whate'er the text be, rhyme or prose.
And high-perched on some window-seat,
Or in some ingle-side retreat, or in an alcove consecrate
To lore and to the lettered great,
For happiness I need not look
Beyond the pages of my book,
Yea, I believe that like an elf
I'd be contented with a shelf
If thereupon with par pright its If thereupon with me might sit Some work of wisdom or of wit Whereto, at pleasure, I might turn, And the fair face of Joy discern! I love a book—its throbbing heart! And while I may not hold the art That dresses it in honour scant,— The tree-calf * tooled " or "crushed " Levant,— Rather a rare soul, verily, Rather a rare soul, verily,
Than a bedizened husk for me!
So, though no Midas' magic bands
Fo gold transmute my barren sands,
Though friendly Fame deign not to lay
About my brows the vine and bay,
Though fond eyes marry not with mine,
Nor lip to lip give sacred sign,
The core of all content I know,
A blessing that is balm for woe;
On life with level gaze I look,
And all because I love—a book!

With regard to the recently published letter of Herbert Spencer about Japan, Mr. Frederick H. Balfour writes to *The Times*:—During my residence in Tokyo, more than ten years ago, I was in the frequent habit of dropping into Maruya's, the well-known book-seller of Nilon-bashi, who gets out English books on science and philosophy for the use of students at the Imperial University. One morning I made a remark to the shopman upon the very large assortment of Herbert Spen-cer's works with which the shelves were encumcer's works with which the shelves were encumbered—regarding it, not unnaturally, as evidence of Spencer's popularity. "Ah, yes," was the unexpected reply, "Spencer is a drug in the market. We sell scarcely any of his books now, as you see. The young fellows consider that he is 'passe,' and prefer something rather more up to date."

And all because I love-a book!

Professor Wiesner, of Vienna University, has

were the real inventors of our paper. Three of the MSS, in question are of Eastern Turkestan origin, while the fourth is Thibetan. They furnish unquestionable proof of the fact that the Chinese unquestionate proof of the fact that the Chinese manufactured paper out of the fibres of plants, with the addition of the pulp of rags, even using starch to make the paper smooth. At first they could only have used Indian ink, for ordinary ink would have run on their paper. Next, in order to prevent the ink running they must have used gypsun, then gelatine, and finally starch, which led them to the use of size. The Arabs, who learnt the art of making paper from the Chinese, added starch make the paper stronger and purer. The four MSS. are precisely dated, and are of the eighth century (A.D.).

The production of an authoritative biography of the late Marquess of Salisbury is under serious consideration. It has, however, still to be determined whether it is not yet too early to carry such an enterprise to a definite conclusion with any hope of doing full justice to the subject. The late Prime Minister's friends and relatives, who have the bulk of the papers and data within reach, realise that the biography of a Minister of the Crown, and especially one of extraordinary long service and pre-eminence, must of necessity deal with much that is in the highest degree confidential. They, therefore, feel that, unless some little time is allowed to elapse, the biographer will be placed in the dilemma of doing injury by a breach of confidence, or rendering his work of comparatively little interest, and, perhaps, even of misleading the public in important particulars. The official Life, in this case, may not be expected until every detail can be exhaustively considered, and the biographer, given the liberty which it is now impossible to

Professor W. J. Counthope has reached the fourth volume of his "History of English Poetry" and deals in it with the development and decline of the poetic drama in the space of time which we roughly call the Elizabethan age. He has much to say concerning Shakespeare which will interest all students of English literature. Within limits, says Prof. Courthope in effect, Shakespeare the man is seen in Shakespeare the poet :-

My belief is that, in his sonnets, Shakespeare was not, like so many of his contemporaries, elaborating a cold system of poetical flattery, but was giving expression to a profound view of life, the result partly of observation and reflection about men and things, partly of personal experience and emotion; that this view took fresh form and colour at different stages. view took fresh form and colour at different stages of his career; that its lyrical character may be detected running, as a thread, not only through the sonnets themselves, but through his epic and dramatic work, whereby, when these different classes of composition are compared with each other, a certain insight may be obtained into his poetical motives. At the same time the expression of these general and personal feelings is greatly modified by the traditions of the poetical form which Shakespeare employed, so that, in interpreting his sentiment, we have always to keep in mind the vein of thought peculiar to the sonnet from the earliest ages, and the changes effected in its character by the altering moods of society at large.

And here is a summing-up of the poet in his

And here is a summing-up of the poet in his maturity :-

Other dramatists, like Æschylus, may have risen iii more transcendent heights of lyric sublimity others, like Sophocles, may surpass him in the majestic screnity and perfection of dramatic strucmajestic serenity and perfection of dramatic struct; but none can compare with him in the breadth of his imaginative sympathy, in the depth of his imaginative sympathy, in the depth of his insight into the springs of human action, in his knowledge of man's relation to the world in all its aspects—moral, religious, social, and political, in his power of embodying in an ideal the operation of universal passions. His thought embraces at once the elemental simplicity of Homer and the civil refinement of Dante, and there is no nation, no language, of Europe in which the speculations of Hamlet and the sufferings of Lear are not found as interesting to-day as when they were first represented on the English stage. Moreover, the historical examination of Shakespeare's plays explains why they were necessarily the product of the English mation. England alone presented such social conditions at the close of the sixteen century as allowed all the great contemporary tendencies of human action to be reflected in the drama.

FINANCE.

The case lodged by Mr. M. Hamada, Fukuoka Minister of State for Finance, claiming yen 1.90, which plaintiff yen 97.60, and interest at the rate of 6 per cent. from Dec. 4th last till the execution of judgment was unthorities in 1874 when the land survey took place in connexion with the revision of the authorities in 1874 when the land survey took place in connexion with the revision of the authorities in 1874 when the land survey took place in connexion with the revision of the authorities in 1874 when the land survey took place in connexion with the revision of the authorities in 1874 when the land survey took place in connexion with the revision of the authorities in 1874 when the land survey took place in connexion with the revision of the authorities in 1874 when the land survey took place in connexion with the revision of the connexion with the revision of the authorities in 1874 when the land survey took place in connexion with the revision of the authorities in 1874 when the land survey to

THE LAW COURTS.

LIREL CASE.

The trial of K. Maejima, nominal editor of the Yokohama Shimpo, who was charged with having vilified the firm of Messrs. Dodwell and Company in his paper, took place on March 11th in the Yokohama District Court before Judge Hadano and Public Procurator Shigyo.

At the outset of the trial, Public Prosecutor stated that accused published in his paper on December 4th, 1903, a paragraph which said that Messrs Dodwell and Company had sent abroah Japanese girls of ill-fame by their ships. Suce action on the part of the accused should bd punished under the Press Regulations and the Penal Code.

Accused stated that he did not intend to vilify the foreign firm when he reported that girls were going abroad without passports, but simply to advise the authorities to be cautious in administration.

Mr. Vamada, employed by the defence, stated that the information appeared in the paper entirely from the point of view of public interests and did not apply to individuals. He asked for leave to examine Mr. Takahashi, a police inspector of the Harbour station, as a with

The Public Procurator objected to the request but the Court decided to examine the witness

SIG. ISAACS v MAX ISAACS.

The hearing of this case, in which plaintiff claims yen 12,000 damages, caused by defamation on the part of the defendant, was resumed in the Yokohama District Court before Judge Danno

Plaintiff's counsel repeated the statements given at the previous hearing, which took place on Feb.

Mr. Sawada, defendant's counsel, contended that Mr. Dayet had often written to Mr. R. Isaacs, New York, about suspicious circumstances and false entries in the business books and it was to these matters that the lawyer attending the state of the s ed in the previous proceedings. Mr. Max Isaacs, who had a doubt about such false entries in fact requested the Court to avoid such ugly imputations as they would injure the fame plaintiff.

Plaintiff's Counsel, Mr. Masujima, introduced one of the local foreign papers as evidence. This paper published the statement referred to, and Counsel asked the Court to examine Mr. Dayet, and a Japanese as witnesses. The Court decided to examine Mr. Dayet on March 21th at 2 p.m.

INFRINGEMENT OF REGISTRATION.

K. Hirukawa (54) and his wife Kin (50) were sentenced on March 12th in the Tokyo District Court before Judge Imamura to two months' imprisonment with hard labour, a fine of yen 4, and six months' police surveillance each. They brishment with that tabon, a the of few 4, and six months' police surveillance each. They borrowed on March 12th, 1903, yen 800 from Mrs. Matsumoto offering their dwelling house as security. The transaction was registered in the Tokyo Local Court. They then borrowed yen 3,300 on April 14th in the same year from another person and gave the same security.

CLAIM AGAINST THE MINISTER FOR FINANCE.

The case lodged by Mr. M. Hamada, Fukuoka prefecture, against the Minister of State for Finance, claiming yen 1.90, which plaintiff insists he wrongly paid out on behalf of the authorities in 1874 when the land survey took

the Prize Court. The hearing will be resumed in the beginning of April.

A CHARGE OF INCENDIARISM.

An Indian merchant, M. C. Fernandez, No. 127, Yamashita-cho, Yokohama, who is charged with incendiarism, was committed for trial on March 12th in the Yokohama District Court.

According to the decision of the preliminary examination, the accused arrived in Yokohama on Jan. 1st this year with the purpose of starting on Jan. 1st am year with the purpose of starting business in imports and exports. On the 26th of the same month he rented a house, No. 127, belonging to a French gentleman, and established an office there. He engaged a Portuguese, J. da Silva, and three Japanese. Subsequently he purphased from Japanese merchants. guese, J. da Silva, and three Japanese. Subsequently he purchased from Japanese merchants furniture, silk goods, porcelain, lacquered ware, and bronzes. On Feb. 15th the accused insured the merchandise, etc., with the Hongkong Fire Insurance Company, Ltd., whose Yokohama agents are Messrs Jardine, Matheson and Company, and Schale and Company. pany, for a thousand yen. On the 22nd of the same month he paid yen 7.50 to the agents as premium. At this time the accused was in such a distressed condition that he spent yen 450 which had been deposited by the three Japanese employees as their personal guarantees. The accused, at 6 o'clock on the evening of Feb. accessed, at 6 clock on the evening of Feb. 22nd, set fire to a bag of sulphur which was kept in the sample room, the result being that a part of the building was destroyed. His action should be punished in accordance with Art. 403 of the Penal Code, and he is committed for trial under the provisions of Art. 168 of the Code of Penal Procedure.

YAMADA v. SIMON, EVERS & CO.

The hearing of this case, in which plaintiff claims yen 546, was resumed on March 14th in the Yokohama District Court before Judge Danno.

The case arose over a sugar contract, particulars of which have already been published in the other cases of Yamada versus Messrs. Simon, Evers and Co., and Messrs, Simon, Evers and Co. versus Yamada.

Plaintiff promised to purchase from defendants Haintin promised to purchase from defendants three thousand bags of sugar for yen 26,712. Before the arrival of the goods, he promised Watanabe, a sugar dealer, a thousand bags, and another dealer, Komiya, two thousand bags, for yen 9,114 and yen 18,144 respectively, which figures make a total of yen 27,258. On the arrival of the sugar the merchandise proved to he arrival of the sugar the merchandise proved to be of an inferior grade to that contracted for and plaintiff would not take delivery of it, and so lost the expected profit.

Defendants' counsel repeated his former con-

tention and added that the Tokyo Appeal Court had dismissed a similar case which arose from the same business, and which the Court decided it could not receive as the contract stipulated that any dispute that might arise must be submitted to arbitration and not taken into court. This case must also be settled by means of arbitration and not in Court.

Counsel entered on a brief discussion, after which the hearing concluded. Judgment was reserved till March 16th,

TAMAMURA v. G. R. ALLEN.

This case came up again in the Yokohama Local Court on March 15th when judgment was delivered ordering defendant to pay plaintiff yen 97.60, and interest at the rate of 6 per cent. from Dec. 4th last till the execution of judgment, and

Plaintiff was represented by Mr. Ideura, and defendant was absent and not represented

明治廿五年三月廿日第三種都便物理の

Plaintiff's counsel stated that plaintiff lent defendant yen 1,700 on June 1st, 1900, on security of the perpetual lease of No. 270 Bluff, together with two houses and a working factory situated on the ground. On the due date defendant did not man healt the principal. defendant did not pay back the principal though plaintiff often urged payment. Owing to the absence of defendant, judgment

was delivered in favour of plaintiff with costs.

LIBEL CASE

Mr. Ikariyama, Superintendent of the Kaga-cho Police, lodged on March 17th in the Yokocho Police, lodged on March 17th in the Yoko-hama District Court a libel case against the nominal editor and publisher of the *Chuo Shimbun*, published in Tokyo. He alleges that the paper vilified him by connecting his name with Mr. Takahashi, who was recently punished for having divulged military secrets to a Russian officer.

AMERICAN TOPICS.

With the performance of "Parsifal" at the Metropolitan Opera House, New York, on Feb. 11, the maximum operatic receipts in America and probably in any other country were reached. The two performances of "Parsifal" yielded vielded approximately \$38,000. The receipts of eight days were \$100,000.

Mr. John D. Rockefeller has resigned from the board of directors of the United States Steel Corporation. In tendering his resignation Mr. Rockefeller wrote that "it has not been convenient for me to attend the meetings of the board." John D. Rockefeller, Jr., still remains a director

Of photographs, chromos, drawings and engravings the United States sells Canada a quarter of million dollars' worth as against forty thousand dollars' worth coming from England. And the sum-spent by Canadians on English Bibles, prayer-books, psalm and hymn books has diminished by a half in the last five years, while our own exports across our northern frontier have exactly doubled in the same time.

During January there were built and officially numbered in the United States forty-six vessels of 13,992 gross tons. The great lakes led in tonnage ith 7,154 tons, made up by the Duluth, built at Chicago for the American Shipbuilding Company, and the Pere Marquette, built at Wyandotte, Mich., for the Eastern Equipment Company. The Atlantic and guif ports showed a total contraction of treatment and surface and surfa struction of twenty-eight vessels. The remaining construction was on the Pacific coast and western

Regarding the population of Hawaii, figures show a steady decrease in the number of natives and a steady increase in the number of persons of foreign birth, especially Japanese and Chinese. In 1872 the number of natives was, in round the number of natives was, in round terms, 50,000, and in 1600, 30,000. In 1872 the number of Chinese was, in round terms. 2,000 and 1900, 25,000. The record of Japanese among the population only begins with 1884, when the number was 126 persons, but in 1900 the number was over 61,000. The total population of 1872 is given at 16 800 and in tion of 1872 is given at 56,897, and in 1900 at 154,001.

People who have suffered from the alkali dust People who have suffered from the alkali dust in travelling through southern Arizona, New Mexico and Texas, find the old plague has partically disappeared. This has been accomplished by sprinkling the track with oil. The principal reason why the oiling of roads has proved more successful in the West than in the East is that the California oil has less edge, in much less relative. California oil has less odor, is much less volatile, and contains a larger amount of asphalt than the and contains a larger amount of asphalt than the Pennsylvania oil, and therefore forms a more perfect crust of asphalt and sand. When this work was first taken up three years ago, many difficulties were experienced in handling the thick, mucky, crude oil, but at present it is possible to distribute it the full width of the ballast on the roadway and that, too, while

running at the rate of about ten miles an hour. United States Steel Corporation at a labour cost From four to six thousand gallons of oil are used to the mile. It has been found necessary to follow the first application of oil with subsequent sprinklings from six months to a year and a half, depending on the amount of rainfall and the character of the ballast. In sandy regions the oiling must be repeated after any extensive working on the track which breaks the gummy crust.

A law recently promulgated fixes the gold and silver of the Argentine Republic as the legal currency in Paraguay. The United States \$20 gold piece is worth \$20.40, and the English sovereign \$5 in Paraguayan gold. The banks and exchange houses observe this law. For instance, in making a draft on the United States they will take each dollar at \$1.02 when it really they will take each dollar at \$1.02 when it really bears a premium of \$1\frac{1}{2}\$ per cent, mint value in the Argentine gold. The exchange as a rule is quoted at the rate of the day on which Argentine gold is being sold. In addition to the foregoing quotations of American gold there is a bank discount and a computation of interest to be calculated. The silver pieces of 25 grams, .900 fine, will be valued at 94 cents, Paraguayan, and the fractions at their respective values accordingly.

While New York's bank clearings for 1903 were \$13,000,000,000 below those of 1901, when the record was made, the clearings of London's banks in 1903 were \$3,000,000,000 above those of 1901 and \$500,000,000 over those of 1902. Nevertheless, New York is still far ahead of London in the grand total. While New York's clearings in the year recently ended amounted to \$66,000,000,000 in round figures, those of the London banks were only \$50,600,000. The American city was more than \$15,000,000,000 ahead of the British metropolis in this very important activity. If the bank transactions be a fair criterion of the volume of general business, then New York is far ahead of London in the grand aggregate of its trade, reasons the St. Louis Globe-Democrat. The proportionate extent to which checks are used in business in the two which cheeks are used in business in the tro-centres, of course, is a matter which has a very important bearing on these figures in making a comparison based upon them between the two cities. It is a fact, however, of great significance that London was ahead of New York in this particular until 1898. In that year, for the first time, the American city got ahead of its British rival. New York has been ahead ever since, though its lead has been shortening since 1901.

In his last annual report on the Philippines as Civil Governor, the new Secretary of War says that political conditions in the islands make the time ripe for a period of great construction, and that during the next decade railroads, canal and steamship companies should revolutionize the interior trade of the islands and have a marked effect on the export trade. He suggests, therefore, that the Philippine Commission be authorized, with the approval of the Secretary of War and the President, to enter into contracts with railroad companies to whom franchises for the construction of roads shall be granted, by which an income of not exceeding 4 per cent., and probably not more than 3 per cent., shall be guaranteed on the investment, the amount to be fixed in the law. This method of financial encouragement is declaced to be much preferable to the granting of lands, or other forms of govern-ment subsidy. He urges certain tariff reductions and the authorization of bond issues by the commision or legislature to a limited amount for permanent improvements. It is interesting to note that in his new post Secretary Tast will continue to play an importent part in the govern-ment of the islands. The very day, by the way, on which his report was transmitted to Congress witnessed his formal induction into the office of Secretary of War.

not to exceed fifty cents a ton, and as low as forty-seven cents a ton has been done at times when the output has exceeded the normal. economies cannot be practiced where the latest appliances are not installed, but the record shows what can be done by the adoption of economizing equipment to the fullest ex-tent, and point to the possibilities of further appliances in a country in which high wages are a constant spur to labor-saving inventions. It is also pointed out by our contemporary that one large steel concern is considering the advisability of increasing its blast furnace capacity so that in periods of great demand it can meet the requirements of its steel plant from a moderate output of an increased number of furnaces, rather than by record-breaking tonnages from its present capacity. The cost of additional furnace capacity will be great, but the economies accruing from iron conforming to the required analysis, from less fluxing material and less wear and tear on machinery, it is believed, will more than balance the nery, it is believed, will more than parance initial cost and the interest on the investment.

Several lessons may be drawn from the Balti-more fire, of value to that and other cities in the more fire, of value to that and other cities in the future, says Bradstreet. Baltimore does not appear to have had the fullest physical equipment for the purpose of fire fighting. Its engines, in the words of the New York firemen, who are credited with finally checking the fire, were too light and too few to cope with a fire in a city of 600,000 inhabitants. It is reported, too, that the New York engines alone were capable of pumping salt water, though why this should be so is a mystery. Again, engines alone were capable of pumping salt water, though why this should be so is a mystery. Again, Baltimore's proximity to an unlimited supply of salt water does not seem to have prompted the creation of an auxiliary system of salt water mains for fire purposes. This, however, is something which New York, Brooklyn, Philadelphia and other coast cities seem to have overlookhd. Standard sizes of hose and couplings would seem to be pointed to as necessary also. The fact that, with few or no exceptions, the insurance companies will pay their losses promptinsurance companies will pay their losses promptly and in full shows that they have not forgotten the lessons learned from the Chicago disaster as to segregating the individual risks. It is questionable, however, whether the companies in all cases have allowed for the risk of general conflagration as opposed to the ordinary fire risk. connagration as opposed to the ordinary fire risk. Given a high wind, a breakdown in the apparatus and several other conditions, such a thing seems possible in any city. Hence the need of limiting any one company's liability to loss from fire in any one city. Dynamiting as a means of stopping a great fire's spread does not seem to have been a distinct success. Another reflection that comes to mind success. Another reflection that comes to mind is that fireproof or rather slow burning construcis that hreproof of rainer slow burning construc-tion is of no particular value in hindering a fire's spread if these buildings are surrounded by old and flimsy constructions. Finally, it will pro-bably be rather easier for the companies to get a fairer price for the insurance they offer than it has been in the past few years of extreme com-petition and cut rate insurance. The Polymer petition and cut rate insurances. The Baltimore fire will not have occurred in vain if some or all of the lessons deducible from this fire are taken to heart and thoroughly learned.

NEWS OF THE WEEK.

Copper	17,896,104.21
Convertible notes	221,800,400.00

Tong-Yuen, a Chinese trader in Osaka, has chartered the British steamer Tingshing to reopen the service between Kobe and Tientsin. The steamer was to leave Kobe on March carrying 2,700 tons of sundries for North China. The Jiji adds that about eight thousand tons of merchandise for Tientsin are still lying at Kobe and Osaka untouched since the service on the line was suspended.

From the Autocar :-

Wanted.—Will any wealthy, charitably disposed gentleman, enthusiastic automobilist, or large firm, give a greatly interested man of small means a second-hund car? Applicant, who would be deeply grateful, is very keenly interested in motoring, but cannot afford to buy a car. As a guarantee of good faith, he would gladly undertake not to dispose of the car at any time without the full consent of donor. A certain bishop is supposed to have begun an episcopal charge with the expressive words, "I feel a feeling which I feel we all feel." The feeling which this advertiser feels is almost if not quite universal, and extends to many other objects besides motor-cars. How many of us are "deeply interested" in motoring, or for that motters in this chipmen I that in pictures and yet. matter in blue china or Italian pictures, and yet "cannot afford" to indulge our fancy! It is only the idea of advertising the sentiment that is novel.

THE WORK OF THE WOMEN'S CHRISTIAN ASSOCIATION IN AMERICA.

[A paper read before the Tokyo-Yokohama Ladies sionary Conference in Tokyo, Feb. 27, 1904.]

The Italian Minister at Tokyo, according to the Official Gazette, has informed the Japanese authorities that Major Caviglia is appointed Military Attaché to the Legation and that he is expected to arrive in the beginning of April.

Punch, contributes a delightful item to the discussion of the situation between Russia and Japan. "We understand," says the humourist, "that the chief difficulty which prevents Russia from giving way in the present dispute is the fear that, if she now carries out her promises as regards Manchuria, a dangerous precedent will be created."

Captain Viscount Ishiyama (40) of the First Commissariat was found dead on the morning of March 33th, having committed suicide by shooting himself in the throat with a revolver in a building at the rifle range belonging to the militage, or court noble, beforethe Restoration. During discovered the restoration of the young women neither could a large, or court noble, beforethe Restoration. During discovering the method with the Young Mem's Christian Association in America, it is interesting to see how it grew up within the Young Men's Christian Association did it develop a serve the organization of the first Association of the first Associatio In reviewing the history of the Young Women's

the young men further the special work for young men which is the aim of their Association; so Mr. Wishard was sent back to teorganize the Student Associations. This left nothing for the young women to do but to form Associations of their own, which they did with the help of Mr. Wishard with such results that in 1885 there were between eighty and ninety Young Women's Christian Associations under constitutions similar to those of the Young Men's Christian Associations, adopting the principles of the latter, pursuing their methods, attending their State conventions and receiving the gracious help of their Secretaries. Naturally enough suggested, the next step of progress was the formation of State Organizations. Michigan led in 1884 and by 1886 there had followed Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Kansas, and Nebraska, nine states in all.

by 1886 there had followed Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Kansas, and Nebraska, nine states in all.

But now a serious problem presented itself to these young organiters. There came calls from cities for work among young women similar to that being done among young men. Some of the state organizations amended their constitutions so as to admit city associations, but for most of them this was not an adequate solution. The State Committees at this time were made up of young women from the Associations and teachers and the head-quarters were liable to be moved every year. Besides a growing responsibility was being felt, not only few college women in a few colleges, but for all young women throughout the land. A central Committee of strong women was required to control such a work from a national standpoint. Could such women be found willing to undertake an untried-pioneer work? Could a Secretary be procured, talented and devoted to her calling? Whence would the means of her support come? were some of the questions that perplexed the early leaders. Of the character of the latter the first Secretary speaks as follows: "The organization was crude and the workers untried but their enthusiasm knew no bounds. We cannot speak too highly of the personnel of those early associations. They were picked workers who had come to the kingdom for such a "time as this" and seemed called of God to lay broad and deep the foundation of a large superstructure which God should build in his own way. Sample and humble, energetic and faithful, ready to do anything for the Master—believing firmly in the needs of the Association and seeing at least dinly its possibilities, they were deeply consecrated, warm-hearted Christinn workers, winners of souls who "turned many to righteousness and will skine as the stars." For such workers the only step was a forward one, and August, 1886, saw delegates from eight states assembled at Lake Geneva, Wisconsin, with three purposes regarding the National organization they wished to e in, with three purposes regarding the National organization they wished to effect:

I. Its aim should be fourfold—the promotion of the physical, social, mental and spiritual life of young

women.
2. An Evangelical basis which should affiliate it with the church.

3. A permanent executive committee to oversee and develop it.

and develop it.

The organization was effected, the National Committee chosen—its headquarters located at Chicago, and a Secretary called. That same summer saw the beginning of the great missionary revival that swept over our colleges and five hundred of the first two thousand Student Volunteers were members of the Young Women's Christian Associations. The first year the new Secretary gave her time to the study of the field. The work developed rapidly. State conventions were held. Secretaries began to be called for state work. Associations were organized in N. Y. and Penn. The Young Women's Christian Association Quarterly, since become the Evangel, was published. A second Secretary was sent to the Pacific Coast. In 1891 the first summer school was held at Bay View, Michigan.

The Association had now spread its wings from coast to coast and the next five years were intensive. The first summer school removed from Michigan to Lake Geneva, Wisconsin, became inadequate; and with Mr. Moody's consent a second conference was held for the East at Northfield, Mass. This was followed by one for the South, finally established at Asheville, North Carolina, and that by one for the far west held at Capitola, California.

The last five years *898*1903, have been called the period of specialization. The work has grown The organization was effected, the National Com-

The members of the National Committee are being chosen to study and become authorities in that part chosen to study and become authorities in that part of the work only in which they are specially interested. The Summer Conferences are being divided in city and college conferences and in such a matter as the securing of funds even donors are asked to give directly to the support of a particular worker or a particular field. The following figures exhibit the remarkable growth of the Association:

In 1886.

na	titutions.

The National organization with its large secretarial force, the state organizations with their state secre taries, all exist for the sake of the individual association city and college.

What is a city Association like? In many of our large cities you find them occupying sometimes a whole building sometimes one floor not far from the business part of the town, a home where shop girls, clerks, waitresses, stenographers, teachers, any self-supporting girl, girls of leisure, every girl of good moral character, may come and go as she pleases and find help for every side of life. They differ widely according to the needs of the field, for the Association aims to be very pliable and enters its field with but one fixed idea—that of bringing the bless-ings of Christ's layer peaces. It is were very worm, woman ings of Christ's love nearer to every young woman. Not old lines of work are taken up by every Associa-tion but every Association has some of them. The Association aims to promote the physical life and more or less connected with this department are the following lines of work.

Noon Rest where a wholesome lunch is provided

or women only at reasonable rates.

A Rest Room, with lounges, darkened and quiet.

Gymnasium. Courses in Domestic Science and Domestic Art.

Summer Cottages or Summer Outings. Boarding House Directory.

Employment Bureau, Traveller's Aid. To promote the social side of life there are social occasions at the rooms or in the homes of members and clubs both social and literary.

For the mental life there are lectures and entertain-For the mental life there are lectures and entertainments and educational classes in which the fo lowing are some of the subjects taught; English, Stenography, Type-writing, Book-keeping, History, Literature, Physiology, Rhetoric, Elocution, Chorus Singing, Mandolin and Guitar, Piano; Drawing Painting, Pyrography, Venetian Iron Work; German, French and Italian. For the promotion of the spiritual life there are Bible Study classes, Devotional Meetings and Gospel Meetings and the personal work of the Secretary.

Meetings and Gospel Meetings and the personal work of the Secretary.

Perhaps the most popular, because the most recently developed, side of Association work is what is called Extension Work, the holding of noon meetings in manufacturing establishments and the betterment of the conditions of the workers. Thirty-seven Associations are doing Extension Work, ten have Secretaries. In 80 factories regular meetings are held touching 866 young women weekly. A letter from one of them, quoted by Miss Barnes in her report, is sufficient evidence of its value:—

"You cannot realize how we look forward to Thurs-

" You cannot realize how we look forward to Thurs day as our Sunday, to meet our Serretary, who comes one day of each week to talk about the best things of life. She tries to bring others into the light by telling them how esus leads and helps her. I want to tell of one instance in which he helped me. There was one morning at my work I could not see my way through and I remember our Secretary told us not to worry but to pray and trust. So I said I would not cross the bridge before I got to it, and just then our dear forewoman, whom I used to hate came and offered to help me. It seems the dear, Lord sent her to show me how true the message was received a few days before. I am sorry to say that

I have not come into the beautiful light yet but

expect to one of these days."

Rest rooms, lunch rooms, a recess of ten minutes Rest rooms, lunch rooms, mercess of ten minutes in forenoon and afternoon, a matron to look out for the girls—are some of the features the Extension Work is promulgating. Again, quoting from Miss Barnes—"A vision of true solidity of character, no matter where placed, is to be the heritage that will fall to the young women themselves. We cannot give soft hands nor costly raiment to every gill, but we can help to kindle a fame in her soul that shall make these things of small account. The girl may never change her environment. She may never know luxury nor even many comforts, but she may live to mobiler purpose and struggle not in vain, for the life that Christ has entered fails never in its aim."

am.

It is impossible to estimate all the Association
means to girls compelled to work their whole lives
through, yet haunted always by ideals long cherished
which are through the Association placed within

their grasp. The College Association has to do with a more The College Association has to do with a more favoured but not less needy class of young women. The physical and mental life of college women is pretty well taken care of. Indeed, too much mental life is a danger and as much as possible there is brought to the front the Association ideal of the young woman "thoroughly furnished." in her whole being. It is the promotion of the social and spiritual life, how-ever, that is the especial care of the College Associa-tion. In the University of Minnesota there are two tion. In the University of Minnesota there are two functions recurring as regularly as the years go round, the Reception for Freshmen and the Past Examination Jubilee, given jointly by the Y. M. and X. W. C. A.'s. Christmas and Valentine paries, Twilight Concerts, Serial Farewell Spreads, suggest ways in which the young women are brought together to become acquainted.

For the spiritual life there are Bible classes in which during 1902, 10,412 students were entolled. There are Mission Study Classes and Devotional meetings held weekly.

meetings held weekly.

One important feature is the Fall Campaign, in-One important feature is the Fall Campaign, instituted by the early return of old nembers to college in the fall to make themselves generally useful to the entering class, by furnishing a boarding house directory, an employment bureau, assisting in the intricate process of registration, in disentangling programmes, sealed by enrolling, after a thorough canvass, as many as possible of the new girls on the membership and Bible Study lists.

many as possible of the new girls of the memoership and Rible Study lists.

As for the Summer Conference, Robert Lyon has a word to say about them which will bear quoting again: "Apart from all other work which the American Committee is doing the good that has been accomplished through the summer conferences would, in my judgment, be sufficient to justify its existence and continuance. Hundreds of young women have in these conferences either begun in Christian life or taken such a forward step in it as constituted a practically new devotion to Christian tastes and Christian service. Habits of Bible Study, interest in missions, a straightforward sense of duty, new conceptions of prayer, a deeper love for Christ as personal Lord, have come through these conferences to young women from all parts of the country and from other lands. The Church at home and abroad is receiving now a wealth of truer aud more faithful service as a result of these summer conferences."

And now "A man's gift maketh room for him," What are the gifts of the Association that have made room for it? Wherein lies its strength?

1.—In its basis—the Rock on which Christ said

r.—In its basis—the Rock on which Christ said his church should be built, and more and more is that getting to be the care of the Association. Individual getting to be the care of the Association. Individual Associations are coming to emphasize that their only excuse for existence is the avowed purpose of relating every girl within reach to Jesus Christ as her Lord and Master. Any organization that takes that as its definition of Christianity is sure of blessing.

2.—In its concentration. It is for and by young women. The Secretaries become experts in the problems of a certain class and less time is lost in dealing with them.

dealing with them.

3.—In its breadth.

a. In aim, a four-fold work. No one can complain that anything is left out. It anticipates all accusations of narrowness.

b. In scope. It reaches after every young woman. There is already, there will be more and more brought about by the Association, an interest of every woman in every other woman without regard to rank or condition.

rank or condition.

4. Its oneness. It is interdenominational and can therefore work where churches may not work.

5. Its foothold in strategic points. Notions long prevalent that only those entered Christ's work who by nature were incapacitated for any other are being revolutionized by the entrance into leadership of the strongest young women in college. It is being recognized that Christ's cause demands the most gitted.

Again, the training received is a valuable prepara-tion for Christian work after the college course,

6. It is practical.

a. In practical things, such as the extension work. b. In spiritual things, There is no vagueness. It insists upon taking honestly the things Ghrist said. It demands the old-fashioned repentance and the old-fashioned forgiveness, and it demands also a real surrender, an abiding in Him. Its work has not been so much making new Christians as giving new life to old Christians.

It is hard to tell in words of mouth what the Association is doing. It is better known in the hearts of those who have through God's rich grace been brought face to face by it with the blessed reality of a living Fountain, opened for sin, a personal Friend who offers to every one an unbroken, eternal companionship.

THERESA MORRISON.

WHY AMERICANS SYMPATHIZE WITH

[By J. H. DR FOREST.]

The following paper was published in Japanese in the Kahoku Shimpo, Sendai, in February. It is now issued as a Japanese tract by the Kei Sei Sha.

Doubtless the Japanese people know in a general way why the \$5,000,000 of our great Republic, from President Roosevelt to the ordinary citizen, are a unit in their deep sympathy for Japan. But it may not be out of place at this crisis for an American who has lived thirty years in Japan to set forth some of the reasons for this attitude.

the reasons for this attitude.

A recent magazine from the United States says that the Russian diplomats in Washington are greatly surprised at the warm feelings towards Japan, and one of them says:—"Why should America be proJapanese? You want peace. The Japanese people do not want peace. They are more and more urging their Government towards war. And you are backing the disturbers of peace against conservers of peace against conservers of ing the disturbers of peace against conser

Naturally a Russian must talk in this style, but it makes no impression on Americans, as is seen from the recent cablegrams from the States announcing offers of service to the Red Cross Society and mil-lions of money for Japanese war bonds. There is a lions of money for Japanese war bonds. There is a true and deep enthusiasm in American hearts every-where for Japan, and I have not heard of a single American who thinks Russia is right and worthy of victory. In my mind the weighty reasons for this are as follows :-

are as follows:

I.—Russia is a great despotism. The United States is a great Republic. One stands for tyranny, the other for liberty.

But some one may ask: Have not the United States and Russia always been on friendly terms? Did no: the United States feel grateful to Russia when, during the war for Independence the Russian fleet appeared in United States waters and gave new courage and hope to our exhausted army? And again, did not Russia give great comfort to the United States waters to the United States waters are given from the United States waters and gave new courage and hope to our exhausted army? courage and nope to our exhausted army? And again, did not Russia give great confort to the United States in the civil war of forty years ago by sending her fleet to New York, while England's attitude, though professedly neutral, was really hostile to the United States?

Yes, we freely acknowledge that the friendship of Yes, we freely acknowledge that the friendship of Russia on these two occasions was of great value in us, and we are truly grateful for her kind services. But at the same time we know very well that Russia's sympathy for us was superficial and prompted not by any lore of our Republic, but by hatred of England. It was to annoy England rather than to assist the United States that Russia was prompt in her expressions of sympathy. All the love that ever existed between the States and Russia is only skindeep, and we are under no obligations whatever to deep, and we are under no obligations whatever to sympathize with her so long as she stands for tyranny and hatred of liberty.

There are some splendid men and women in Russia and at the head of all is the truly noble-hearted gentleman and monarch, Nicholas III. We must not gentleman and monarch, Nicholas III. We must not forget that he is a lover of peace and righteousness, and that he was the one who instituted the Hague Peace Tribunal in the hope that all difficulties between nations might be settled by peaceful arbitration, and wars he prevented. If he could have had his own way, it is widely believed that he would have seen the justice of Japan's claims, and would never have allowed war to begin. We all remember, too, that he entertained no bitter feelings towards Japan when that crazy policeman near Otsu, in attempting to kill the Prince, unade an almost fatal wash on his to kill the Prince, made an almost fatal gash on his

But the Russian nobility, who surround the Throne, are the ones, we believe, who have forced the Czer to take the successive steps that were sure to end in war. His councillors are the ones to blame, and they are those who uphold the tyrannical form of

There are others who love liberty and righteous-

ness, like Count Tolstoi, but their voices have been choked. There are multitudes who have been ex-asperated by intolerable acts of despotism until they asperated by intolerable acts of despotism until they have become haters of all government and plan to assassinate all rulers. Hence Russia breeds what is found so much in no other nation—bands of anarchists and nihilists who are willing to throw away their lives in order to kill their oppressive ruler. A few years ago, in crossing the Pacific, I made the acquaintance of a Russian military officer and had frequent conversations with him. At last I ventured to ask him how such an educated and cultured gentleman as himself could endure the despotic condition of his country. At first he refused to entertain a question that reflected on his native land, but on my pressing it with a sincere desire to know entertain a question that renected on his native and, but on my pressing it with a sincere desire to know his heart, he opened freely to me and said with deep emotion:—"If our Government does not grant a Constitution and give us our rights, before long there will be a revolution by the side of which the French Revolution will be mere child's play."

We must not forget that the love of liberty exists in many brave and suffering hearts in Russia, among students, peasants, exiles, and even in the army With this spirit we Americans are in deep sympathy But the real power is in the hands of the despotic party, and for them we have but one prayer—that they may be speedily overthrown and utterly defeated, they may be speedily overthrown and utterly deteated, by peaceful means if possible, if not, then by crushing force. This is the loud demand that Americans make to Russia:—Give to your people from whom you have too long withheld most precious rights, political liberty, with a Constitution worthy of the twentieth century, and thus take you place by the side of nations that two progress and humanity.

It is because Japan with open mind and heart saw the untold value of having a Constitution with reprethe untold value of having a Constitution with representative forms of government, and with pollucal and religious liberty that the people of the United States at this crisis are drawn in profound sympathy to her. Were I not for your glorious Constitution, were Japan back in the Tokugawa style of national life, we should never think of shouting "Banzai" for the Enaperor and sending sympathetic contributions in time of war. It is because we feel that Japan now stands for the great principles of human progress and international righteousness that we deeply sympathize with and wish her Emperor long life and her army and navy speedy and decisive victories on land and sea.

2.—Russia, being a despotism, naturally hates

2.—Russia, being a despotism, naturally hates universal education. The United States, being a Republic counts if the privilege of every man, woman, and child to have the fullest possible education.

It is pitiable in the extreme to read of the dense

ignorance of the 130,000,000 of Russians. Poultney Bigelow, an American writer of wide repute, said three years ago:—"Out of 100,000,000 Russians three years ago:—"Out of 100,000,000 Russians there are 90,000,000 who can neither read nor write." These ignorant millions, he says, are "on the social and intellectual level of domestic cattle." They obey officials just as dogs obey their masters. It is this that characterizes their colonial expansion—the dense ignorance of the colonists and the lack of schools. A despotic government cannot afford to have schools and universities except in quantity enough to educate the necessary officials. Japan has enough to educate the necessary officials. Japan has proportionally ten times as many pupils in schools as Russia.

Every ray of political and religious liberty is a sm. Therefore Russia has de danger to despotism. Therefore Russia has despotic press laws, and is careful to suppress all liberty-loving articles from papers and magazines and books. And lest such dreaded articles should get into Russia from other countries, all foreign papers and magazines and books are examined, and everyand magazines and pooks are examined, and every-thing unfavourable to the despotic atmosphere in blotted out with great ink-blacked pads. This is a well known fact, and it was confirmed by the Rus-sian officer above mentioned, who told me that all his foreign magazines were thus treated with abund-ance of black paint. He also said that the foreign books bought for the Government libraries were not thus injured, but whenever he drew one to read he was obliged to sign a paper promising that he would reveal its contents to no one, and that he would not leave it where any one could see it. Just think of such a government in this enlightened Twentieth Century!

a government in this enlightened Twentieth Century!

Five years ago I visited Vladivostock with some friends and went into the interior of Siberia a few scores of miles. One of my friends in an interview with a high official asked him how he regarded the common people of Russia. His prompt reply was:—

"They are made for us to rule and for our benefit."

When my friend told him that in the United States it was just the opposite—that Government was for the benefit of the people—he seemed unable to comprehend it. In his training and experience, the great ignorant masses needed masters to command them, and there was no need of regarding them as fellow ignorant masses needed masters to command them, and there was no need of regarding them as fellow human beings. They were to be whipped and sent into exile and shot like dogs if they disobeyed.

How can liberty-loving America have any sympathy with a nation whose political creed is that men

are to be kept in ignorance and held like cattle? Russia daubs with black ink the papers and magazines of the United States; Russia has forbidden inagazines of the United States and the Institution of our great writers to step upon Russian territory, and last year she expelled the correspondent of the London Times from her empire. Russia is the great friend of ignorance and despotism, and the great enemy of free institutions and education.

We of the United States believe that all people should have the light of knowledge. And when at the clear of the reserving with Social had Builtingians.

the close of the recent war with Spain the Philippines fell into our hands, one of the first things our Govern-ment did was to send one thousand trained teachers ment did was to send one thousand trained teachers there to establish the best schools everywhere. We might have annexed Cuba, but instead of that we invited two thousand of her teachers to visit the United States, to study during the summer at one of our great universities, then to examine our cities and our methods of government, and then we carried them back to Cuba in our transports without it costing them anything. In this way we desire to give to the whole world as fast as possible the blessings of knowledge.

It is because Japan is so enthusiastic for knowledge.

It is because Japan is so enthusiastic for knowledge, and because her young men have gone by hundreds to our universities in the United States, and because her noble Emperor showed his grandeur of purpose in his admirable Rescript at the opening of his prosin his admirable Rescript at the opening of his pros-perous reign in these words:—"Seek for knowledge throughout the whole world," that we Americans rejoice in Japan's progress and in this crisis especi-ally feel profound sympathy for her. We fear that victory for Russia will mean a vast extension of tyranny and ignorance, while victory for Japan will mean a check to despectisms in the East and open doors for one of man's most precious rights, the right to knowledge.

mean a check to despitisms in the East and open doors for one of man's most precious rights, the right to knowledge,

3. Russia, in accordance with despotic principles, employs religious to strengthen the chains of tyranny and ignorance. The people of the United States stand for religious liberty and believe that true religion is one of the best safeguards of the home, of society, and of the State.

Russia is called a Christian country. Doubtless there are a great many noble, earnest, self-sacrificing Christians among her people. Her Emperor is one, a devout believer in God, the Father of all men, and a lover of the righteousness that is taught by Christ. Bishop Nicolai, whose long unselfish work in Japan shows his Christian character, is another noble gentleman and scholar. There are not a few such in Russia, and if we think only of them we may well say that Russia is a Christian country. Or, if we look superficially, we shall see that the Russians have the same Bible and worship the same one God and believe in the same Christ that all Western nations do, and therefore we may call Russia nations do, and therefore we may call Russia

in reality the Russian Government uses But in reality the Russian coveriment uses. Christianity as an aid to despotism and ignorance. Religious liberty is one of the most precious of human rights, yet we may say there is no such thing as religious liberty in Russia. It is true there are Jews and Armenians and many kinds of Protestants, Jews and Armenians and many kinds of Protestants, altogether amounting to 15,000,000, but they suffer all kinds of repression and open persecution, and even death. They live in fear of revolt, and are a constant source of anxiety to the public peace.

Christianity is the State religion, and of course has

many educated bishops and priests in the upper cir-cles, but the majority of priests are ignorant and superstitious, and can be of no use except in an ignorant and despotic environment. Instead of Instead of

superstitious, and can be of no use except in an ignorant and despotic environment. Instead of arousing the people, they act as a kind of anaesthetic to keep the people from waking up. I need only quote what two recognized authorities say of them:

Wallace, an Englishman, who spent many years in various parts of Russian and was made a member of the Imperial Russian Geographical Society, on his return to England in 1877, published a large book on Russia, in which he says of the ordinary priest;—"He is expected to perform punctiliously the rites and ceremonies prescribed by the Church. He rarely preaches or exhorts, and has no moral infilience over his flock. I have occasionally heard of Russian priests who approach to the Protestant ideal, but I confess I have never seen any of them, and I venture to assert that their number is comparatively small. The Protestant clergy have in all countries rendered valuable service to the cause of popular education. But to be a good member of the Greek Church, ability to read is not necessary, and education in the eyes of the Greek priest has not the same importance it has in the eyes of Protestant pastors."

Bigelow, the American quoted above, says in a

pastors."

Bigelow, the American quoted above, says in a recent article:—"The ordinary parish priest is very much like the ordinary peasant. He performs clerical ceremonies and gets a few fees for squirting holy water over pigs and cows to prevent disease. For more than a century the Czar has maintained at Peking a mission consisting of ten priests who have carefully abstained from mission work, but have furnished their Covarrance twith informatics on whet. furnished their Government with information on what was going around them."

Russian Christianity on the whole is a sham and Russian Christianity on the whole is a snam and disgrace to the Christian name. It consists too much in useless ceremonies and empty form. It fosters ignorance and supersition. It is the servant of despotism instead of being the moral and spiritual power to elevate the people. If this be Christianity, the less the civilized world has of it the better, for it is in reality the nearly of human progress.

is in reality the enemy of human progress.

The United States also is called a Christian nation. The United States also is called a Christian nation.

And though there are in our wide domains many evils of which we are deeply ashamed, yet the Christian Church with all its sects is active in fighting these evils and in trying to better the condition of all. Especially does our Christianily encourage education, and millions of dollars are yearly given for private and public schools and universities. There is no nation in the world that spends so much on education. Our Christian ministers are well educated. They not only preach, but they lecture and write for the press and work in every form of benevolence among the poor and unfortunate. Moreover we grant religious liberty, so that a Jew or Mohammedan or Buddhist can openly and without fear practice his religion. Besides this, the Government is wholly separate from any interference with religion bis religion. Besides this, the Government is wholly separate from any interference with religion and can never use it for political purposes. Christianity is the strongest moral and spiritual power that gives life and hope and joy to our homes and to society. The large majority of our thoughtful adults, from our beloved President down, are believers in God and in Christ whose teachings stand as the foundation of all our priceless liberties.

We cannot sympathize with a nation like Russia where there is no religious liberty and where Christianity is degraded into a tool of ignorance and despoism. But we do profoundly sympathize with Japan whose Constitution has that invaluable 28th article which recognizes the same religious liberty for which

which recognizes the same religious liberty for which our ancestors fought, and for which tens of thousands of them perished in prisons, at the stake, and on bloody battle fields. Ever since Japan's Constitution was promulgated, this 28th Article is the one that has made the whole Anglo-Saxon race warmly sympathetic with Japan.

There is no need of writing more in order to show why Americans side with Japan. It is no shallow and temporary feeling, such as would arise from the friendly manner in which Commodore Perry opened Japan. Nor does it come from the fact that our diplomatic relations have always been pleasant and mutually helpful. If that were all there would be no such enthusiasm for Japan as is now seen in America. But it is because Japan stands for those great liberties, of constitutional government, of universal education, of equal justice, of religious faith, that we are altracted to her in this crists. It is because her international intercourse has been honovariale. We feel that the battle Japan is now fighting is not for humanity. If Russia should win the victory, all these precious liberties would be lost in the East and the progress of the whole world set back. If Japan wins, the light of political and religious liberty will flood the whole East and will aid the salvation of China and also the final reformation of Russia.

As a missionary of Jesus Christ I deeply regret that they had to be seen a between two nations. There is no need of writing more in order to show

As a missionary of Jesus Christ I deeply regret that there should ever be war between two nations. For I believe all the human race are children of one Almighty God and All-loving Father. We therefore For I believe all the human race are children of one Almighty God and All-loving Father. We therefore are all brothers, whether born in Japan or Russia, or Africa or America, whether black or yellow, or white. But in this imperfect stage of development, where language and morals and religion differ, there will be misunderstandings, and also wars. And when as a last resort war breaks out, the true Christian should take his sword and fight for righteousness and for humanity and for liberty. I say this because I with my three older brothers fought for the Union and for the abolition of slavery in our Civil war of forty years ago between the North and South. I daily pray, as Christ taught us, "Thy Kingdom come: Thy will be done on earth as in heaven." The Christian principle is for universal peace and true brotherhood. But when a nation tries by injustice and tyranny to prevent the good of the world, it is with the death of the content of the christian principle is for universal peace and true brotherhood. But when a nation tries by injustice and tyranny to prevent the good of the world, it is and tyranny to prevent the good of the world, it is right and noble to resist, and to pray that God will defeat all injustice and inhumanity.

CORRESPONDENCE.

THE SIX-ASIDE FINAL

TO THE EDITOR OF THE "JAPAN MAIL."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—With reference to the communication dated the 10th inst. signed by "X.Y.Z." commenting on my letter which appeared in your paper of the 10th inst., I am quite aware of the difficulty of getting twelve men to turn up on a field at a given hour, as I happen to know that Mr. Wheeler's team has been waiting some time to play the "Final."

With regard to the state of the weather at this period of the year, it appears to me poor appreciation of the special permission for football during March, referred to by "X.Y.Z." to rush play through on

a day calculated to do considerable damage to the

My letter of the 9th inst. was merely intended as a public comment on an announcement of the "final" which appeared in your columns and which was no doubt received by you from the proper quarter. In conclusion I should like to repeat that it is a

pity that the so-called final should take the form of a five-a-side practibe game.

Yours faithfully, "PLAY THE GAME."

Yours faithfully, March 11, 1904

THE BEEF AND BUTCHER'S RING.

TO THE EDITOR OF THE " JAPAN MAIL

SIR,—Again a rise! what I want to know is when by way of a change we shall see a notice of a fall

in price.

Is the rise justified? Are cattle becoming scarce, or is it the effect of the ring formed by the butchers in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama, who seem to have the matter entirely in Yokohama.

every opportunity.

Can nothing be done? At what price does
Australia come in with Australian beef and mutton and cold storage? Surely the margin must be near at

which there is a profit.

I remember when beef here was cheaper than bread, but now soon we all will have to turn vege-

How would it do to try a strike and rigidly keep Lent, it might bring the butchers' trust to rea

THE INTERPORT FOOTBALL MATCH.

The Interport Association Football match played in Kobe on Saturday afternoon was one of the most interesting seen on the local ground for a couple of years, says the Kobe Herald.

In the first half play was not at all fast, but in the second period some very exciting play took place, and the result—a draw—was a correct index of the strength of the opposing teams. The teams were

strength of the opposing teams. The teams were as follows:—
YOKOHAMA:—W. S. Moss, J. Waddilove, E. W. Kilby, W. B. Mason, H. W. Kilby, A. Kingdon, J. F. Drummond, O. D. Strome, W. J. White, S. Wheeler, J. M. Mollison.
Kobe:—Guterres, H. E. Green, Crane, McDougall, S. R. Clarke, D. Weed, E. C. Jeffery, E. G. Fradgley, H. Rankin, G. C. Allcock, C. H. Lightfoot.
Kobe kicked off and after desultory play the ball went out to Yokohama. On the throw in by Weed the ball was secured by White who looked dangerous till stopped by the Kobe backs. After give and take play, Strome secured and made a good shot at goal which was cleared by Lightfoot. Yokohama were now pressing and after several throws in Allcock cleared well for Kobe. Mollison secured and made a rather poor shot, the ball going wide of the goal. Kobe then took the ball up the field and a splendid shot by Crane was finely saved by Waddilove.
After the goal kick Yokohama took the ball down the field, some good play being brought to a conclusion by a fine clear by Rankin. More desultory play ensued and Strome securing the ball made a dash for Kobe's goal, but was nicely stopped by Jeffery, Mason secured almost immediately and made a good run, but kicked out when attempting a shot at goal, Fraderly cleared the kicking out. Yokohama who

Mason secured almost immediately and made a good run, but kicked out when attempting a shot at goal. Fradgely cleared by kicking out. Yokohama, who had the advantage of a strong wind, were keeping the ball in Kobe's territory. Drummond then made a nice run, Crane for Kobe duplicating immediately after. A goal given against Green was taken by Jeffery who made a fine kick into the goal, Waddilove turning the ball over the bar at the expense of a corner. Weed took the corner, placed fairly well, Yokohama managing to clear. Clarke secured and made a neat run, but the ball was again secured and made a neat run, but the ball was again

cleared by Yokohama.

Strome and Drummond each had fruitless shots at goal, and then a good deal of even midfield play resulted. Yokohama then pressed and Allcock cleared and the Kobe left wing secured and made a fine run down, and when dangerous were pulled up by F W Kilby at back

nne run down, and when dangerous were putted up by E. W. Kilby at back.

After some very even play in midfield Jeffrey made a nice run but was cheated by the Yokohama backs, and in a melee Green had his ribs and back hurt, but resumed in method should be short time.

On the bounce off Yokohama secured, but Druntand

On the bounce off Yokohama secured, but Drummond who looked dangerous was brought up by Rankin. Yokohama pressed, however, and Jeffrey headed behind, giving a corner which was well cleared by Kobe. Drummond secured but his shot went wide. Green then made a nice run but was checked by the Yokohama halves. Guterres secured and running up passed to Green, who passed to Clarke, the prettiest combined forward run up to the moment resulting in a corner, which was well be to the moment resulting in a corner, which was was the arrival of the Afruli on Feb. 2nd, fitted up they consisted of two old women, four children and

was still pressing and a really splendid clear by E. W. Kilhy was duly appreciated by the spectators. White secured and made a fine shot which was well cleared by Lightfoot. H. W. Kilby secured and running right though, shot splendidly from a very difficult angle, but Lightfoot cleared admirably. After a foul against Yokohama, Moss and Mollison kicked out in quick succession. Yokohama then started to press, Fradgeley clearing, but Yokohama were not to be denied and a fine shot from White was well fisted away by Lightfoot. MacDougall now secured and made a fine run but holding the ball too long was despoiled by a Yokohama half-back. After some long kicking Drummond secured and made a fine centre and Allcock in attempting to clear gave a corner which was kicked by Mason, and H. W. Kilhy securing made a good attempting to clear gave a corner which was kicked behind. Kobe secured after the goal kick and Waddilove was tested and made a fine save. Clarke then secured and, running down, centred well, and the hall going out to Gutterger was kirked widely and the hall going out to Gutterger was kirked widely and the hall going out to Gutterger was kirked widely and the hall going out to Gutterger was kirked widely and the hall going out to Gutterger was kirked widely and the hall going out to Gutterger was kirked widely.

and Waddilove was tested and made a fine save. Clarke then secured and, running down, centred well, and the ball going out to Guterres was kicked wide. After some even play, Kobe rushed down and E. W. Kilby made a splendid clear, the whistle then going. The game was resumed at 4.15, and Kobe securing forced a corner which was finely placed by Fradgley, but Moss clearing well, Drummond secured and mis-kicked back into centre and Kobe were looking dangerous till the ball went behind. Yokobama passed after the kick out and Allcock in saving and mis-kicked back into centre and Kobe were looking dangerous till the ball went behind. Yoko-hama passed after the kick out and Allcock in saving gave a corner which was taken by Kingdon, but did not result in anything. After some mild play Kobe pressed but E. W. Kilby headed out finely. Wheeler secured and "running down shot nicely, but the ball was easily cleared by Lightfoot. Give and take play then took place and Waddilove cleared nicely when pressed. Yokohama then got a free kick for a foul, which did not result in anything, and the play which had been fast slowed down for a time. Yokohama then received a corner which was kicked behind by Kingdon. Rankin cleared nicely when pressed and soon after play was stopped for a while, Jeffrey having a bad spill. On the bounce off Kobe pressed and E. W. Kilby was again called upon to clear, and Yokohama made a return visit but were pulled to by Rankin. Macdougall made a nice run down the field but his shot was easily cleared by Waddilove, Kobe were now pressing continuously and took the ball down but Crane's shot was cleared by Waddilove. Crane returned again, however, but was "spilt" by Kilby at hack when shooting and the hall went wide.

but Craese shot was cleared by Waddilove. Crane returned again, however, but was "spilt" by Kilby at back when shooting and the ball went wide. White for Yokohama broke away but was not supported and the Kobe right wing then pressed, E. W. Kilby again spoiling the attack.

Kobe, not to be denied, tried again, and Kilby at back made a splendid clear. Crane made a run but his shot went wide. Yokohama then pressed and Lightfoot cleared a long shot, and Yokohama coming again Lightfoot made a fine fist out. Kobe then mated Yokohama and Waddilove was hard pressed but cleared finely. Kobe still pressing kicked wide.

After the goal kick Green secured and made the best shot of the match, a long and powerful kick, which was brilliantly saved by Waddilove. Drummond made a good run and when very dangerous was spilled by Rankin. Jeffery clearing kicked out and, H. W. Kilby made a good run but shot wide.

The ever-ready Kilby at back again saved for

out and, H. W. Kilby made a good run but shot wide. The ever-ready Kilby at back again saved for Yokohama. Kobe pressed, but the Yokohama halves relieved the pressure, and Strome secured but was pulled up for off-side rather unluckily, being in a good position for a dash at goal. Drummond made a fine run down the wing and centred nicely, but Wheeler who was in a fine position to score kicked wildly over the bar. Kobe' then started pressing, Green being knocked over while shooting. After a further rush by Kobe, Green attempted in long shot which went over the bar. A corner to Yokohama was kicked by Mason and Kobe conceded another which was badly placed by. Mason, and the Kobe forwards secured and rushed down the field, but were pulled up by Kilby at back. Crane made a wide shot at goal. Kobe was awarded a free kick just outside the 18 yards line and a good kick into goal by Green was well saved by Waddilove. Midfield play then ensued and time was called with the balt in Kobe's territory.

Kobe's territory.

E. W. Kilby, Yokohama's left back, deserves special mention, his play being brilliant throughout. Kobe's forwards were slightly faster than Yokohama's but the latter's long and accurate passing evened matters up. The Halves and Backs on both sides

to take large numbers of Japanese away. arrival the Japanese Commercial Agent telegraphed to the various outlying districts and the Japanese began to stream in. Some, however, asked the Russian gan to stream in. Some, however, asked the Russian officials in the various towns who told them that there was no danger of war at present and that the whole affair was obviously a commercial speculation on the part of the Japanese Commercial Agent. When one considered the charter party, the fittings and the sanitary arrangements, as well as the zoo tons of food on board, it was difficult quite to see where the profit of such a speculation would be obtained.

profit of such a speculation would be obtained.

In three days time some 2500 Japanese had collected and embarked, and the Japanese Commercial Agent's wife also went by the Afridi. All the other Commercial Agents and many high officials came to see her off and the Governor inspected the boat, then made a speech saying how foolish it was to run off in such a manner, that in a month they would all be back, but that he would do what he could to fill their positions for them, so that on their return they would fine no situations vacant. Easier said than done, when the respective merits of Japanese and Russian artisans and servants are considered.

On the morning after the Afridi left, that was

On the morning after the Afridi left, that was Sunday the 7th, the Japanese Commercial Agent Sunday, the 7th, the Japanese Commercial Agent sent a notice round saying that he had been instructed to withdraw. This fell like a bombshell among the Officials, and was met by blank incredulity, but was only too soon supported by the attack on Port Arthur. Martial law was proclaimed and a scene of the wildest confusion and panic ensued. All the Japanese and English were ordered out in three days, this order including the British Vice-Consul; horses were commandeered and the exodus began. Every house in Nicolsk and Khabarovsk was taken by telegram and the civilians began to leave. The house in Nicolsk and Khabarovsk was taken by telegram and the civilians began to leave. The railway was taken over by the military authorities, all the waggons were sent to Manchuria, and only one train left every three days; tickets were all bought up days before and as no baggage but a hand bag was allowed to be taken away, it was impossible to find sitting accommodation in the cars, as every corner was filled with the so-called band. as every corner was filled with the so-called hand

bags!
On the 9th the Commandant of the fortress, Major On the 9th the Commandant of the fortress, Major General Voronetz, who had taken supreme command of the town, thus superseding the Governor, called on the British Vice-Consul and Commercial Agent and informed him that owing to a change in his orders. English subjects might have eleven days' grace in which to betake themselves forty versts from the town. As there was neither accommodation nor food in the surrounding district this order was equivalent to leaving the country.

In the meanwhile a heavy snowstorn raged

this order was equivalent to leaving the country.

In the meanwhile a heavy snowstorm raged, covering the ground with two feet of snow and forming drifts of 6 and 8 feet. This greatly impeded the traffic and the departure of the people; it brought, however, a rise in temperature, and this was utilised by the fleet to don their war paint. The cruisers Gromoboi, Rossia, Rurik and Bogaty had their search lights going all night and in the morning the greater portion was dark gray, their funnels and parts of their bows being yet unfinished presenting a dazzling contrast. They were all finished by the evening, as well as the large transport Lena. This Lena used to be the Volunteer Fleet boat the Moscow. but her engines are not in good renair and her chief engineer expressed grave doubts as to whether she could go to sea or not. It seems extraordinary how these ships could have been left apparently forgotton up till the last moment.

The ice breaker anused herself breaking all the last income the backer and deathers.

The ice breaker anused herself breaking all the ice in the harbour and towing it out so that the ingress and egress of vessels could be managed with the greatest celerity and easiness.

The Japanese Commercial Agent left in the S.S. Batavia on the 13th instant, but before this the food question had become most pressing. Nothing could be bought. There were only 17,000 sacks of flour in the town for the civil population, very little sugar and that at 32 cents a Russian lb., whereas it had been 16 cents the day before.

The panic increased greatly at a notification of the

been 16 cents the day before.

The panic increased greatly at a notification of the Commandant that only those civilians who had 8 months' provisions might stay, and those provisions were liable to be commandeered at any moment. Then indeed did the rush begin. The scenes at the were liable to be commandeered at any moment. Then indeed did the rush begin. The scenes at the railway station were most heart-rending, families got separated and people fought for seats,

The fleet in the meanwhile had left for Hakodate,

but on approaching that fortress decided to return, on account of the roughness of the sea and a snow

thirty-five sailors, all of them wearing felt boots and Chinese hats and coats given them by their captors. The morning that the fleet left, some very sad scenes were witnessed on the admiral's wharf. The wives and betrothed of many of the officers, watching the departure of the ships, saw the four black vessels slowly leaving the harbour under salute from the fortresses, and their feelings became too much for them, so that crying and sobbing they clung to each other, while some fainted and had to be carried to their homes.

their homes.

The next blow to the inhabitants who were left The next blow to the innoctants who were left was a rumour that the banks were closing. The Russo-Chinese Bank was unable to meet its calls and so closed, hoping to receive a large remittance from the Harbin branch. This did not arrive, so they obtained a loan from the States bank and had their cash department open for three hours each day. Much greater consternation was, however, caused when the States bank itself closed and departed with its money and staff to Khabarovsk—only those who are conversant with Russian business methods can realise what a blow this would be. One of the are conversant with Russian business methods can realise what a blow this would be. One of the directors of the Russo-Chinese Bank had in the first panic rushed off to Khabarovsk and he secured rooms there for the bank and sent urgent messages that they should come to join the branch of their bank there. Eventually summoning up sufficient courage he returned to Vladivostock and secured three waggons with which to transport the staff of the bank, its money, and books. Starting at six in the morning and trudging through the snow this was accomplished, but owing to a delay the staff settled down to some breakfast at a neighbouring house. In the meanwhile the Custom House also had settled to leave on that day, so they unloaded the bank's effects and piled themselves and their luggage into the waggons. On the Bank's staff reappearing the scene may be better imagined than described! It eventually ended in the two parties going off together, sitting on each other's knees, and on boxes and bales, a most amusing and undignified assemblage.

For some days no meat was obtainable and the

For some days no meat was obtainable and the loldiers were sent out to the outlying islands of oppoff, Askold, and Puljatin to bring any cows and norses there might be there and to kill all the deer—

Popoff, Askold, and Puljatin to bring any cows and horses there might be there and to kill all the deer—Askold alone having some hundreds on it. Putjatin belonged to an old Tientsin resident, the late Mr. A. D. Startseff, and a clean sweep was made of everything on it. On the arrival of the carcasses of the deer, they were met by crowds of people on the beach, each laying hold of a haunch or shoulder, paying what was asked and running off to their homes with it. Most of the cows were reserved for the military but a few fortunate civilians got some for eating purposes at about 300 roubles a piece.

A few of the staff of the Russo-Chinese Bank remained in Vladivostock to look after the godowns which contained many valuable things sent there by the refugees, and to transact the urgent business, but the thing that did more than anything to reduce people to a state of helplessness was the fact that on the 15th, under orders from the Viceroy, the telegraph office was closed indefinitely for receiving telegrams, so that people could not communicate with their relations or friends—a truly paralyzing arrangement. The British Vice-Consul had received the approval of his Government to leave with the rest of the British inhabitants for Japan and most of the British The British Vice-Consul had received the approval of his Government to leave with the rest of the British inhabitants for Japan and most of the British left on the Stollberg on the evening of the roth. On board were the prisoners of war, some Japanese and 1500 Chinese—near the mouth of the harbour she ran into some mines that were being laid and reversing her screw she only just backed in time to avoid being blown up. She then kept to the right near Russian Island when a gun was fired to stop her departure; at the some moment she ran on a rock and a quiverne shock ran through the shim. her departure; at the some moment she ran on a rock and a quivering shock ran through the ship causing much commotion on her crowded deck, and she was ordered to return immediately to the wharf, where she disembarked all her passengers on the following morning. The wildest rumours were of course prevalent as to the reasons for this procedure, but on the 19th she again left, the Chinese and Japanese were battened down under hatches and the first class passengers were locked up in the saloon with the blinds drawn. A Russian Naval crew and two officers navigated the boat out of the harbour and when outside the passengers were allowed on deck, where, in spite of the above precautions, they could see perfectly the track by which they had come through the thin ice!—China Times.

THE VENEZUELA ARBITRATION.

MURAVIEFF'S COMMENTS

The arbitration tribunal, which has been considering the claims of the blockading powers for preferential treatment of their claims against Venezuela, has decided unanimously that the three blockading powers, Great Britain, Germany and Italy, have the right to a preference of the customs duty at La

Guaira and Puerto Cabello, the litigants to pay their own costs in the procedure and divide equally the costs of the tribunal. The United States is commissioned to carry out the decision of the tribunal within three months.

In giving judgment the tribunal points out it has been guided by international law and the equity of the case, and that the protocols signed at Washington since February 13th, 1903, and particularly the pro-tocol of May 7th, whereof the obligatory nature cannot be doubtful, form the legal basis of its sentcannot be doubtful, form the legal basis of its sentence; that the tribunal is not competent to question
the jurisdiction of the mixed commissions at Caracas, nor to judge their action or the character
of the warlike operations of the blockading powers,
nor to decide if the three blockading powers exhausted all pacific means to prevent the necessity for
employing force. The tribunal decides that since
1901 Venezuela refused arbitration proposed on several occasions by Germany and Great Britain, that
after the war no formal treaty of peace was concluded,
that the operations of the blockaders were stopped
before they had received satisfaction for all their
claims, and further that the question of preferential
treatment was submitted to arbitration.
The tribunal declares that it found and recognized
in these facts precious evidence in favour of the great

in these facts precious evidence in favour of the great principle of arbitration in all phases of international

conflict.

In addition to the protocols the blockaders could not have intended to renounce their acquired rights nor their privileged de facto position. The government of Venezuela itself had recognized in principle the justice of their claims, while it had not recognized those of non-blockading Powers and until the end of January, 1903, made not the slightest protest against the claims for preferential treatment. Throughout the diplomatic negotiations Venezuela constantly distinguished between the allied Powers and the neutrals. These latter, not having protested against distinguished between the allied Powers and the neutrals. These latter, not having protested against preference of the blockading Powers either at the time the war stopped nor immediately after the signature of the protocol of February 13th, the government of Venezuela only agreed in respect to allied Powers to offer special guarantees for the fulfilment of its engagements. The good faith which should direct international relations impose the duty on the tribunal that the words "all claims" employed by the Venezuelan representatives in the negotiations with the representatives of the allied powers could with the representatives of the allied powers could relate only to the latter Powers. Neutrals should in some respect profit by the circumstances created by the operations of the war without acquiring new rights, the rights already acquired remaining absolutely intact.

In the decision the United States is charged merely to supervise the carrying out of the decision recording

to supervise the carrying out of the decision regarding

to supervise the carrying out of the decision regarding costs.

After the delivery of the decision, President Muravieff, the Russian Minister of Justice, in a short speech, declared that the findings had been reached after a most minute and most impartial investigation. "Like all human acts," he added, "the decision was susceptible to criticism, but now it was made everyone should accept it. The arbitration, begun in time of peace, had ended amidst acts of war, which was a terrible obstacle in the path of light and progress. In spite of all goodwill, alas, no one was secure against an unexpected hostile attack. A hation was obliged to accept a war when the legitimate defence of honour and liberty was involved. The just Providence which ruled over battles will distinguish between right and unfounded pretensions. At the end of this war between a European and an Asiatic people the right will shine out afresh."

The President concluded with saying that The Hague arbitration tribunal remains always the rampart of justice, truth and reason, and the sublime hope of the future.

BRITISH TRADE WITH MANCHURIA.

The following is a copy of the memorial of the incorporated Chamber of Commerce of Liverpool, drawn up for presentation to Lord Lans

downe:—

(1) That the port of Newchwang, situated in the Liaotong or Mukden Province of Manchuria, on the right bank of the river Liao-ke, 15 miles above the bar, was opened by the Government of China, as a Treaty Port, in the year 1861, in accordance with the terms of Article XI. of the Treaty of Tientsin.

(2) That Newchwang ranks about the sixth amongst the 33 Chinese Treaty Ports as shown by the Trade Returns of the Imperial Maritime Customs of China.

£2,500,000; and that this country also derives further industrial and financial benefits by building ships for the trade, both for British and Japanese shipowners, and by manning and supplying the

former.

(4) That the port of Newchwang is a Treaty Port of China, as already said, and open to the trade of all nations, and it is the principal southern outlet for the trade of Manchuria, which has an area of about 400,000 square miles, population estimated at 15,000,000 of inhabitants, and fertile soil producing wheat, oats, barley, millet, buckwheat, maize, rice, beans, tobacco, silk, and opium, and which, moreover, is rich in cattle and horses, gold and silver, iron and tin; and that Newchwang, being already a great trade centre, must benefit greatly by the further development of Manchuria, if left under Chinese control. control.

control.

(5) Since the year 1900, when the Boxer rebellion took place in China, merchants of Newchwang have felt that their position and privileges were being unfavourably affected by the action of Russia, who was permitted by the Allies to undertake alone the protection of the port, and who has since placed its flag over both the western and eastern Customhouses of Newchwang, collected the Customs duties, and even regulated the tariff. That Russia also temporarily seized the Niu-chwang and Shan-hai-kwan Railway in the direction of Tientsia, and only retired on receiving a payment of claim, for costs of administration, of two or three million roubles, and after much disturbance and considerable diversion after much disturbance and considerable dive

of trade.

6. That British traders deprecate continuance of this Russian occupation of a Chinese Treaty port, and the interference of Russia in the management of matters which concern trade, and which devolve by right upon the Chinese Imperial Martime Customs. They foresee that, should the port pass more fully under Russian control, British trade would become restricted and the present "open door" be closed. Moreover, both the merchants of Newchwang and Tientsin are under great apprehension of a still further Russian advance in the direction of Peking.

7. That the independence of Manchuris has been

7. That the independence of Manchuria has been

very fully recognised by Russia in the following manner, viz. —

(a) By the leasing, by Russia, from the Chinese (a) By the leasing, by Russia, from the Chinese Government for a term of 25 years from March 15, 1898, of the Liao-tung Peninsula, wherein now lie Dalny and Port Arthur.

(b) In regard to the Chinese Eastern Railway, by 1808 that Chinese Hall have the

contract of Aug. 27, 1898, that China shall have the option of purchasing that railway at the end of 36 years after its completion, on certain fixed terms;

(c) By also agreeing in the same contract that the Eastern Chinese Railway shall revert to China at the end of 80 years from the date of its completion, if not previously bought by the Chinese Government.

8. That this Chamber has already supported the recent representations of the Chinese Association on the support of the chinese Association of the chinese and resident the recent representations of the Chinese Association on the support of the chinese and resident the recent representations of the Chinese Association on the support of the chinese and resident the recent representations of the Chinese Association on the support of the chinese and resident the resident the resident that the chinese and resident the resident that the chinese chinese the resident that the res

recent representations of the Chinese Association on the subject, and received the assurance of your lordship's sympathy, and the promise that due weight would be given to the considerations then urged, and which have since been brought again to the attention of this Chamber by other interests directly concerned in trade with Manchurfa.

9. Your memorialists therefore most urgently pray that your lordship will bring the matter of the preservation of British trading rights, with the port of Newchwang and the country of Manchuria before His Majesty's Government, and urge, as indicated in your lordship's letter to this Chamber, dated Nov. 5 last, that he will take steps, if possible in conjunction with other Powers concerned in trade with Newchwang, to secure the fulfilment by Russia of its treaty obligations to China and other nations in respect to trading privileges.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

AMERICANS SYMPATHISE WITH JAPAN.

London, March 10.

At a dinner of the Wisconsin Society of New York, General Wheeler referred to the Japanese naval successes as truly indicating Japanese greatness. This declaration was received with cheers.

of China.

(3) That this position is owing chiefly to British enterprise, energy, and capital, that the great part of the property in the foreign settlement is British, that gling for her national existence and only a sked for fair play and straight dealing. At British, that the foreign trade with the port was in 1902 of the value of £6.130,000, including treasure, of which the British share was estimated at checred for some minutes.

continue as she had begun.

Members of Congress and others all spoke in favour of Japan.

THE TZAR AND VLADIVOSTOCK. London, March 11.

The Tzar has congratulated the garrison at Vladivostock on its baptism of fire. His Majesty says he is convinced all will make a rampart of their bodies to protect Russia's stronghold against the enemy.

THE BRITISH FISCAL QUESTION.

London, March 11. In the House of Commons the motion of Mr. Pirie, condemning the continued agitation in favour of preferential and protective tariffs, which, he said, is encouraged by the language of certain Ministers, has been

rejected by 289 to 243 votes.
Twenty-six Unionists voted with the minority. The above vote is regarded as hastening the general election.

RUSSIAN DESTROYER LOST.

A Russian torpedo-boat-destroyer has been lost between Crete and Port Said. The crew were saved.

BALTIC SQUADRON AND THE N. E. PASSAGE.

The Temps correspondent at St. Petersburg states that the Russian Baltic squadron will probably leave for the Far East in July next. It will attempt to force the north-east was a kind of nightmare. I Janan would do passage.

RUSSIAN HORSES.

London, March 12. The exportation of horses from Russia has been prohibited.

THE "DMITRI DONSKOI" GOES HOME.

The Russian warship Dmitri Donskoi, which has been repairing at Suez, has entered the Canal.

A BRITISH DEFICIT.

The Times computes this year's deficit at two million pounds sterling and next year's The prospect for the taxpayer is not cheerful. THE SULTAN OF JOHORE.

The Sultan of Johore has called on the Hon. E. J. Lyttleton, British Colonial Secretary, at the Colonial Office.

THE LAST ATTACK ON PORT ARTHUR.

London, March 13. Vicercy Alexieff reports that in the course of a reconnaissance before dawn on the 10th of March, six Russian torpedo boats encountered some Japanese torpedo-boats and countered some Japanese torpedo-boats and cruisers outside Port Arthur. A hot action ensued. The Russian torpedo boat Stereguschtchi and one Japanese torpedo-boat were sunk. Four of the former's crew were captured. Admiral Makaroff went to the control of the Novik and Bavan, but as the rescue with the Novik and Bayan, but as the Stereguschtchi was surrounded by five Japanese cruisers, he was compelled to retire. The enemy bombarded the ships and fortress with their heavy guns at long range The Russian losses in the night engagement and the bombardment together totalled six officers and 31 men wounded and three men killed.

BARON SUYEMATSU IN ENGLAND.

London, March 14.

Baron Suyematsu has arrived at Liverpool. It is believed he has some mission.

GENERAL KUROPATKIN DEPARTS. General Kuropatkin had a magnificent

Mr. Pratt, Assistant-Attorney-General, send-off at St. Petersburg when starting for replying to the adverse criticism lately proposed as a private citizen that Japan would the front. He will probably make a railway nounced against his administration, said that hoped as a private citizen that Japan would the front. He will probably make a railway train his headquarters.

recall all troops from Korea and begin operations in May. He thinks that he will have done with Japan by the end of July.

PRAISE FROM BERLIN.

Military and naval critics in Berlin admire unreservedly the manner in which the Japanese are using their fleet to support their military operations, the mobility of the fleet, and the consummate skill of its commanders.

RUSSIA PATROLS THE MEDITERRANEAN.

The Dimitri Donskoi is patrolling the North Egyptian coast. She stopped the German liner Stuttgart and the British steamer Mortlake, the latter bound from Batoum to India. The Dimitri Donskoi fired across the Mortlake's bows and inspected her papers.

BARON SUYEMATSU INTER-VIEWED.

London, March 16. Baron Suyematsu has been interviewed by a representative of Reuter. He said he wished the world to understand that Japan was not waging war for the pur-pose of material gain or of enlarging her was a kind of nightmare. Japan would do her work in such a way as to secure peace

A GOVERNMENT DEFEAT.

Later.

On a motion by Mr. Redmond to reduce the Irish Education vote the Government was defeated by 141 to, 130 on a scratch division.

for some decades.

THE FRENCH GOVERNMENT AND THE CLERICALS

London, March 17.

The French Government was defeated yesterday by a majority of eleven, the figures being 282 to 271, on an amendment expenditure at 141,876,067 pounds sterling. making the period for suppressing clerical teaching ten years instead of five as proposed by the Government.

THE FRENCH NAVY.

M. Pelletan, replying to recent attacks upon him, said that since taking office, he had re-inforced the squadron in the Far East, which would be completed by a torpedo destroyer division.

He had also provided for the safety of the Colonies by the organization of mobile defence in the shape of destroyers and submarines [wherein nothing previously done construction ships due improvement be-siegers' personnel was fairly satisfactory.]

THE SQUADRONS. He said the Channel and Mediterranean Squadrons could sail at a moment's notice.

(RECEIVED AT THE LEGATION OF FRANCE.) KUROPATKIN STARTS.

Saigon, March 16.

General Kuropatkin has started for the scene of the war. He was loudly cheered on leaving St. Petersburg.

THE PORT ARTHUR SQUADRON.

AND TIRED MOTHERS Find Comfort in

INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and rest for Tired Mothers in warm baths with Curtcura Soar, and gentle anointings with Curtcura Ontment, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of Curtcura Resolvent Pills, to cool and cleanse the blood. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in One Soap at One Price, the BEST skin and complexion soap, and the BEST toilet and BEST baby soap in the world.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tastale brated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and hume cures. Put up is acrow-cap pocket vials, containing 60 doses.

place at another coal mine in Kurate district. Sixteen men were killed, fourteen injured and thirty are missing.

THE Yokohama Specie Bank received a telegram on March 17th, from its London branch to the effect that the funds for relieving distress among the families of soldiers and sailors at the front collected in that city, amounted to a hundred and ten thousand was and ten thousand yen.

A SAILOR of the Dutch steamer Celebes was arrested on March 17th by the Bluff police and is undergoing examination in the Court. The charge is that he stole money belonging to one of the patients in the General Hospital while he was under treatment there.

THE foreign silk traders of Yokohama, according to the Yokohama Shimpo, have organized an association to guard the interest of the business in raw and waste silk. They elected nine as an executive committee, and Mr. R. D. Robison was appointed President, and Mr. H. Abbegg, Vice-President President.

THE Yokohama Shimpo states that the house tax question, which is now under examination in The Hague, Arbitral tribunal will be settled in December this year. Mr. T. Miyaoka, an official of the Department of Foreign Affairs will be present at the Court, leaving Yokohama in the middle of April,

THE German steamer Abyssinia collided on March 18th with the Japanese steamer Heijio-Maru, which was lying in Shimonoseki Strait while the former was entering. The Japanese steamer sustained damage for which she lodged a claim against the owners of the German steamer. steamer.

Two Russians arrived on March 17 at Yokohama from Yamada, Iwate prefecture, and applied to the French consulate for protection as they had no money to return home. It is believed that the men landed at Yamada after shipwreck. The Governor of Iwate sent the men to Yokohama so that they might find a steamer to return home.

THE Toyo Kisen Kaisha held a meeting on March 20th at 2 p.m. when the accounts for the last half year were submitted to the shareholders. The net income was yen 202,657.77 to which the balance, yen 74,496.27, brought forward from the previous account, was added, making a total of yen 277,154 04. Of the total, yen 10,132 was set forward to the next account.

A TELEGRAM from Nagasaki states that the British steamer Willowdene arrived there on the 19th inst. with Cardiff coal. She immediately right inst. with Cardiff coal. She immediately left for a certain port to land the cargo. Other British ships the Telemachus and Tamfalus carrying 4,500 tons and 1,000 tons of coal respectively from England were expected, also to arrive there on the 20th. The Asahi states that the coal of the latter two steamers is for the use of the British fleet.

THE British steamer Bengloe has been chartered by the Nippon Yusen Kaisha to take the place of the steamer Yawath Maru, which was the first steamer that re-opened the Shanghai line, as for some months past.

NINTY-FOUR Russians from captured ships who have rised the price shows that they have rised at Saseho left Nagasaki on March 22nd by the German Mail steamer for home.

The Benglog will leave Yokohama on March 21st at 6 p.m. off On the following night, a gas explosion took

first steamer that re-opened the Shanghai line, as quoted at £65½. The price shows that they have rised the latter has again been taken off the schedule. The Benglog will leave Yokohama on March 21st at 6 p.m. off On the following night, a gas explosion took

WAR NOTES.

Friday, March 18.

There continues to be a great deal of talk about the results of the last bombardment of Port Arthur, but the only sources of authority are the crews of the three Norwegian steamers which were allowed to escape after the event. They do not appear to know much, or even to be willing to tell what they do know. The only important allegations made by them, so far as we can see, are that no scarcity of provisions or ammunition is felt at Port Arthur and that Admiral Makaroff is showing much zeal and resolution. The fact is that a bombardment by ships, especially when the fire is indirect, can not produce much effect, and can not be in any sense a conclusive operation. It is a mere preliminary.

These Norwegians allege that, when they left Port Arthur. the Retrisan, the Tsarevitch and the Sevastopol were in dock. There is no dock at Port Arthur that could admit even one of these ships, much less three.

They further allege that they saw the Russians take measures to sink, in line with the steamers sunk by the Japanese, an old vessel laden with stones. What on earth vessel laden with stones. What on earth would have been the object of such a manœuvre?

They also allege that when they left the port on the 12th instant, there were only the three iron-clads in the harbour. tallies with the report sent from Paris that on the 11th the Russian squadron put out But the ships did not go very of the port. far, nor did they make any very animated search for Admiral Togo. There is good search for Admiral Togo. There is good reason to believe that they are lying once more under the guns of the shore batteries. However, that they are able to put to sea at all is a very important fact. Admiral Makaroff has revitalized them.

According to Newchwang, the Russian Official Gazette alleges that Russian scouts have ascertained the presence of four bodies of Japanese troops, each one thousand strong, on the banks of the Chhyong-Chhon River.

Reuter's representative in Newchwang reports that according to statements circulating among Russians in Port Arthur and also in Newchwang, the St. Petersburg authorities have decided not to assume the offensive until an army of 300,000 men has been

It is expected that the ice on the Liao will break-up about the 23rd instant, and that the British and American gun-boats lying at Newchwang, will leave their moorings early in April.

From Newchwang comes news that the Russian guards there are few in number. They are not quartered in the town, but they march in daily from New-kia-tung.

People in Newchwang are said to expect that the break-up of the ice will be quickly followed by a Japanese attack, and they say that the bandits are all awaiting that event to rise against the Russians.

The Chinese authorities are said to be taking steps to convey inside the wall all food-stuffs found in the region of disputed neutrality on the west of the Liao River, sternation among the Chinese. Neither is it of the Russian squadron in Port Arthur left true that the Russians are taking steps to the harbour for a trial trip on the 16th, and block the Liao: that would be a very diffi-

cult operation.

The Asahi Shimbun attributes some remarkable statements to Captain Troubridge who has just returned—it is said—from Port Arthur to Shimonoseki. We question the correctness of the Asahi's version, but at any rate it represents Captain Troubridge as affirming that the bombardment did instant, and that 770 soldiers and 60 men of great damage, most of the Japanese shells the land transport were drowned.

Russian soldiers are reported to that one of the Japanese men-of-war was attacked by a Russian destroyer, and that she barely escaped being torpedoed. There are other assertions but they need confirmation.

There is a rumour that the Russian destroyer Skori, when entering the harbour at Port Arthur on the 16th instant, struck an unbuoyed torpedo and was blown up, only four of her crew being saved.

General Kuropatkin is expected to reach Mukden on the 26th and Liao-yang on the 28th instant.

On the 17th instant the Emperor gave audience to several officers-numbering 262-of a certain Division which is on the point of proceeding to the front. On the following day another audience of a similar character was granted to 235 officers of another Division.

Lieutenant-General Uyeda has been appointed to the command of the Fifth Division vice Lieutenant-General Yamaguchi, who becomes a member of the High Martial Council. The Fifth Division has its headquarters at Hiroshima.

Saturday, March 19. There have been wild rumours in Tokyo to the effect that the Vladivostock squadron put

to sea in a blinding snowstorm, and having successfully navigated the Tsugaru Strait, reached Port Arthur safely. We can not

a tremendous sea was running on the latter

day.

There are again reports that Viceroy Alexieff has been wounded, but if so the hurt must be very slight for His Excellency is said to be able to move about.

Viceroy Alexieff in many ways. ral laments, so the story runs, that having a mother alive he is unable to die for his steam near the Retvisan and sunk. It is supcountry

t6th instant.

The Russian Government has constituted four naval prize courts, one at Vladivostock, one at Port Arthur, one at Libau and one at Sebastopol.

Sunday, March 20. Viceroy Chang Chih-tung is said to have started for his post in the Yangtse Valley.

London telegraphs from St. Petersburg that every part of the Liaotung Peninsula has been put in a condition of thorough defense, and quotes General Kuropatkin as alleging that there are 230,000 Russian troops between Harbin and Port Arthur. If Kuropatkin has made such a statement, he is drawing too long a bow. Other authorities estimate that the whole Russian force eastward of Lake Baikal does not exceed 150,000.

It is stated that the officers of a balloon corps reached Port Arthur on the 3rd

instant.

The Nichi Nichi Shimbun's Chefoo correspondent makes himself the mouthpiece find any confirmation of the story,
On the 17th and 18th a violent gale blew that place from Port Arthur and Dalny, in the Sea of Japan. Takeshiki reports that Probably not much credence can be attached to their stories, but they have a certain interest. One left Port Arthur on the 2nd instant, and, travelling by rail to Tongku, took steamer thence to Chesoo. All the art must be very slight for His Excellency Chinese, he says, went up to the top of a said to be able to move about.

Chinese, he says, went up to the top of a said to be able to move about.

Chinese, he says, went up to the top of a said to be able to move about.

On the 25th February. They observed that Russian menaces and to be assisting the Russian ships made their escape into the port and that, presently, a destroyer coming along at full speed, blew up in a cloud of posed that her boiler burst. More than one half of the carriages in Port Arthur have gone north, and the Russian drivers of those remaining have been drafted into the ranks, their places being taken by Chinamen. It is stated that Viceroy Alexieff's last There were some twenty thousand coolies at reatest con-Nearly all pairing the forts and others restoring the that remain are those who can not afford to suffered to fall into disrepair, and work is e-camp to Mukden and one to Kirin for leave their sole means of sustenance. When now going on day and night to strengthen the purpose of arranging a concerted plan we remember what friendly relations existed it. Embrasures are pierced at intervals, between the Japanese troops and the Chinese Up to the end of February the coolies were inhabitants in 1894-5, it is impossible not to receiving 60 sen daily and an allowance of 2 lbs. of rice, but thereafter the sum was reduced to 50 sen and the rice was replaced by barley. There are not more than 30,000 Russian troops in the place and they are mostly very old or very young, the best soldiers having gone north. Probably for that reason they showed remarkable alacrity in getting under cover during the attack by the

Japanese.

Another Chinaman who left Dalny at the same date, says there were then 200 Russian troops in Dalny and 300 Russian residents, with about ten thousand Chinese. There was constant expectation of a Japanese attack, and preparations were made to retire at once in the event of such a contingency, a train being kept always ready for the purpose. The fort Nan-kwan, 63/3 miles west of Kinchow, was not yet ready, only 20 mountain guns being in position. At the site of the Shen-tza fort some levelling of the ground was all that had been done. The mines laid at the base of this fort were all exploded by a thunder storm in February

Another Chinaman who left Port Arthur on the 4th says that between that place and Yinkow he saw a Russian notification which declared that although few Russian troops were in the neighbourhood, Russia had obtained a hundred thousand the Asashiwo, the Shirakumo, the Kasumi have been already obtained in this way. Chinese braves, who would soon arrive to preserve order and afford protection. Every one was therefore advised to continue his

ordinary occupation in peace and security.

In the Novo Krai of the 12th and 13th instant, it is stated that in addition to the sinking of the Stereguschtchi and the loss of 49 officers and men that formed her crew, the destroyer Ryeshitelni blew up in the Akatsuki. Thus only the Asashiwo police the harbour after the fight. How it fared and the Shirakumo succeeded in getting out with her crew we are not told. Our con-temporary also says that the destroyer Vlastnyi had 4 officers wounded, 2 men killed and 12 men wounded.

Monday, March 21.
The Kolnische Zeitung's St. Petersburg correspondent says that the Russian Government contemplates putting an armoured train on the Manchurian railway, and that the train will be ready by May.

Tuesday, March 22. It is stated that M. Lessar has communicated to the Chinese, Foreign Office in the name of Admiral Makaroff, a message that as the Russians consider it necessary to place mines all along the coast of Manchuria for purposes of defense, Chinese vessels should not approach to within a distance of five miles without obtaining the assistance of a pilot. If they neglect this precaution it will be at their own risk.

It is a large order, the laying of torpedoes all along the Manchurian coast. And the question is: can it be carried out? What facilities has Admiral Makaroff for laying mines along the shore of the Yellow Sea and the Gulf of Pechili? One would suppose that he had command of the sea whereas in point of fact his cruisers and torpedo-craft do not at present venture to steam eastward or westward of Liaotung.

The fact that the above intimation was conveyed in the name of Admiral Makaroff and not in that of Viceroy Alexieff is con-sidered significant. But we do not ourselves see that much importance of that kind attaches to it.

it. If Admiral Makaroff can carry out credible. Least of all the last. About six his wholesale project of mine-laying, the weeks ago when the exodus of Japanese over-sea arrival of food-stuffs in Manchuria subjects from Manchuria was beginning to

Among the latter horses are includ-the Japanese squadron consisted of 4 boats, ed. Three thousand animals are said to the Japanese squadron consisted of 4 boats, and the Akatsuki. When the Russian squadron of 6 destroyers came in sight, the commander of the Japanese squadron signalled to his boats to steam at full speed in a direction which would have cleared the Russian line. But owing to the state of the weather this signal was not intelligible on board the Kasumi and the Akatsuki. Thus only the Asashiwo of the zone of danger. It was a little later that the Akatsuki received a shell which burst a steam-pipe, and caused the death of 4 men by scalding. Finding herself surrounded by the enemy she concluded that it was all over, and that nothing remained but to die hard. Her gunners worked vigorously, and poured such a storm of shot and shell into the nearest Russlan destroyer that the latter, in turn, seems to have become desperate. She steamed at full speed for the Akatsuki, apparently intending to ram or at any rate to torpedo. But she missed the Akatsuki by about 4 yards, and the torpedo she discharged was equally unsuccessful. As she passed, the Akatsuki's gunners gave her such a dose that she never made another effort to fight but steamed away at top speed. At this moment two other Russian boats were within 200 yards of the Akatsuki and a fierce fire was interchanged. then three Russian cruisers emerged from the harbour, and the enemy's destroyers seem to have engaged them by mistake, affording the Akatsuki an opportunity to escape. She had 5 men killed and 2 wounded, so that the Russians' fire was of poor quality after all. The episode closed at

Two from being detained against their will, they squadrons of cavalry have arrived, escorting are thus securing permission to remain as

pedo-destroyers of the finest type. Each Dr. Morrison, Peking correspondent of destroyer's materials will require two trains The Times, is reported to have reached to carry them. This we learn from a London Shanghai on the 20th. He is represented telegram in the Asahi Shimbun. The des-

way grow more and more onerous.

It is stated (Nichi Nichi Shimbun) that Russia is employing the lamas in Mongolia An account is given by an officer engaged to observe and report upon the movements

> The Novoe Krai of the 27th February, as translated by the Foreign Office, says that an announcement was published in Port Arthur in the sense that any Russian families desiring to leave the place and not having means to do so, would receive free tickets to Irkutsk, on application to the police, together with a sum of 10 roubles

> On the 1st of March the same journal contained a notification the gist of which was that wolunteer force had been organized at Port Arthur and recognised as a force of regulars on the 21st of February.

> A notification issued by Lieut.-General Stessel, commandant of the forts, stated that whereas, at the first sound of guns all the officials and others had at once closed their doors and fled for safety, not towards the forts but in some other direction, without regard to the convenience of the defenses but thinking only of their own persons, it was now forbidden to close offices on any occasion before the fixed hour, and any violation of this veto would be severely punished.

Viceroy Alexieff's departure from Port Arthur on the 21st of February seems to have been a very solenn affair. His Excellency received from the hands of the Mayor a piece of sculpture representing apparently the Virgin Mary and the Twelve Apostles, and having a legend to the effect that the people prayed heaven to bring destruction on the crafty enemy. The Viceroy, who was accompanied by a strong guard of honour, doubtless made a suitable acknowledgement of this ceremony, but his quality after all. The episous closes in that port lave not visible and according to the product of the product once put to sea. The ice is expected to which are described by the Port Arthur journal as having been more impressive than vehement.

Wednesday, March 23. Viceroy Alexieff is now said to have Shanghai and Tientsin send some items officially informed the Chinese that mines of news. One is that the Russians have have been laid everywhere along the coast taches to it.

PORT ARTHUR.

Saturday, March 19. (Reports continue to arrive from Chefoo concerning the bombardment of Port Arthur on the 10th instant. The latest informant is the master of a Chinese junk said to have left Su-yuelt-tao on the west of Liauti-shan Dalny on the 4th instant drifted to Talien on the 15th instant. The gist of the statement is that the forts suffered greatly, but dangerous that the Russians exploded them we are now told that some of the damage all on the following day. was caused by their own defective construction. The Chinaman says further that out of 8 torpedo-destroyers which left the port only 4 had returned up to the 15th, the other four having disappeared, but the nature of this allegation renders it difficult Russian vessels injured previously, they have received temporary repairs but are not fit to put to sea. During the attack two Japanese dressed in Chinese costume and been withdrawn for service in the field. four Chinese were executed. Concerning The Hochi Shimbun conjectures that the the position taken by the bombarding ships, destruction of the destroyer Skori,—which the Russians have taken care that it shall seems to be a fact—was probably due to no longer be out of the range of fire, for the mines laid by Japanese destroyers they have mounted 12-inch guns on the top during the night of the 9th,-10th instant. of the hill. It will be observed that this But the Skori is said to have suffered Chinese junkman talks of 12-inch guns as when attempting to enter the port, and certhough they were mountain artillery, which tainly the accounts given at the time did not could be run up a hill 800 feet high at a suggest the mouth of the harbour itself as the moment's notice.

All accounts agree that the bursting force of the Japanese projectiles was great. It is ron, or at least a part of it, put to sea on the alleged that the gunboat Giljak (1,300 tons) and a dredging ship were sunk during the bombardment and that about 12 shells fell in the dock. It is evident that if the Japan- felt even at Port Arthur; in oth ese ships fired from a position under the that torpedoes are drifting around. cover of Liauti-shan the eastern harbour and the dock would have been directly in their Takeshiki, that the Russian squadron which line of fire, and it is also evident that if a left Port Arthur after the bombardment dozen, or half a dozen, 12-inch or 10-inch consisted of the Petropaulousk, the Pobleda, shells fell in the dock its capacity for work the Peresvies, the Sevastopol and the Askold must have been reduced to cipher.

It appears that the recently reported death of eleven Russian soldiers at a point 22 kilometres north of Mukden was due to a party of bandits. They had wrecked the line just before the passage of a train full of troops, and there resulted an accident in which eleven lives were lost and many were wounded.

The fiji Shimpo says that according to investigations by good authorities the Russian forces now in Port Arthur are three full regiments and one weak regiment of infantry, five thousand garrisen artilley, and a small force of cavalry and artillery. At the rear of the fortress work is vigorously pushed on for defensive purposes, palisades being erect-ed and barbed wire fences put up.

Wednesday, March 23. Rumours are again reaching Tokyo about another attack on Port Arthur. It is interesting to note that every cardinal incident at that place has been reported in this vague manner in Japan many hours before the receipt of official intelligence. On the present occasion there comes from the Russian side a story that a large part of the Japanese squadron has been sunk. That is totally incredible. Ships are not sunk in bombardments or in attacks planned and carried out as Admiral Togo has been conducting his operations hitherto, unless they are ships intended to be sunk as was the case on the 24th Feb., and we may note that on that occasion also the first story circulated was a statement that four Japanese war-ships had been sent to the bottom. If there has been any new enterprise we ought to hear of it officially within the course of the next day or two, but the fact is that we in Japan are almost the last to hear of anything, happening at the seat of war. Thus the main facts of the first attack at Port Arthur, which was made during the night of February 8th and 9th, were published by The Times in London on the morning of the 10th, whereas the official report did not reach Tokyo until the afternoon of the same We have alluded to this matter before, and have noted that Tokyo must always expect to be tardily served with news so long as the seat of war is not in direct telegraphic touch with Japan. The Russian military authorities can communicate direct with St. Petersburg, and that is what Viceroy Alexieff did with regard to the torpedo attack at Port Arthur on the night of the 8th-9th and the naval engagement on the 9th. The Viceroy showed on both occasions a degree of manly frankness which was duly applauded in Europe, but unfortunately his subordinates do not equally appreciate the value of veracity, as is shown by the working of the Mukden-Shanghai factory. It may be expected that the intelligence of this fifth attack—if there has been one, which we think more than probable—will reach us first from Europe, and very likely it will speak of the sinking of Japanese ships, as did the opening story of the affair on the 24th of February, for there is reason to think that Admiral Togo has repeated his blocking tactics, though with what degree of success we can not yet say.

The German newspaper of Shanghai publishes a letter from Port Arthur dated the 17th instant, saying that the garrison has 850 oxen and many thousands of pounds of overflowing with biscuits and flour, and that to punish any concealment.

It is not surprising to learn that hard as along the line from Dalny to Port Arthur reply to some commercial proposal in the

now needed.

A telegram to the Kokumin Shimbun from Moji alleges that a fight occurred between the Japanese and Russian squadrons outside sunk—presumably struck by a torpedo. The Japanese had 7 engine-room hands killed or wounded. No official intimation whatever regarding such an attack has been received in Tokyo. If it had taken place on the 18th, as alleged, news of it would have been received officially by now.

With regard to the recent rumour that the Russians had sunk two vessels at the mouth of the harbour of Port Arthur, it is said to conjectured in naval circles that this measure is designed to break the force of the current, which is so strong that torpedoes can not be kept in position. Concerning this theory there is a story that when the last attack was made, one of the Japanese cruisers lying off the port, observed something like a torpedo drifting towards her. A marine fired at it with a rifle and it exploded. It seemed to have broken away from its moorings, and as similar accidents are frequent, Admiral Makaroff may have ordered the sinking of vessels, which, though they narrow the entrance to 100 yards, have the effect of lessening the force of the current.

It appears to be altogether untrue that the French Representative in Tokyo entered a protest against the bombardment and destruc-tion of the Russian sanatorium on the island San-shan-tao. Reuter forwarded the news on the strength of a statement made in the Temps, but leading Tokyo journals have ascertained by inquiry in official quarters that no such protest was entered and that no sanatorium has been destroyed. to San-shan-tao, our readers doubtless re-member that the island was attacked by one of Admiral Togo's cruiser squadrous and that the light-house and other Russian buildings on it were destroyed, but whether they included a sanatorium is a question not hitherto considered. Evidently not,

Thursday, February 24. Moji appears to be the origin of the rumour that an engagement took place outside Port Arthur on the 18th instant. The story reached other journals as well as the Kokumin, the fiji among the number. But the Jiji refrained from publishing it as there was evident reason to query the truth of a statement involving the hypothesis that an event so important had remained for nearly five days entirely outside the range of offi-cial intelligence. The most circumstantial form given to the tale is that three Russian ships were engaged and that one of them was sunk, and that the Japanese had 7 killed or wounded, including an engineer. On the top of this comes Reuter's intelligence that, according to St. Petersburg, an engagement, or attack of some kind, commenced on the 22nd. The latter appears to be much the more probable version. There is no difficulty in imagining that an event happening on the 22nd at Port Arthur was known in the Russian capital on the same day, or even at the same if not an earlier hour, due allowance being made for difference of longitude. The Russian wires

A Chinese despatched by the Chefoo correspondent of the Asahi to investigate the state of affairs at Port Arthur, reached on the On the other side of the same promontory lay a.m. one of the Japanese war-ships was hit toth instant a point within 7 miles of Pigeon a large four-funnelled war-ship which had by a shell from the forts and retired. There-

on the 25th ultimo two Russian destroyers had been put hors de combat: one the vessel already reported as having been sunk in Pigeon Bay by Japanese cruisers; the other a boat that went down between Pigeon Bay Port Arthur on the 18th instant, and that a and Port Arthur. The crew of the Pigeon Russian line-of-battleship was blown up and Bay destroyer escaped, with the exception of two men, but as to the crew of the other boat nothing is stated. Proceeding to a village called Liukia the Chinaman observed a battery of 8 guns at a distance of one third of a mile on the sea shore, but not a solitary Russian soldier was in sight. He saw only one officer on a neighbouring hill.

It would appear from this account that the Chinaman made his way round the coast westward from some point on the east of the Liauti-shan promontory, and having reached Pigeon Bay, turned inland, crossing thence to Port Arthur via Liukia-tung.

In the last-named town he found 300 artillery-men who seemed to man the shore batteries during the day and to retire to the shelter of the town during the night. Everything in the way of an animal or of food stuff had been seized by the Russians whose conduct, the informant alleges, was of the most disorderly nature.

Proceeding on his way he passed through Kinkia, and learned from the inhabitants that whereas articles of wearing apparel were cheap in Port Arthur, a poud of kerosene oil, procurable in Chefoo for 4 sen, was sold at 30 sen. Flour was selling at 4½ yen per bag, the Chefoo price being 2.20 yen. Bread purchasable in Chefoo for .06 sen was not to be had under 5 sen. The Russians were requisitioning fowls at from 5 sen to 10 sen, sign at 11 years and the graph and one at 11 years and the graph are sen at 11 years and 11 years are to 10 sen, pigs at 1½ roubles each and oxen at 5 roubles, while the services of mules were taken without payment, and unless the owners went with them, they never saw the animals again. On the other hand, if they went they had to find provender. The entry of junks was interdicted, and the people declared that if the Japanese did not arrive soon, all the inhabitants from Port Arthur to Kinchow would be reduced to the direst straits. The Russians were said to be less skilled in the use of their weapons than even the Chinese, and it was alleged that if the latter had rifles they could give a good account of themselves. A junior Russian officer declared that in the fight on the 9th of February, all the batteries at Port Arthur were short of ammunition.

In the fight on the 10th instant, five Russian destroyers had gone out of port but only two had returned. The repairs of the wounded men-of-war had been effected in a most temporary manner with wood only. Not more than 7 or 8 vessels and 10 destroyers were fit to leave the harbour. According to what this Chinaman himselfsaw, there was one vessel-along, low ship-lying in the dock, and he was informed that her re pairs would occupy about a month. In the east harbour there were two large ships which, it was expected, could be repaired with compara-tive ease. When the Russian Squadron put to sea on the 12th instant, the Askold did not go out, though she was lying in deep water, and it was therefore conjectured that she had suffered some superficial injury. On the shore of the Tiger's Tail a steamer of the are not congested as are those available point of the Tiger. Tail a big war-ship was between Japan and Europe. Ilying aground. (Probably the Retvisan, A Chinese despatched by the Chefoo corwhich had been dragged to that position

sense of forwarding a supply of food-stuffs, Bay. He there learned that in the attack lost all her masts, owing, it was said, to fire for the writer adds that no such supply is on the 25th ultimo two Russian destroyers from the forts. At the middle of the same from the forts. At the middle of the same spit, that is to say, on the east of the West Harbour, four vessels and the big dredger lay awaiting repairs. All the other ships were apparently at sea. Their smoke could be seen in the south. (This account would indicate that 10 war-ships were awaiting repairs, including the Askold—Ed. J.M.) The squadron did not go more than about A squadron did not go more than about 4 miles seaward, returned to the harbour at night. It was stated that on the east of the ships sunk by the Japanese at the entrance there was a boom, and moreover the Russians themselves had narrowed the entrance by sinking two vessels. One of the Japanese ships was said to have been sunk in a position which greatly impeded ingress and egress.

As for the land forces, this informant estimated them at about 2 regiments of infantry and 2,000 cavalry and artillery. A band of Chinese subjects had been organized by the Russians as detectives at a salary of 40 roubles, and whenever they arrested a suspicious character they received a handsome reward. A number of Chinese who had lest Port Arthur by permission on the 3rd instant, and had entrained for Newchwang, were compelled to alight at Kinchow, and were set to work at the Sukia fortifications. Provisions were said to be plentiful in Port Arthur. Some further details are given as to the distribution of troops but they are

not intelligible. Returning to Port Arthur on the 15th from

Dalny, this Chinaman learned that on the 14th three junks carrying Chinese fugitives had put off from Liauti-shan, but when the fact was signalled to Port Arthur, torpedo-destroyers were despatched from the latter place in pursuit. One of the junks escaped, but four of the passengers in the other were killed and the rest taken prisoners. (Can these things be true?) Since the 14th instant vigorous measures had been in progress to construct a fort on Liauti-shan so that the Japanese ships might not be able to repeat their manœuvre of the 10th instant. Some 300 Chinese and as many Russians were daily employed upon this battery. At the rail-way terminus some 700 waggons were way terminus some 700 waggons were collected, apparently as vehicles for escape in time of emergency. An order had been issued that all large junks should be drawn inland to a distance of 50 yards from the shore, and all small junks to a distance of several hundred yards. The order had not yet been strictly enforced, but practically all the junks had been rendered unfit for sea.

As usual the first news of operations at Port Arthur reaches us from Russia, in the shape of a report by Viceroy Alexieff to his Government and telegraphed subsequently to the Foreign Office in Tokyo.

The main facts only seem to be given. They are these :- At midnight on the 21st instant two Japanese destroyers appeared off the harbour's mouth, but being sighted by the forts and by the Bobr and the Otvazny, and being brought under fire, they retired. At 4 a.m. on the 22nd three Japanese destroyers again made an essay but again had suffered some superficial injury. On the shore of the Tiger's Tail a steamer of the same squadron began to leave the harbart Chinese Railway Co. was lying under water, her decks just awash. On the inward point of the Tiger's Tail a big war-ship was left the harbour or not the report does not say). Japanese line-of-battle ships now approached Liaoti-shan and opened fire. The Retvisan replied, her guns being trained

the squadron re-assembling, steamed away slowly to the south, all sign of them having disappeared by 12.30 p.m. The Russians had 4 killed on shore and 9 wounded, and one received a contused wound.

Paris sends another version of the same report, namely, that at 9.20 a.m. the Retruisan opened fire on 18 Japanese vessels, and that at 11 a.m. the engagement ceased. The Russians had 25 killed and wounded.

These are curiously curt statements. The Japanese official account will probably be more interesting. Perhaps the least expli-cable item is the behaviour of the Russian squadron which "began to leave the har-bour, led by the Askold." What became of it. Did it ever consummate its harbourleaving movement, or did it put back again on sighting the Japanese? Some very exultant telegrams have been reaching us about the squadron's resumption of a sea-going role but if its recovered powers of locomotion are to be limited to "beginning to leave the harbour," and scuttling back again at the aspect of danger its last state seems to be less glorious than its first.

MARQUIS ITO IN KOREA.

Friday, March 18.

The Nichi Nichi's Seoul correspondent says that although the Russo-phil party in Korea ceased to be visibly active after the departure of Li Ha-keun and Hyong Sangkon, there remain among the Emperor's immediate entourage a number of diviners and necromancers who employ all their influence to prejudice him against Japan. These people have been telling His Majesty that though the visit of Marquis Ito is ostensibly friendly, its real purpose is to induce the Court to permit the passage of the Prince Imperial to Japan, where he will be virtually a prisoner. Thus the coming of Marquis Ito is regarded with ill-concealed apprehension. The Marquis will find means to dispel these foolish fears, and it is probable that his visit will have a very material influence upon the relations between Japan and

On the 17th at 11 a.m. the Marquis arrived in Chemulpo. The Korean and Japanese officials sent to meet His Excellency repaired to the Hongkong Maru and hundred with the Environ At a circulative. lunched with the Envoy. At 3 o'clock the landing was made and at 5 p.m. the Marquis and his suite reached Seoul. They were received at the station by all the Korcan Ministers and by many high dignitaries, as well as by an enormous crowd of Japanese and Koreans. A guard of honour attended. It need scarcely be said that the distinguished envoy rode to Seoul in the Emperor's state coach. His Excellency proceeded to a building next door to the French Legation where quarters had been prepared for him.

Saturday, March 19. Marquis Ito was received by the Emperor of Korea on the 18th instant. Subsequently the Marquis visited the acting Minister of Foreign Affairs, Cho Pyong-sik.

Sunday, March 20.
On the 19th inst. one of the Korean Imperial Princes visited Marquis Ito. The Emperor being in mourning was unable to make a visit in person. On the same day the Marquis was waited upon by the various Korean Ministers, and in the afternoon he proceeded to the Foreign Legations. On the

after the Japanese slackened their fire, and entirely engrossed with visits and entertain- The natural accessibility of Marquis Ito ments in honour of the Japanese Ambassador and that administrative business is virtually suspended. Meanwhile the Court and the Cabinet are said to be altogether undetermined as to the policy to be pursued towards the Marquis. Several promoters of progress have been eagerly awaiting the coming of Marquis Ito. The Seoul newspaper has published a programme of 55 articles, which have provoked some ridicule as an evident attempt to curry favour with Japan. It is expected that Marquis Ito will have several capacity of ambassador, but merely as a Japanese statesman.

Monday, March 21.

Marquis Ito, as arranged, was received in private audience by the Emperor of Korea on the 20th instant. The length of the interview and the nature of the subjects discussed are not stated.

The Koreans seem to have been much perturbed by anticipations as to the issue of Marquis Ito's visit. They are said to have imagined the Marquis would require the Emperor to make a trip to Japan; that he would demand a cession of Korean territory; that he would ask for the pardon and return of the exiles now in Japan; that he would insist on the adoption of a system providing for Japanese interference in the empire's administration, and so forth and so on. But the Marquis has not asked for anything at all or preferred any inconveni-ent requests. He has merely assured the Emperor that Japan has no intention except to preserve the territorial integrity and the independence of the empire; that she desires to see Korea's finances placed on a sound basis; that she will lend a sum of 5 millions of yen to promote that (end, and that she offers to Korea the services of competent advisers. In view of these generous and magnanimous declarations the Korean nation has drawn a long breath and broken into smiles.

Tuesday, March 22. The Emperor of Korea has conferred the highest Order in his gift on Marquis Ito. On the 20th the Marquis had his first private audience. It is stated that all officials, except an interpreter, were required to leave the room, and that a long and intimate conversation ensued between the Sovereign and the Ambassador. What passed is not known publicly, but rumour says that the Emperor places entire confidence in Marquis Ito and expresses a desire that his sojourn in Seoul

may be as protracted as possible.

On the evening of the same day the Court entertained the Ambassador and his suite together with the leading Japanese officials. There were uninteresting but cordial ex-

changes of toasts.

A later telegram says that during the above interview Marquis Ito deprecated any heroic programme of reforms, and also advised His Majesty against changing the organization of the army or largely increasing its establishment. For the rest the conversation is said to have turned chiefly on the relations between the two Courts and not to have taken a political complexion. It goes without saying that the senders of these telegrams append an expression of the Korean monarch's admiration for Marquis Ito's ability, tact and experience.

The Nichi Nichi Shimbun's Seoul correspondent shows the obverse of this pretty 20th a party was to be given at the Court picture. It says that not a few Korean in honour of the Ambassador. picture. It says that not a few Korean wisest plan would probably be to develop officials are endeavouring to make selfish educational facilities with a view to the It is stated that the Government officials are capital of the Ambassador's presence. enlightenment of the people at large and the

and their own adroitness in gaining access to him under various pretexts—this is especially true of the officials happy enough to belong to the reception committee-enable them to depict themselves as having gained the full confidence of the celebrated statesmen; a position which they utilize by representing to the Emperor that in the relations they have thus established, and above all in their own continued conduct of them, lies the only hope of serving the State. aggrandisement and personal ambition are interviews with the Emperor, not in his the ruling motives of human procedure the world over, but Korean humanity seems be more affected by this leaven than any other section of mundane beings. There is also a party whose units are clever enough to construct a footstool by ridiculing the doings and denouncing the want of patriotism shown by these self seekers, so that, on the whole, Marquis Ito's arrival in Seoul has the whole, Marquis ito's arrival in Seoul has brought to the surface many unsightly dregs. As for the Court itself, the sentiment by which it is chiefly pervaded seems to be one of relief. The Sovereign and his immediate entourage are reported to be saying in the words of the old Japanese proverb: "Tis not so very big, this Fujiyama, when one comes to view it," and finding that all their perturbed anticipations about the purposting of turbed anticipations about the uprooting of ancient ways and the cleaning of Augean stables, have no foundation of fact, they are less than ever disposed to put their hands to the plough. Finally this analysis descends to the people. They, we learn, having no private axes of their own to grind and not having been brought under the direct spell of Marquis Ito's personality, regard his forbearance with apprehension and his moderation with suspicion. There is armour, they think, under the velvet surcoat, and one fine morning the country will wake up to learn that its fancied security was the calm before the storm. But, after all, Marquis Ito is not to remain longer than ten days in Seoul, and during such a brief sojourn there can not be much opportunity for him to adopt a new route, still less to undo the re-assuring results his declarations and his mien have produced. It may really prove-the Koreans are alledeg to be saying—that, after all, their country is not to be medependency of Japan, and that no serious shock will be given to the pleasant and exciting game of intrigue and corruption that has so long absorbed the attention and engrossed the abilities of Korean officialdom.

> Wednesday, March 23.
> The Shogyo Shimpo publishes the alleged gist of what passed between the Emperor of Korea and Marquis Ito at their first private meeting. Previous intelligence is little augmented by this account. It appears that the Emperor expressed profound admiration for the successful progress of Japan, and for the unfailingly able statesmanship that has guided her course, this latter remark being specially addressed to Marquis Ito, of whose services the Monarch spoke in terms of warm appreciation, adding that he trusted the Marquis would assist Korea with his advice. Marquis Ito replied that heroic reforms would seem to be unsuited to a time like the present, when Japan and Russia were at war, and that he ventured to recommend deliberate steps of progress. Above all it appeared unadvisable that any expansion of armaments disproportionate to the national strength should be attempted. The

growth of the country's resources. The Marquis concluded by earnestly hoping that The the relations between the two empires would

grow constantly closer.

From the same source we learn that the autograph letter of the Emperor of Japan which Marquis Ito presented to the Korean Sovereign, opened with an expression of satisfaction that the recent Protocol marked the commencement of an era of increased friendship between the two empires. His Majesty then said that he was sending Marquis Ito to convey a full statement of his views to the Korean Monarch, and that it would give him much satisfaction to learn that the Marquis had been honoured with an audience and had been interrogated fully by the Emperor of Korea.

Mr. Hayashi gave a brilliant party in Seoul on the 21st instant, in honour of

Marquis Ito.

Thursday, February 24.
At a banquet given by the Korean Minister of Foreign Affairs on the 22nd instant, Marquis Ito is said to have made a speech insisting that, according to the most enlightened ideas of the time the essentials of a successful national polity are loyalty on the part of the ruled and benevolence on the part of the ruler. In Korea nothing was more to be deprecated than heroic reforms unsuited to the disposition of the people, and above all it was desirable that squabbles for office and power should to the Yalu, it will suit their convenient the qualities of loyalty and benevolence without which there could be no such thing as a sound State.

The high Korean officials who heard this speech are said to have been much impresed. Altogether Marquis Ito's sayings and the Shogyo Shimpo that the mere prospect doings seem to be winning golden opinions

Marquis Ito is to have his second private audience on the 25th. The Emperor is said to be very anxious that he should remain a long time, but he is determined to leave on the 27th.

KOREA.

Friday, March 18. The Russians continue to publish in Korea manifestoes warning the inhabitants and the officials that Korea being now under compulsory control by Japan, no orders or ordi-nances issued by the Seoul Government will be considered to have binding force, and that should the Koreans show any disposition to assist the Japanese, the Russians will treat Korea as a hostile country and inflict due punishment. A document in the above sense is said to have been issued to the local Russians may gain something by these intimidations, but to outsiders they look rather ridiculous.

would melt away en route and that the force reaching the Yalu would be a cipher.

Japanese newspapers say that ex-President McKinley's son has arrived at Chemulpo en conte for the front. His mission is apparently

of Pyong-yang.

carried great quantities of food-stuffs to the place expecting to find something like a Doubtless for a moment some famine. scarcity existed, but it was quickly remedied; not so quickly, however, as to prevent the circulation of wild newspaper reports.

The newspaper correspondents who proceeded to Pyong-yang on their own account without obtaining military permits, have been ordered to return to Seoul or Chemulpo.

The Seoul correspondent of the Nippon alleges that an investigation made on the 4th instant showed an unexpectedly large force of Russians in Wiju, namely, 2 brigades of infantry and 2,400 cavalry with 8 guns On the same authority it is stated that at Hoi-nyong, a little south of the Tumen there are over a thousand troopers, but this latter estimate is open to doubt. Tientsin's story that twenty thousand Russians had crossed the Yalu is considered unworthy of credence, but if there be two brigades at Wiju, then rumour has not exceeded its proverbial margin of exaggeration.

Saturday, March 19. Reports continue to reach Seoul from Chonju and Kasan that a considerable force of Russian cavalry is in the region im-mediately north of the Chhong-chhon River, that is to say, about 60 miles north of Pyongyang. If the Russians can induce the Japanese to march direct from Pyong-yang leaders and released the other 34 prisoners be effected, a battle in the neighbourhood of

of going to the front has caused desertions to the number of some 400.

It is again stated that Prince Li Chi yong tion. will be sent as special envoy to Japan.

Monday, March 21.

The Nichi Nichi has a telegram from Seoul saying that the incursions made by Russian troops into northern Korea are partly to obtain provisions, Manchuria having been almost depleted, and partly to exhaust the store of provisions available for the Japanese. It results that there are virtually no cattle or horses left in the district north of Anju.

agreement with a French firm, and that Mr. on the 20th. The same evening at 5

will be given by Marquis Ito on the 23rd. Other parties also are spoken of.

The Jiji Shimpo says that there is a pal-pable increase in the number of students who have applied to learn the Japanese lan-guage in the Government Languages School It is said that there are 1,750 Russian cavalry in Chongju and that they have pushed a strong outpost as far as the Chhong-chhon River. This outpost is within 45 miles are 1,000 Russian 10. gaining vogue in Russia. The Russian Government finds Korea's action inconsistent with neutrality.

Tuesday, March 22.

It appears that there are Japanese troops in Hamyong-do. News comes that a band of insurgents numbering about 300 created a disturbance at a place called Ham-heun, some 45 miles north of Yuensan, along the north-east coast. A party of Japanese were sent from Yuensan to quell them, and there resulted a kind of engagement, in which 8 of the Koreans were killed, 20 wounded and 36 taken prisoners, the Japanese having no casualties except one wounded. Among the Korean prisoners there were some leaders of the movement and from them it was learned —or, at least, they pretended—that they had been acting at Russian instigation.

On the 21st instant it was finally decided to open Yong Am-pho to foreign trade; that is to say, Yong Am-pho is to be re-garded as included in the region associated with Wiju, which was opened some time

Wednesday, March 23.

The insurgents whose discomfiture at Ham-heun in Hamyong-do was yesterday reported, are now stated to have been the familiar Tonghaks, whose motto is the extermination of all foreigners including Japan-The Japanese retained the two ring-And unless some turning movement incident that Yuen-san has not been left cted, a battle in the neighbourhood of improtected by the Japanese. Probably the Anju seems not improbable.

The talk of despatching Korean troops taking place from Possiet southward of the northward to repel the Russian invasion, has not materialized. Seoul telegraphs to discovery that "an obstacle" stood in the

Way.

It is now stated that Russian instigation had nothing to do with this petty insurrec-tion. The probable cause was discontent with the proceedings of Korean officials.

It is stated that the Kussians have a line of vidette posts from the neighbourhood of Kazan all the way to Wiju. They are seizing all the forage procurable in Korea and it does not seem to be enough for their purpose. At Kasan they are said to number some two thousand troopers.

Thursday, February 24. It appears that the detachment of Japanese recently engaged with the Tonghaks It is well known that Messrs. Mitsui & near Yuensan, was under the order of Cap-Company have
five-years' contract with tain Okuda. The distance from Yuensan to the Korean Government for farming the Hamheun is 45 miles by road, but the giuseng monopoly. There is a report that detachment proceeded by boat along the the Court, or some official of the Imperial shore as far as a point 10 miles from Ham-Household, has concluded an independent lieun, which they reached at 10.40 a.m. sense is said to have oven issued to the local agreement with a French hrm, and that Mr. on the 20th. The same evening at 5 authorities in Hamyong-do. Possibly the Russians may gain something by these intimidations, but to outsiders they look rather ridiculous.

The talk of despatching Korean troops to the northern frontier seems to be replaced to the local agreement with a French hrm, and that Mr. on the 20th. The same evening at 5 p.m. they arrived in the neighbourhood of Hamheun. Nothing was seen or heard for Messrs. Mitsui's rights.

On the 21st instant Mr. Hayashi was to give an evening party in honour of Marquis to the Tonghaks until nearly midnight, was about to commence. The Japanthood party and that Mr. on the 20th. The same evening at 5 p.m. they arrived in the neighbourhood of Hamheun. Nothing was seen or heard of the Tonghaks until nearly midnight, was about to commence. These were armed only with pistols and matchlocks, which were seized, together with their camp and their leaders.

The Nichi Nichi's Seoul correspondent states that although things seem quiet in Chemulpo seems to have now an ample ed by the Powers.

Supply of provisions. There have been seri
A telegram from St. Petersburg says that Their feud continues to be none the less sador departs, a coup of some kind is expected, having for object the elevation of Lady Om to the rank of Empress.

NEWCHWANG.

Newchwang seems to be in great straits for flour. The British and American consuls have telegraphed to Tientsin asking for a supply, however small, and it has been decided that 280,000 lbs. shall be sent forward under escort of British troops, to be delivered to the two consuls and by them alone distributed.

It need scarcely be said that no credence whatever is attached in Tokyo to the story whatever is attached in long of the the story telegraphed from Newchwang viå Paris that a detachment of Japanese landed at the former place and, having made a reconnaissance, re-embarked. That would have been one of the most extraordinary military manœuvres ever heard of. It seems astonishing that such tales should be sent along the wires round the world, but we conclude that current events in the Far East have proved too exciting for the moral equilibrium of some intelligence agents, or that, in the rush of competition, they can not pause to discriminate between the possible and the inconceivable. The Imperial Hotel in Tokyo, unless all accounts be incorrect, has occupied itself during the past month or six weeks with tales of a very wonderful character, one of them being that the Port-Arthur and Vladivostock squadrons emerged from their respective harbours of refuge during a pre-arranged snow-storm and affected a junction without mishap.

Tientsin telegraphs that the Russians are vigorously pushing the defenses of New-chwang and that the foreign and Chinese Russians seem to be paying no attention to the bandits who are said to rob and murder without let or hindrance. So long as they leave the railway unharmed the bandits may perhaps count on immunity from molestation.
With reference to these defenses of New-

chwang the Russians are reported to have effected the purchase of 10 Chinese junks at a high price. These they are about to sink at the entrance to the Liao River. All these doings spell ruin for the foreign trade of Newchwang, but apparently the Powers, still under the spell of Russia's might, shrink from whispering a word of protest.

The Foreign Office in Tokyo is informed from Peking that the United States Consul at Newchwang reports to his Minister in Peking in the sense that the two Japanese subjects recently apprehended by the Russians on suspicion of being spies have been released, and have left for Tientsin, together with four Japanese women.

THE LATE DUKE OF CAMBRIDGE.

A very long link with the past is severed by the death of George William Frederick Charles, Duke of Cambridge, Field Marshal, K.G., K.P., G.C.M.G., G.C.H., G.C.S.I., etc. The eldest son of the first Duke of Cambridge, he was a first cousin of the late Queen Victoria, and saw the light on March 26th, 1819, two months before K.G., K.P., G.C.M.G., G.C.H., G.C.S.I., etc.
The eldest son of the first Duke of Cambridge, he was a first cousin of the late bridge, he was a first cousin of the late brusqueness, slow in intellect perhaps, and saw the light on March 26th, 1819, two months before his more famous relative. Though he spent the greater part of his long life in England he never shook himself free from the day's shooting. When other topics her cargo had been released. We may mention that the delay was 23 days—from the Duke lapsed into taciturnity. A man of kindly instincts, despite his brusqueness, slow in intellect perhaps, and a month as the Kobe Chronicle alleges.

fore he saw active service. He was then advanced to the rank of Major-General and Highlanders and Guards, united to form the first division of the army sent to the Crimea. At the battle of the Alma the Duke led his division in a manner that won the confidence of his men and the respect of the veteran officers with whom he served. At the battle campaign proving too much even for his vigorous constitution. The Royal Duke tried a change to Pera, but this not answering he proceeded to Malta, and thence by easy stages home. He received the Crimean medal with four clasps for the engagements he had passed through. In 1861 he was promoted Colonel of the Royal Artillery and of the Royal Engineers, and in November of the following year he received the rank of Field-marshal. Before this, however, he had succeeded Viscount Hardinge as Commander-in-chief of the British Army. This was in 1856. From that date on till the autumn of 1895, he held that high position, the appointment being perpetuated by the issue of enabling Royal Warrants. Public opinion, however, was gathering head and at last the Government had to bow to its residents of the place are withdrawing in great numbers. Every train going westward scheme of Army reform was submitted in is full of people. Probably because they are the sequel of which the Duke of Cambridge wholly engrossed with military matters the retired. It was no secret that Queen Victoria did not approve of the shelving of her cousin, but she had learned her lesson well and bent before the storm. To the aged Duke this deposition was a bitter blow, and he missed no opportunity of telling an ungrateful country what it had lost. It was only natural, the Duke being but human, as are we all. Consider for a moment his position. Entering the army when the purchase system was in full vigour, with the traditions of the Peninsula War still paramount, and like all his race a firm believer in the divine right of Kings and of those im-mediately connected with them, the Duke of Cambridge could not have been expected to have believed anything but that the Army must now go "to the dogs." Like his royal and Queenly cousin he saw with distrust the increasing power of the middle and manufacturing classes, but of course could do nothing to stem the rising tide.

> There can be no shadow of doubt that as Commander-in-chief the Duke of Cambridge was in his element. He revelled in the minutiæ of buttons, stripes, gold braid, and military millinery generally. His conversation, says one who knew him intimately, was limited to two subjects, the army, and the day's shooting. When other topics

the ways of thought, habits, and manners, of the class into which he was born, the Prussian aristocrat of the olden school. This pay as Commander-in-chief, and the allowances of the many Colonelcies which he the great mass of the English nation, though singularly enough he was popular with the rank and file of the army. At the lage of 18 he received a commission as Colonel from his course. Once I from his course, Once I from his cours who had ascended the throne some six versy in which the Duke came off months previously, but he had to wait second best with the Spectator over the till the outhreak of the Crimean war before he saw active service. opening of part of Windsor Forest for the drill of a Volunteer corps. The Duke contended that the drill would disturb appointed to command the two brigades of the deer, an echo from Norman days quite consistent with the character of the man, but in the end a hint from high quarters caused him to recede from his position, and the Volunteers got their drill-ground. With him dies the title, for he was only married morganatically to a once beautiful star of off Inkermann he had a horse shot under the English stage—unless the King cares to him. His health broke down soon after this, the trying climate and the rigours of the campaign proving too much even for his interesting to recall that he came of a long lived stock, his mother dying at the ripe age of ninety-two years, while his cousin's reign was the longest of any British Sovereign.

> During Tuesday forenoon the warships in harbour, led by H.M.S. Leviathan, fired minute guns in recognition of the obsequies of the late Duke of Cambridge and the flags of the various consulates and ships were half masted.

THE "HERMES."

We observe that the Kobe Chronicle describes the action of the Naval Authorities in the case of the Hermes as "arbitrary," by giving a most imperfect statement of the facts, endeavours to show that a great wrong was done. The Kobe journal's editorial account is that the Hermes was a Norwegian steamer " sailing under the flag of a neutral Power on the most friendly terms with Japan," and that she "cleared from Moji with a cargo of coal for Port Arthur, her papers being all in order and duly passed by the Customs of that Port." It may be observed en passant that this assertion about the steamer's papers being in order is quite irrelevant, and seems to have been introduced merely for purposes of effect. What is omitted, however, is really important, namely, that the *Hermes* was chartered Arthur. Hence when captured by the Japanese off Port Arthur on the 9th February, she was a ship in Russian service carrying contraband of war to a Russian naval port. Her arrest under such circumstances was absolutely legitimate, and it became a very delicate matter to determine whether the plea of ignorance advanced on her behalf should be allowed to have any validity, and whether, even if the ship herself were released, her cargo of coal should not be confiscated. What course would finally have been adopted by a Western Power in the premises we can not be sure, but there is reason to believe that the charterers of the Hermes were very greatly surprised when they learned that not only the vessel but also her cargo had been released. We may men-

working order for three years, the present mood, the Government not professing any manufacturers will find employment during resolve to adhere rigorously to its proposals, the interval. Some of the party politicians and the parties being disposed to yield on are understood to object, however, on the all the main counts, except the salt and ground that no reason for haste offers in the silk-stuffs taxes, provided that the Cabinet case of these monopolies, and others contend that every undertaking which calls for an immediate outlay of capital should be deferred. As to the former point, it is of course a matter of opinion, but as to the tothe silk-fabrics tax is that great difficults. latter, the official answer is that although, culty would be experienced in collecting with regard to the monopoly of manufacturit. Of course if that be true of silk fabrics, ed tobacco, a capital outlay of 3 million yen it is true also of woollen stuffs, and should

Monday, March 21.

It appears probable that there will be some differences of opinion between the Cabinet and the political parties with regard to the war taxes. Both the Seign-kan and the Progressists are opposed to the establishment of a salt monopoly—for the present at all events—and they disapprove of the imposition of any consumption tax on salt pending the establishment of the monopoly. They further agree in condemning the projected tax on silk fabrics and the issue of debentures of petty small denominations by savings banks. Thus far the two parties are in unison. But they differ as to the land tax, the business tax and the income tax. In the case of these three taxes the Seiyu-kai approve the Cabinet's programme, but the Progressists desire to limit the increased rates to 50 per cent. The Seiyu-kai further think that instead of making several additions of various kinds to the statutory import tariff, the better plan would be to raise the rates all round by 5 per cent. Whatever reduction of projected income would result from the amendments proposed by the Sciyu-kai, they wish to compensate by administrative economics, their view being that these outlays may be diminished ed by 5 millions, and that further the salaries of all officials who are in receipt of 2,000 year annually or upwards should be cut down by 20 per cent., those of smaller amount being reduced by 10 per cent. On the other hand, if the amendments of the Progresssits be adopted there will be a diminution of 20 millions in the Government's programme. This the Progressists desire to compensate by administrative economies and by floating loans, Count Okuma being convinced that the floating of loans is the sound way to defray war outlays.

Another important point of difference between the Government and the Seiyu-kai is that the latter have resolved to withhold their post facto assent to Imperial Ordinance Salk—60 sen per koku or 66 sen per picul.
Silk stuffs—15 per cent. ad valorem.
Woollen stuffs—15 per cent. ad valorem.
It is expected that all these changes will be voted without difficulty. But some controversy is anticipated with regard to taxality and the second stuff of the House's withholding its consent would be the state of the House's withholding its consent would be stated by state of the House's withholding its consent would be stated by state of the House's withholding its consent would be stated by state of the House's withholding its consent would be stated by state of the House's withholding its consent to imperial Ordinance.

No. 291. This is the Ordinance in the Special Account funds to war purposes and the issue of short-period loans. The effect of the House's withholding its consent to imperial Ordinance is with the Special Account funds to war purposes and the issue of short-period loans. The effect of the House's withholding its consent would be also be a special Account funds to war purposes and the issue of short-period loans. The effect of the House's withholding its consent would be a special Account funds to war purposes and the issue of short-period loans.

is required in the first year, there will be a both of these items be expunged, the cornet profit of 4 millions, and that in a few responding reduction of projected revenue years the revenue accruing will be 30 will be 9½ million yen in round figures. The Tokyo Chamber of Commerce appears to entertain some apprehension about the effect of the proposed sugar tax also. It is the Chamber's idea that if the taxation of raw sugar be raised from 25 to 30 per cent., a blow may be given to the refining industry which is just beginning to raise its head. As for the Kyoto manufacturers of silk stuffs they claim that the intended tax would kill their industry. A memorial pre-pared by them on the subject contains an unexpected statement, namely, that silk stuffs being articles of luxury, the demand for them has shown a palpable diminution since the China-Japan war, and if now a tax be imposed the enterprise will probably perish, the Government thus losing its anticipated revenue and the weavers their bread.

It appears, in fine, that the taxes doomed

The salt consumption tax (which the Go-	
vernment proposes to levy pending the	Yen.
establishment of a monopoly)	2,836,791
Silk Fabrics	4,183,885
Woollen Stuffs	2,138,661

Total 9,159,337 This deficit the Seiyu-kai propose to make up by administrative economies representing millious, and by docking the pay of officials, on a sliding scale, all salaries of and above 2,000 yen annually to be reduced by 20 per cent., and those under 2,000 yen by 10 per cent.

Evidently the Government's project for a monopoly of salt manufacture will not be endorsed by the Diet this session, at all events, but, on the other hand, there seems to be some prospect of the monopoly of tobacco manufacture being favourably re-ceived. The latter is of much importance, for the Treasury anticipates from it ultimate ly a yield of 30 million yen annually, and as we explained in a recent issue, the hardships that the original scheme would have imposed upon manufacturers are greatly mitigated, if not altogether removed, by the modifications now introduced.

Wednesday, March 23. After a great deal of discussion and many conferences the Government and the parties have at length come to an agreement on the subject of the financial programme. The dent of the war taxes, namely, the bills prodeflected and the short-period loan (100 most important concession made by the
viding for State monopolies of tobacco and
million yen) has been issued. These measalt manufactures. Much agitation was sures, therefore, would stand. But further shall cease to be levied one year after the
caused by the proposal, formulated last year, outlays on account of the Seoul-Fusan Railconclusion of the war. That is radical. For salt manufactures. Much agriation was sures, therefore, would stand. But further snant cease to be leveld one year after the caused by the proposal, formulated last year, outlays on account of the Seoul-Fusan Rail-to establish a monopoly of tobacco manufacture, criticism being specially directed against the project of paying only one year's income to the present manufacturers by way of solatium. The Government has apparent parties held a joint meeting on the 20th purposes, the increased taxes assume the chest, and, inasmuch as they will cease to be levied almost immediately after the war, no means are apparently provided for pay-

ing off the debt.
With regard to the various increments of taxation, various changes of programme have been agreed to. Both of the parties consent that urban building land shall bear the additional burden suggested by the Treasury. But whereas the Seiyu-kai are disposed to endorse the projected rate (41/2 per cent.) in the case of agricultural lands, the Progressists maintain that the rate should not exceed 4, and a compromise has consequently been effected at 4.3. The taxes on business, incomes, sake and soy are to The taxes be passed as officially proposed, but in the case of sugar, although the total amount raised is to be as projected, the method of levy will be different. Further, the Govern-ment consents to withdraw its proposal for abolishing the system of return duties on refined sugar for export. The tax (consumption) on salt and the salt-manufacture monopoly will not be put forward by the Treasury, and neither will the tax on silk fabrics. Woollen stuffs and kerosene are not disturbed, the Government's rates being accepted. As for the statutory tariff, it will be raised by 5 per cent. all round.

Contrary to expectation the Parties agree to the Government's bill for the monopoly of tobacco manufacture, but they insist that the commutation must be on the basis of 4 deny that the proposal came from them, and years instead of 3. The system will go into force in the case of cigars from the 1st of result is that the proposal must have been July; in the case of cut tobacco from April spontaneously generated.

Ist, 1905.
There is a trifling change with regard to the stamp tax, but the Parties agree to the proposal for issuing small-denomination (5 yen) premium-bearing notes by the Savings Bank, provided that the operation be post-poned until August next.

The Parties further agree to give post-facto approval to Urgency Ordinance No.

291 (relating to war finances and the Seoul-

Fusan Railway).

Concerning the Seiyu-kai's demand that economies to the extent of five million yen should be made in administrative outlays, the Government have promised to do what they can but they have declined to bind themselves to any special sum.

Finally, with regard to the proposal for cutting down salaries, it is agreed that the question had better be deferred.

These various changes are not yet expressed arithmetically, and it is uncertain whether the Treasury will amend the figures in its bills or leave the House to amend them.

The Kokumin calculates that the following approximate losses of revenue will result from the compromise :-

From expunging the silk-fabrics tax 4,180,000

Total...... 9,710,000

On the other hand, by adding 5 per cent. to the import duties under the Statutory Tariff—a change which can not be effected before six months—, a revenue of $2\frac{1}{2}$ millions will be obtained. This, however, may be set against the increased outlay on account of extending the commutation basis of the tobacco-manufacture monopoly from 3 years to 4. How, therefore, the deficit is to be met, no one pretends to see.

All the newspapers roundly condemn the litical parties. They ask how it is possipolitical parties.

character solely of additions to the war ble to reconcile their persistent resolve to Regrouping these figures, the net result is cut down all the taxes proposed by the Go-vernment with this sudden readiness to burden the State to the extent of over 3 millions on account of the tobacco-manu- the discharge of their duty are excluded. facturers. Evidently there prevails a widespread belief that all is not square and above-board. "Nicotine" has been circulating—golden mixture—is the cry. Further, there is the inconsistency shown by the Progressists towards the land tax. Hitherto they have openly advocated the doctrine that the land-tax is essentially an impost to be drawn upon in time of war, yet they now refuse to endorse the Government's proposed draught on it. The Nichi Nichi Shimbun recalls the fact that a few years The Nichi Nichi ago Count Okuma figured as an ardent advocate of tax upon silk-fabrics, yet his Party now oppose the tax.

> Thursday, March 24. The Stiyu-kai have apparently agreed that the Tobacco Monopoly Bill should be accepted, so far as they are concerned, in the form proposed by the Government; namely, on a commutation basis of 3 years' profits. Both of the political parties show marked anxiety to be acquitted of having proposed the four-years' amendment, and the curious thing is that whereas the leaders declare themselves precluded by mutual promise from disclosing any details of their conferences the Seign-kai nevertheless unhesitatingly

It is stated, with regard to the scheme of commutation, that Messrs. Murai & Company claim to be making a yearly profit of 1,360,000 yen; Mr. Iwaya a profit of 890,000 yen and Mr. Chiba a profit of 390,000 yen, while the total profits of other firms are estimated at 2,340,000 yen. On these bases the sum paid by the Government for buying out the manufacturers would be about 15 million yen. We wonder what measure of agreement appears between the income taxes and the business taxes paid by these companies, compared with the profits they now allege.

THE NAVY'S CASUALTIES.

The Asahi says that the health of the squadrons engaged in warlike operations has been extraordinarily good up to the present. Eash ship has had only 5 men sick on the average, and the figure over all has been .06 per cent. or 6 per 1,000. Strange to say there have been practically no men incapacitated by frostbite, although the operations have been conducted in extraordinarily cold weather. That is probably because the experiences garnered in 1894-5 have been well utilized. The chief cause of temporary casualty has been hurts received in the discharge of duty; not wounds received in action but trifling injuries otherwise suffered. Our contemporary then gives the following list of casualties :

FIRST ENGAGEMENT, FEBRUARY 8TH AND 9TH. Total Casualties 72.

DETAIL.

Hart (not b	y the e	enemy's fire)
Wounded a	nd die	d before entering hospital
14	14	while under treatment on board
20		while en route for hospital
9		after admission to hospital
Recovered		
Under treat	ment i	n hospital
13	- 0	on board

10 deaths, and 62 wounded (in action), of whom 30 have recovered and 29 are under treatment. N.B.-The three men hurt in

SECOND ACTION, FEB. 14TH (TORPEDO ATTACK).

Total Casualties 4. DETAIL.

THIRD ATTACK, FEBRUARY 25TH (SINKING OF BLOCKING STEAMERS).

For some unexplained reason no figures are given relating to this attack. It will be remembered that the official account gave 2 killed and 3 wounded.

FOURTH ATTACK, MARCH 10TH.

Total Casualties 22.

DETAIL

Killed
Hurt (not by the enemy's fire)
Wounded and died after admission to hospital
Under treatment in hospital on board

One noteworthy point connected with the last action was that arrangements had been made for placing the wounded men in a hospital ship immediately after the action. Thus they received the best treatment while en route for Saseho, and the consequence was that everything in the nature of inflammation was averted.

GUNJIN IZOKU SHIMPO.

In a recent issue we invited the attention of our readers to a powerful association formed under the presidency of H. I. H. Prince Arisugawa, and having for object the succour of the families of soldiers serving at the front. The Association is called the Ieikoku Gunjin Yengo-Kai, and already in the very short period of its existence it has collected nearly three quarters of a million yen. We are now asked to speak of another Society working in the same cause but having already existed for several years. It is the Society for Assisting the Families of deceased Soldiers (Gunjin Izoku Kingo-kai) which was organized in 1888 under the Presidency of Count Bojo, and has for Vice-President Count Ohara, its committee being Mr. Ozaki Yukio, Count Itagaki, Prince Nijo, Count Okuma, Baron Kaneko, Count Soyejima, Marquis Kuga, Viscount Yenomoto, Baron Kioura, Marquis Oyama, Marquis Yamagata and seventy-four others. This society has about 45,000 members, in all parts of the empire, and since the China-Japan War it has given assistance to some two thousand families which would otherwise have been reduced to indigence. It publishes a periodical called the Gunjin Izoku Shimpo, in which the names of all contributors are inserted as well as statements of accounts and of the manner of spending the funds. As Japan is likely to have fully 300,000 soldiers in the field before this war is over, there is ample room for all these charitable associations, and they will doubtless enlist the sympathy of many of our fellow-residents.

PRINCE PU LUN.

Prince Pu Lun reached Tokyo on the 21st instant, at 12.14 p.m., and drove to the Shiba Detached Palace. Among his suite are three officials who have previously visited this country. The Prince will be received in audience by the Emperor on the 24th. He goes to Nikko ou the 27th and leaves Japan for America on the 30th.

THE " MANDJUR."

The Mandjur's case is not yet fully settled. Her steering gear is now the bone of contention, the Russian authorities insisting that it shall not be removed, and alleging that the presence of a Japanese man-ofwar, the Akitsushima, at Woosung is a violation of Chinese neutrality. It would scarcely be possible to reach a higher level of pettiness than that reached by the Russian officials in this matter. Some of them seem to be incapable of conducting a simple transaction in a straightforward manner. Either the *Mandjur* is to be disarmed or she is not. If the former, then what on earth is the use of raising difficulties about her steering gear some other part of her equipment? needless air of bad faith is thus imparted to the whole transaction. As for the Akitsushima's lying off Woosung, she is not in a Chinese port, and her presence there is in no sense a violation of neutrality.

1HL DIET.

Before the Houses met on the 18th instant, the Sciru-kai and the Progressists had agreed that Mr. Matsuda Masahisa of the former party should be elected President, and Mr. Minoura Katsudo, of the Progressists, to the Vice-Presidency The Seiyu-kai leaders in the Lower House are to be Messrs. Matsuda and Hara, and the Progressist leader, Mr. Inukai.

The balloting for the election of President followed the above lines. Two ballots for the presidentship resulted as follows:

FIRST BALLOT.	
Mr. Matsuda Masahisa	
" Hatoyama	
Kono Hironaka	
" Ebara Soroku	18
SECOND BALLOT.	
Mr. Hatoyama	
, Ebara	
. Kono	
Hara Kei	64
454 54 5	

The names of Messrs. Matsuda, Hatoyama and Ebara were therefore sent up to the Emperor.

For the vice-presidentship Mr. Minoura obtained 268 votes.

His Majesty has duly approved the selections of the Lower House, namely, Mr. Masuda Masahisa for President, and Mr. Minoura Katsudo for Vice-President.

The House of Representatives met on the 19th and Mr. Matsuda took his seat as Prehis resolve to be guided in all his decisions by a spirit of fairness only, but he asked the forbearance of the House as he could not claim any accurate acquaintance with the rules, and might possibly commit errors.

Mr. Minoura also expressed his thanks for the honour paid to him in electing him to the Vice-Presidency.

The oldest member, Mr. Iwamoto Sei-noshin, then briefly congratulated the two nominees, and the House, having organized its sections, rose.

Yesterday the official opening of the Diet took place. His Majesty left the Palace at 10.30 a.m.., Prince Iwakura acting as Chief Chamberlain, and the Sovereign's cortege consisting of Viscount Tanaka, Baron Hanabusa, Baron Okazaki, Baron Sannomiya, and Count Toda. At the House of Peers the Prince Imperial was waiting, and after a short rest the Emperor and the Prince A similar resolution awaits discussion in proceeded to the Chamber where His Ma- the Lower House. It has been introjesty read the following speech :-

We hereby open the Imperial Diet and inform Ozaki, and it bears the signatures of 243 members of the House of Peers and of Representation members. ntatives that

It gives us profound satisfaction that Our relations with the Treaty Powers are steadily growing in cordiality and good understanding.

Prompted by a desire to maintain permanent peace in the Eastern Orient, Our Government, by Our command, entered into negotiations with Russia, but We argust that which the first professions are the professional professio

Speech.

It is the steadfast aim of the Empire to preserve peace in the Far East. But Russia has shown herself deficient in any sincere respect for peace, and has violated the solemn pledges given by her to China, as well as the assurances she repeatedly addressed to the Powers. We are thoroughly satisfied that Your Majesty has declared war against Russia. The Empire's expeditionary forces are winning success in battle after battle, and are operating with loyally and valour. That is due to the virtues of Your Illustrious Majesty's servants, will respectfully endeavour to discharge our legislative duties in conformity with Your Majesty's instructions."

This reply was read to the cunistances. House on Monday forenoon and approved by it.

The Imperial Navy, braving innumerable difficulties and going out to meet cold and hardship, is valiantly and zealously winning great victories, and we believe that the time is near when it will secure the power of the sea for this empire. Its loyalty, courage and spirit invite the utmost admiration. We, members of the House of Peers, applaud the achievements of the Imperial Navy and desire to exalt its glory.

Before rising, the House, on the motion of desire to answer them when the Committees met.

Marquis Kuroda, passed a resolution warmly

When the House was about to proceed to the lauding the conduct of the Navy. resolution ran thus :-

Our intrepid and dauntless Navy is winning victories wherever it turns and has carried terror our enemies. By brilliant process it has quickly swept the foe from the sea and has wonthe profound admiration of the nation. We members of the House of Representatives hereby proclaim our sincere

duced by Dr. Hatoyama, Mr. Hara and Mr. ed as highly prejudicial to the country's interests,

THE HOUSE OF REPRESENTATIVES.

The House met at 1.10 p.m. on the 23rd instant. The Prime Minister spoke as follows:

cardiality and good understanding.

Prompted by a desire to maintain permanent peace in the Eastern Orient, Our Government, by Our command, entered into negotiations with Russia, but We tegret that, owing to a want of sincerty on the part of Russia in her peaceful professions, We have been compelled to appeal to arns. That step having been taken, there can be no pause until the object of the war is achieved. Our forces in the presence of hardship and suffering, are displaying loyalty and valour and we trust that all the people of Our Empire will cooperate in perfect unity to enhance the country's glory.

We have directed Our Ministers to submit certain tragency ordinances and drafts of law having reference to the situation, and we look to you to compty with Our purpose by bringing to your deliberations a spirit of harmony and conciliation.

The House of Representatives has adopted a course which will effectually avert any danger of a repetition of such course as that made by Mr. Kono Hironaka last session, when he so greatly abused his position of President by introducing a reply of his own composition to the Speech from the Throne Mr. Kono himself has now received a tolerably plain intimation of the House's sentiment towards him, since in the balloting for president he obtained no votes except those of his own immediate followers, 22 disgruntled members. What the House has done is to change its procedure, so that whereas formerly the reply to the Speech was composed by the Chief Secretary and the President and merely read to the House, it has now to be scrutinized by a special committee of 9 elected for the purpose. Thus prepared the reply took this form:

We, Your Majesty's Servants of the House of Representatives with all humility tender our thanks for Your Majesty's Servants of the House of Representatives with all humility tender our thanks for Your Majesty's Condescension in opening the province these matters fail while and careful the service of the cabinet in devising and carrying out the province have GENTLEMEN,-I deem it a great bonour to share with the Imperial will.

His Excellency Baron Komura then ascended the rostrum and explained in detail the progress of the negotiations with Russia, which had unforfunately ended in a rupture. We hope to give a full translation of the Minister's speech in a future issue. Its gist may be gathered from the documents submitted by His Excellency to the House and re-produced elsewhere in our columns.

H. E. Baron Sone, Minister of State for Finance, spoke briefly. He said that the House was asked to consider financial projects necessitated by the The reply made by the Peers to the Speech from the Throne is almost identical with the reply of the Representatives. They repeat the formula that Russia showed lack would merely say that he left the matter of any sincere respect for peace, and they declare that war was inevitable in the circumstances. This reply was read to the would be repeated to the would be required in the circumstances. This reply was read to the would be required in the circumstances. This reply was read to the would be required in the circumstances. This reply was read to the would be required in the Circumstances. would be given in full detail by the Ministers and would be given in full detail by the Ministers and Government Delegates in the Committee rooms, and he earnestly trusted that the House would give its consent. It was as regrettable as it was unavoidable that a situation should have arisen demanding such heavy sacrifices from the people, and he begged the House to be assured that no effort would be spared by the Government to make the burden as light as possible.

One or two questions were asked by the House and the Premier and Baron Sone signified their

Order of the Day, Mr. Ogawa moved that the order be changed for the purpose of taking suitable steps in the case of member suspected of being a Russian spy,

(We may explain that the member is Mr. Akiyama, proprietor of the Niroku Shimbun. The editor and publisher of that journal was lately sentenced by a tribunal of first instance to four months' minor imprisoment and the newspaper was ordered by the Court to be suppressed, in consequence of a leading article which was regard-

An appeal has been taken. During the trial, the public procurator openly charged the journal with acting in Russian interests, and it has come to be felt that the proprietor, Mr. Akiyama, must be required to clear his reputation).

明治廿五年三月廿日第三種藍便物觀可

Mr. Ogawa said that he sincerely regretted to bring forward such a motion, but that the evidence offering was too strong to be dismissed without careful consideration, and while he did not venture to make any explicit accusation, he felt that the House must inquire into the matter, not only on its own account but also on account of Mr. Akiyama.

A Committee of 18 was appointed to examine into the matter.

The House then handed 22 Government bills to special committees and rose at 2.45 p.m.

NOTES ON CURRENT EVENTS.

An interesting interlude in the War drama is furnished by the arrival of Mr. F. D. Cheshire and Mr. J. W. Davidson for the purpose of assuming the duties of Consul at Mukden and Antung respectively. Their instructions, we believe, are to proceed to Shanghai in the first place, and should no convenient means of travel be available from that place, they will go on to Chefoo and be sent to their destinations in gun-boats, or, at old; but before he was eight he was creating any rate, as far on the way as a gun-boat can take them. Mr. Davidson will reach his destination first and, unless all accounts be incorrect, he will find the Russians fortifying Antung which they regard as part of their scheme for defending the passage of the Yalu. They will not object, it may be presumed, to the presence of a United States Consul. Indeed they can not object without involving themselves in a troublesome complication. But if, as is not improbable, they have delared a state of siege at Antung, their commanding officer will be entitled to exercise discretion of a very far-reaching character. As for Mr. Cheshire, his way to Mukden will probably be viâ Taku and Newchwang. Both officials will be privileged to make very interesting observations.

Japanese securities have taken an upward bound on the London market. The four-per-cents are now quoted at £65.10s., showing a rise of £3.

The Emperor is expected to leave Tokyo on the 31st instant, so as to worship at the Ise Shrines on the 3rd proximo, which is the anniversary of Jimmu Tenno's death. His Majesty will then proceed to take up his headquarters either at Kyoto or Osaka.

The Goshiu Maru, ran on a rock Yanazu Strait at 6 a.m. on the 19th. All her crew were saved, but her cargo of 3,000 bags of rice was lost. She was a small steamer of 235 tons, the property of the Osaka Teikoku Kabushiki Shosen Kaisha.

Lieut. Loftus C. O. Mansergh, who was in command of the submarine that sank with all on board off the Nab, was appointed naval cadet in 1886 and lieutenant in 1895. He was, with many other officers, attached to the Thames cruiser for duty on submarines, having been gazetted to that service in January, 1903. Sub.-Lieutenant John Preston Churchill was also among the junior officers of the *Thames* having been appointed on Dec. 23rdlast for an additional six months' course of instruction in submarines.

what Mrs. James Walter told the Yoko- but these legacies and all other legacies hama Literary Society a little while ago, bequeathed by him are to be for the benefit from personal experience as a traveller on her, she is beautifully fitted for passenger expended for building, furnishing, or decorataccommodation. Her value is said to 1,200,000 yen at ruling rates.

We learn from a statement of accounts which has been circulated that the net profits in connection with the Cinematograph Entertainment at the Public Hall on March 15th, in aid of the Red Cross Society of Japan, amounted to yen 375.94 which sum has been handed over to the officials of the

That the days of "infant prodigies" in the world of music are not over is proved by the extraordinary skill with which Max Danewski, the eight-year-old Polish musician. conducted the municipal orchestra at Bournemouth last February. It is just sixty years since Londoners were reading the announcement: "The celebrated Hungarian boy, Master Joachim, will make his first ap-pearance before an English public, and perform grand variations for the violin on me theme from Rossini's 'Otello.'" At this time "Master" Joachim was thirteen years a sensation in Europe by the magic of his violin-playing. Madame Normann Neruda (Lady Halle) was little over six when she made her first bow to the public, and appeared in London at one of the Philharmonic Concerts when she was barely eight. But no child has ever rivalled the precocity of Mozart, who could play cleverly on the harpsichord at three; delighted the Emperor Francis I. of Austria with his rendering of a and, as a child of seven, Samuel Wesley heard the band of a regiment of Guards play a spirited march of his own composition.

A QUARTER OF A MILLION FOR LONDON HOSPITALS.

Mr. Edmond Dresden, of 36, Curzonstreet, Mayfair, London, who died at Wiesbaden on December 17 last, has left estate of the gross value of £339,500 12s. Id. and of the net value of £321,682 17s. Id. and probate of his will with two codicils, the last made September 29, 1903, has been granted. The testator bequeathed all his pictures and portraits to the Children's Hospital at Great Ormond-street, to be hung in the wards, he bequeathed his laces, his collections of Oriental silver ornaments and ivory carvings, &c., to the South Kensington Museum, lings, &c., to the South Kensington Museum. He bequeathed £25,000 to the Children's Hospital at Great Ormond-street, for the maintenance in perpetuity, of beds to be called the "Dresden Cots," which are to be contained—if possible—in one ward, such ward to be called the "Dresden Ward," and he bequeathed [17,000 or if the contained or if the con he bequeathed £5,000, or if the executors should think necessary, £6,000, to the National Lifeboat Institution for the building and maintenance of a lifeboat of the latest and most approved pattern, such boat to be called the "Edward Z. Dresden," in memory of the testator's late father. He urse of instruction in submarines.

The S.S. Manchuria, declared a prize of Hospital, St. Mary's Hospital, Paddington.

ing. After other legacies he left the residue of his property as to one-fifth each for the said Middlesex Hospital, St. Mary's Hospital, the Brompton Hospital for Consumption, the Royal Free Hospital, and Queen Charlotte's Lying-In Hospital, but on condition that such legacy is in each case to be held in trust to create a fund to be called the "Dresden Assistance Fund," and the income thereof is to be applied for the benefit of needy and deserving in-patients of the hospital on their being discharged. The testator left his share of the reversionary interest in his sisters' settlement in equal shares to the Middlesex Hospital, the London Hospital, and the Cancer Hospital at Brompton, for the purpose of providing beds to be called the "Dresden Beds," and for the benefit of the patients, but in no case to be applied for the purpose of building or furnishing. The amount available for Mr. Dresden's bequests for hospitals seems likely to exceed £250,000. The testator directed that his tombstone should bear the following inscription: "Here lie the remains of Edmond Dresden, who believed in no religion but that of being charitable to his fellow-man and woman both in word and

POPULAR CONCERT.

Friday was one of those raw, unpleasant days, with snow falling all through the morning, and a shrill breeze soughing and biting all through difficult concerto at six; and at eight difficult concerto at six; and at eight was playing his own symphonies before King George III. At seven years Schubert was able to teach his own master, Michael Halzer; Vieuxtemps began to scrape a baby fiddle at two, and at eight was assisting his master in a concert tour through Belgium; and, as a child of seven. Samuel Wesley some items of the programme to that advertised. expected. The concert was a little different in some items of the programme to that advertised during the past week, owing to several disappointments, due to colds and ill-health, but it nevertheless was of very high merit and many of the numbers were warmly re-demanded. Miss Lloyd Thomas received a hearty welcome back to the Yokohama concert platform, her contributions proving most delightful. We append the full programme :-

> r. Piano Solo, " Kreisleriana" Nos. 6 and 7 R. Schumann.

war, she having been under repair at Naga-saki when hostilities broke out, is a vessel of 2,936 ton gross (1,627 net), and from Queen Charlotte's Lying-In Hospital, also missing. The police are searching for him.

A STRANGE BLUNDER.

In the Kobe Chronicle of the 13th instant there appears a leading article which calls for comment, the subject discussed being of much importance and the extraordinary mis-statements made by the Kobe journal, with all the assurance of absolute conviction, being of a nature to engender mischievous errors. We quote the article at some length with its heading,

THE PRISONERS OF SASEHO.

The PRISONERS OF SASEHO.

It will have come as a surprise to most people to learn that the passengers who were on the Russian merchant steamers taken by Japan at the outset of the war have during all this time been detained on board the vessels at Saseho, and have only just been released. Those vessels were seized between the rith and roth of February, and the crews and passengers were released apparently on the 10th March, so that they have been detained for a whole month as prisoners. Now while there may be some excuse for a beligerent. have been detained for a whole month as prisoners. Now while there may be some excuse for a belligerent detaining the crews of merchant steamers seized on a charge of carrying contraband of war, it seems to us that there is no particle of justification for the detention of passengers, some of whom were women and children. Our vernacular contemporaries have been commenting on the magnanimity shown by the Japanese in the release of the Norwegian steamer Hermes. We shall come to that case presently. Meanwhile we should like to ask our Japanese contemporaries how they regard this detention of men. Meanwhile we should like to ask our Japanese con-temporaries how they regard this detention of men, women, and children whose sole offence was that they were travelling in a Russian vessel, and had taken their passage before either war broke out or the rupture of diplomatic relations had occurred. * * * Whether the two countries were or were not at war makes really no difference to the case. It is not an offence for a person to take passage in the mercantile steamer of a belligerent nation even if that steamer should have contraband of war on board, and we deny that the Japanese authorities had any justification in international law for detaining these passengers who should have been liberated at the earliest possible moment after the vessel had been the earliest possible moment after the vessel had been seized. It is absurd to suppose that it took four, weeks to distinguish between passengers and crew, or to complete an investigation into the responsibility of the missionaries or the women and children on board regarding the fact that these Russian vessels carried contraband of war. Such action is not only far from magnanimous, but it falls below the most ordinary standard of justice. * * * It is perfectly far from magnanimous, but it falls below the most ordinary standard of justice. * * * * It is perfectly clear that even if the vessels were legally seized it was the duty of the Japanese authorities, in accordance with the principle of international law that as little injury should be done to non-combarants as possible, to release the passengers on board, whether men, women, or children, at the earliest possible moment. * * * We understand that during the whole time these people were detained they were prohibited from sending or receiving communications—a fact which, if true, must have made the detention —a fact which, if true, must have made the detention all the more trying, as it, was impossible for them to assure their friends or relatives that they were safe, while from a business point of view such a prohibi-tion was calculated to do most serious injury to private interests.

* * * We had hoped that Japan would set an example to the other Powers and advance those precedents of international law which go to minimise the injury which war inflicts upon individuals who are non-combatants, or the damage done to neutrals. It is therefore regrettable to find that instead of pross there is a retrogression to the arbitrary methods of bygone days.

It will be observed that the chief accusa tion preferred against the Japanese authorities by the Kobe Chronicle relates to the passengers of the captured ships. These passengers were held, it is alleged, from some time between the 6th and the 10th of crew of the Hermes were confined to the February until the 10th of March; they are vessel." What else could have been done declared to "have been detained a whole month as prisoners;" and the Japanese are seriously claim for itself the silliness of imdenounced as having violated international agining that foreigners should be allowed to law in thus detaining them; as having land freely and enjoy full liberty of motion at neglected the duty plainly imposed by that a belligerent Power's naval station where law and as having "retrograded to the martial law is in force? Even the men arbitrary methods of bygone days."

that the whole of this sweeping charge national usage than the Kobe Chronicle

such detention having taken place, the fact informed, applied for permission to go ashore is that the eighty-three passengers travelling during the time of the vessel's detention. in the captured ships were brought to Nagasaki by the S.S. Nagato Maru on the 9th find for the Kobe journal's singular halluciof February, under the orders of the Saseho nation is that some women and children Port Admiralty, and were then and there did actually remain on board the captured liberated. On the very day that the seizures vessels until the end, and it may have been were made, or at latest a day subsequently, ignorantly supposed by outsiders that they the passengers were all set free. A few of were under detention. But in fact they them preferred to remain for a time on board were the families or servants of members of the ships and were allowed to do so, but the crews, and to stay on board so long as that was solely their own option. Thus the latter did was their own wish. the Kobe Chronicle's allegation that it "took four weeks to distinguish between passengers and crew," and all its arguments about the duties prescribed by international law the unctuous pretence of solicitude for and the harmlessness of taking passage in Japan's reputation which the Kobe Chronicle the mercantile steamer of a belligerent nation, are founded on false information. Our contemporary, more suo, professes to have been hopeful of Japan setting an example to other nations and pretends to regret that she has shown herself retrogressive. There is some difficulty in reconciling these professions of goodwill with hasty credence of injurious and unverified testimony, and with indecent alacrity to make it the text of an elaborate and sweeping libel.

The Kobe Chronicle further writes :-- " We understand that during the whole time these people were detained, they were prohibited from sending or receiving communications." In the term "these people" our contemporary includes "passengers and crews," but inasmuch as the passengers were not detained at all, the allegation becomes imaginary in their case. As to the crews, the Kobe Chronicle is guilty of a second misstatement in this instance. We have ascertained by inquiry at the Naval Department that the crews were by no means prohibited from sending or receiving comor receive just as many communications as they pleased, subject of course to the ordinary rule of censorship invariably enforced under such circumstances. Here again the Kobe Chronicle's giddy talk about it being "impossible for them to assure their friends or relatives that they were safe," and about "such a prohibition being calculated to do most serious injury to private interests from a business point of view," must be characterized as pure slander.

Another statement made by the Kobe Chronicle shows either singular ignorance or a blind desire to seize any pretext for adverse criticism. It is that during four weeks' detention at Sasebo, "the captain and with them? Does the Kobe Chronicle serving before the mast on the Norwegian One readers will be surprised to learn steamer had a clearer conception of inter-

is based upon a falsehood. So far from any seems to have, for not one of them, we are

The only semblance of palliation we can

It would be superfluous to comment on the character of this slander, aggravated as it is by the offensive heading "The Prisoners of Saseho," and still further aggravated by parades in the forefront of its accusations.

THE BOOKSHELF.

China's Business Methods and Policy, by T. R. JERNINGHAM; Shanghai, Kelly and Walsh, Ltd.

MR. JERNINGHAM has spent many years in Shanghai, first as Consul-General of the U.S.A., and then as an attorney-at-law, in which he has had largely to do with commercial questions, and he therefore approaches his task with peculiar qualifications. His book runs to 407 pages, and in the course of some 23 chapters he deals with such diverse subjects as the Administrative System, Land Tenure, Sources of Revenue, Law Courts, Money, Banks, Guilds, Imperial Household, Family Law Commercial Trend, Interior Trade Routes, Educational System, Extraterrioriality, Strategical Positions, Consuls and a Consular System, Missionaries, Pacific Ocean—the arena, Western nations in China, Policy, The Emperor—powers and restraints, Other Methods, Shanghai, and an Incident of the China-Japan War. Jerningham's book consists of a series of detached papers, rather than of a connected "prohibited from sending or receiving com-munications." They were allowed to send his different subjects seperately and as one desires, without destroying the effect or the continuity of his arguments. His matter, though not novel, is very interesting, and very well written. He has drawn on many authorities—a list of their names and writings printed at the beginning of the volume, requiring a whole page to itself. They include most of the men who have made China their study during the past hundred years. Mr. Jerningham's historical retrospect of the treaty-port of Shanghai makes pleasant reading and recalls to memory many of the stirring scenes which the Model Settlement has passed through in its brief span of sixty years. Needless to say, like all who have sojourned within her borders, he is an enthusiast regarding Shanghai, and towards the close declares that justification is to be found for "the Model Settlement's claim to be considered, commercially, the Empress of the Far East." One or two corrections might be made in a second edition, Mr. Jerningham spelling Shimonoseki in a way we have never seen before; while Koxinaga is also unrecognisable. We thank Mr. Jerningham for his book, and more particularly for having brought within its covers such a large amount of useful information which before he sat down to write, was scattered over a vast area of bookland, and hidden away in many a well-nigh inaccessible

A Sketch of Chinese History, by the Rev. F. L. HAWKS POTT, D.D., Shanghai, Messrs. Kelly and Walsh. Ltd.

DR. HAWKS POTT is the President of St. John's College, Shanghai, and the author of "The Outbreak in China." His present volume, he tells us, is written to meet a practical need. "Of large histories and of monographs treating fully of some one period, there is no lack, but a concise outline of Chinese history accenting the turning points in the life of the nation had yet to be produced." Mr. Hawks Pott has carried out his plan excellently well and at the same time has been able to clothe the bare facts of history with a literary mantle attractive to the eye and ear. His little book, we feel sure, will serve a wider purpose than he anticipates. It will be more than the textbook he modestly sets it down to be-it will be for many a pleasant inducement to go more deeply into the absorbingly interesting history of the world's most ancient and in many respects, peculiar race. We note that in referring to the great warrior and statesman famous in Japanese annals as the Taikô, our author spells his name Fideyoshi, instead of the more generally accepted form we are used to. Incidentally we might also remark that Hideyoshl did not accompany the Japanese army which he sent to Korea as the writer seems to infer. Mr. Pott also omits all reference to St. Francis Xavier's visit to Japan when referring to that remarkable missionary's travels in this quarter of the globe. We must also emphaticter of the globe. ally dissent from his statement on page 186, wherein he says that the fourth reason for the Japan-China war of 1894-95 was earnest desire on the part of the Japanese to divert attention from domestic affairs on account of a civil revolution threatened by the military classes. She was anxions to divert this restless military energy into another channel, and so took the opportunity of allowing it to expend itself upon China." These things Mr. Pott can correct in a second edition, for on the whole he has written the story of China's relations with the outside world with a commendable absence of bias. The maps which accompany the text are excellent.

A Guide to Feking, by Mrs. Archibald LITTLE; Tientsin, the Tientsin Press.

MRS. ARCHIBALD LITTLE, whose contributions to literature about China have been many and interesting, is the author of a Guide to Peking which should prove of the greatest value to foreigners generally. only does she describe the capital, the Forbidden City, the various temples and other public buildings, but she also takes the reader away to the Ming Tombs, the Summer Palace, the Great Wall, the Western Tombs, Peitaiho, Ching-wantao, and Shanhaikwan. There is a good deal of additional information with regard to official and military departments, and there are two good maps one of Peking and the other of the Capital and surrounding country. The little work is published by the Tientsin Press and is a very creditable production.

Japan: Aspects and Destinies, by W. PETRIE Watson: London, Grant Richards.

MR. W. PETRIE WATSON has written a clever book, an interesting book, a thoughtful book; a book, in fact, well worth the writing, and one which old residents of Japan will enjoy reading. His publisher announces it in these terms :-

This book is a study of Japan of the moment-of

its social, industrial, and political conditions-from its social, industrial, and political conditions—from what is, perhaps, a rather novel standpoint. It gives the views of leading Japanese personages on some of the large questions—such as that of the "Yellow Peril"—which the crisis in the Far East has recently brought into peculiar prominence. The future of Japan is discussed in certain aspects which possibly have not had the attention they deserve in Europe. The writer was for several years, and up to a recent date, in a journalistic position in Japan, which afforded abundant opportunities for the study of presentially conditions there.

Mr. Watson, as many of our readers are aware, was for some years on the staff of the Kobe Herald. He has studied his subject, therefore, at first hand, and writes himself down as a frank admirer of the land and its people, though fully aware of the many shortcomings, national and otherwise, which have caused it to fall short in achieving all the high ideals which the governing oligarchy we use Mr. Watson's phrasethem in the early days of the Restoration. And he gives it as his deliberate opinion that Japan as a nation comes by its salvation solely through its "governing men," or, to quote Mr. Watson's words in the chapter headed "A Fantasy of Mystery,"

You find on examination that the country is saved from the penalties of this chaos by its governing men. from the penalties of this chaos by its governing men. Under them are forty-four and a half millions of people whose minds are not made up between the old gods and the new; who, in their perplexity, worship under both hierarchies or under none; who molify their dryads with peace-offerings bought with the wages of service given to alien delies. The commercial class, for one instance, does not yet know whether to succeed with Oriental cunning or with the European strong hand and straight dealing. But the governing men know what they must do. They know that with the nation's affairs it must be the European strong hand, as far as the country is able, and that with the nation's affairs it must be the European strong hand, as far as the country is able, and European straight dealing whether the country is able or whether it can't—this or nothing. Therefore the strong hand and the straight dealing it is; as witness a great navy and formidable army, and the Alliance with England which was born in straight dealing and must prosper in it. This keeps the country right with the world—its governing men know what has to be done. They ride upon the chaos. The world see them; not the Japanese people. As much as is seen of this neonle is still a! people. As much as is seen of this people is still a

The above extract will give a fair idea of Mr. Watson's style. He runs to epigrams occasionally, though never in the wearisome style which makes Mr. Percival Lowell's books a head-aching business, even to the fairly well-balanced and alert mind. With a keen eye to the thousand and one paradoxes to be met with in this land of paradox, he brings before our mind very vividly the many strange contrasts which meet one in the course of the day's work in this land. He had an opportunity of seeing the modern High School Girl as she is to be seen in Tokyo, on an Exhibition Day, and he is struck with the anomaly which she presents:

She wore, as she nearly always does now—even from the time when she is only an elementary school-gir!—a maroon skirt, coming to a little below the knee, and a blouse-bodice of white, or mave, or dove-grey, or any not too garish tint; also laced boots and stockings ** ** On the whole she is, as to her dress, a cross, a hybrid; not ungraceful, not at all the last word on female attire. As to her as to her dress, a cross, a hybrid; not ungraceful, not at all the last word on female attire. As to her face, figure, deportment, manner, what are they, what do they express? Something extraordinary? She is I tall and big for her age; her cheeks are full and plump, and the hybrid skirt permits a glance at well-rounded calves. She is, I am persuaded, as tall as our High School girl, but plumper. This alone is remarkable, extraordinary; for the full-grown Japanese race, especially its women-folk, is smaller by half a head than we are. Then her complexion, oftener than not, is clear almost to white; pigmented, as often as not, with a delicate, finely-graded peach-bloom. This too is remarkable, extraordinary; for the grown Japanese man is yellow or copper brown; the Japanese woman yellow like parchment. * * * * But more; this High School girl is lithe, active, you would say, seeing her on the streets of Tokyo, almost athletic; athletic without qualification, you would say, on Exhibition Day at the Woman's University in Tokyo. She talks with animation; almost

she chatters; and in these University grounds she runs, and bobs, and darts. It is remarkable, extraordinary; for the Japanese wife is a study in passivity, almost a study in still life, she speaks when spoken to, not else. Clearly there is a mystery somewhere. This Japanese High School girl, tall, plump, romping, gith, coquettish, eupeptie, behold her and, remembering the Japanese wife, agree with me that she is something extraordinary—she or the wife. she or the wife.

Though Mr. Watson in his preface declares that he "does not understand Japan," he, by his work, shows that he took every opportunity to fathom the mystery of the land, and in the Chapter headed, "The Pyschic Link," he comes very near to the heart of the secret—the national cult of ancestor worship. Indeed, he asks the question, is this not the golden, necessary bridge between Japan's Past and Japan's Future? We would that we had space for quotation from this chapter, but the exigencies of the printer's circumscribed page drive us on. Mr. Watson expresses delight, as an Englishman, at the conclusion of the Anglo-Japanese Alliance, and finds much to say in support of it. We have only room for one more quotation from his pages. It comes from the chapter headed "The Climax and its Parable," and he is writing of the Anglo-Japanese alliance.

I like to think also that the Alliance is sponsor to a great ethical experiment. Why not? Europe is near two thousand years old in the use of governments which at least profess to find inspiration, direction, nay, even authority, in the canons of a revealed theology. Some say Europe is a success by reason of it reception, admission, profession of this revealed theology. Some say not. There is, at least, an element of doubt in the matter and, anyhow, our systems are often a hideous mockery of the theology we accept as revealed. Here, however, is a state that professes only reason, a state that glories in its are often a niceois mockery of the theology we accept as revealed. Here, however, is a stake that professes only reason, a state that glories in its stoic acceptance of the dread verdicts of unaided, uninspired Reason. May we not then keep a space clear, so to speak, for this great ethicopolitical experiment? There being a certain doubt —proven by many unlovely hypocrises in the very midst of our systems—of the final sufficiency, the complete authenticity, of our real or quasi-theological canons, shall we not give room, opportunity, and time for the Japanesse experiment with Reason, if only to see what comes of it, what its issue may be? Let me offer the most sordid of pleas: let us take a little trouble merely for the satisfaction of our curiosity. Let us note whether this experiment, which ignores theologies, resolves any of the hard problems which theologies have failed to illumine for us. It may be that some critical principle of life, of experience, of death, waits to be discovered by some such experiment as this.

In taking leave of Mr. Watson's book, we would point out, for his benefit should a second edition be called for, that here and there he displays a tendency to repeat a phrase too often, not for the sake of emphasis, but through pure forgetfulness we imagine. Thus three times within the limits of as many pages he writes, "Asakusa, Tokyo's Battersea Park"; this reiteration leads only to needless irritation. Again, he could leave out with advantage the rather commonplace illustrations which find space within his covers. Surely he could have chosen something more worthy of his letter-press? And in conclusion we sincerely hope his publisher

of Naval Architects and Marine Engineers in alien race, should find his theories capable of New York on Nov. 19th and 20, 1903, has practical application in the Constitution they had reached us. It is, as most of our readers are framed. On that occasion I handed Mr. Spencer

MR. HERBERT SPENCER ON THE JAPANESE CONSTITUTION.

To the March number of the Taivo Baron Kaneko Kentaro contributes an interesting article entitled, "The late Mr. Herbert Spencer and the Japanese Constitution," the substance of which is given below:—As a teacher of philosophy Mr. Herbert Spencer has many admirers and not a few followers in this country.* But the connection of this great philosopher with our Japanese Constitution is a subject of which the world knows nothing and which I myself was not at knows nothing and which I myself was not at which he was a member and of which he life. First let me say a few words concerning my life. First let me say a few words concerning my own connection with our Constitution. About the his opinion of our Constitution. But he made own connection with our Constitution. About the pyear 1875, when I was studying in America, I was greatly attracted by Spencer's works. His writings on Sociology especially interested me,† and subsequently when I was studying Law in Harvard University I was greatly struck by the connection of sociology with all the deeper questions of law, and I perceived that the development of law cannot be properly understood without a study of the social conditions which own connection with our Constitution. About the without a study of the social conditions which bring certain laws into existence. I observed that the improvement of Law invariably was brought about by the improved state of the social relations of various people. When subsequent to that I finished my course, returned to Japan, became connected with various Government offices, and set about preparing new Laws for this country,
I realized the importance of basing all changes
made on actually existing social conditions.
After the promulgation of the Constitution in 1889 I was ordered by Marquis Itō to go abroad to collect information likely to be useful to us in commencing parliamentary government. In August of that year I went to Harvard and called on my old friend Professor John Fiske, the historian and philosopher. Professor Fiske has been called the American Spencer, so ardent an admirer and follower was he of the great English philosopher. I begged him to supply me with a letter of intro-duction to Mr. Spencer. At first he refused on the ground that Mr. Spencer objected to see many the ground that Mr. Spencer objected to see many people and that former letters of introduction had proved to be of no use. But he was eventually prevailed on to furnish me with the letter. I went prevailed on to furnish me with the letter. I went presented my letter, and Mr. Spencer at once made an appointment with me. When I told him how greatly we had been assisted in framing our Constitution by his works on Social Evolution, he replied that he was well aware that in various European countries legislation had been materially induenced by the facts which he had collected and arranged bearing on social development, but it was no less a surprise than a source of pleasure to him to find that a nation situated away in the distant East, consisting of people belonging to an distant East, consisting of people belonging to an

* This is largely owing to the fact that the late Dr. Toyama, with great earnestness and ability, expounded Spencer's system of philosophy at the Tökyö Imperial University some years ago. Many of the students who listened to those lectures devoted much time to further study of Spencer's teaching aftear leaving the University.

† The reference is evidently to Spencer's work entire the students of Spencer's work entire the students.

† The reference is evidently to Spencer's work entitled, "The Study of Sociology," one of the International Scientific Series of books issued in 1873, and to Vol. I. of the "Principles of Sociology," which appeared in 1874. The first-named book is one of the most popular of Mr. Spencer's works. This volume, his treatises on Education, and the Data of Ethics, and his Essays on general subjects are free from many of the technicalities of his larger works and consequently have commanded a wider circulation among general readers. The third and last volume of "Principles of Sociology" did not appear till the autumn of 1896. The delay was caused by failure of health.

reached us. It is, as most of our readers are framed. On that occasion I handed Mr. Spencer aware, descriptive of the construction of the two an English copy of our Constitution and great ships which Mr. Hansoom has built for the Marquis Ito's Commentary thereon, and asked him Great Northern Railway Co. These gigantic to give me his opinion on the subject. He provessels, the Minnesota and Dakota, are 630 feet in length, 73½ feet in beam and have a total said that he had serious doubts whether satisfactargo capacity of 30,000 tons. tory constitutions could be framed in the way we proposed to compile ours. They had hitherto grown out of a variety of pressing circumstances and not infrequently been purchased by blood-shed. Hence their stability. Was not constitutional Government in Japan quite foreign to the essential nature of the country's existing institu-tions, etc? Baron Kaneko then goes on to relate how he explained minutely to Spencer the change that had come over the Japanese nation and how the minds of the people and the feelings of His Majesty the Emperor even had been prepared for the radical reform proposed. Spencer expressed himself satisfied on this point, continues Baron Kaneko, and subsequently on March 3rd, in one of the rooms of the Athenæum Club, of agreement with the body politic of history, enormous difficulty will be encountered in carrying this Constitution and these Laws into practice, eventually making the realization of the principal objects of Constitutional Government impossible. In reference to this, some little time ago I took occasion to speak to your Minister, Mr. Mori Arinori. In framing the Japanese Constitution the guiding principle should be conservatism combined with gradual progress. Your constitution must be based on history and national customs. Western Constitutions may serve as guides, but what material is taken from them must be made to harmonize with your traditional system of government. I trust there will be no attempt to sweep away the old system and replace it with something quite new. For it is in politics as in botany, plants and trees that are imported into a country cannot be made to bear fruit precisely in the some way that they have done on their native soil. The Constitutions of the West have grown out of the special conditions and customs of various countries, and it would be a mistake to think that these Constitutions a mistake to think that these constitutions when translated and adopted by some foreign country could be made to work in the same way as they had done among the peoples who brought them into existence. But in examinbrought them into existence. But in examining your Constitution and Marquis Itô's Commentary thereon, I find plain proofs that the above named principles have been duly observed and therefore I highly approve of your Constitu-tion. But what I wish your Government to specially bear in mind is that the framing of a Constitution is a much easier task then putting it into operation. The drawing up of a Constitu-tion is a work that may be accomplished by a few industrious scholars, but when it goes into operation a whole nation is concerned and the task of making it work smoothly is seen to be gigantic. Compared with those encountered by the mere compiler, the difficulties met with by the administrators of a new set of laws are enormous. Take as an illustration of what I mean, the case of America. In that country according to its Constitution all subjects are on an equality; high and low have the same rights. In the free expression of opinion and in the participation in the government of the country all citizens occupy the same position. So says the Constitution. But as a matter of fact it is not so. Some decades after the framing of the Constitution, by

† The importance of the subject and the great weight naturally attached to Mr. Spencer's opinion seems to call for a literal translation of his words, as expressed in Japanese by Baron Kaneko. This we have given in the text.

degrees it became apparent that Constitutional Government had changed into Party Government, And the parties to whom the carrying out of the Constitution was entrusted consisted of men who were working in their own exclusive interests. The Constitution was perverted by these adminis-trators, and upright citizens began to perceive that the equality of rights which the written Constitu-tion guaranteed was a principle which in practice was violated in a most flagrant manner.

" According to my political creed, it should be to entrust the control of various necessary enter-prises to private individuals or bodies as soon as possible. But though a state of non-interference on the part of the authorities must ever be regardon the part of the authorities must ever be regarded as the ultimate aim of all government, society is not at present sufficiently advanced to allow of this principle being put into immediate operation. The theory that Government interference is unnecessary implies a state of perfection that does not actually exist in the world to-day, but it is a state to which we must look forward and for which we must strive.* The steps which must be taken in order to lessen the duties of Governtaken in order to lessen the duties of Govern-ment are the cultivation of an independent and enterprising spirit among private citizens, the creation of a state of readiness on the part of the people to discharge all their duties without Government superintendence, and the bringing into existence of a deep regard for the rights of others. When this has been done, then and then only can the Government with safety withdraw and refrain from interference with the general business of citizens. When, though speech and action may be free, citizens can be trusted to act so as not to trample on the rights of others and not to disturb the public peace or endanger public safety, the functions of government will be narrowed to a very small compass. When this comes about the day will have dawned when the highest of all political principles will have been realized. The erection of political structures resembles the building of the Egyptian pyramids. In order to insure safety the work must proceed gradually. Chamber must be raised over chamber till the top is reached. The rapidity with which political edifices may be reared depends largely on the amount of intelligence possessed by the units of the nation for whose use the building is being prepared. It is for Japanese statesmen to consider what storey in the political pyramid they have now reached. How far has the nation advanced. To hurry the work would mean subsequent instability. To skip over necessary inter-mediate steps in the development of political institutions only involves subsequent difficulty.

"In parting from you there is just one word "In parting from you there is just one word more I wish to say, which is, that your Government will do well to make sure that the qualifications of the members of your Lower House are what they ought to be. Taking our Western Constitutions as a guide, the fundamental principle on which they rest is that expressed in the Declaration of American Independence, namely, that those who are under an obligation to pay taxes have a right to participate in government. This is one of the most fundamental and important of political principles, and it has never been violated without leading to numerous abuses. But it has been ignored in numerous instances during the past roo years. The right of legislating has been claimed by numbers of persons on other grounds than tax-paying and so we have had, for instance, in our English parliament a number of Irish members elected, who are not men of property at all, whose tax-paying capacity is extremely limited and who have little knowledge of practical affairs, and who have little knowledge of practical affairs, but who nevertheless have had granted to them the right to sit in parliament and deliver flippant, irresponsible and idle speeches. We live in a day in which Governments cannot insist too strongly on the carrying out of the principle that participation in governing shall be proportionate to the tax-paying capacity of candidates for election. This is the only way to obtain a solid and serious body of legislators. I trust that your Government will not fail to recognise this your Government will not fail to recognise this in future."

^{*} Mr. Spencer, it will be remembered, wro against over-legislation throughout most of his life.

most handsome manner by the great philosopher, who evinced the keenest interest in Japanese affairs. Mr. Spencer introduced Baron Kaneko to a number of noted people in the Athenæum Club and showered all the honours he could on this worthy representative of the Oriental pioneer of Western Civilisation.

j Since the above was in type we have come across an article in the Spectator referring to a letter addressed by Mr. Spencer to Baron Kaneko, dated Aug. 20th, 1892. This letter Mr. Spencer asks the Baron to keep secret till after his death. It would seem that the Baron understood by this that Mr. Spencer wished none of his views on Japanese affairs and institutions to be published during his lifetime. On the retirence entiplied by Mr. Spencer the affairs and institutions to be published during his life-time. On the reticence enjoined by Mr. Spencer the Speciator justly remarks: "The letter would have roused no animosity, the philosopher mistaking the character of his countrymen, who allow philosophers as they allow the cherge, to say, and even teach, a great many things in which their audience, outwardly reverential and really respectful, do not in the least helium?

THE FRENCH PLAYS.

A large and enthusiastic audience assembled on Wednesday evening to witness the production by the Societé Dramatique Française représentation of the vaudeville-comedies which had been promised to the community. As has already this object has been greatly furthered. The per-formance was under the distinguished patronage of Madame Harmand and His Excellency the Minister for France, and among the other important personages present were H. E. the British Minister and Lady MacDonald, Governor Sufu, and Mayor Umeda, and it proved a complete success. To this happy result it will doubtless be admitted on all sides that the share taken in the evening's entertainment by the Bijou Orchestra the evening's entertainment by the Bijou Orchestra greatly contributed. This excellent combination of anateurs, consisting of eleven members, and equipped entirely with string instruments, played as an overture Sousa's "King Cotton" March, the "Valse Bleue" of A Margis, and the "Anona" Two-step of Vivian Grey during the intermission; as an extra the popular "Haiwatha," with, of course, "La Marseillaise," and a capital innovation was that of playing a line or two by way of "curtain-raiser" before each of the two pieces. Of the general appreciation which the way of "curtain-raiser" before each of the two pieces. Of the general appreciation which the performance won it may be enough to say that the applause and laughter were frequent indicators of unqualified success. The ladies taking part in the piece were the recipients of many floral gifts.

Of the two pieces, both in one act, by Eugène Labiche, that were staged, it may be at once said Labiche, that were staged, it may be with that the second, in some part because of the circumstances under which Mr. G. G. Brady agreed to applicate of the success with which he acted to participate, of the success with which he acted and also of the facilities which the play offered for the exercise of the abilities of the various actors, was the more successful of the two.

"La Grammaire" with which the evening's entertainment opened deals with the troubles of a pretentious "ancient negociant" who though ab-solutely ignorant of the fundamental rules of his language has been enabled by the assistance of his daughter to achieve such a reputation for learning that he has been nominated for mayor of his own town and as member of a distinguished society, the President of which, in the belief that Roman antiquities are to be found in the other's garden, causes much laughter by the production of various fragments of household crockery to which he attaches the merit of extreme old age. The blunders that ensue furnish the most mirth-provoking situations and all ends well when the happiness of a young couple is secured. As Poitrinas, President of the Academie d'Etampes, M. M. J. Dayet was excellent, at once making a that the sigh favourable impression on an audience which had hitherto been denied the pleasure of seeing and hearing him; as Francois Caboussal, M. L. Cherfils

No answe

The reason for Mr. Spencer's objecting to the acted with much force and appreciation of the publication of his opinion on the Japanese Constitution during his lifetime is not apparent.† Caboussat, was taken by Mdlle Joubert, who gave Baron Kaneko says that he was treated in the a charming rendering; and the comparatively unimportant rôles of *Machut*, and of *Jean* were done good justice to by MM. Cl. Eymard and G. La Roche

"L'Affaire de la Rue de Lourcine" concerned itself with the doings of Lenglume, a "rentier" admirably impersonated by M. Dayet and Murphy (Mr. Brady) whom he has brought home with him in the sequel of an unduly prolonged festivity. Lengtune awaking in his own bedroom from sleep after his dissipation hears snoring under circumstances which create in his mind anxious fears as to the character of the person who has evidently accompained him home, and when later Murphy (a personage really invented for the purpose of facilitating Mr. Brady's assumption of a part and so of the movement of the plot) proves to be the sleeper whose snores in his had aroused in Lenglume's mind the liveliest apprehensions as to domestic trouble, makes his appearance, and it becomes evident that neither of them has the remotest idea of what he was doing the previous night. A declaration by *Polard* that he had seen both in the Rue de Lourcine conducting themselves with extreme violence, and the reading of a very old paper which reports a murder there and speaks of a green umbrella bearing initials which correspond with those of *Murphy*, convince the pair of repentant roisterers that they are the murderers the date of the newspaper being left unmentioned, and, moreover, their hands are begrinned, in been intimated the money netted is to be presenttheir pockets there are lumps of coal (the
ed to the funds of the Red Cross Society of
Japan, and it is highly satisfactory to know that
merchant), and in short the evidence in sight convinces them of their guilt. Their efforts to elude detection give rise to the most laughable events and in the end all is cleared up by the discovery that the murder story does not refer to the goings-on of Lengtume and Murphy. In the progress of the plot a considerable share is taken by *Norine*, the wife of *Lengtumé* (a rôle admirably undertaken by Mme. Barmont), but undoubtedly the most conspicuous characters were Lenglund and Murphy, upon the rendering of which Messrs. Dayet and Brady are respectively to be heartily congratulated. That the latter gentleman should have essayed and with such success at a few hours notice, the part that he undertook, is little short of marvellous. The characters of *Polard* and *Justin* were painstakingly filled by Messrs, G. La Roche and L. Cherfils.

H.M.S. " CENTURION."

In the House of Commons on Feb. 9th, Mr. R. Lucas asked the Secretary to the Admiralty whether H M.S. Centurion was recently commissioned with some of her guns wrongly sighted; and, if so, what steps had been taken to remedy their defects.

Mr. Pretyman: All the Centurion's guns have correct sights. Some difficulty was experienced in fitting the old pattern mountings of the 10 in. guns with duplicate sights of a new design; it is hoped to rectify this shortly. The original sights are still fitted to the guns, and are quite accurate.

Mr. Lucas: As this matter is of considerable importance, I should like to ask what prospect there is of the sights being definitely corrected within a short time?

Mr. Pretyman: I cannot say exactly how long it will take. It is a scientific question, but, if the hon, gentleman will give me notice, I will answer the question.

Mr. Gibson Bowles: Is it to be understood that this vessel is going to sea with incorrect

Mr. Pretyman: No, Sir; the original sights are correct, and are still fitted to the guns. A new pattern sight is fitted in duplicate, which is not

absolutely correct.

Mr. Gibson Bowles: Then are we to understand that the sights that are to be used are incorrect, and that the correct sights are not to be used?

No answer was returned.

DEATH OF AN OLD JAPAN RESIDENT.

The Kobe Herald learns with sincere regret that news was received by the American mail of the death in New York, last month, of Mr. W. H. Morse, who was one of the original partners in the well-known firm of tea merchants, Messrs. Smith, Baker and Co., of Kobe and Yokohama. Death was due to an attack of pneumonia. Mr. Morse succumbed at the compneumonia. Mr. Morse succumed at the com-paratively early age of sixty-four, after a short illness. The deceased gentleman, who was a native of Boston, came to Japan in 1860 and joined the firm of Walsh, Hall and Co. After several years' service with the then leading American house in this country, Mr. Morse in 1868 joined the late Mr. Colgate Baker and Mr. R. B. Smith and commenced business in the name of Smith, Baker & Co. He first came to Kobe in 1869 or 1870 and was one of the original members of the K. R. and A. C. He took a keen interest in various forms of sport and was for a time Clerk of the Course in the Race Club here. Mr. Morse last visited Japan in 1891, we believe, and has not been actively connected with business for some ten or twelve years. He leaves a widow and three children, to whom the sympathy of all old residents here and in Yoko-hama will be extended. His removal breaks one more of the few remaining links connecting the early days of foreign intercours here.

YOKOHAMA GENERAL CEMETERY.

The annual meeting of members of the Community to receive the report and accounts of the Yokohama General Cemetery Committee for the year ended Dec. 31st, 1903, was held on Thurs-day in the Board of Trade Room,

day in the Board of Trade Room,
On the motion of Mr. B. Gillett (Hon. Secretary and Treasurer), Mr. J. C. Hall, H.B.M.
Consul-General, took the chair. The others present were Messrs. Jas. Dodds, J. P. Mollison, J. de Cuers de Cogolin, A. Morey Weale, R. T.
Bell, N. F. Smith, L. J. Healing, James Walter, Fr. Retz, J. Griffin, E. Powys, H. J. Sharp, N. W. McIvor, etc.

The CHAIRMAN said he did not know whether those present had had time since they came into the room to examine the report and accounts but to make sure that they would have time he proposed to wait a few minutes while gentlemen glanced through them.

After a short wait Mr. Gillett, at the Chairman's request, read the reports and accounts as

The Yokohama General Cemetery Committee beg to place before the Foreign community of Yoko-hama the Annual Report, and Treasurer's Statement of Account for the year which ended on the 31st

December, 1903.

From the Treasurer's Statement of Account, it will be noted that the Committee have received yen 450 from the Trustees of the "Yokohama General Cemetery Trust Fund," being one year's interest at 5 per cent. on yen 9,000, which sum, was standing in the credit of the Trust fund on the 31st December 1902. It will also be further noted, that in accordance with a special Resolution passed at a meeting of the Foreign community held on 30th March 1903, the Committee have paid over to the Trustees yen 3,000 out of the accummulated Cemetery funds, thereby increasing the amount in the hands of the Trustees to yen 12,000, the interest alone on which, is to be annually paid over to the Cemetery Committee, and to be applied by them to the permanent maintenance and preservation of the present Cemetery grounds. As called for by the special Resolution above referred to, a copy of said resolution has been endorsed on the original trust deed. Beyond these observations there is nothing specially for the Committee to allode to in connection with the Accounts. The respective items will speak for themselves.

The interments during the year 1903 numbered 40, as against 49 in 1902.

7 Who were Visitors, temporarily resid-December, 1903.

12,450.00 By amount brought down from previous I year's interest, 5 per cent. on yen 9,000.
By amount received from General Cemetery
Committee, to be added to the amount
of Cemetery trust fund, 1st April, 1903. 450.00

3,000.00 December 31, 1903. By amount brought down from previous amount

E. & O. E.

Yokohama, 1st January, 1904.

I hereby certify to having seen the Hongkong and Shanghai Bank fixed deposit note for yen 12,000 mentioned in the above account, all in order.

P. E. FRED. STONE.

On the motion of Mr. Griffin seconded by Mr. A. G. M. Weale the report and accounts were adopted.

Before the meeting proceeded to the next business, Mr. Gillett begged to announce with re-gret the approaching departure of their friend Mr. James Dodds and he said this because as they were aware Mr. Dodds for many years had been a leading spirit in connection with the affairs of a leading spirit in connection with the affairs of the Cemetery. Not for one, nor two nor three-but for twenty years he had been connected with the Cemetery Committee. He (Mr. Gillett) sup-posed he knew as much as any of the Com-mittee of the value of the services that had been called on for counsel and advice and the attending of meetings, and he was always available. He asked Mr. Dodds whether they must lose him and the reply being firm they had to bow their heads to it. He asked them to listen while he read a resolution that he had framed and which ran as follows:

That this meeting desires to place on record its sincere regret felt at the approaching departure of Mr. James Dodds from Yokohama and his consequent resignation from the Committee of the Yokohama Cemetery. It would further wish to express the very high appreciation of the valuable services he has rendered to the Yokohama Community in connection with the management of the cemetery for a considerable number of years, and sincerely trust that on his retirement together with the members of his family to dear old England he may with them during many years to come continue to live in good health and happiness, reaping to the full in

every way all that he can wish for himself the fruit of his many years of labour and energy spent in Yokohama."

Messrs. J. P. Mollison and N. W. McIvor both associated themselves with the resolution as

seconders and it was at once adopted.

The Chairman said it gave him a pleasant

duty to convey this resolution passed at this public meeting to Mr. Dodds and remarked that he should be wanting in his duty if he failed to express his own hearty and sincere concurrence with the terms of the resolution. His own memory in connection with Mr. Dodds' presence in Japan extended over a quarter of a century and during all that time Mr. Dodds had occupied a prominent and honourable position in the commercial activity and the social and public life of the port. He was perfectly certain that every word of the resolution came from the hearts of Mr. Dodds' friends in Yokohama, and he could assure him that he carried the best wishes for himself and family from the many friends he had attached to himself in this land which he had made the centre of his life's activity.

The resolution was carried by acclamation.

Mr. Dodds, in acknowledging the resolution,
dwelt upon the services of Mr. Gillett and said the Committee were merely a body to consult and advise with that gentleman. He added that he felt deeply and more deeply every day the having to leave Yokohama because during his long re-sidence he had taken a great interest in all local

affairs.—(Applause).

It was decided to re-elect the previous Committee with the substitution of Mr. P. S. Bent's name for that of Mr. Dodds, his father-in-law, a compliment which, proposed by Mr. Gillett, was cordially seconded by Mr. McIvor and Mr.

Jas. Walter and heartily echoed by the Chairman.

The Chairman remarked upon the good repre-

sentation of the community at that meeting and expressed the belief that it might be taken as a compliment to Mr. Dodds; and Mr. McIvor for himself and as in some degree representing Americans, spoke of the high services rendered to Yokohama by Mr. Dodds.

A vote of thanks, on the motion of Mr. Gillett, to Mr. Hall for presiding and to the Board of Trade for giving the use of its rooms closed the ... 12,000.00 proceedings.

LITERARY GOSSIP

The title of Mr. Hall Caine's next novel is to be "The Prodigal Son." It is to appear serially in the Manchester Sunday Chronicle.

Mr. John Murray's doctors having advised him to be wise in time, and, after twenty-two years of almost incessant work, take a rest, he has left London for a six weeks' sojourn at St. Moritz.

We are to have yet another life of the Duke of Wellington. The author is Judge O'Connor Morris, and the volume will be added to the "Heroes of the Nation" series, to which will also be added shortly a volume on Constantine the Great and Julius Cæsar.

While on a visit to Teneriffe some years ago, the late Marquis of Bute heard of the existence there of an extensive collection of original MSS. relating to the Inquisition. He acquired it, and a two-volume book, giving its contents and throwing much light on the Inquisition in the Canary Islands, is now appearing through Messrs. Blackwood. The work has been prepared, under the direction of the present Marquis of Bute, by Dr. Birch, of the British Museum.

A history of the Indian Mutiny, written from original documents, is in preparation. The author is Mr. G. W. Forrest, himself the son of a Mutiny hero, Captain George Forrest, V.C. As Director of Records to the Indian Government, Mr. Forrest in 1890 began a systematic examina-tion of all the State papers bearing upon the Mutiny. The present history is based on them, with additional material from personal resources. It will be published by Messrs. Blackwood.

An effort is being made to complete the re-

building of the church of Lower Brixham, Devon, building of the church of Lower Brixnam, Devon, which was commenced thirty years ago in memory of Henry Francis Lyte, its first vicar. £2,000 is still required to complete the work, and surely there should be no difficulty in collecting this sum from those who have found consolation in "Abide with Me," which was written by Lyte or the left experience be great at Brixham. Lyte on the last evening he spent at Brixham.

Mr. G. B. Burgin has a real grievance. "Hazell's Annual" has inadvertently ranked him with the immortals in its obituary list, and Mr. Burgin can now revel in the gloomy excitement of reading the letters of condolence addressed to his "widow" on the "premature death" of "a writer of great promise." Like "Mark Twain," in kindred case, he has taken the "sympathy" in excellent part, and jests cheerfully at the anticipation of an event that all lovers of good humour must trust will be long in being realised. must trust will be long in being realised.

Commenting on the late Sir Leslie Stephen, the Times of Ceylon says:—Sir Leslie Stephen came of a learned stock and he himself was one of the most accomplished writers of the day. His share in the "Dictionary of National Biography" will always be foundly remembered. He married the in the "Dictionary of National Biography" will always be fondly remembered. He married the youngest daughter of W. M. Thackeray. As a critic the late Sir Leslie Stephen was profound and lucid, and he made his points with remarkable effect. He has latterly been publishing his literary reminiscences, which have proved delightful reading. He will be remembered, apart from his own well-balanced brain and facile pen, as the brother of the author of the Indian Penal Code, and father of the deeply mourned "J.K.S." that brilliant young genius who, like Marlow, has that brilliant young genius who, like Marlow, has been described as one of our greatest "might

Although the British Museum was not able to secure the manuscript of "Paradise Lost" which was offered for sale a few days since, the Scotsman recalls that the Department of Manuscripts acquired a year or two ago a very interesting relic of John Milton in the shape of the poet's commonplace book, most of which is in Milton's own hand, while the "Paradise Lost" manuscript is, of course in the handwriting of an amanuensis. nand, while the "Paradise Lost" manuscript is, of course, in the handwriting of an amanuensis. The commonplace book was discovered in 1874 among the papers of Sir Frederick Graham, and a photographic facsimile of it was published in

In a recent lecture on the growing distaste on the part of the many for the higher kinds of poetry, Mr. Alfred Austin complained that novels had ousted the best poetry from its proper place as the chief literary pabulum of the average man. But he is surely mistaken, thinks the *Globe*, in supposing that really classic poetry, such as the works of Milton and Shakespeare, is less read nowadays then it was in the days of supposing the same of supposing the sa works of Milton and Shakespeare, is less read nowadays than it was in the days of our ancestors. The people who do not read poetry are the people whose ancestors could not read at all. There can be no doubt that poetry is bought, at any rate, as freely as ever. It is impossible to say whether the buyers also read.

Ireland has lost her greatest scholar by the death of the Rev. George Salmon, Provost of Trinity College, Dublin. By British and Continental mathematicians he will be remembered as the author of four text-books, of which three at least have long held their place as classics. His "Conic Sections," which made its appearance in 1847, has been translated into most European 1847, has been translated into most European languages, and holds its own with ease as the best book on the geometry of curves of the second degree. The best edition, largely extended and enriched by additions, is the "Analytische Geometric der Kegelschnitte," edited by Dr. Wilhelm Fiedler, a Zürich Professor, and published in two volumes by the well-known firm of Teubner, of

ably fire proof? Are due precautions taken against fire and proper provisions made for its rapid extinction if it should occur?

With the name of Mr. Charles H. Clarke, the publisher, whose death has occurred in his 82nd year, will always be associated one of the great successes of the business he followed for so long a period. It was in 1852 that he brought out "Uncle Tom's Cabin," and sold a million and a quarter copies within the year. He was the quarter copies within the year. He was the first English publisher to recognise what at that time was only a moral obligation to share profits with an American writer; he sent Mrs. Stowe a thousand guineas. Mr. Clarke, who founded one of the first magazines for ladies, and also one for boys, was the youngest son of the Captain J. H. Clarke, who fought with Nelson at the Battle of M. Copenhagen and was Equerry to Queen Caroline.

An interesting ceremony took place recently in Grasmere Churchyard, when a memorial stone was unveiled by Mrs. Fisher Wordsworth, of Rydal Mount, to commemorate Capt. John Wordsworth, who on February 5, 99 years ago, perished in the calamitous shipwreck of the Fard Abertagrans. He was the favourite brother perished in the calamitous shipwreck of the Earl of Abergavenny. He was the favourite brother of William and Dorothy Wordsworth, and himself a passionate lover of the Grasmere Valley, to which he had intended to retire. Wordsworth's poems referring to his brother John are "The Brothers," a passage at the end of "The Prelude," "The Fir Grove Path," "Elegiac Stanzas suggested by the picture of Peel Castle in a storm." "The Daisy," "Elegiac Stanzas in memory of my Brother," and "The Character of the Happy Warrior."

In spite of the labours of Gifford, who first supplied a tolerably correct text, a thoroughly satisfactory edition of the works of Ben Jonson has always been a pronounced literary want. The statement is now made that the Delegates of the Oxford University Press have decided to under-Oxford University Press have declined to inder-take a new complete edition of the great Eliza-bethan—to be contained probably, like Gifford's in nine volumes—and that the services of Pro-fessor Herford and Mr. Percy Simpson have been secured for the task. The first noteworthy secured for the task. secured for the task. The first noteworthy edition of Jonson was published in many noble volumes by the learned Northampton antiquarian Peter Whalley in 1756, but Whalley, in spite of great claims, did not do much towards perfecting the poet's text, which remained in a sad condition until the time of Gifford, many of the dramatic speeches being mixed, with quite unintelligible results. It may be recalled that Gifford's edition—which, as it was republished by Routledge in a single stout volume, will not be driven out of demand by the new one—opened montroversy between Sir Walter Scott and its editor on the subject of the unlovely personal character of Ben, which Gifford, in his enthusiasm, sought to screen.

Although his life's work was handicapped by a delicate constitution, Canon Ainger, whose death occured on February 8th, managed to maintain an intimate connection with many spheres of activity. To literature he gave more of quality than quantity, including that admirable life of Charles Lamb in the "English Men of Letters" series, and the life of Tennyson in the "Dictionary of National Biography." In editing "Hood's Poems" he undertook a particularly congenial task, for he followed Hood and Lamb in being a quite incorrigible punster. His faciin being a quite incorrigible punster. His faci-lity for punning vied with that of Sir F. Burnand, volumes by the well-known firm of Teubner, of Leipzig.

The destruction by fire of the Turin Library is an international loss; scholars will mourn the destruction of many valuable Latin MSS., including a palimpsest of Pliny's Natural History, and a splendid collection of Oriental MSS. As with the recent theatre fire in America, the disaster in Turin will probably raise doubts in many minds the house and hearing voices in the drawing.

as to the safety of other public and private room be said to the servant, "Don't announce libraries. Books are not easy to burn, and if the me." He intended to amuse the children, and buildings in which they are stored are reasonably so ruffled his hair, turned up his coat collar, and fire-proof there need not be much risk. But are proceeded to crawl into the room on his hands the buildings of, for examples, the British and knees, growling in imitation of a bear. In Museum, the Bodleian, and the Vatican reasonably fire-proof? Are due precautions taken against proceeded to crawi into the room on his hands and knees, growling in imitation of a bear. In the room stood two startled spinsters! He had gone to the wrong house. We confess, however, that we have heard the same story told of Lewis Carroll.

THE LAW COURTS.

HAIM v. BRETSCHNEIDER.

March 26, 1904.]

The hearing of a case filed by Mr. Albert Haim, representative of the Turkish merchants, Messrs. D. Messulam and A. Haim, No. 246, against Mr. C Bretschneider, Yokohama, claiming yen 1,413.25 with interest, began in the Yokohama District Court before Judge Danno on

Plaintiffs were represented by Messrs. Akiyama

and Ikeda, and defendant by Mr. Ideura.

Plaintiffs' Counsel stated that the Turkish rader received in August last an order for 450,000 porcelain cups to be packed in 300 cases, from Messrs. Palacci, Menasce et Cie, Cairo, Egypt, and they requested defendant to furnish them with the earthenware. On October and the parties concluded a contract that defendant should supply the cups at sen o8 per piece and that delivery should be executed within 360 weeks—50 cases containing 1,500 pieces to be delivered in every six weeks—and the first delivery to be made at the end of November or the beginning of December. Defendant however failed to carry out his promise and owing to this breach of contract plaintiffs sustained damage.

Defendant's Counsel held that defendant forwarded to plaintiffs on December 7th, 50 cases as the first delivery stipulated in the contract, but the latter refused to take delivery on the pretence that the goods were inferior to the samples which had been furnished and they also refused to pay for

had been turnished and they also these to pay for the cups. Defendant considered that the contract was thus rendered null and void.

Mr. Akiyama, Plaintiffs' Counsel, further stated that before the due date of the first delivery of the goods, defendant intended to transfer the contract to a Japanese porcelain dealer as he was unable to execute the order, but plaintiffs did not consent to this. To prove his facts, Counsel asked the Court to examine a Japanese, C. Kitagawa, an earthenware broker. As to the fact that plaintiffs refused to take delivery, defendant's counsel also asked the Court to examine another Japanese, K. The Court granted consent to both requests.

The case was adjourned till April 5th.

SELIOUS CHARGE AGAINST RUSSIAN SAILORS.

Two Russian sailers who were convicted in the Morioka District Court on a charge of having MOTIONA DISTRICT COURT Of a charge of having attempted to murder the Captain of their ship, before arriving at Yamada Iwate prefecture, and who had appealed against the sentence, were acquitted on March 16th in the Miyagi Appeal

According to the decision, the accused were prosecuted as attempted murderers and also as attempted robbers, and this uncertain accusation did not furnish grounds to deal with them in the Court. Moreover the evidence as to whether their action was performed in Japanese waters was insufficient.

They have been handed over to the French Consulate, Yokohama, by the police of Sendai.

LIBEL CASE.

Yuen-si Song, ex-Chinese Compradore of the Russo-Chinese Bank, who is now in Kobe, has begun in the Court a libel case against the bank. According to the complaint, the bank injured his reputation by prosecuting him in Shanghai without any ground. The officers attempted to arrest him, but he escaped arrest by staying on board a lanances steamer at Shanghai. Japanese steamer at Shanghai.

NEWS OF THE WEEK.

The U.S. transport Sheridan arrived on March zoth at Nagasaki from Manila.

Baron Suyematsu, who arrived in London on March 14th, will shortly have audience of the

A member of the crew of the steamer *Itola* was badly injured while working cargo on Thursday afternoon. He has been removed to the Yokohama General Hospital.

A jinrikisha coolie I. Nagano (40) strangled his child on the night of March 17th in Uyeno Park, Tokyo, and committed suicide by hanging himself. The cause is believed to be poverty.

Mr. T. Okazaki, Kobe, has purchased the Dutch steamer Celebes, which was lying at Yokohama, and renamed her the Nichiyei Maru. She left Yokohama on the evening of March 19th for Kobe.

The mail steamer Kiautschau, twin-screw, 10,880 tons, belonging to the Hamburg America Line, has been acquired by the Norddeutscher Lloyd, and will in future be known as the Prinzess Alice.

A Chinese passenger by the steamer China, which arrived on March 17th at Yokohama, committed suicide by drowning himself before the vessel reached her mooring. The body was not vessel reached her mooring. The cause is not known

The blood-stained stretchers employed to carry the wounded officers and blue-jackets of the Russian warships Varyag and Korietz were brought on March 18th to the military museum, Yushu-kwan, Kudan, Tokyo, where they are now exhibited.

Y. Magome, manager of the Gumma Commercial Bank was arrested on March 23rd in Tokyo. The charge is alleged to be that he obtained money amounting to 13,000 yen from the Third Bank and nine others by means of fraud.

The Crown Prince and Princess have donated its employ, was sentenced on March 23rd in the gross and net weight, the nature of the con-

a thousand yen to the Red Cross' Ladies Nursing Tokyo District Court to three years' imprisonment with hard labour, a fine of forty yen and ten months' police surveillance. .

> About twenty coolies, on the night of March 22nd attacked the Greek Church, at Odawara. destroying the furniture and also breaking into the dwelling of a missionary. No one, however, was injured. The rioters do not appear to have been arrested.

> The marriage of Colonel Marchand with Mme. Heriot, the announcement of which has aroused much popular interest in Paris, will take place early in May in the picturesque commune of Cabbe-Roquebrune, in the south, away from the turmoil of fashionable society.

> The cinematograph show at the Van Schaick Hall on Tuesday evening was a huge success, the hall being crowded to its utmost limits by an enthusiastic audience of little folks. Mr. Clarence Griffin and the Signori Dentici deserve the hearty thanks of the community for this excellent treat.

> Admiral Sir Cyprian Bridge arrived at Yoko-hama on H. M. S. Leviathan on Sunday, and the customary salutes were exchanged; after paying some official calls, the Admiral left for Miyanoshita. Admiral Noel, the new Commander-in-Chief, is expected here shortly.

The Moscow Gazette has started a subscription list to present a battleship or cruiser to the Russian Government. The idea began with a flourish of patriotism about the middle of January, and up to Feb, 12th something like fifty or sixty roubles had been collected—five or six pounds

It is believed, says a London paper, that a Scottish descent can be claimed for Rear-Admiral Stark, who commands the Russian fleet at Port Arthur. Many officers in the Russian service trace their descent from Scotsmen who arrived in Russia during the time of Peter the Great and the Empress Catherine.

A telegram from Hakodate states that a Rus-sian crown to be fixed on a flag-staff was found on March 20th washed ashore near Matsumae. It is believed that the Russian squadron from Vladivostock lost it in the attack on the Japanese steamers Nakonoura Maru and Zensho Maru. The crown measures about seven inches in height.

The Saseho City authorities have decided to establish gas-works and to borrow eighty thousand yen as capital for the enterprise from the Industry Encouragement Bank, for which purpose the Ministers for Home and Finance have granted the usual permit. The local authorities intend also to establish water-works.

The Central Tea Guild has established a society under the name of Seicha Yushitsu Domei-Kai (Tea Export Union Society). The aim of the society is to enable manufacturers to regulate their output according to the taste of customers abroad, with which purpose several members will be sent to investigate conditions in foreign countries.

Mr. O. A. Zemenkoff (39) second mate; his wife (35), and K. E. Ferber (50) fireman, of the captured Russian ship *Kotik*, who were released at the Yokosuka Naval station, arrived in Yokohana March 22nd at 9 a.m. under escort of the police. At the Kencho, the Russians, except the woman, took an oath not to join in hostile service during the war.

K. Hadano (22), a farmer in the village of Magome, district of Ebara, near Tokyo, murdered his mother on March 18th by inflicting injuries on her with a short sword. He then gave himself up at a police station. The crime is attributed to brain illness from which the murderer has been sufficient for some morths past been suffering for some months past.

T. Tanaka, formerly an employee of the Mitsu cording to the Official Gazette, notified on March 24th that all applications to the Customs for postal parcels to be sent to Russia must describe the condition of the conditions and year belonging to the bank while in parcels to be sent to Russia must describe the conditions and year sentenced on March 23rd in the conditions.

gins now on the market. They say that it is doubly distilled and matured by age, that it is more palatable than them and that it is a desirable digestive stimulant. It is strongly recommended as a liqueur after meals and on the whole appears to fill a useful place in the market.

A fireman of the Russian steamer Kotik, which was seized on Feb. 10th, by the gunboat Amagi and removed to the Yokosuka Naval station, was released on March 19th and removed to the French Consulate, Yokohama, where he took an oath in the presence of Governor Sufu and the police authorities, not to join in hostile service during the war. He will leave for Shanghai by the first mail.

A London telegram dated 27th ult. states:— The election for the South Birmingham seat rendered vacant by the death of Mr. Powell Williams dered vacant by the death of Mr. Powell Williams has resulted in the return of Viscount Morpeth, the Unionist candidate, by a majority of 3,076 over Mr. Hollowell, the Liberal candidate, who polled 2,223, whilst Viscount Morpeth polled 5,299 votes. The election was fought largely on the question of Chinese labour in the Transvaal.

So much attention has been paid recently to Russian politics in relation to the Far East, that the gravity of the financial and industrial crisis with which the country is confronted has not received the attention which it deserves. It is undeniably serious, all the same, and, as explained in a recent statement of the Controller of State to the Czar, it results from the over-stimulation of domestic industries by State grants.—Engineering.

During ten days of March ended the 20th, the During ten days of March ended the 20th, the foreign trade of Japan amounted to: Exports—yen 6,933,988 in commodities; yen 2,850,136, gold coins and bullion; and yen 8,221 silver coins and bullion. Imports.—yen 8,869,641 in commodities; yen 54,672, gold coins and bullion; and yen 32,992, silver coin and bullion. It is remarked that during the period, gold bullion valued at yen 54,000 was brought from Korea to be cast at the Osaka Mint.

AMERICAN TOPICS.

A spacious \$250,000 site for a new athletic field adjoining the Armour Institute of Technology at Chicago, is the latest gift of Mr. J. Ogden Armour to the school. The announce-ment was made by Dr. Frank W. Gunsalus, president of the institution. The site is bounded on the south by Third Street, on the west by Armour Avenue, on the east by Dearborn Street and extends north for 385 feet.

What is believed to be a mine of pure glass has been found in the neighbourhood of Tampico, Mexico, according to mining men who have recently returned from that section. Tests have demonstrated that with simple melting and running into moulds the product comes out as clearly as the best manufactured glass. The component parts of the glass are the same as enter into commercial glass, though in places it is said to be

second street, all four tracks laid and baliasted; Forty-second to Forty-seventh street, rails down, but ballasting not complete; Seventy-first to One but ballasting not complete; Seventy-first to One Hundred and Third street, rails all down, but ballast not finished; upper west side, from One Hundred and Third as far as One Hundred and Third as far as One Hundred and Third street, tracks laid, but not ballasted; quantities of rubber in its roots. The Picradenia Ninety-seventh to One Hundred and Twelfth, on floribunda has been known to botanists a long and even this stretch offers no unusual obstacles, each side, double track laid, but only partially time, but this variety of it, called P. floribunda The road leaves the Pacific ocean by easy

Baltimore's fire loss has by the latest estimates been reduced to \$85,000,000, "or less," three-fourths insured. There are those, however, who stick to the higher estimates running up to \$150,000,000, the great disparity in the figures given being due in part to the fact that in some cases only actual losses are given, while others lump actual and collateral and incidental losses, such as stoppage of business, all together. The city began its rehabilitation before the ashes of its business district were cold; there has been little time wasted in bewailing the catastrophe, all the energy of the city being spent in making plans for replacing the buildings destroyed and in restoring business machinery to its normal condition. Indeed, the manner in which the calamity has been borne could not have been more admirable.

According to a bulletin issued in Washington on Feb. 19 by the Interstate Commerce Commission, showing the railroad accidents that occurred the United States during July, August and September, 1903, 60 passengers and 220 employees were killed, and 1,668 passengers and 1,914 employees injured, making in all 280 persons killed and 3,582 injured in train accidents. Other accidents to passengers and employees not the result of train accidents make the total number of casualties 15,187; 109 passengers 916 and employees killed, and 2,688 passengers and 11,474 employees injured. The total number of persons killed during the quarter shows an increase of 181, and the number killed in train accidents 280, as against 230 for the preceding quarter, an increase of 50. Seventy employees were killed in coupling and

one million multiplied a thousandfold, the task reaches the stage of impossibility. Yet it is necessary to use such figures to show the rapid growth of life insurance in the United States. During last year the total amount of life insurance in force was increased over that of 1902 by about \$1,500,000,000. The total amount of life insurance now outstanding in America is discoloured from admixture of mineral salts.

It is said that the new subway in New York will be opened early next summer—perhaps in June or July. The work completed is as follows: From Park Row station to Canal street, tracks laid, but not ballasted; from Canal to Forty-second street, all four tracks laid and ballasted.

tents, and their value, numbers and size, and that the weight and value must be in accordance with the French scale and Russian money respectively.

The proprietors of the new Gin which is advertised in our columns claim for it some characteristics which can hardly be attributed to other gins now on the market. They say that it is an increase of \$5.370,277, 0901, 1902. This sideral away which may make it worthy of general study by the agricultural colleges. It is not probable that it will take the States during the year 1903, as collated in the current issue of the Monthly Bulletin of the Fidelity long time, but the "Colorado rubber plant," as an increase of \$5.3170,277, 0901, 1902. This sideral away which may make it worthy of general study by the agricultural colleges. It is not probable that it will take the States during the year 1903, as collated in the current issue of the Monthly Bulletin of the Fidelity long time, but the "Colorado rubber plant," as an increase of \$5.3170,277, 0901, 1902. This sideral away which may make it worthy of general study by the agricultural colleges. sidered a worthy addition to our natural resources, and its discovery justifies the attention given to economic botany in American colleges.

> According to advices received from Amsterdam, Antwerp and London by New York diamond importers, the De Beers' diamond selling syndidiamonds 5 per cent., to go into effect immediately. This is the fourth advance in the last year. The De Beers Co. handles more than 90 per cent. of all the diamonds mined in the world. About 60 per cent, come to the United States. Though diamonds are now selling at about 20 per cent. more than at any time since the consolidation of the De Beers mines of South Africa in the '70s the present advance was not a surprise to New York diamond importers. Their brokers in Amsterdam and Antwerp had been cabling them that the European market was almost devoid of diamonds. American diamond buyers who have been in Europe in the last few weeks, declare that they never encountered a more broken that they never encountered a more broken market or found goods so scarce in the history of the trade. Hardly a diamond importer has been able to obtain more than half or his usual quantity of stones. The figures of General George Mindl, jewellry examiner for the port of New York, bear out the importers. According to General Mindl \$725,000 worth of diamonds were imported in Inspect, see that during the imported in January, 1904, less than during the same month last year. In two years the total advance on small stones has been 25 per cent, and oh large stones 30 per cent.

The fortune left by the late Senator Hanna is variously estimated at between \$3,000,000 and \$7,000,000. He was a man of wealth, with his investments carefully placed and well cared for in every way, but his investments are so widely scattered that it would be exceedingly difficult to estimate their tolal value. He was one of the heavy holders of stock in the Pittsburg Coal Co. and had besides immense amounts of coal property through Ohio and lands and mines elsewhere, the total value of which reaches a very large figure. His ore mines and iron interests were very heavy and valuable and his ship interests were also of great value. He owned a large amount of of great value. He owned a large amount of Seventy employees were killed in coupling and uncoupling cars, an increase of eight over the number of fatalities from this cause in the preceding quarter. The total number of collisions and derailments was 3,603 (1,765 collisions and 1,298 derailments), of which 251 collisions and 251 derailments affected passenger trains.

It is extremely difficult for the ordinary mind to realize the full significance of what a million dollars means, and when it becomes a question of lone million multiplied a thousandfold, the task strong financial houses of the city. His financial affairs are in good condition. For years he gradually unloaded his business cares, and the heavier duties of all the departments of the interests he controlled have been placed in the hands of men whom he selected for that purpose. During the past year he put his business affairs almost wholly off his shoulders. Friends say that he made his will a long time ago.

The building of the Alaska Central line is now assured, six Chicago capitalists having agreed to furnish the necessary money, and it is expected that work will begin as soon as the spring weather will permit. The road will be built to Kenai cannot be over-estimated.

An economic discovery which may be of considerable importance is reported by the Colorado College botanical department. This is that a variety of picradenia which grows in the region around Buena Vista, Colo., contains considerable quantities of rubber in its roots. The Picradenia Seward will be the hardest of the line to build,

grades, and the grade over the entire 413 miles will not exceed more than a per cent. The 20 per cent. grade is only for four miles. Dowdell & Co., one of the largest contracting firms of Chicago, has taken the contract to build the entire line. Rails and other material will be shipped from Seattle to Seward just as fast as the mile contract that the contract to build the entire line. as the mills can turn them out. The men who have made a study of the route have figured it out that each section of 20 or 30 miles will open up a new and independent field, which will put the road on may paying basis from the start, without waiting for the entire line to be completed Resurrection Bay was chosen as the southern terminus, for the reason that it is open to navigation the year around. The Alaska Central will tap some of the richest country in Alaska. The forests of fir, spruce, hemlock and maple are very extensive and the mineral resources are vast. Once the trunk line is built, a number of branch lines to reach the various mining camps are in contemplation, and ground that can not now be worked because it costs too much to pack in supplies, will be developed.

CORRESPONDENCE.

THE FALL OF A POWERFUL FORTRESS

(TO THE EDITOR OF THE " JAPAN MAIL.,")

SIR,-Will you kindly allow me to correct a slight

STR,—Will you kindly allow me to correct a slight error into which you appear to have, inadvertently, fallen in your issue of Wednesday, 16th inst.

You say, in your article under the caption "Port Arthur:"—"When has it been recorded that a powerful fortiess was evacuated merely in the face of a bombardment from the sea, without the landing of a single soldier." May I beg to recall to your recollection that, as a matter of history, the powerful modern fortress of Alexandria, was, in the face of the British bombardment from sea, in 101, 1882, completely evacuated ment from sea, in July, 1882, completely evacuated and abandoned by its defenders, without the landing of m single man from the Fleet, (soldiers there were none nearer than Cyprus). When the Marines landed the next morning, they found the forts completely deserted.

HISTORICUS. Yours truly.

THE SHOHEI-GI-KWAI.

TO THE EDITOR OF THE "JAPAN MAIL,"

SIR.—So many questions concerning the working of the "Shohei-gi-kwai," or "Society for the Relief of the Families of Soldiers," have come to me, that I think a statement in your columns may be of

I think a statement in your columns may be of interest.

This Society, whose President is Mrs. Watanabe, of Motohamacho, Itchome, Yokohama, has divided the city into five sections. In each section an meeting has been held, and a committee of thirty appointed; this committee subdivides its own section, and each one visits every soldier's family in her portion to find out whether or not help is needed. I was present at the meeting held in the Aizawa section, and was very much pleased with the enthusiasm and thoroughly husiness-like manner is which everything was done. I have just been informed that reports to date show two hundred destitute families of soldiers—six hundred persons altogether.

The pan is to supplement the best the family can do, so as to prevent actual suffering. Not more than yen 2.50 per month will be given to one person.

The Society is happy in having Mrs. Watanabe for its President. Her long connection with the Jizenkai and the orphanage, has shown to all her associates her especial fitness for the position.

I have been informed that if one wishes to contribute the heartest of the pompty of the property of the propersy pound.

I have been informed that if one wishes to contribute the comfort of the soldiers, the money should go Madame Sufu; if to their families, to Mrs. Watanabe.

Besides these two societies, the fisenkai has undertaken to care for the sick in the soldiers' families free of expense to them, in the Negishi Hospital. Mrs. James Walter is Hon. Freasurer of the foreign

Blankets and sheets are much needed in the she cannot consent to surrender to, or share with, egishi hospital, to accommodate the increasing any other Power. The Japanese Government have given the matter their most serious consideration and Negishi hospital, to accommodate the increasing numbers; also any cloth, new or old, of which futons could be made.

Yours very truly, C. W. VAN PETTEN. March 18th, 1904.

JAPANESE SCIENTISTS.

In the course of an interesting article in *The Academy and Literature*, Mr. C. W. Saleeby draws attention to the additions made to science by such experimenters as Dr. Kitasato the discover of the tetanus bacillus-and Mr. Shiga-the bacteriologist who has discovered a serum for dysentery-and then proceeds :-

The third discovery is really more interesting, because it raises newer problems. There is in the body of each of us a pair of organs known as the adrenal glands: yet unknown to the public, though life could not continue without them. It is a curious fact, by the way, that the public has heard of the stomach—which is the least important of the digestive organs and which many teople are now himself. fact, by the way, that the public has heard of the stomach—which is the least important of the digestive organs, and which many people are now living without in perfect comfort—yet has never heard of the pancreas, which is the digestive organ par excellence, and which is essential to life quite apart from its digestive function. Occasionally we consume, as a dainty, an animal's pancreas, which we call a "sweet-bread," but we never suspect that without our own sweetbread we could not live for more than three weeks. Similarly the adrenal glands, without which we would die in an even shorter time, are not known to public fame. It was a Japanese chemist, Takamine, who isolated from these glands the invaluable substance which they produce for the benefit of the test of the body. It is known as adrenalm, and nearly every sample of it, if prepared by a good firm, bears upon it the name of that distinguished Japanese. I have not space here to discuss the normal rôle of adrenalin. I would only say that if there were none in your blood just now, you would not have the muscular strength to sit in an easy chair, far less stand or walk. But the most remarkable influence of adrenalin is on the blood-vessels. A solution containing one part of it in a million will contract the microscopic blood-vessels in the foot of a frog so that you can no longer see them. Hence it is the most powerful of all chemical agents for stopping haemorrhage. It will arrest bleeding from the nose when everything else has failed; not that that much matters for the nose is accessible to mechanical means; but adrenalin has already sweed may lives that were oozing away in a thin red streau no surgeon could reach. I wonder how many many lives that were oozing away in a thin red stream no surgeon could reach. I wonder how many Russian soldiers lives will be preserved by it during the present war, to enable them to fight against Takamine's fellow countrymen? Not that they will know their saviour's name or race.

CORRESPONDENCE REGARDING THE NEGOTIATIONS BETWEEN JAPAN AND RUSSIA.

No. 1.

BARON KOMURA TO MR. KURINO.

Tokio, July 28th, 1903. Telegram.)

The Japanese Government have observed with close attention the development of affairs in Manchuria, and they view with grave concern the present situation there. So long as there were grounds for hope that Russia would carry out her engagement to China and her assurances to other Powers on the subject of the evacuation of Manchuria, the Japanese Government maintained an attitude of watchful re-serve. But the recent action of Russia in formulating new demands in Peking and in consolidating rather than relaxing her hold on Manchuria compels belief that she has abandoned the intention of retring from that she has abandoned the intention of returing from Manchuria, while her increased activity along the Korean frontier is such as to raise doubts regarding the limits of her ambition. The unrestrained permanent occupation of Manchuria by Russia would create a condition of things Jaejudicial to the security and interest of Japan. Such occupation would be destructive of the principle of equal opportunity and in impairment of the territorial integrity of China. But, what is of still more serious moment to the Japanese Government, Russia stationed on the flank of Korea would be a constant menace to the separate existence Mrs. James Walter is Hon. Treasurer of the foreign section of that Society.

The Ophanage, in Nogeyama, whose nice, new building is not yet full, will take any little children whom the war may send there, so long as there is room. Mrs. Watanabe is Treasurer of the orphanage.

The Shohei-gi-kwai is working with great care, and can relieve more suffering with the same amount of money than we could do, by personal distribution, because they can investigate as we cannot. I make this statement in answer to repeated questions.

The suddenness of the need and its nrgency, taxes the Societies to their utmost, but the response from poor as well as rich, is gratifying; this first month or two is likely to be the hardest.

manent occupation of Manchuria by Russia would be accounted the security and in this special to the security and in this sections would be a condition of things plejudicial to the security and in the sections would be decided to propose the following as the basis of an important one to the sparate existence dor money than we could do, by personal distribution, the suddenness of the need and its ribution, and poor as well as rich, is gratifying; this first month or two is likely to be the hardest.

In a menent occupation of Manchuria by Russia would be accounted to the security and in the sections would be a condition of things plejudicial to the security and in the sections would be de-isderation to the condition of affairs in those centerious continuous due is structive of the principle of equal opportunity and in manual interests of the use Powers meet, have decided to propose the following as the basis of an understanding between Japanese Government, after giving most serious consequent to make its create a condition of things plejudicial to the security and in the remain whom the war may send there is and indicate to the principle of equal opportunity for the condition of affairs in those centerious devices deviced to propose the following as the basis of an understanding between Japanese Government

given the matter their most serious consideration and have resolved to approach the Russian Government in a spirit of conciliation and frankness with a view to the conclusion of an understanding designed to compose questions which are at this time the cause of just and natural anxiety; and in the estimation of the Japanese Government, the moment is opportune for making the attempt to bring about the desired adjustment. sired adjustment.

sired adjustment.

The Japanese Government, reposing confidence in your judgment and discretion, have decided to place these delicate negotiations in your hands. It is the wish of the Japanese Government to place their present invitation to the Russian Government entirely on an official footing, and you are accordingly instructed to open the question by presenting to Count Lamsdorff a Note Verbale to the following

"The Imperial Japanese Government, believing that the Imperial Russian Government share with them the desire to remove from the relations of the two Empires every cause of future misunderstanding, would be glad to enter with the Imperial Russian Government upon examination of the condition of affairs in the Extreme East where their interests meet, with a view to a definition of their respective special interests in those regions. If, as is confidently hoped, this suggestion meets approval in principle, the Imperial Japanese Govern-

proval in principle, the Imperial Japanese Government will be prepared to present to the Imperial Russian Government their views as to the nature and scope of the proposed understanding."

In presenting the foregoing note to Count Lamsdorff, you will careful to make him understand that our purposes are entirely friendly, but that we attach great importance to the subject. You will present the note to Count Lamsdorff as soon as possible, and keep me fully informed regarding the steps taken by you under this instruction; and immediately upon the receipt of an affirmative reply from the Russian Government, the substance of our proposals will be telegraphed to you. telegraphed to you.

MR. KURINO TO BARON KOMURA.
Petersburg, July 31st, 1903.
Received, August, 2nd, ...

(Telegram.) Your Excellency's telegram of the 28th instant, was duly received. In accordance with the instructions contained therein, I saw Count Launsdorff to-day and, before handing to His Excellency the Note Verbale. I stated substantially as follows:

The condition of affairs in the Far East is become the condition of affairs in the Far East is become the condition of affairs in the Far East is become the condition of affairs in the Far East is become the condition of affairs in the Far East is become the condition of affairs in the Far East is become the condition of
The condition of affairs in the Far East is be-coming more and more complicated, and unless something be done at present with the view of removing all cause of misunderstanding between Japan and Russia, the relations of the two coun-tries will increase in difficulty, entailing nothing but disadvantages to both countries. Under the circumstances, the Imperial Government, fully ani-mated by a spirit of frankness and conciliation, have decided to approach the Imperial Russian Government with a view to arrive at an under-standing.

standing.

I then handed to him the Note Verbale, saying I then handed to him the Note Verbale, saying that I was so instructed. After the had seen it, I expressed my ardent hope that the Russian Government would share the above view in the same spirit. Count Lamsdorff said that he was perfectly satisfied with the decision of the Japanese Government, for, with the decision of the Japanese Government, for, as he had said to me very often, an understanding between the two countries is not only desirable, but is the best policy; should Russia and Japan enter into full understanding, no one would in future attempt to sow the seeds of discord between the two countries. So far as he was concerned, he was, he said, in perfect accord with the view of the Japanese Government; but he wished to see the Emperor on the subject before a definite answer was given. He expects to see the Emperor next Tuesday, and promised to give me an answer on the following day. He added that the Emperor would surely approve the matter. the matter.

No. 3. BARON KOMURA TO MR. KURINO.

(Telegram.) Tokio, August 3rd, 1903. In reference to my telegram of the 28th July, the

necessary for the protection of their respective interests as above defined, subject, however, to the provisions of Article I of the Agreement.

"3. Reciprocal undertaking on the part of Russia and Japan not to impede development of those industrial and commercial activities respectively of Japan in Korea and of Russia in Manchuria, which are not inconsistent with the stipulations of Article I of this Agreement.

"Additional engagement on the part of Russia not to impede the eventual extension of the Korean railway into southern Manchuria so as to connect with the East China and Shan-hai-kwan-Newchwang lines.

"4. Reciprocal engagement that in case it is found necessary to send troops by Japan to Korea, or by Russia to Manchuria, for the purpose either of protecting the interests mentioned in Article II of this Agreement, or of suppressing insurrection or disorder calculated to create international complications, the troops so sent are in no case to exceed the actual number required and are to be forthwith recalled as soon as their missions are accomplished.

"5. Recognition on the part of Russia of the exclusive right of Japan to give advice and assistance in the interest of reform and good government in Korea, including necessary military assistance.

"6. This Agreement to supplant all previous arrangements between Japan and Russia respecting Korea." 4. Reciprocal engagement that in case it is found

arrangements between Japan and Russia respecting Korea."

In handing the foregoing project to Count Lamsdorff, you will say that it is presented for the consideration of the Russian Government in the firm belief that it may be found to serve as a basis upon which to construct satisfactory arrangements between the two Governments, and you will assure Count Lamsdorff that any amendment or suggestion he may find it necessary to offer will receive the immediate and friendly consideration of the Japanese Government. It will not be necessary for you to say much in elucidation of the separate items of the project as they are very largely self-explanatory; but you might point out that the project taken as a whole will be found to be but little more than the logical and essential development and extension of the principles already recognized by the two Governments, or of conditions embodied in the engagements which the project is designed to supplant.

The foregoing instruction is sent to you in carriery

embodied in the engagements which the project is designed to supplant.

The foregoing instruction is sent to you in anticipation that the answer to the Note Verbale presented by you will be favourable; but you will not act on that instruction until you receive further instructions which will be given after you have communicated to me the answer to the Note Verbale.

No. 4.

MR. KURINO TO BARON KOMURA. Petersburg, August 5th, 1903. (Telegram.) Received,

Count Lamsdorff says he is authorized by the Emperor to open negotiations with me on the subject of the Note Verbale.

No. 5. BARON KOMURA TO MR. KURINO.

Tokio, August 6th, 1903. (Telegram.)

(Telegram.) Tokio, August 6th, 1903. In reference to your telegrams dated the 1st and 5th instant, you will state to Count Lamsdorff that the Imperial Government fully appreciate the friendly spirit with which the Russian Government received the proposal of the Japanese Government to enter upon negotiations with regard to an understanding between the two countries, and then present at once the project to the Russian Government in accordance with instructions contained in my telegram of the 1st instant. my telegram of the 1st instant.

No. 6.

MR. KURINO TO BARON KOMURA. Petersburg, August 12th, 1903. (Telegram.) Received, 14th,

Count Lamsdorff, being now very much occupied, could not receive me until to-day, when I handed to His Excellency the proposed project in English in accordance with your instructions. I added that the longer the conclusion of an accord is postponed the more difficult will it become, as the condition of affairs in the Far East is now getting more and more complicated. I asked him to hasten the matter as much as possible. He said he would examine the project with care.

No. 7. MR. KURINO TO BARON KOMURA.

Petersburg, August 24th, 1903 (Telegram.) 25th, Received.

Received, ... 25th, ... Count Lamsdorff received me yesterday by special arrangement, and I asked his views as well as the attitude of the Russian Government regarding our proposals, adding that the Japanese Government are now impatiently waiting for me reply. He said that he had studied the project seriously, but that the Emperor having heen absent over a week on account of the manusures, he had been unable to take any steps in the matter; but he asked my opinion about

transferring the negotiations to Tokyo as there were many details which would have to be referred to Admiral Alexieff. I said to him that the Japanese Government having confided the matter to me, I should prefer to proceed with it, but that I was willing to communicate his opinion to you.

He stated that he has already sent copy of our project to Port Arthur with the view of obtaining the opinion of Admiral Alexieff. After such conversation, he said the question of Japanese railway enterprise in Manchuria would be difficult, but upon all other points perhaps the Russian Government would be able to come to an understanding. I said that in order to arrive at a satisfactory understanding mutual concessions as well as a spirit of conciliation are necessary and that the Japanese Government would be prepared to give favourable consideration if any suggestions should be made by Count Lamsdorff.

No. 8.

BARON KOMURA TO MR. KURINO. Tokio, August 26th, 1903.

(Telegram.) Tokio, August 26th, 1903. In reference to your telegram of 24th instant, you will say to Count Lamsdorff that the Japanese Government would prefer to continue negotiations in St. Petersburg, believing that by so doing, the work will be greatly facilitated. You can add that there are no details to be considered in connection with pending negotiations, which require local knowledge, and that the Japanese Government, having placed the negotiation in your hand would dislike to make any change. You will say to Count Lausdorff that the Japanese Government are anxiously awaiting a definite reply from his Government to their proposals, and you will continue to use every endeavour to obtain from him such a reply as soon as possible.

No. 9. ME. KURINO TO BARON KOMURA. Petersburg, August 27th, 1903. Received,

(Telegram.)
I saw Count Lamsdorff to day on the subject (Telegram.)

I saw Count Lamsdorff to-day on the subject of your telegram dated the 26th instant. He said he had audience of the Emperor last Tuesday, and was told that His Majesty desires very much the early conclusion of an entente satisfactory for both countries, and expressed his wish to conduct the negotiations at Tokio so as to expedite the matter. Then Count Lamsdorff added that the Emperor is to leave here for the country next Monday, and then for foreign countries for some time, and at the same time the Ministers concerned would be absent from St. Petersburg. Consequently, negotiations in Tokio would be much the easier and quicker way of concluding the matter. I said, referring to my conversation with Count Lamsdorff of the 23rd instant, that the proposed understanding involved mostly questions of principles and politics rather than details, and consequently that the continuation of negotiations at St. Petersburg would be proper and at the same time the quickest way to arrive at a satisfactory understanding. He repeated what he had just said and insisted upon his proposition.

upon his proposition.

Under the circumstances, I think it hardly possible Under the cucumstances, I think it hardly possible to change the course now proposed by Count Lainsdorff under authority of the Emperor. I also think that negotiations at Tokio would entail many disadvantageous consequences; and definite instruction for the distribution of the country of the course of the country of the

for the further course is awaited,

No. 10. BARON KOMURA TO MR. KURINO. Tokio, August 20th, 1903.

Tokio, August 20th, 1903.

[Telegram.]

In reference to your telegram of the 27th instant, you will say to Count Lamsdorff that the Japanese of Government still think that negotiation will be facilitated if continued in St. Petersburg since the negotiations relate to principles and not details; and you will add that he and you having been duly authorized in the matter and the proposals of Japan having been presented to him, the Japanese Government had supposed that the seat of negotiation had been agreed to. You will accordingly urge upon Count Lamsdorff the desire of the Japanese Government to continue the negotiations in St. Petersburg, and express a hope that his Government will reconsider the question. You will also say that the Japanese Government presume they are justified in assuming from the proposal to transfer negotiations to Tokio, that our proposals are in principle acceptable to the Russian Government as the basis of negotiations.

No. 11. MR. KURINO TO BARON KOMURA. Petersburg, August 31st, 1903. Received, September 2nd, 1903.

(Telegram.)
I saw Count Lamsdorff to-day and explained fully
the purport of your telegram of the 29th instant.
The substance of his reply is as follows:

He said that the negotiations relate to principles, but principles must be decided upon examination of

local and practical questions. Accordingly the Russian Government desired to transfer the discussions to Tokio on account of the necessity of consultation with Admiral Alexieff, and also to manifest a sense of deference to Japan as the proposal had been made by her, and that the acceptant of the proposal at St. Petersburg does not signify that the seat of negotiations should be at the same place. He added that the proposal to transfer the negotations to Tokio does not necessarily mean that our proposals are acceptable to the Russian Government, as bases for negotiations could not be determined without reference to practical questions concerning which Baron Rosen and Admiral Alexieff have much better knowledge than he himself.

I urged as my opinion that this being the most important question of high politics between our two countries, perhaps the Emperor had much to decide, and consequently it would be very convenient if the negotiations were conducted at St. Petersburg, and wished his serious reconsideration is much desired by the Japanese Government. I objected also to the suggestion of transfer on the ground that the question relates to principles as well as to the direction of international political concerns which may not be within the powers conferred upon Admiral Alexieff, If I remember rightly. I said, I understand that his authority is limited to mere questions of local administration. He said that on this question Admiral Alexieff would only be consulted and decide nothing and added that he. Count Lamsdorff, is also desirous to settle the question as quickly as possible, and that is the reason why he suggested the transfer. The Russian Counter-proposals are being prepared by persons having local knowledge, consequently the transfer of negotiations to Tokio would expedite the matter. Should the negotiations be conducted at St. Petersburg, he would be obliged to attend to the matter personally with me; but this autumn he has to be long absent from the city on account of his attendance upon the Emperor.

No. 12.

BARON KOMURA TO MR. KURINO. Tokio, September 2nd, 1903.

Telegram.) Tokio, September and, 1903. In reference to your telegram of the 31st ultimo, you will 5'y to Count Lamsdorff that it being the acknowledged desire of both Powers to arrive at an understanding as soon as possible, the Japanese Government fear that discussions would be greatly protracted if the negotiations were now to be transferred to Tokio without some accepted basis for negotiation; and you will add that the Japanese Government, having presented their proposals in concrete form to the Russian Government, believe that negotiations, wherever conducted, would be greatly facilitated if the Russian Government were primarily to announce whether such proposals can in principle be accepted as the basis for negotiations. The Japanese Government do not understand that the acceptance of those proposals as such basis would exclude amendments that might be regarded as necessary. On the contrary, such acceptance would in preselve for a desirier point of desirition which is would exclude amendments that might be regarded as necessary. On the contrary, such acceptance would merely fix a definite point of departure which is desirable in all negotiations and very important in the present case. You will use every endeavour to secure the desired apparaturement from the Russian secure the desired announcement from the Russian Government.

MR. KURINO TO BARON KOMURA. St. Petersburg, September 5th, 1903 (Telegram.) Received,

I saw Count Lamsdorff yesterday. With the view of preventing any misunderstanding about the sense of the instruction contained in your telegram of the 2nd instant and also with the view of impressing upon the Russian Government the feeling of impressince placed by the Japanese Government on the matter, I prepared a Note Verbale which I handed to him. We then had a rather prolonged discussion on the question. The substance of his remarks is as follows:—

According to his experience of 40 years in the Foreign Office, negotiations of an international character had always been conducted on the proposits of one Power together with the reply of the other,

and it was not usual to accept the proposition of one as the sole basis of negotiations. Baron Rosen had and it was not usual to accept the proposition of one as the sole basis of negotiations. Baron Rosen had already been commanded by the Emperor to study seriously the proposition of the Japanese Government, and at the same time to prepare and elaborate Counter-Proposals in consultation with Admiral Alexieft, and, if the Japanese Government were willing to enter into negotiation, to commence immediately the pourpalers adopting the propositions of the Japanese Government and the Russian Counter-Proposals as the basis of negotiations. I said during the discussion that if the Russian Government were really animated by a desire to enter into a satisfactory arrangement with Japan, I should deem it highly necessary that the Russian Government should instruct their negotiators to adopt as the basis the Japanese proposals, or at least the essential principles thereof so as to facilitate the attainment of the object of the negotiation, for I am inclined to doubt if Admiral Alexieff is disposed to enter into negotiations with Japan in a spirit of conciliation which is of prime necessity in order to arrive at a satisfactory understanding. He said that when he received our project there were only two courses open for Russia to take, either to reject our proposals or to enter into an egotiations on them. The Russian Government have adopted the latter course; this does not, however, signify acceptance of our project in its entirety or in principle; but having agreed to the proposition to enter into an latter course; this does not, however, signify accept-ance of our project in its entirety or in principle; but having agreed to the proposition to enter into an entente, they have decided to examine the proposi-tions and to prepare Counter-Proposals so that the two might be used as the basis of negotiations. Besides, he said that in our project there are certain clauses which could not be reconciled with Russian in-

clauses which could not be reconciled with Russian interests, and others which require modifications; and
he could not say that the Russian Government accepted our proposals even in principle as basis, but
only in conjunction with their Counter-Proposals.
Having exhausted every effort for the attainment
of the desire of the Japanese Government, I am now
fully convinced that it will not be possible to change
the course proposed by Count Lamsdorff; and I think
that there is no other way for Japan but to agree to
his suggestion. Count Lamsdorff is to leave here on
the 10th instant for Darmstadt to attend the Emperor his suggestion. Count Lamsdorff is to leave here on the 10th instant for Darmstadt to attend the Emperor

No. 14.

BARON KOMURA TO MR. KURINO. Tokio, September, 9th, 1903. (Telegram.)

In reference to your telegram of the 5th instant, you are hereby instructed to inform Count Lamsdorff that the Japanese Government consent to transfer mat the Japanese Government closes to transfer negotiations to Tokio, and you will add that the Japanese Government trust that instructions to the Russian Minister at Tokio are of such a character as to enable him to present the Russian Counter-Proposals without delay and to proceed immediately with the negotiations.

Baron Rosen left Tokio on the 22nd instant for (Telegram.)

Baron Rosen left Tokio on the 22nd instant for Port Arthur. Proviously to his departure, he called on me and told me that he had been instructed under Imperial order some time ago to hold himself ready to start at once for Port Arthur, whenever necessity might arise to do so, in order to expedite the preparation of the Russian Counter-Proposals between Admiral Alexieff and himself, and that he had just received from the Admiral a request to repair to Port Arthur for personal consultation on the subject. He added that he expected to come back within about eleven days. within about eleven days.

No. 17.

BARON KOMURA TO MR. KURINO.

Tokio, October 5th, 1903. (Telegram.)

(Telegram.) Tokto, October 5th, 1903.

Baron Rosen came back to Tokio on the 3rd instant. He called on me on the same day and handed to me the following as the Russian Counter-Proposals, which, he said, was sanctioned by the Emperor of Russia, upon joint presentation by Admirat Alexieff and himself:

1. Mutual engagement to respect the independence and territorial integrity of the Korean Empire

2. Recognition by Russia of Japan's preponderation would be contrary to the principle always insisted on by Russia that the question concerning Manchuria is give advice and assistance to Korea tending to improve the civil administration of the Empire without infringing the stipulations of Article I.

Our contention is:—1st, that Japan does not ask

of Japan in Korea, nor to oppose any measures taken for the purpose of protecting them so long as such measures do not infringe the stipulatious of Article 1.

4. Recognition of the right of Japan to send for the same purpose troops to Corea, with the know-ledge of Russia, but their number not to exceed that actually required, and with the engagement on the part of Japan to recall such troops as soon as their mission is accomplished.

5. Mutual engagement not to use any part of the territory of Korea for strategical purposes nor to undertake on the coasts of Korea any military

to undertake on the coasts of Korea any military works capable of menacing the freedom of navigation in the Straits of Korea.

6. Mutual engagement to consider that part of the territory of Korea lying to the north of the 39th parallel as a neutral zone into which neither of the Contracting Parties shall introduce troops.

7. Recognition by Japan of Manchuria and its littoral as in all respects outside her sphere of interest.

BARON KOMURA TO MR. KURINO.

Tokio, October 8th, 1893. (Telegram.)

In reference to my telegram of the 5th instant, I have begun discussion with the Russian Minister to Japan taking our proposals and the Russian Counter-Proposals as the basis and with a view to secure, if possible, the recognition by Russia of the fundamental principles laid down in our proposals.

No, 19.

BARON KOMURA TO MR. KURINO.

Tokio, October 16th, 1903. (Telegram.) In reference to my telegram of the 8th instant egotiations are now going on between Baron Rosen of myself regarding the following proposals, which had presented as amendment to the Russian Counter-Proposals :-

Counter-Proposals:—
Article II. Insert the phrase "including military assistance" between "assistance" and "to Korea."
Change the word "civil" into "internal."
Article III. Insert the phrase "the development of" between "impede" and "the commercial."
"Undertakings" to be changed into "activities," and "taken "into "to be taken " and "them" into "those interests."

"Undertakings" to be changed into "activities," and "taken" into "to be taken" and "them "into "those interests."

Article IV. Recognition of the right of Japan to send troops to Korea for the purpose of suppressing insurrection or disorder calculated to create international complications.

Article VI. Mutual engagement to establish a neutral zone on the Korea-Manchuria frontier extending......kilometres on each side, into which neutral zone neither of the Contracting Parties shall introduce troops without the consent of the other.

Article VII. To be struck out and replaced by the following three Articles:—

VII. Engagement on the part of Russia to re-

VII. Engagement on the part of Russia to re-spect China's sovereignty and territorial integrity in Manchuria and not to interfere with Japan's commercial freedom in Manchuria. VIII. Recognition by Japan of Russia's special interests in Manchuria and of the right of Russia

to take such measures as may be necessary for the protection of those interests so long as such measures do not infringe the stipulations of the preceding

1X. Mutual engagement not to impede the con-nection of the Korean railway and the East China railway when those railways shall have been eventually extended to the Yalu.

BARON KOMURA TO MR. KURINO.

BARON KOMURA TO MR. KURINO.

(Telegram.) Tokio, November 1st, 1903.

Baron Rosen called on me October 31st and stated that the definite proposals which I presented to him as amendments to the Russian proposals as reported in my telegram of the 30th October were beyond his instructions and that he would, November 1st, telegraph the full text of the said proposals to his Government and ask for further instructions. Accordingly you are instructed to see as soon as possible cordingly you are instructed to see as soon as possible the Acting Minister for Foreign Affairs in the absence of Count Lamsdorff, and say to him that in preparing the proposals in question, the Japanese Government did not fail to take into full consideration the wishes of the Russian Government. You will inform served for further discussion. In the Russian Counterour amendment to Article VII of the Russian CounterProposals that no agreement could be reached, each
insisting on the impossibility of accepting the other's
proposition. The contention of the Russian Minister
is:—1st, that the Russian Article VII is the only
compensation to Russia for the concessions to be
made by her in respect of Korea; and Znil, that admission of the Inpanese amendments on this point
would be contrary to the principle always insisted on
by Russia that the question concerning Manchuria is
one exclusively for Russia and China admitting of no
interference on the part of any third Power.

Our contention is:—1st, that Japan does not ask interests, is purely a Russo-Chinese question; but Japan has extensive and important rights and interests in that region, and the Japanese Government think that in declaring that Manchuria is outside their sphere of special interest, they are at least entitled to ask for a correlative engagement on the part of Russia not to interfere with the commercial and residential rights and immunities belonging to Japan in virtue of her treaty engagements with China. You will in addition point out that the invitation of the Japanese Government which originated the present negotiations, had in view a definition invitation of the Japanese Government which origi-nated the present negotiations, had in view a defini-tion of the special interests of Japan and Russia in those regions of the Far East where the interests of the two Powers meet. The Japanese Government could not have anticipated that the Russian Govern-ment, in accepting that invitation, would wish—as might be inferred from Article VII of their Counter-Proposals,—to restrict the proposed definition evolu-Proposals,—to restrict the proposed definition exclusively to the region in which Japan possesses special

I saw the Acting Minister for Foreign Affairs on the 2nd November. He said, as his personal opinion, that Japan is making the same demands only in different form and that those demands are too great. I asked in what respects the Japanese Government are considered to be demanding too much, and I added that we do not ask anything more than the recognition of existing treaty rights and immunities of Japan in Manchuria. He then stated that Baron Rosen had said nothing on the and immunities of Japan in Manchuria. He then stated that Baron Rosen had said nothing on the subject. The only difficulty, he said, is the connection of the Korean and Manchuria railway. To my question whether there are no other difficulties, he answered that the railway question is the only difficulty, although it had been accepted ad referendum; and in conclusion I asked him to use his best influence for the resinforcem; equipment his best influence for the satisfactory solution of the question, as the Japanese Government are fully animated by the spirit of conciliation, and I urged him to advise Count Lamsdorff in the same sense and if possible, to approach the Emperor of Russia on the question. He said that he was willing to do so, and added that Count Lamsdorff will return at the and of this media this media of the process. the end of this week.

No. 25.

MR. KURING TO BARON KOMURA. (Telegram.) Petersburg, November 13th, 1903. Received.

I saw Count Lamsdorff November 12th, and asked whether he had received a copy of the telegram which I had handed to Prince Obolensky and whether any action had been taken in the matter. He answered that he had submitted the telegram to the Emperor, and that before his departure from Darmstadt, he sent under an Imperial order instructions to Baron Rosen to continue negotiations with the Japanese Government. I asked him whether it is on the basis of our last proposal that Baron Rosen was instructed to go on negotiating. Count Lamsdorff said that Baron Rosen had been ordered by the Emperor to examine our last proposal with Admiral Alexieff and to make modification if necessary, and added that at this moment Baron Rosen and Admiral Alexieff must be engaged in the preparation of Counter-Proposals. I remarked to Count Lamsdorff that according to the view of Prince Obolensky, the I saw Count Lamsdorff November 12th, and asked Counter-Proposals. I remarked to count Lamsnorn that according to the view of Prince Obolensky, the connection of Korean and Manchurian railways is the question that divides the two Governments; but the Japanese Government having subsequently the question that divides the two Governments; but the Japanese Government having subsequently modified the article relating to the question, I cannot believe that it is the principal point on which an agreement can not be established. Count Lamsdorff replied that he thinks for his part that it is the Manchurian question which divides the parties, as he had said from the very beginning the Russian Government consider always that this question is a question exclusively between Russia and China, and it must be reserved to his Government to take all proper measures to safeguard their very considerable interests in Manchuria to means of an arrangement with China. I explained to him that Japan is ever ready to recognize the special and considerable interests which Russia has in Manchuria, and that she has no intention whatever of trespassing upon them, but that Japan has a perfect right to demand that the independence and territorial integrity of China shall be respected and the rights and the interests of Japan in that region shall be formally guaranteed. Count Lamsdorff answered that the objection relates to the form rather than the substance of the proposal. In Lamsdorff answered that the objection relates to the form rather than the substance of the proposal. In Manchuria, other Powers also have rights and interests, and Russia cannot enter into special arrangement with each of those Powers regarding Manchuria. I observed that should the Russian Government be in accord with Japan in principle, it is deeply to be regretted that an understanding cannot be reached, merely because of failure to find a suitable formula by which to bring the two Governments to an

Alexieff to the effect that Admiral Alexieff had al-ready forwarded the Counter-Proposals to St. Peters-burg. Baron Rosen added that he had not yet received any instructions on the subject of the Counter-Proposals. Consequently you are instructed received any instructions on the subject of the Counter-Proposals. Consequently you are instructed to see Count Lamsdorff as soon as possible, and after explaining to him Baron Rosen's statements as above, you will say that the Japanese Government are anxious to proceed with the negotiations with all possible expedition; and you will urge him to exert his influence to secure the early dispatch of instructions to Baron Rosen in order that the negotiations may be resumed and concluded without delay.

No. 27.

MR. KURINO TO BARON KOMURA.

Petersburg, November 22nd, 1903. (Telegram.)

Received, ,, 23rd, ,, 1 saw Count Lamsdorff on the 22nd November. He said that the modifications are already in the He said that the modifications are already in the hands of the Emperor; but on account of the illness of the Empress, the former does not attend to any business affairs; hence the delay. I asked him to use his best endeavours to obtain the earliest possible Imperial order on the question. He said in reply that it will be better for me to write him a note giving the purport of instructions I have received from you; then he will immediately send it to the Emperor. At the end of the conversation I asked whether m is not possible for me to get some information about the modifications proposed by Admiral Alexieff. He modifications proposed by Admiral Alexieff. He seemed rather puzzled to give a direct answer; but he said that the Russian Government are ready to ne said that the Russian (overnment are ready to enter into immediate agreement with Japan regarding Korea, even making large concessions, but as to Manchuria, Russia once took possession of the country by right of conquest; nevertheless, she is willing to restore it to China, but with certain guarantees assuring security to the enormous interest which Russia has in Manchuria. While China is still insisting upon her refusal to give such guarantees, it is not possible for Russia to come to any arrangement with a third Power respecting Manchuria, as the question is exclusively between the two countries concerned. Then I said that if I accurately judge the nature of our proposition, it is not the intention of the Japanese Government to internot the intention of the Japanese Government to interfere with direct negotiations between the two Governments concerned, as may be seen from the first part of Article VII of our last proposition; but we only wish the independence and integrity of China as repeatedly declared on the part of Russia and security for our important interests in that province. This is for our important interests in that province. This is not for the purpose of interfering with the affairs of the two Powers concerned, but only to prevent misunderstanding between Russia and Japan regarding the province where both Powers have some interest; and I added that if in principle such an entente could in some form or other be arrived at, perhaps even negotiations between Russia and China might be more easily carried out. He thereupon research his more easily carried out. He thereupon repeated his request for me to write him a note as above mentioned, and that I should add my own opinion in it, and that he would immediately send it to the Emperor. He told me that he expects to have audience on the 25th November at Skernevice and that the note 25th November at Skernevice and could be sent to him towards this evening. I judge could be sent to him towards this evening. I judge from the tone of Count Lamsdorff's conversation the modifications proposed by Admiral Alexieff not be favourable to our proposition regarding China and Manchuria.

Count Lausdorff received me on the night of December 3rd. I handed him a French translation of your telegram of December 1st together with a letter which I addressed to him expressing fully the situation under which the Japanese Government are now labouring. He said that the question requires consideration still, and he is in communication with Admiral Alexieff; but the Emperor is to return December 5th, and he said that he will fully explain the urgency of the matter on the occasion of his audience on the following Tuesday. He thinks he will then be able to send instructions to Baron Rosen. To my question whether it is not possible for him to have audience at an earlier date, be said that Saturday is the fête of Crown Prince, no he said that Saturday is the fête of Crown Prince, no business is transacted on Sunday, and he will be oc-cupied with other affairs on Monday. He promised to let me know the result of his audience next

No. 33. MR. KURINO TO BARON KOMURA.

(Telegram.) Petersburg, December 9th, 1903.
Received, 10th, Alexseff and Baron Rosen to continue the negotiations in accordance with the Counter-Proposals of Admiral Alexieff, but that the Japanese propositions have been fully considered. I asked whether he could inform me of the nature of the propositions on which Baron Rosen is authorized to continue the negotiations. He said that they will be officially communicated within two or three days through Baron Rosen to the Japanese Government.

No. 34.

BARON KOMURA TO MR. KURINO.

BARON KOMURA TO MR. KOMINO.

(Telegram.) Tokio, December 12th, 1903.

Baron Rosen called on me December 17th and under instructions of his Government, officially presented to me the following Counter-Proposals of the Russian Government in reply to our definitive amendments as stated in my telegram of October 200th:—

i. Mutual engagement to respect the independence and territorial integrity of the Korean

2. Recognition by Russia of Japan's prepon-derating interests in Korea and of the right of Japan to assist Korea with advice tending to improve the civil administration.

3. Engagement on the part of Russia not to oppose the development of the industrial and comercial activities of Japan in Korea, nor the adop-on of measures for the protection of those

4. Recognition by Russia of the right of Japan

4. Recognition by Russia of the right of Japan to send troops to Korea for the purpose mentioned in the preceding Article, or for the purpose of suppressing insurrections or disorders capable of creating international complications.

5. Mutual engagement not to make use of any part of the Korean territory for strategical purposes and not to undertake on the Korean coast any military works capable of menacing the freedom of navigation in the Straits of Korea.

6. Mutual engagement to consider the territory.

6. Mutual engagement to consider the territory of Korea to the north of the 39th parallel as a

neutral zone, within the limits of which neither o the Contracting Parties shall introduce troops.

7. Mutual engagement not to impede the connection of the Korean and East China Railways, when those railways shall have been extended to the

8. Abrogation of all previous Agreements between Russia and Japan respecting Korea.

No. 35.

BARON KOMURA TO MR. KURINO

(Telegram.) Tokio, December 21st, 1903. In an interview with the Russian Minister, December 21st, I pointed out the fundamental difference in territorial compass between Japan's original proposals and Russia's new Counter-Proposals, and after fully explaining the reasons which induced the Japanese Government to believe it to be desirable in the general interests to include in the proposed understanding all regions in the Extreme East where the interests of the two Empires meet, I expressed the hope that the Russian Government would reconsider their position regarding that branch of the question. I also informed him fully respecting the

reconsider their position regarding that branch of the question. I also informed him fully respecting the amendments which Japanese Government consider it necessary to introduce into Russia's new Counter-Proposals. Accordingly, in order to remove every possibility of misunderstanding on the part of Russia respecting the attitude of the Japanese Government, you are instructed to deliver to Count Lamsdorff a Note Verbale to the following effect:

"The Imperial Government have examined with great care and attention the new Russian Counter-Proposals of the 1th instant. They regret to find that the Imperial Russian Government did not see their way in those proposals to give to the compass of the suggested understanding the same territorial extension as was decimed essential by Japan. The Imperial Government, in their original invitation to the Imperial Russian Government in August last, endeavoured to make it entirely clear that they desired, with a view to remove from their relations with the Imperial Russian Government all those regions in the Extreme East where the interests of the two Empires meet, and they cannot bring themselves to the conviction that a full realization of that desire can be expected if a the interests of the two Empires meet, and they cannot bring themselves to the conviction that a full realization of that desire can be expected if a large and important portion of those regions is wholly excluded from consideration. Accordingly, the Imperial Government feel constrained to ask the Imperial Russian Government to reconsider their position on the subject, and they hope that the Russian Government will be able to see their way to arrive at a satisfactory solution of the question. The Imperial Government also find it necessary to ask for the following amendments to the new Russian Counter-Proposals:

"a. Article II to read: "Recognition by Russian

"a. Article II to read: "Recognition by Russia of Japan's preponderating interests in Korea and of the right of Japan to give Korea advice and assistance tending to improve the administration of the Korean Empire"

"b. Article V to read: "Mutual engagement not to undertake on the Korean coast any military works capable of menacing the freedom of navigation in the Straits of Korea;" and

"c. Article VI to be suppressed.
"As the principal part of these amendments

"A the principal part of these amendments cannot be said to be in excess of the modifications which were agreed to ad referentum at Tokio and as the Imperial Government consider those changes indispensable, it is hoped that they will receive the ready agreement of the Imperial Russian Government."

In presenting the foregoing note to Count Lams-dorff, you will say that I have spoken to Baron Rosen in a similar sense, and you will also express the desire for an early response.

in a similar sense, and you will also express the desire for an early response.

No. 36.

Mr. Kurino to Baron Komura.

(Telegram.) Petersburg, December 23rd, 1903.

Received, 24th, 24th, 1903.

Received, 24th, 1903.

Upon receipt of your telegraphic instructions, I saw Count Lamsdorff December 23rd at 2 p.m. He told me he had received a telegram from Baron Rosen, stating that the latter had had an interview with you, and that particulars would follow, but such particulars had not been received yet by him. When I handed him the Note Verbale, he said that he would study it together with the report from Baron Rosen, and that he would do his best to send the Russian answer at the earliest possible date; but he added that he would have to communicate with Admiral Alexieff. In conclusion, I stated to him that under the circumstances it might cause serious diffiand an adversary and a conclusion, I stated to mind that under the circumstances it might cause serious difficulties, even complications, if we failed to come to an entente, and I hoped he would exercise his best influence so as to enable us to reach the desired end.

whether any action had been taken regarding our last propositions. He said they had been fully considered; and he asked me to assure you that Baron Rosen will soon be instructed to praceed with the negotiations in a friendly and conclinatory spirit, and he added that he saw no reason why we could not arrive at an entente.

No. 38.

BARON KOMURA TO MR. KURINO.

(Telegram.) Tokio, January 7th, 1904.
Baron Rosen handed to me January 6th the following reply of the Russian Government to our last propositions of December 21st last:—
"Having no objection to the amendments to Article

"Having no objection to the amendments to Actore
II of the Russian Counter-Proposals as proposed by
the Imperial Japanese Government, the Imperial
Government considers it necessary:—

"1. To maintain the original wording of Article
V which had already been agreed to by the Imperial Government, that is to say, "mutual engagement not to use any part of the territory of Korea
for strategical ournoses, nor to undertake on the for strategical purposes, nor to undertake on the coasts of Korea any military works capable of menacing the freedom of navigation in the Straits of Korea

"2. To maintain Article VI concerning a neutral zone (this for the very purpose which the Imperial Japanese Government has likewise in view, that is to say, to eliminate everything that might lead to misunderstandings in the future; a similar zone, for example, exists between the Russian and British possessions in Central Asia).

"In case the above conditions are agreed to, the Imperial Government would be prepared to include the projected agreement an Article of the

in the projected agreement an Article of the following tenor:

"Recognition by Japan of Manchuria and her littoral as being outside her sphere of interests, whilst Russia, within the limits of that province, will not impecte Japan, nor other Powers in the enjoyment of rights and privileges acquired by them under existing treaties with China, exclusive of the establishment of settlements."

No. 39.

Baron Komura to Mr. Kurino.

BARON KOMURA TO MIR. KURINO.

(Telegram.) Tokio, January 13th, 1904.
You are instructed to deliver to Count Lamsdorff a Note Verbale to the following effect which, you will say, is intended to confirm to him the views of the Imperial Government communicated by me to Baron Rosen on the 13th January:—

The Imperial Government, in order to arrive at a pacific solution of the pending questions and to firmly establish the basis of good relations between Japan and Russia, and in addition with a view to protect the rights and interests of Japan, have given most careful and serious consideration to the reply of the Imperial Russian Government which was delivered by His Excellency Baron Rosen on the 6th instant. by His Excellency Baron Rosen on the 6th instant. They have finally come to the conclusion that the

They have finally come to the conclusion that the following modifications are necessary, i. e.:—

1. Suppression of the first clause of Article V of the Russian Counter-Proposals (presented to the Japanese Government through Baron Rosen December 11th) that is to say, "not to use any part of Korean territory for strategical purposes."

2. Suppression of the whole Article (VI) concerning establishment of a neutral zone.

3. The Russian proposal concerning Manchuria to be agreed to with the following modifications;

a. Recognition by Japan of Manchuria and its littoral as being outside her sphere of interest and an engagement on the part of Russia to respect the territorial integrity of China in Manchuria.

b. Russia within the limits of Manchuria will not impede Japan nor other Powers in the enjoyment of rights and privileges acquired by them

ment of rights and privileges acquired by them under the existing treaties with China.

c. Recognition by Russia of Korea and its littoral as being outside her sphere in interest.

4. Addition of an article to the following effect:—
Recognition by Japan of Russia's special interests in Manchuria and of the right of Russia to take mea-

in Manchira and of the right of Russia to take measures necessary for the protection of those interests.

The grounds for these amendments having been frequently and fully explained on previous occasions, the Imperial Government do not think it necessary to repeat the explanations. It is sufficient here to express their earnest hope for reconsideration by the Imperial Russian Government

Russian answer at the earliest possible date; but he didded that he would have to communicate with admiral Alexieff. In conclusion, I stated to him that mider the circumstances it might cause serious difficulties, even complications, if we failed to come to an intente, and I hoped he would exercise his best influence so as to enable us to reach the desired end.

BARON KOMURA TO MR. KURINO.

(Telegram.) Tokio, January 23rd, 1904.
You are instructed to sound Count Lamsdorfi respecting the probable nature of Russia's reply to our last note and when the reply will be delivered.

No. 41.

Mr. Kurino to Baron Komura

MR. KURINO TO BARON KOMURA.

(Telegram.) Petersburg, January 25th, 1904.

Received, " " "

In reference to your telegram of 23rd instant, I saw
Count Lamsdorff January 24th and asked his views
in regard to our last proposals and also how soon the
Russian answer could be given. He was not inclined to enter into details, but said that there are
certain points to which he could not agree. He expects to lay his views before the Emperor next
Tuesday, January 26th, and he hopes to be able to
send an answer before long.

M. de Hartwig whom I saw this afternoon, told me
that the Department of Foreign Affairs is yet in
communication with Admiral Alexieff, and he cannot say how soon an answer can be sent to Japan,

not say how soon an answer can be sent to Japan.

No. 42.

BARON KOMURA TO MR. KURINO.

(Telegram.) Tokio, January 26th, 1904.

As the situation admits of no indefinite delay in the settlement of the questions involved, you will seek an interview with Count Lamsdorff at the earliest opportunity and state to him as an instruction from your Government that in the opinion of the Imperial Government a further prolongation of the present state of things being calculated to accentuate the gravity of the situation, it is their earnest hope that they will be honoured with an early reply, and that they wish to know at what time they may expect to receive the reply. receive the reply.

No. 43.

MR. KURINO TO BARON KOMURA.

(Telegram.) Petersburg, January 26th, 1904. Received, 27th, "

In reference to your telegram of the 26th instant, the Russian Minister for Foreign Affairs said that the Ministers of War, Marine and other authorities concerned are to meet on the 28th January for the consideration of the question, and that their decision will be submitted to the Emperor for sanction, and he remarked that it had been the intention of Admiral Abrieff to come here, but the their decision remarked that it had been the intention of Admiral Alexieff to come here; but that that idea was now abandoned, and his opinion will soon be received by telegraph. Under these circumstances, he says, he is unable to give the exact date when the reply will be given: but he can say it will not be much delayed. He said that he had received reports from official sources to the effect that Japan had sent a considerable number of troops, munitions and war materials to Korea, and asked me whether I could give any explanation regarding it. I simply answered that I knew nothing of such facts, and regretted not being able to give him any explanation. He added that such action on the part of Japan causes a very bad impression, while the two Governments are engaged seriously in such important negotiations. Telegraph me for my information whether the reports are true, and if so, the details.

No. 44. Baron Komura to Mr. Kurino.

Tokio, January 28th, 1904. (Telegram.)

In reference to your telegram of 26th instant, you will see Count Lamsdorff at an early opportunity and say to him that you have been authorized to and say to film that you have been authorized to deny positively the statement that Japan has sent to Korea a considerable number of troops, munitions and war materials. As a matter of fact, no troops have recently been sent to Korea nor any ammunitions have been sent beyond the amount required for the ordinary use of the Japanese troops stationed in Korea. You will then ask him whether he is not able to equality you for your own information. stationed in Notes. For will then ask thin whether he is not able to acquaint you, for your own information, with the nature of the decision taken at the proposed conference of the Ministers on the 28th January, and whether he can indicate the approximate date on which the Russian reply is to be given.

No. 45.

MR. KURINO TO BARON KOMURA.

Petersburg, January 28th, 1904. (Telegram.)

Count Lamsdorff is satisfied with the explanation contained in your telegram of to-day. As to the question regarding the concentration of Russian roops near the Yalu, he does not believe it to be

true, and he remarked that such newspaper reports are very regrettable. I tried to obtain information about the decision of to-day's meeting. He said that it is not possible for him to say anything concerning it as it will not be sent to the Emperor, and that until the respective Ministers have been received by the Emperor respecting the question, nothing can be said definitely. He stated that the Grand Duke Alexis and the Minister of Marine are to be received in audience next Monday, and the Minister of War and himself on Tuesday; and be thinks an answer will be sent to Admiral Alexieff on the latter day. I pointed out the urgent necessity to accelerate the despatch of an answer as much as possible, because further prolongation of the present condition is not only undesirable but rather dangerous. I added that all the while the world is foud with rumours and that I hoped he would take special steps so as to have an answer sent at an earlier date than mentioned. He replied that he knows the existing condition of things very well, but that the dates of audience being fixed as above-mentioned, it is not now possible to change them; and he repeated that he will do his best to send the reply next Tuesday.

Petersburg, February 1st, 1904. (Telegram.)

Received,
Received,
Received,
Regarding your telegram of the 30th January, I saw Count Lamsdorff in the evening January 31st, He says he appreciates fully the gravity of the present situation, and is certainly desirous to send an answer as quickly as possible; but the question is a very serious one and is not to be lightly dealt with. In addition, the opinions of the Ministers concerned and Admiral Alexieff had to be brought into harmony; hence the natural delay. As to the date of seeding an answer, he says, it is not possible for him to give the exact date as it entirely depends upon the decision of the Emperor, though he will not fail to use his efforts to hurry the matter.

(Telegram.)

In compliance with the request of Count Launsdorff, I went to see him at 8 p.m. February 4th. He told me that the substance of the Russian answerhad been just sent to Amiral Alexieff to be transmitted to Baron Rosen. He added that Admiral mad been just sent to Amirat Alexielt to be trans-mitted to Baron Rosen. He added that Admirat Alexielf may happen to introduce some changes so as to meet local circumstances; but in all probability there will be no such changes. He then stated as his own opinion that Russia desires the principle of independence and integrity of Korea and also of necessity, the free passage of the Korean Straits. Though Russia is willing to make every possible concession, she does not desire to see Korea utilized for strategic purposes against Russia and believes it useful for the consolidation of good rela-tions with Japan to establish by common accord a buffer region between confines of direct influence and action of the two countries in the Far East. The above is expressed entirely as his personal opinion, and I cannot say whether the same is the substance of the above-mentioned answer, though it seems to be very probable.

The information that Viceroy Alexieff has been summoned to St. Petersburg is baseless.

THE JAPANESE NAVY.

With regard to the Japanese Navy, the Russian Minister of State for the Navy has said that Japan had organized it with admirable promptitude. NEW RUSSIAN SOUADRON.

The Russian Naval authorities are now endeavouring to make preparations for the organization of a new squadron to be sent to the Far East.

THE FIFTH ATTACK ON PORT ARTHUR.

London, March 23.

According to official information published in St. Petersburg, the Japanese squadron consisting of eighteen ships bombarded, yesterday morning, for forty minutes, the forts of Port Arthur from off Liauti-shan. Five Russians were killed and ten wounded. At noon, the Japanese retired south-ward. Viceroy Alexieff reports that the Russian squadron left their moorings in order to fight the Japanese, but his information did not touch upon actual fighting.

NEWCHWANG.

With regard to the firing heard at Newchwang, it is declared at St. Petersburg that the Russian gunners were performing their target practice. At the forts, four 5-in. guns and 18 field-guns are

JAPANESE FORTS.

The Russians state that the Japanese works extending from Anju to Yuensan cannot be destroyed.

RUMOURED POISONING OF THE AMIR.

Information from Askhaband (in Transcaspia) is published in St. Petersburg to the effect that the Amir of Afghanistan has been poisoned.

SAVE YOUR HA

With Shampoos of Cuticura Soap and Light Dressings of Cuticura.

This treatment at once stops failing hair, removes crusts, scales, and dandruff, soothes irritated, itching surfaces, stimulates hair follicles, supplies the roots with energy and nourishment, and makes the hair grow upon a sweet, wholesome, healthy scalp when all else fails.

LIONS USE CUTICUKA

Assisted by CUTICURA ONTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling halr, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, and for all the purposes of the toilet, as well as by millions of women in the form of washes for ulcerative weaknesses, and many sannive, antiseptic purposes which readily suggest themselves to women and mothers.

COMPLETE TREATMENT FOR EVERY HUMOUR,

Consisting of CUTCUBA SOAR, to cleanse the skin of crusts and scales, and acton the thickened cuticle; CUTCUBA CHETMENT, to instantly allay itching, inflammation, and Irritation, and soothe and heal; and CUTCUBA RESOLVENT PILLS, to cool and cleanse the blood. A SPIGLE SET to often sufficient to cure the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, with loss of hair, when all else falls. Sold throughout the world. Australian Depot: R. Towns & CO., Sydney. British Depot: 7.28, Chartorhouse Sq., London. French Depot: 5 Rue de la Psix, Paris. FOTTER DEUG AND CHEM. CORP., Sole Props., Boston, U. S. A.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, conomical substitute for the cole-brated fluid CUTICURA RESOLVENT, as well as for all other blood purifors and humour cures. Put up in serowcap pocket vials, containing 60 doses. CUTICURA PILLS are alternative, antiscribe, tonic, digessive, and the purest, sweetest, most successful and economical of blood and skin purifors, humour cures, and basic-digestives.

YOKOHAMA: SATURDAY, APRIL 2ND, 1904.

SHMMARY OF NEWS.

During a gale, a junk with 520 bags of barley was capsized on the night of March 26th at

MARQUIS ITO is expected to arrive at Saseho this morning and will leave there by the steamer Hongkong Maru.

MR. HIROSE, President of the Yamanashi Prefectural Assembly, was arrested on March 27th on a charge of fraud.

THE Toyo Kisen Kaisha's steamer Manshu Maru has been taken off the schedule and left Yokohama on March 26th for Yokosuka.

MR. Nozawa, m correspondent of the Niroku Shimpo, says a Moji telegram to the Kokumin, has been prohibited from visiting transports.

THE Government intends establishing an insti- BBFORE long the rules governing the bestowal of tution under the name of Haihei-In, to afford the Victoria Cross will be altered. It has long tution under the name of Hathei-In, to afford the Victoria Cross will be altered. It has long possess a heavy gas, whose radiations are similar accommodation for soldiers injured at the front, been felt that the Cross should be awarded not so to, and probably identical with, radium.

for which purpose the authorities have purchased the building of the Nippon Athletic Society. The place will be completed by August.

CAMBRIDGE has now won the famous Varsity boat race 27 times, against Oxford's 33. Cambridge has scored three wins in three successive

378 THE well-known actor Ichikawa Gonjiro, who was suffering from consumption, died on the morning of March 27th. He was fifty-seven vears of age.

FROST prevailed on March 29th in the district of Fuji, Shidzuoka prefecture, the injury to the crop of barley being estimated at about 40 per

GENERAL YAMAGUCHI, formerly Commander of the Fifth Division, who is now appointed Military Councillor to the Head-Quarter staff, will come up to Tokyo early in April.

383 COUNT KATSURA, the Premier, entertained the members of both Houses and the government delegates on March 30th at the Imperial Hotel. The Houses closed the same day.

K. KATO, . bookseller, of Isezaki-cho, Yokohama, was on March 26th prosecuted by the police on a charge of having sold illustrated post cards which are injurious to social order.

VISCOUNT YOSHIKAWA, Minister for Home Affairs, entertained the local governors who are now in Tokyo, and officials of the Tokyo City Office, on March 27th at 3 p.m. at his official residence.

Mr. R. IMANISHI and a few other merchants of Osaka have purchased the property of the Tokyo Beer Brewing Company for two hundred thousand yen. They will shortly re-open business under the same name.

THE Nichi Nichi's Ujina correspondent states that Lieut. Martini, Naval attache of the French Legation, Tokyo, paid a visit to the captured Russians now confined in a Buddhist temple at Matsuyama, on the 24th ult.

THE Asahi's Saceho correspondent states that on the evening of March 27th, a quantity of powder exploded at the Saseho Naval Arsenal with the result that a wooden building was destroved and four workmen were killed.

CAPTAIN TROUBRIDGE, Naval attaché of the Britis't Legation, proceeded on March 26th to the Palace, accompanied by Sir C. MacDonald, where he had farewell andience of the Emperor. Capt. Troubridge left for England on the 28th.

A TELEGRAM from Sapporo reports that a pupil named H. Morikawa (15) attending the Sapporo School, committed suicide on March 27th by drowning himself in the Toyohira river. The cause of this tragedy is said to be that he failed to pass a scholastic examination.

LIEUT.-COLONEL MACKENZIE FOSS, who has been shooting and exploring on the Siamese frontier, went through Colombo the other day and claims with his party of engineers to have located large deposits of tin-ore fully equal to those of the Straits Settlements

much for an act of bravery in saving an individual life, as for an act of bravery benefiting the nation, or the particular fighting section of it to which the individual belongs. The amendment of the rules, we understand, will be based on this wider interpretation of an act of bravery.

Mr. Ozaki, Mayor of Tokyo, Mr. S. Shimada and four other members of the Lower House en'erfained the foreign war correspondents now staying in Tokyo on the evening of March 26th at the Maple Club, Shiba Park.

THREE men armed with swords and revolvers entered, early on the morning of March 27th, the dwelling of T. Kamoshita, a wealthy farmer, at Kita-toyoshima, near Tokyo. Having tied up all the members of the family, the robbers took away money and many articles from a godown.

MAN anned with a large knife entered, on the night of March 25th, the dwelling of a merchant, T. Shibatu, Furo-cho, Yokohama, and inflicted severe injuries on the latter and his mother. It appears that the culprit was attempting to steal some articles from a cabinet when the occupants awoke from sleep and gave the alarm,

A TELEGRAM from Nagasaki states that a British steamer arrived there on March 29th with iron pipes and tin sheets to be forwarded to Vladivostock. The customs appraisers are examining the cargo with a view to deciding whether it is to be classified as contraband of war. It is believed by the authorities that the material is to be used at a ship-building yard, or for acartridge-filling

PRINCE ZU-LUN and suite left Shimbashi by the 10.30 a.m. on March 28th, arriving in Yokohama at 11.40 a.m. They proceeded to the Oriental Palace Hotel where the Prince was entertained at lunch by prominent Chinese traders. Governor Sufu and other officials were present. About a p.m. the Prince removed to the Grand Hotel. Yokohama was decorated by the Chinese in the Prince's honour. The Prince and party will leave on the 30th by the Gaelic for San Francisco.

A PRO-JAPANESE demonstration is reported to have taken place in Berlin on Feb. 14th, in one of the restaurants in the Friedrichstrasse. Some Japanese, mostly medical students, entered the place, when a German called for three cheers for Japan, which were heartily given by all present. One of the Japanese students mounted a chair, and delivered a little speech in broken German, in which he intimated that he and his colleagues were convinced that the sympathy of Berliners, from whom they had learned so much, was on their side.

MR. GUENTHER, United States Consul-General, writes from Frankfort that the tremendous price which is asked for radium at present will probably be lessened considerably in the future. This wonderful element is only obtained from the ura-nium ores of Bohemia, and the assertion that the price is artificially screwed up by the producers is perhaps only true to a limited degree. Pro-fessor Himstedt, of the University of Freiburg, has continued investigations as to the existence of radium in nature, and has extended those formerly made of rain water and of the soil with reference to the presence of radium. He has arrived at the conclusion that radium occurs more frequently in our surroundings than has heretofore pected. According to his experiments, all natural springs of water and also the petroleum wells

direction of Hwi-chhon. This last-named place is about mid-way between the east and west coasts of northern Korea, and lies on a branch of the road leading to Kang-ge, which is an important city 55 miles from the Yalu's upper water. This intelligence goes to confirm news previously received to the effect cially in a country where means of communication are radically defective. The truth seems to be that the Cossacks are moving actively hither and thither in a region having the Chongpu-Unsan road for its southern · limit, and perhaps a hundred and fifty miles of the Yalu for its northern boundary.

The principal local official in Wiju wires that the Russians are preparing the place for defensive purposes; that the communications are interrupted and that provisions

are very scarce

Another telegram to the Hochi Shimbun is in the sense of the news sent from St. Petersburg that the Russians have retreated to the Yalu. But they have not retreated, as is shown by the Chong-ju affair.

There has been another capture of twelve Tonghaks near Hamheun. The leaders

were executed.

The War Office announces that the Russians who fought at Chongju on the 28th instant were Cossacks belonging to the Chichinsky Regiment of the Zabaikal Army. Further, the troops forming the line of outposts between Chongju and Wiju are the First and Fifth companies of the Argunsky Regiment This Regiment has a fighting force of 890 sabres, with 55 non-combatants and 51 transport troops. Various articles belonging to the retreating Russians were found at Kasan.

CAPTAIN HIROSE.

who also perished on the 27th, had been raised in rank on the 26th and had received the sixth class of the same Order. widest regret appears to be felt for Captain Hirose's death. A man of learning as well as a fine officer, he was universally beloved would then be relieved of the necessity of of for his gentle, unassuming demeanour. Some guarding it, and might also use it as an years ago, after a visit to Russia, he came avenue for importing supplies. But we would home across Siberia, and acquired a fair point out to the *Jiji Shimpo's* correspondent knowledge of the Russian language. Death that the action taken by British subjects in found him at the early age of 37, and it this matter is perfectly explicable without seems as certain as human things can be cerrecourse to the hypothesis that they are tain that his fate was the result of that heroic secretly acting in Russian interests. No-search he made for warrant-officer Sugino thing could be more natural than that they at a moment when the least delay in leaving should desire the continued presence of a the Fukui Maru involved immense risks, gun-boat. The gun-boat is the one emblem

THE AMERICAN-CONSUL QUESTION.

Shanghai telegraphs that the Russian could scarcely reconcile the average Britisher Authorities have intimated to the Govern- to lose everything for her sake. ment of the United States that so long as a state of war exists it will be preferable not to post consuls at the newly opened ports in Manchuria. If that be true, the Washington ed by the Russians at Newchwang, and all and to obtain the rest by diverting money Government will have a problem to solve. Government will have a problem to solve.

NEWCHWANG

Saturday, March 26. The ice is on the point of melting at

Newchang and in a few days the British and American gun-boats will leave the place. Thereafter it is expected that the Russians

Wednesday, March 30.

On the 23th instant the Russian Consul at Chefoo published a notification that any vessel desiring to enter Newchwang must stop at a point 5 miles outside the harbour, and submit to an examination, after which she would be allowed to proceed. The object of this notification was to encourage steamers. to proceed to Newchwang, so as to open a route for the inflow of provisions and muniwhich would enable them to escape detention by Japanese men-of-war, but the Consul naturally refused to give any such docu- Over-sea trade would be effectual ments. The view he is said to take is that by that system, we should think. all the region eastward of the Liao, under which definition Newchwang falls, is belligerent territory, and consequently vessels proceeding thither must take the risk. Besides, consul can not examine the whole of a ship's cargo. He has to rely solely on the manifest, and that is obviously an insufficient guarantee against the smuggling of contraband.

The Jiji Shimpo's Peking correspondent states that a certain British subject in Newchwang, apparently acting in Russian G interests, induced a number of his fellownationals to sign a petition to the Britishi Minister praying that the gun-boat Espicgle might be allowed to remain in the port, Captain Hirose received a step of rank Sir Ernest Satow replied, however, that and the Order of the Golden Hawk the day there being no possibility of treating Newbefore his death. Warrant Officer Sugino, chwang as neutral territory, the Espiegle could not be suffered to lie there, and she would have to take her departure early April. It is plain that the Russians would like to have Newchwang enjoy the facilities connected with neutrality, as they the Fukui Maru involved immense risks, gun-boat. The gun-boat is the one emblem Nothing could have been more characteristic of security in the eyes of the British merchant of the man than this act. It tells in word in the Far East. There are Englishmen in why he was beloved by his subordinates, Newchwang who possess large vested inand how his discharge of difficult duty was terests and probably some are still accompalways successful. He distinguished himself panied by their wives and families. Should in his classes at the Naval Academy and he was a noted student of jujutsu. To whatever he did he carried the same spirit of unfailing earnestness. is the question of continuing or abandoning business from which daily bread is obtained. The best will in the world for Japan's cause

the above story about permits for steamers. Of this aggregate it is proposed to make up Martial law, we are told, has been proclaim- 1,800,000 yen by administrative economies,

the other hand, according to Shanghai, the Russian officials have issued a notification that ships entering or leaving the port-must stop near the eastern lighthouse and submit to examination, the time for such operation being from 6 a.m. to 6 p.m.

From Newchwang comes intelligence that Yalu a line from Wiju to Chhosan, a junks, but great doubts are entertained as by a party of Russian soldiers under a Russian distance of 185 miles. But of course such to the probable success of the manceuvre officer. The owner of the place was tied up extension is quite out of the question, especially to the force of the current at this time and his store pillaged. But justice seems of the product of the pr to have been rendered speedily. The Russian Consul hastened to the place, released the Japanese store-keeper and took steps to have him compensated to the extent of \$337, which money was duly paid to him on the 3rd instant.

Thursday, March 30.

We stated in our last issue that the Russians had declared a state of siege at Newchwang. It is now alleged that they have promulgated a regulation that all pertions of war. It is stated that after the sons exporting goods from the place must issue of the notification British and German pledge themselves not to carry the goods to shipping firms in Chefoo applied to the either Japan or Korea, the pledge to take Japanese Consul, Mr. Mizuno, for passes the form of a sum of money representing the market value of the goods, which money will be lodged with the Russian Authorities. Over-sea trade would be effectually stopped

THE WAR TAXES.

The Budget Committee of the Lower House held a meeting on the 25th instant, and came to the following conclusions:-

The Business Tax to be increased as desired by the Government.
The Income Tax to be increased as desired by the

Government. The Sake Tax to be increased as desired by the overnment.
The Exchanges Tax to be increased as desired by

The Shooting Licenses Tax to be increased as desired by the Government.

The Shooting Licenses Tax to be increased as desired by the Government.

The Mining Tax to be increased as desired by the

Government.
The Soy Tax to be increased as desired by the Government.

The Registration Tax to be increased as desired by the Government.

The Imported Sugar Tax to be increased as desired

by the Government.

The Salt Consumption Tax
The Salt Fabrics Tax

rejected.

The Silk Fabrics Tax

The Kerosene Tax to take the form of an increase of 3.2 sen per gallon, cauned and uncanned alike.

The Sugar Consumption Tax—
Class I—3 yen.
Class II—3.30 yen.
Class III—3.30 yen.
Tobacco Tax, all manufactured tobacco to pay 150 per cent. a. valorem instead of 100 per cent.

The Lord Tax to be increased to a change.

The Land Tax to be increased to 4.3 on agricultural land, building Linds being taxed as proposed by the Government.

The results so far as income to the Treasury is concerned, are :-

The latest news from Chefoo contradicts Thus the total reduction is 6,395,317 yen. 1,800,000 year by administrative economies,

MAROTHS ITO.

Saturday, March 26. On the 23rd instant Marquis Ito gave an entertainment in Seoul. It is stated that after dinner Marquis Ito openly asked the Korean officials present what kind of ceremony their country had formerly observed towards China. On receiving an accurate reply, His Excellency asked whether anything of this ceremonial remained. The Koreans answered that it had been absolutely abandoned after the Shimonoseki Treaty The Marquis next inquired whether any such ceremonial was observed towards Russia or whether there was any idea of observing it. The reply was emphatically in the negative. "Then," said the Marquis, " I rise to propose the health of His Majesty the Emperor of Great Korea." These preliminaries and their sequel are said to have produced a strong impression upon the Korean officials. It was indeed a dramatic kind of procedure, well calculated to remind the Koreans of the cardinal fact that, nationally speaking, they owe every thing to Japan.

Monday, March 28. The immediate result of Marquis Ito's visit appears to be that steps will be taken to reorganise the government on lines more or less remotely like those adopted by Japan at the time of the Restoration. There is, of course, a radical difference in the two situations, for in Korea the central administration is already under the Sovereign's direction and no occasion exists to make any sweeping re-construction. Hence we can not clearly discern what is intended. No difficulty offers in determining what is wanted and what is radically wanting, namely, official integrity. But that is scarcely a matter of system. We must be content to await some fuller exposition of the steps contemplated.

On the occasion of the function given to Marquis Ito in the Palace on the 25th inst., the Emperor conversed with the Ambas-sador for two hours, and accompanied him to his palanquin when the time for leavetaking came. In the Kokumin we read an expose of the counsels given by the Marquis. He is said to have strongly condemned the custom of officials offering all kinds of conflicting advice to the Throne, and to have insisted that the Cabinet should act as a filter for such advice and should accept full responsibility for it. His Excellency further insisted that Korea's history indicates her greatest misfortune to be perpetual struggles for political power among ambitious men, and consequent involving of the Court in these intrigues. It should be the prime endeavour of the Sovereign to educate a spirit of harmony and co-operation, and His Majesty, carefully segregating himself from all de-tails or petty affairs, should confine his attention and direction to cardinal matters only.

The Emperor is reported by the same authority to have received this advice with most unequivocal indications of pleasure and appreciation. His Majesty begged the Ambassador to remain in Seoul, so as to assist in giving practical effect to his wise counsels. But the Marquis pleaded multiplicity of duties awaiting him in Japan and troops in that direction, the enemy's explained that his sojourn in Seoul must be force there is really small. It is doubtvery limited. The Emperor then asked him to regard Korea as his country villa, and to visit it as often as circumstances would permit.

Marquis Ito left Seoul on the 26th instant. He is said to have had an extraordinary it would seem that there are only 100 table.

farewell. The Imperial State carriage was all military intelligence is too fragmentary again provided for his use on the railway.

Thursday, March 31. Marquis Ito arrived at Saseho on the morning of the 29th instant. He was saluted by American, English, German and French men-of-war now lying in the port. His Excellency's plan was to go on by ship to Kobe, reaching that place on the 30th.

KOREA.

Saturday, March 26.
The Korean Government formally announced the opening of Yong Am-pho on the 24th instant.

Lieut.-Colonel Nozu has been definitely

been transmitted to the Seoul Government. He says that between February 2nd and March 15th the total number of Russian Of these a thousand proceeded in the direction of Chhosan, three thousand took up miles above Wijn. Previously nothing had from Wiju.

Is it true, we wonder, that the Russian what a farcical character do the Tsar's complaints assume that Japan's first belligerent acts preceded any declaration of war. tually on the 2nd of February, namely, 4 days before the rupture of diplomatic rela-tions and 6 days before the first act of war on Japan's part, the Russians themselves had commenced the war by moving troops into Korea; that is to say, into the very territory which they subsequently pretended to be neutral. There never was a more ludicrous farce. They began to invade Korea at the very time when Count Lamsdorff was making pacific declarations to Mr. Kurino in St. Petersburg, and it was one of their own ships-the Korietz-that fired the first shot on the 8th of February outside Chemulpo. Yet they pretend that the Japanese began the war without due notice. The plain truth is that had the Japanese Government delayed a little longer, Pyong-yang and probably Seoul would have been occupied by Russian troops, while Viceroy Alexieff was leisurely examining whether some "local modifications" of St. Petersburg's answer might not be necessary before presenting it to the Foreign Office in Tokyo.

The Emperor of Korea has presented to the Japanese naval forces in Korean waters 20 dozens of champagne, 50 boxes of cigars 30,350 boxes of cigarettes of sorts, 30 tubs of sake and 50 oxen.

Monday, March 28. Accounts from the north-east of Korea indicate that although there has been a great deal of talk of the doings of Russian Tumen aggregate as many as 2,500 men. Kyong-song is one of the strongest positions on the north-east coast, and send-off, all the Korean high officials and Russian soldiers there. On the other hand,

all the members of the foreign Corps Diplo- it is tolerably plain that the Japanese have matique attending at the station to bid him, some force in Yuensan, but the truth is that and untrustworthy for the construction of any clear ideas.

But although the Russians have not apparently crossed the Tumen on the north-east in any force, they are said to be collecting in large numbers on the north side of the river, their place of concentration being Chong-song (not to be confounded with Chhang-song on the Yalu). From that region the Korean local officials send word that the Russians are murdering the people, seizing provisions and otherwise behaving with great violence, so that the inhabitants are flying from their homes and many are without means of sustenance. The unfortunate offi-cials ask plaintively "What are we to do?"

On the other hand there can be no quesappointed military adviser to the Korean tion that the Russians are vigorously fortiforment for a period of 5 years.

The chief local official at Wiju has sent a pear to be on the northern bank of the river. pear to be on the northern bank of the river. report by messenger to Seoul, whence it has They extend from Antung to Chhang-song, a distance of over 40 miles. At Chhang-song four forts are said to have been erected March 15th the total number of Russian and at Antung seven have guns actually troops that crossed the Yalu was 4,500 mounted, while six others are in the con-Of these a thousand proceeded in the direction process. All these preparations would doubtless render the passage of the their quarters in Wiju and 500 moved south-river very difficult at any point between ward. Chhosan is far up the Yalu—108 Antung and Chhang-song. But the position has one very great and palpable weakness. been heard of Russian troops higher up the Its base of supplies is Liao-yang, at m disriver than Chhang-song, which is 44 miles tance of 180 miles from Antung, and the roads between the two places are of the worst possible description, especially at this forces began to cross the Yalu into Korea time of year. Indeed it is already rumoured on the 2nd of February? If it is true, then that the Russians on the Yalu are in great straits for provisions, and that they are beginning to eat their transport animals.

The civilization that the Russians are spreading at the point of the bayonet in the "benighted regions" of the Far East is a noble product of the heirs of all the ages. Even at Smolensk, within their own lines, these fine fellows have to be executed in batches to restrain them from pillage and rape. What must they be when they find themselves enjoying the splendid freedom of an enemy's country?

Mr. Hayashi, Japanese Representative in Seoul, has applied to the Korean Govern-ment for permission for Japanese subjects to engage in fishery operations along the coasts of the three provinces, Pyongsan-do, Hwang-hai-do and Chhungchhong-do. These are the western provinces of Korea; that is to say, the provinces where military movements are now supposed to be taking place on the largest scale. It is therefore of great moment that an ample supply of fish should be forthcoming. So long as Japanese troops work within a reasonable distance from the sea, they may be said to carry their commissiariat with them. Already the Japanese enjoy fishing privileges on the shores of five other Korean provinces. If the above application be granted—as we presume it will be—they will be able to fish everywhere on the coast of Korea. It can not be doubted that the resulting development of the sea's resources would be considerable.

On the 25th instant Marquis Ito and the members of his staff, together with Mr. Hayashi, Mr. Hagiwara and others had the honour of lunching with the Emperor of ful whether all the Russian troops posted Korea in the Palace. Japanese newspapers here and there in the vicinity of the note that although this is not the first instance of foreigners being entertained in the Palace, it is actually the first instance of the Emperor himself sitting down with them to

The two leaders of the Hamheun riot-

that is, the Tonghak instigators—have been executed.

It is alleged that the Russian troops have retreated from Chonju to Son-chhon, a distance of 19 miles, breaking all the bridges and destroying the telegraphs en route. Son-chhon is 50 miles south of Wiju.

Tuesday, March 29.

Mr. Hayashi is said to have applied for permission to lay a line of telegraphs from Pyong-yang to Anju. Apparently this must be a question of increasing the capacities of the present line.

Reports continue to come from Chemulpo that the place is crowded with petty tradesmen and adventurers who have come to make capital out of the war. These people are so numerous as to be a nuisance.

We have been hearing of various changes of plan as to the personality of the special ambassador who is to be sent from Korea to Japan. Apparently the Court has reverted to its original intention, and Prince Li Chiyong will be the envoy.

Wednesday, March 30.

Marquis Ito's brief stay in Seoul is said to have produced an excellent effect so long as he was in sight, but the best informed persons are convinced that Korea will drift back into its old groove so soon as ever the echoes of Marquis Ito's wise words grow faint. Already there are evidences of a recrudescence of political intrigues. The Min section, supporters of the Prince Im-perial, and the adherents of the Lady Om, led by Chyo Pyon-sik, are beginning to renew their activities, and it is further stated that Li In-yong and his brother have addressed to the monarch a secret memorial, pointing out that although Japan enjoyed the sympathy of Western nations at the outset, she has incurred the hostility of France and Germany by using Korean territory, for belligerent purposes and by her arbitrary conduct in general towards Korea. Therefore, these politicians urge, Korea's obvious route to safety is to cultivate French and German friendship, and thus open a path to an ultimate understanding with Russia. These two Li are the men who advised the Emperor to take refuge in the French Lega tion when a crisis recently came in sight.

The immediate subject of political dispute is the office of Gisei Daijin, which appears to be a new post, having for functions the giving of advice about administrative affairs in general. Each party has a candidate of its own.

Prince Li Chi-yong, it is reported, may be the bearer of a fresh communication about the Korean refugees, when he comes as special ambassador to Japan. But at present only the Minister of the Household is in favour of entrusting him with such a commission.

LADIES' PATRIOTIC ASSOCIATION.

We understand that Princess Iwakura, President of the Japanese Ladies' Patriotic Association, has been graciously pleased to accept a contribution of one thousand yen, from Nobel's Explosive Company, Limited, Glasgow, through their agents Messrs. Mollison & Co., of 48, Yamashita-cho, Yokohama and 70, Kyo-machi, Kobe, towards the relief of the wives and children of Japanese soldiers and sailors called to the front, and also a contribution of one hundred yen from Mr. and Mrs. J. Pender Mollison towards the same object.

CHINA.

Monday, March 28. The Russian Representative in Peking has addressed a remonstrance to the Chinese Government on the subject of China's neutrality. He alleges that it is not strict neutrality at all but neutrality essentially benevolent to Japan. In support of his allegation he adduces two alleged facts. One is that certain Japanese marines who landed at Tung-chou in Shantung, were allowed by the Chinese to return to Japan without restraint; the other that Japanese transports constantly call at Chefoo and Yung-ching where every facility is given to them by the local authorities. In consequence of this complaint the Inspector-General of Customs has been requested to investigate the facts, and the Chinese local authorities have meanwhile been reminded of the necessity of observing strict neutrality. But it is em phatically denied in Japan that any transports have called at either Chefoo or Yung-ching; and while it is admitted that, owing to stress of weather, a small party of marines did land at Tung-chou, it is declared that they were not allowed to leave without taking an oath to refrain from further participation in the war. The public would like to learn, on the other hand, how Russia proposes to reconcile with any principle of strict neutrality her own conduct in the case of the Mandjur.

Two cruisers of the Chinese Northern Squadron have been ordered to patrol the coast of Shantung to prevent contraband of war from reaching Liaotung.

Tuesday, March 29.

From telegrams received in Tokyo it appears that Viceroy Yuan has enlisted ten thousand men in Honan and Shantung, who are to be trained so as to take the place of the guards that have been sent to the northeast, namely, into the West-Liao district.

General Ma's troops are said to be posted along the Great Wall on the Manchurian border.

Between Ying-kow and Liaoyang along the Liao River, the Russians are said to have built 13 forts and 3 look-out towers.

It appears that Sir Robert Hart, convinced of the absolute necessity of providing China with suitable armaments, recently memorialized the Throne in favour of imposing a land tax. The rate suggested was small, but nevertheless on the hypothesis that one half of the land in the 18 provinces is arable, there would result a revenue of 400 millions of yen. The Emperor and Empress are reported to have welcomed the project, and printed circulars explaining the details were sent to the various Viceroys and Governors. But the Jiji Shimpo's Peking correspondent, who sends the news, says that Sir Robert regards with great doubt the chances of his project being put into operation.

China is bound by her recently concluded treaties to make provision for the registration of foreign trade-marks within her dominions. But as she did not show any disposition to give effect to this engagement, the Japanese and the American Representatives approached her on the subject, with the result that she got as far as compiling regulations which, however, remain to be carried out.

It appears from telegrams received in Tokyo that China's foreign trade for 1903 aggregated 540 million taels, imports standing for 326 millions and exports for 214 ment at C millions. The Customs revenue was 30 ward. To millions, being half a million greater than the revenue for any previous year. Another way.

ther interesting fact is that Japan's share in the total was 80 million taels.

PIGEON BAY.

Pigeon Bay is now a historical place. It is the place where indirect fire has been employed by men-of-war on a scale hitherto quite unprecedented. The Asahi Shimbun says that the range thence to Port Arthur is only some 9,000 metres, or a little over 5 miles, which is a very convenient range for such a purpose. Guns can not be trained so as to drop shells over a hill 300 feet high—that is the greatest height of the intervening hills at Pigeon Bay—if they are required to fire at a short range, but it is easy even for an uninitiated person to see that in the case of a long trajectory a projectile may reach a maximum height of 300 feet in its flight without taking anything like a vertical course at the time of descent. The Russian engineers had of course recognised that Pigeon Bay was a weak spot in the defences of Port Arthur, and they had accordingly planned six batteries, all of which were in course of construction when war broke out. But none had reached the stage of having guns mounted. Mines, however, are said to have been laid. They did not, however, prevent the Yashima and the Fuji from taking positions in the Bay on the 22nd inst., and bombarding Port Arthur over the hills. From what point Admiral Togo carried on his previous bombardments we do not know, neither does he make any attempt-and the omission is noteworthy—to estimate the damage done by the fire of the Yashima and the Fuji. It by the fire of the Yashima and the Fuji. It may be presumed that the Japanese staff knew all about Pigeon Bay and the state of its defenses from the outset, but to know exactly what temporary measures were adopted by the Russians at any moment would scarcely have been possible. Between sunset and surrise on the possible two or three hundred terredees. any night two or three hundred torpedoes might have been moored in Pigeon Bay so that a ship attempting to take a position there would have gone to almost certain death. But truly it seems possible to take risks where the Russians are the enemy. Is that the case in military affairs also?

THE " BAYAN."

A telegram received in Tokyo says that the Vossische Zeitung learns from a Russian source that the armoured cruiser Bayan, on the 16th instant, ran on one of the mines laid by the Japanese and was blown up, only a small number of her crew escaping. This incident, the German paper adds, was left concealed for some time, but has now leaked out. The Bayan was a fine new ship of 7,800 tons displacement, with an armament of two 8-inch and eight 6-inch quick-firers. She was the only armoured cruiser in the Port Arthur squadron. It will be remembered that on the night of the 10th instant, two Japanese destroyers were despatched upon a minelaying expedition and that they were said to have effected their purpose. Of course the whole story may be untrue.

The same journal says that the Russian Government is persistently reported to have purchased two large, fast German steamers, which are to receive some kind of armament at Cronstadt and then to be sent eastward. The German owners of the steamers, however, deny the story altogether, as well they may be sent to have sent to the steamers.

BARON KOMURA'S SPEECH.

course of negotiations between Japan and Russia from the commencement to their termination. These negotiations lasted for more than half a year and are of a most complicated nature. Now I will try to briefly explain to you, Gentlemen, the main points of

briefly explain to yon, Gentlemen, the main points of these negotiations. When, upon the sudden outbreak in North China of the Boxer troubles in 1900, the Powers sent forces to Chihli for the relief of their Representatives and nationals and were taking action in barmonious cooperation, Russia despatched a large army into Manchuria and finally took possession of the whole of that province. She repeatedly declarded at the time that this despatch of troops was simply for suppressing the Chinese insurgents and that she was determined to respect the sovereignty and territorial integrity of China in Manchuria, and that consequently her occupation of that province, which was the result of inevitable circumstances, was intended to be merely temporry. Nevertheless on that consequently her occupation of that province, which was the result of inevitable circumstances, was intended to be merely temporary. Nevertheless on more than one occasion she tried to induce China to conclude a treaty of a nature tending to impair China's sovereignty and incompatible with the treaty rights of the Powers. Accordingly, on each occasion the Imperial Government warned both Russia and China, and Russia finally concluded in April, 1902, a convention providing for the restoration of Manchuria. In accordance with the stipulations of the Convent in, Russia commenced to prepare for the restoration, and in fact a partial evacuation had already been effected when in April last year, there was a sudden change in her attitude, and not only were the withdrawal of her forces from Manchuria and the restitution of the administration to China suspended, but also various additional conditions were demanded from China. This action is believed to have been due to divided comsels in Russian Government circles regarding the solution of the Manchurian question, and to the subsequent ascendency of the party in favour of permanent occupation.

ascendency of the party in favour of permanent occupation.

The development of affairs in Manchuria received the most careful attention at the hands of the Imperial Government. The maintenance of the independence and territorial integrity of Korea is of the upmost, importance to the safety and repose of this Empire and is in fact our traditional policy; while in the event of the absorption of Manchuria by Russia, the separate existence of Korea would be constantly menaced and the firm establishment of peace in the Far East would become impossible. The Imperial Government, therefore, having regard to the future well-being of the Empire, deemed it necessary for consolidating the peace of the Extreme East and for securing the rights and interests of the Empire to open, as soon as possible, negotiations with Russia with aview to a friendly definition of the interests of the two countries in Manchuria and Korea where those interests meet, and thereby to remove every cause of future conflict between Japan and Russia. The Japanese Government, therefore, instructed their Representative at St. Petersburg on July 28th, 1903, to bring their wishes to the attention of the Russian Government and to request the latter's concurrence. bring their wishes to the attention of the Russian Government and to request the latter's concurrence. The Russian Government willingly assented, and the Russian Minister for Foreign Affairs announced that he had obtained Imperial authority to open negotiations on the subject. Accordingly, on the 12th August last, the Imperial Government presented to the Russian Government through their Minister at St. Petersburg, as a basis of negotiations, proposals substantially as follows:—

* Mutual engagement to respect the independence.

stantially as follows:

1. Mutual engagement to respect the independence and territorial integrity of China and Korea.

2. Mutual engagement to maintain the principle of equal opportunity for the commerce and industry of all nations in China and Korea.

3. Reciprocal recognition of Japan's proponderating interests in Korea and Russia's special interests in railway enterprises in Manchuria, and mutual recognition of the respective rights of Japan and Russia to take measures necessary for the protection of the above mentioned interests so far as they do not conflict with the principle of Article I and Article II.

4. Recognition by Russia of the exclusive right of Japan to give advice and assistance to Korea in the interests of reform and good government.

5. Engagement on the part of Russia not to impede the eventual extension of the Korean railway into southern Manchuria so as to connect with the

impede the eventual extension of the Korean railway clause relating to a neutral source, as it may be into southern Manchuria so as to connect with the East China and the Shanhaikwan-Newchwang lines. About ten days after the presentation of the proposals of which the above are essential points, the Russian Minister for Foreign Affairs suddenly suggested the transfer of the seat of negotiations to original proposals as regards Korea, and on con-

The following is an accurate translation of the negotiations would be facilitated by conducting them at the Russian capital, but also the House of Representatives on the 23rd instant:—

Gentlemen,—It is a great honour to me to make a brief statement before this House regarding the course of negotiations between Japan and Russian from the commencement to their termination. These the proposed transfer, but the Russian Minister for Foreign Affairs was insistent, assigning as the reason for his attitude the Czar's contemplated trip abroad, etc. Again, when the Imperial Government requested the Russian Minister for Foreign Affairs to accept in principle our proposals as a basis of negotiation, he only agreed to take them in conjunction with the Russian counter-proposals as such hasis. The Imperial Government, deeming it disadvantageous to delay any longer the opening of discussions, agreed at length to transfer the seat of negotiations, and requested the Russian Government to present as soon as possible their counter-proposals. It was not until nearly a month later, the grd October, that the said counter-proposals were presented.

In those counter-proposals, Russia while having no objection to engage to respect the independence and

In those counter-proposals, Russia while having no objection to engage to respect the independence and territorial integrity of Korea, declined to extend the same engagement to China, and so far from consenting to recognize the principle of equal opportunity for the commerce and industry of all nations in that country, requested Japan to acknowledge Manchuria and its littoral as entirely outside her sphere of interest. She further proposed various restrictions upon Japan's freedom of action in Korea; for instance, while recognizing Japan's right to despatch troops, when necessary, for the protection of her interests in Korea, Russia demanded previous notice in case of, such despatch, and she refused to allow Japan to use any portion of Korean territory for strategical purposes. She went so far, in fact, as to propose to establish a neutral zone covering all

Japan to use any portion of Korean territory for strategical purposes. She went so far, in fact, as to propose to establish a neutral zone covering all Korean territory north of the 39th parallel, that is to say, more than one third of the entire Korean Empire. But, as the maintenance of the sovereignty and territorial integrity of China in Manchuria is absolutely essential to the preservation of the independence of Korea and as such maintenance was none other than a principle which had been voluntarily and repeatedly declared by Russia herself, and moreover as it was considered necessary to keep uninjured the commercial interests of all the Powers concerned, upon the strength of the Russian engagement to respect treaty rights, the Imperial Government decided to maintain to the end their proposal on that subject, and necessary amendments to other Articles were also made. For instance, the imposition of any restriction on Japan in sending troops to Korea should be struck out. A neutral zone, if it was to be created, should be established on both sides of the boundary line between Manchuria and Korea with the same extent either way—i.e. fifty kilometres on each side. With these amendments, several interviews took place with Baron Rosen from sides of the boundary line between Manchuria and Korea with the same extent either way—i.e. fifty kilometres on each side. With these amendments, several interviews took place with Baron Rosen from the 6th October last, and as the result of repeated discussions, in which some of our amendments were accepted while as to others no agreement was arrived at, our definitive amendments were presented to Baron Rosen on the 30th of that month and the Russian Government were asked to consider them. Although we frequently pressed for an answer, the Russian reply was again greatly delayed and it only reached us on the 11th December. This embodied the 2nd Russian counter-proposals. If the regret of the Imperial Government at such delay was deep, their disappointment at the contents of the reply, when it was received, was still more profound, for in it the clauses relating to Manchuria were completely suppressed, thus restricting the proposed convention entirely to Korea, while on the other hand the original demands regarding the neutral zone and the non-employment of Korean territory for strategical purposes were again revived. But the object of the convention was, as above stated, the removal of all causes of future conflict by a definitive settlement of all questions between the two countries at points where their interests meet, and if Manchuria were placed outside the purview of the arrangement, and a moiety of the problem were thus to remain unsolved, the result would plainly be at variance with the aims for which the negotiations were inaugurated. Consequently, on the 21st of December last, the Imperial Government asked the Government of Russia to reconsider their position on the subject of Manchuria, and again requested, with respect to Korea, the suppression of the restrictions as to the employment of Korean territory, and they also proposed the entire deletion of the clause relating to a neutral zone, as it was considered that, if Russia would not agree to its extension into Manchuria, it would be only fair not to

The Imperial Government, however, not on the consideration that the progress negotiations would be facilitated by content them at the Russian capital, but also of the changes effected in the Russian rative organization in Manchuria and the of a viceroyalty of the Far East, apprehend the transfer of the seat of negotiations to regarding Manchuria, but in reality it was not so, for Russia might seem to be a concession on the part of Russia regarding Manchuria, but in reality it was not so, for Russia made, it conducts the content of Russia made it conducts to content to proposiinight seem to be a concession on the part of Russia regarding Manchuria, but in reality it was not so, for Russia made it conditional on certain propositions regarding Korea to which Japan could never agree. Again no stipulations were to be made as to the territorial integrity of Manchuria and the above mentioned clause, unaccompanied by assurances concerning territorial integrity, would be practically valueless. Accordingly, the Imperial Government, recognizing the absolute necessity of causing Russia to engage herself to respect the territorial integrity of Manchuria, and finding no margin for further concession in regard to Korea, decided to firmly insist upon their amendments, and once more requested on the 13th January last reconsideration by the Russian Government. They subsequently repeatedly instructed the Japanese Minister at St. Petersburg to ask for a reply. The Russian Government, however, did not give any answer, neither did the Russian Minister for Foreign Affairs, in his interview with Mr. Kurino held so late as the 3tst January, afford even an indication as to the date whereon the reply would be presented.

even an indication as to the date whereon the reply would be presented.

Upon the whole, while the Imperial Government invariably met Russia in a conciliatory and frank spirit, in the hope of arriving at a speedy solution of the situation by yielding to Russia's wishes so far as they could do so without impairing the vital interests of Japan, Russia always unduly delayed her replies, or proposed such amendments as were altogether inconsistent with the idea of an amicable settlement, thus making the situation more and more complicated. Besides Russia, while professing peaceful intentions on the one hand, made on the other great naval and military preparations, despatching all her thus making the situation more and more complicated. Besides Russia, while professing peaceful intentions on the one hand, made on the other great naval and military preparations, despatching all her most powerful war-vessels to the Extreme Orient and sending military reinforcements tens of thousands strong to Manchuria and the neighbouring regions. Unusually great activity was shown by her in purchasing and transporting arms, animunition, stores and coal to the same region, so that it was placed beyond the range of doubt that Russia had, no sincere desire for conciliation and only aimed at compelling us to yield to her designs by force of arms. Especially towards the end of January the warlike activities of Russia were so far accelerated that, had Japan permitted any further procrastination, the Empire would certainly have been placed in serious danger. Although the Imperial Government entertained a most sincere desire for peace, yet, in the face of such circumstances, they could not avoid deciding, after a full and careful survey of the situation, to break off the negotiations with Russia and to take all necessary measures for self-defence. Accordingly, on the 5th of Feb., they issued telegraphic instructions to the Japanese Minister at St. Petersburg to announce to the Russian Government that the Imperial Government had terminated negotiations relative to the proposed Russo-Japanese convention, that they would take such independent action as they might deem best to defend and consolidate their menaced position and to protect their established rights and legitimate interests, and that they would sever diplomatic relations with Russia and withdraw their Legation. In accordance with those instructions our Minister at St. Petersburg made the communication on the 6th February last.

nons our simuser at St. Feetsburg made the com-munication on the 6th February last, Such is, Gentlemen, a brief account of the negotia-tions with Russia. As for the details, the document just presented to the Diet will afford you full in-

THE FACTORY GIRLS' CONCERT.

The promoters of the concert for the benefit of the factory girls, held on Friday, March 18th, desire to thank all those who so kindly assisted by taking part, and by selling tickets, also the directors of the Public Hall and Mrs. Manley for reducing their prices for the charity; Messrs. Thwaites & Co. for lending the piano, and the Japan Mail for printing the tickets and programmes at cost price; also the Japan Mail, the Japan Gasette, the Japan Herald, and the Japan Advertiser for advertising the concert free of charge. The concert realised the sum of yen 321.50, which has been handed over to Mrs. E. W. Townend and Mrs. H. McArthur, the local Treasurers of the Fund.

WAR NOTES.

Saturday, March 26.

Two hundred and twenty-nine Japanese subjects hitherto residing in Blagovetchensk have been sent to Tsitsihar under Russian

Monday, March 28.

General Kuropatkin is now said to have reached Mukden and after a consultation with Viceroy Alexieff, to have proceeded to Harbin where his head-quarters will be. Previous intelligence had indicated the 27th as the probable date of Kuropatkin's arrival at Mukden. He, of course, is to be com-mander-in-chief in Siberia and Manchuria, while General Linevitch will, it is said, command the forces operating from Liaoyang to the Yalu.

At Newchwang the withdrawal of American and British residents is said to be regarded by the Russians as an indication that secret intelligence has been received of a projected lauding of Japanese troops. They—the Russians—had counted on the presence of English and American residents as a deterrent against military operations and they are now adopting measures of increased vigilance. But inasmuch as they themselves had paid not the least attention to the presence of such nationals in the place, it is hard to suppose that they credited the Japanese with greater forbearance.

The Governor of Shantung is said to have telegraphed to Peking that the Germans seem to be about to post troops along the newly constructed line as railway-guards. He requests that a protest shall be addressed by the Foreign Office to the German

Takeshiki reports that the Russians have been very unsuccessful both at Port Arthur and at Dalny in their mine-laying operations. In consequence of the gales and high seas prevailing throughout the month, the torpedoes have either drifted or been carried away from their moorings, so that many of them are now floating harmlessly on the surface in full view.

From Moji comes news that a German steamer, the Brisgavia (?) has been seized at that port, having on board 7 field pieces and 208 tons of material for man-of-war construction. Her master pleads that he is bound for Shanghai and the matter is under

investigation.

A Japanese subject who left Kinchow on the 25th instant reports that there are about 30,000 Russian troops there and that they have provisions for three months only. On the east, north and west gates preparations are made to mount quick-firing guns. The gates were all closed on the 17th instant and kerosene was placed under a quantity of hay inside the north gate, evidently with the they ultimately made their way to Chesoo intention of firing the town in case of retreat. Ten Japanese subjects and seven Chinese Outside the southern gate at a distance of about 60 yards there are several batteries and on a neighbouring hill there are seven, the guns (27 in number) being mounted so as to command all the approaches and the ground at the base of the forts being mined. On the 19th and 20th the railway service to Mukden was interrupted, probably because the bandits had injured the line.

Tientsin reports that the Russians are

to ascend the river as far as the Chinese

city.
The s.s. Chefoo attempted to reach Port Arthur on the 24th instant, but was stopped by a Russian destroyer at point 10 miles distant from the port, and had to return to her place of departure (Chefoo).

Some petty newspaper recently published a rumour to the effect that one of the men summoned for duty with the colours attempted to escape, was captured and shot. This tale grew as tales often do, and by and bye people were talking of a grand execu-tion of 25 recusant soldiers at Tsukudajima. Under the circumstances the War Office has been questioned, and it emphatically denies that any one has been shot or that any one could be lawfully shot for such an offence. Naturally there have been attempts to avoid service and to remain earning a livelihood for wife and children; thirteen attempts in all. But in every case without exception the men subsequently joined and all are now serving loyally.

The raising of the Varyag is said to be proceeding most successfully, but as the Kokumin's correspondent, by whom the intelligence is conveyed, speaks of 12-inch guns having been already raised from the vessel, his details are obviously coloured by his imagination. At all events 8 guns of sorts have been taken out of her. They are all said to be serviceable, and it is now certain that the ship can be saved. She will make an addition to the Japanese navy, since she is a fine protected cruiser of 6,500 tons, with a nominal speed

of 23 knots,

In the Port Arthur journal it is stated that the railway round Lake Baikal will be finished by the end of this year or the beginning despatch 7 trains daily. That does not does the whole prospect appear to have any cardinal bearing upon the present situation.

Tuesday, March 29.

The German steamer detained at Shimonoseki as carrying contraband of war, has been released. The guns she had on board were proved to be for Tientsin and the torpedo materials for the Yangtze. General Kuropatkin is telegraphed as having reached Mukden on the 26th, and as

being due at Liaoyang on the 28th.

THE "HANYEL MARU."

Later news from Chefoo says that the ship sunk by the Russian squadron near the Miao Islands was a small coasting steamer called the *Hanyei Maru*. She fell in with called the Hanyei Maru. the Russian squadron at half-past seven on the morning of the 26th instant. Her master and 2 of her crew managed to escape in a junk, and reached Ninghai Bay, whence were taken off the steamer by the Russians. According to the Russian account the junk was taken as well as the steamer, but the master's story is different. The Russian report speaks also of having seen a Whitehead torpedo, but that item of the story requires explanation. The Miao Islands lie on the southern side of the Liautishan Channel, nearly directly opposite to Port Arthur. It is at all events evident from their report that taking vigorous measures to fortify Ying- Admiral Makaroff took his squadron out of the number of men engaged on the Port Arthur on the 26th. For the rest, the the Greek Cathedral. It dominates the city works has been doubled, the batteries on Russians can not be called very fortunate, too completely, and looks down on the Imedither side of the river are being repaired, The sum total of their exploits hitherto has perial Palace. Perhaps another site might and a thousand fresh troops have arrived, been the sinking of two small coasting have been more wisely selected. But the The ice has melted and junks are now able steamers.

M. PAVLOW.

The Vladivostock journal publishes the text of a telegram sent by M. Pavlow to St. Petersburg from Shanghai, where he had just arrived, on the 18th of February. He says that on the 8th of that month telegraphic communication was interrupted, and the Japanese were evidently making preparations for war. Therefore he resolved to send the Koriets with despatches to Port Arthur, and he also warned the Varyag to be pre-pared for emergencies. At 4 p.m. the Korietz went out to reconnoitre, and encountered a Japanese squadron of 6 cruisers and 8 torpedo-craft. One of the cruisers followed her and the torpedo-craft discharged 3 projectiles which failed to reach their mark. (M. Pavlow carefully avoids saying anything about the fact, admitted by the men on the Koriets themselves, that the Russian ships opened the ball by firing by mistake!). The Korietz without firing returned to the port and dropped her anchor. That night several Japanese cruisers landed about 3,000 Japanese troops, of whom the greater part entered Seoul wholly unopposed. M. Pavlow then describes the letter sent to the commander of the Varyag and the exit of the two vessels. He says that the Japanese summoned them to surrender and receiving no reply, opened fire. The Varyag was wounded below the water-line. She put back for repairs, but finding that these would not be effected, her commander decided to destroy the two ships rather than suffer them to fall into Japanese hands. They took the same course with regard to the S. S. Sungari which had come in the same night. The In the Port Arthur journal it is stated that the railway round Lake Baikal will be finishted by the end of this year or the beginning of next, and that it will then be possible to despatch 7 trains daily. That does not seem to be a very imposing number, nor does the whole prospect appear to have any cease firing, and one of the Japanese destant of the railway round comment the same light. The same light which had come in the same light. The same light. The same light which had come in the same light. The same light which had come in the same light. The same light which had come in the same light. The same light which had come in the same light. The same light which had come in the same light. The same light which had come in the same light. The same light which had come in the same light which had light which had come in the same light which had light which had light which had light which had light wh troyers was sunk. On the same night the Takachiho sank, and on the following morning a Japanese transport carried home 80 Japanese killed and wounded from Yashan Bay. All the foreign onlookers were astounded by the valour and resolution displayed by the Russians, and all sympathised. The same evening M. Pavlow asked for an audience, but the Emperor replied that the city was in Japanese military occupation and that unless he observed a strictly obedient mien his palace would be seized. There had been no notice whatever from the Japanese Minister as to the rupture of diplomatic relations (and no notice from Tokyo also?) or of the violation of Korea's neutrality.

This report is worthy of M. Pavlow.

A QUESTION.

Mr. Hanai Takuzo and others-the necessary thirty-three-presented in the Lower House on the 29th instant ■ question which happily there was not time for the Go-vernment to answer. It referred to the land on which the Greek Cathedral is erected in Surugadai. The land is not held under perpetual lease. It is merely allotted as "attached" to the Russian Legation. But there is now no Russian Legation. Therefore these questioners want to know how the land is held.

LIAOTUNG.

Kinchow is one of the most important positions in the Liaotung peninsula. It lies just north of the place where the peninsula the Chinese Imperial Maritime Customs renarrows to a neck of only 2 miles across; garding the health of Swatow in 1902, in a neck which, if carefully entrenched, might defy the southward advance of an army. At Kinchow the railway from Mukden to Port Arthur branches eastward to Dalny. Something was said in our last issue about though a foreigner cannot well estimate the the fortifications of Kinchow, and we now read in the Jiji Shimpo's Chefoo correspondence that the bandits recently attacked a Russian detachment on the north of Kinchow and killed 3 of the railway guards. It is also stated that two Chinese travellers stepped on mines laid outside the southern gate of the city and were blown up together with a coolies that accompanied them. The bandits seem to be very busy to the north of Kinchow and traffic, except by the railway, is said to have been almost abandoned.

It is stated that some 50 head of cattle are transported daily from Kaiping to Kinchow and Port Arthur. If that be so there can not be much truth in the stories about scarcity of provisions in the latter place

The rumour is repeated that during 2 days-the 20th and the 21st-the service of trains was completely interrupted between Liaoyang and Tashikiao, owing to injury done to the line by bandits, who are said to be causing infinite trouble in this respect. They have published a notification that any village will be burned which supplies oxen or tranport animals to the Russians, and the Russians have proclaimed that any village will be burned where such notifications are posted, so that the unhappy villagers are veritably between the devil and the deep

The Russians are said to be offering 2,000 dollars for information leading to the apprehension of any Japanese military spy and all their obligations with rouble notes, which have only a slender value in the market, these promises do not excite the Chinese to

any great display of energy.

A Chinaman who has reached Chefoo, having left Port Arthur on the 24th instant, says that various defensive measures which we can not clearly understand, are being taken at Port Arthur. He also says that a vessel with a largecrane is engaged removing the armaments from injured war-ships.

WAR TELEGRAMS.

It is worthy of note, says the China Mail, that the Far Eastern Press Association, according to the Manila Cablenews, is receiving telegrams direct from Chemulpo. minds us of an incident in the China-Japan war, when a local newspaper was publishing daily telegrams first from Chemulpo and then from beleagured Weihaiwei. These messages ceased suddenly when the China Mail pointed out that there was no cable to Chemulpo or Weihaiwei. Wireless telegraphy was not then in use, and we had a shrewd suspicion that most of the "Special Tele-grams" emanated from the fertile brain of an imaginative sub-editor. We do not accuse the Far Eastern Press Association of manufacturing telegrams; we merely point out that it is getting telegrams like the following out of Chemulpo where no other newspaper or Press organisation seems to be

Chemulpo, March 5.—The Japanese Government has landed nearly 20,000 troops at Chinampo instead of at Chemilpo, as a previous telegraphic report had it. This force is expected to push inland to the railroad.

THE PLAGUE IN CHINA.

Dr. Henry Layng, in the course of his annual report to the Inspector-General of corporates a letter writen from Ungkung by a foreigner resident there, who says:—" The natives claim that there are 100,000 persons at Ungkung within and without the walls; population of Chinese cities, I should think that 75,000 would be nearer correct. The natives say that about 1,000 persons died Unsan. here of cholera during the past summer. distance Cholera was worse in all the surrounding that the Japanese front extends over that villages than in this place. At Cioan city, interval. If the right wing be thrown for where there is a population of about 40,000, ward to Unsan, that would mean a further there were said to be 5,000 deaths. We extension of 17 miles and would nearly had not a case of plague at Ungkung this agree with the Russian statement that the year, whilst the natives say there were Japanese army extends over a front of 45 10,000 deaths from it last year. Certainly there were about 5,000 corpses interred in interval between Kasau and Wiju, there the potter's field, but those that are interred the potter's field, but those that are interred are three rivers, the Pong-nai, the Son-elsewhere are more difficult to reckon. I chong and the Sakju. None of them have inquired in all parts of Ungkung, and is a stream of any magnitude, however, and of hundreds of persons, and without ex-the destruction of such bridges as already ception they say they do not remember exist should not prove a very serious to have seen a rat since the plague obstacle to a military advance on a large ceased last year. It appears that the plague made a clean sweep of the rats, formidable. All the country in which the whilst only decimating the natives; hence I have reached the tentative conclusion that no rats, no plague. Another place and incident will complete about all that I know. Chia-na is about 10 miles from Ungkong, where the natives say there is a population some matter. Evidently the season has a of 20,000, and where plague and cholera large voice in the matter, but as the were exceedingly virulent. First, about warmth of spring will make itself felt in 1,000 died of plague, then cholera came in, a few days, snow and ice must soon cease where the natives say there is a population reinforcing the plague, and by the co-operation 1,000 more deaths ensued. Some of the deceased were buried near a large well belonging to a village of about 500 inhabitants. The well, which was about 12 feet in diameter, was used by the entire community. During the very rainy season in the beginning of summer 300 persons of that village died of plague. Finally when the people saw that the terrapins and turtles people saw that the terrapins and turtles heating of the west-Liab region. Mr. inhabiting the well were floating on their Lessar protests and threatens, but even the backs dead, they concluded that the patient Chinese have begun to grow accustomed to Mr. Lessar's remonstrances graves; so they discontinued using the and callous to his menaces. In fact, Russian graves; so they discontinued using the water, and the plague ceased. Knowing that Chinese coffins are usually sealed with I inquired about those used there, and was of the deceased were interred in improvised the Russians suspect the Chinese of an inboxes and crates." The history of this tention to help Japan at the crucial moment, and former epidemics of plague is much In order to be able to do that effectively the the same, says Dr. Layng. Onset is always in the winter months; the spread of the disease is at first slow; towards the end of operate on the right flank of the Russians in February the rate increases here April 41. Manchuria Now precisely the most to many the rate increases here April 41. and lack of ability to purchase them, many February the rate increases; by April the epidemic is in full swing; it reaches its maximum in May and June, and in August it dies out.

THE CAMPAIGN IN KOREA.

chhon, a distance of some 20 miles, destroy- van so far beyond the wall that if anything ing the bridge over the Tong-nai river en tempted him to draw the sword against route and wrecking the telegraph. At Son- cussia, the latter's position along the Liao, chhon they would be still nearly 50 miles that is to say, along the line of railway, south of Wiju. But according to the St. would become very precarious.

Petersburg account they have retired to the Yalu, and the latter statement is probably the more correct, for the retention of a small force on the Wiju-Chonju road would be a fruitless operation. As to the 45-mile line said to have been fortified by the Japanese, the distance does not quite agree with the names of the places mentioned. From Kasan on the sea-coast there is a main road running nearly due east to Pakchhon (Reuter's "Pekchen") and thence to Nyong-pyon (Reuter's "Yeng-ying"), where it is joined by the cross-road running north to Unsan. From Kasan to Nyong-pyon the distance is 25 miles, and it seems probable Japanese are now operating is mountainous and comparatively wild, traversed by roads which scarcely deserve to be ranked above paths. An advance with artillery through such a country must be a slow and trouble-

THE WEST-LIAO QUESTION.

It is alleged-though from a tainted source, namely, Chefoo—that Viceroy Yuan and General Ma are resolutely proceeding with their dispositions for enforcing the neutrality of the West-Liao region. Mr. neutrality of the West-Liao region. diplomatists in China and Korea have hitherto made the mistake of talking too putty and made almost water and air proof, much. Their words have been numerous out of all proportion to their deeds. There informed that from scarcity of regular coffins is no valid objection to the preservation of neutrality in the West-Liao region unless Manchuria. Now precisely the way to warrant the massing of such a force is to dispute the neutrality of the region, and that is just what the Russians have been doing. Had they agreed from the first that the neutrality of the whole area was a matter of course since they evacuated it in 1902, the Chinese would have had no excuse for massing The Japanese accounts of operations in troops there, and any undue exhibition of north-western Korea do not exactly tally force on their side would have furnished to with the Russian, but the difference is one of Russia a legitimate cause of complaint. But degree only. According to the latest Japan-wordy protests and empty threats have ese version of affairs, the Russians have merely stirred up the phlegmatic Chinaman, retired their outposts from Chongju to Son- and he seems to be gradually pushing his

SIR ROBERT HART.

when the Russo-Japanese war concludes sion. At all events the tax now collected China will have a very difficult part to act is only 25 million taels. How would the and that she should immediately take people bear being asked to pay sixteen measures to prepare herself. Among these measures incomparably the most important is to organise a strong and efficient military force. But at present the Government has no funds for such a purpose. The customs duties and the taxes on land and salt protacls, one half of which goes to the service of the empire's foreign debt. Some other means of increasing the State's inthat it had some close connexion with Mr. other means of increasing the State's inthat it had some close connexion with Mr. other means of increasing the State's inthat it had some close connexion with Mr. other means of increasing the State's inthat it had some close connexion with Mr. other means of increasing the Potring and that it was a paid organ of a rough persual of the measure we find that it in a new form of land tax. There are easy to trace the connexion. Recently this and privates, and that the maximum increase 3,000 million more (1,335 millions of acres) of arable land in the 18 provinces, and if a tax of 200 cash were imposed on each mow, tax of 200 cash were imposed on each mow, there would result an income of 800 millions of taels. One half of that amount at least might be counted on, and one half, or 400 million taels should suffice. Sir Robert—we quote from the Asahi Shimbun—advises that there should be four corps d'armee in the empire, the Chili Corps, the Liangking Corps, the Hukwan Corps and the Liangkvang Corps. Each should consist at first of 50,000 men, to be gradually raised in the course of 10 years to a total strength of half a million, including all the strength of half a million, including all the reserves. Making due provision for military had better be restrained altogether from schools, equipment and war material, he estimates the annual cost of thearmy at 50 millions of taels, which ought to be sufficient, seeing sentiment about their rights and their functions. reserves. Making due provision for military that Japan's army of nearly the same strength tions, but they have also duties, and one of

Then there is the question of a navy. Sir by making mischief. Robert would have three squadrons, a northern, a southern and a third to be subsequently determined, each consisting of 20. ships and 60 torpedo-craft. The cost of ships and 60 torpedo-craft. The cost of maintaining these, together with the necessary schools, and so forth, he puts at 30 millions of tacls (Japan's figure is 31 and her Japanese friends consequently millions of yen). He then proposes 4 decline to depart from the neighbourhood arsenals, costing ten million taels for up-that the proposes to increase the salaries of officials all round as well as the allowances for administrative expenses, to the Mondjur. What a delightful story! which accounts he assigns a sum of 160 The Mandjur incident is truly one of the millions to educational purposes (the Japane) believe this lest account of Russian purposes. course temporary, as the telegraphs and post-offices would soon be self-supporting, Finally Sir Robert sets aside to million taels as the allowance for the Court. In the Mandjur is at length disposed of, and the Asahi's account the above figures are the Commander of the Akitsnshima that the said to total 326 millions of taels, but as presence of his ship is no longer required. they aggregate only 285 millions, there is obviously some mistake. At any rate the outlines of Sir Robert's plan are plain enough. He concludes by advising that the total proceeds of the Customs and the salt by five Italian journals with regard to the tax should be devoted to the service of the war. One says that the only hope of conforeign debt, and that, as soon as it is paid off, these imposts should be wholly remitted

acres, pays only 106 million taels, inclusive if Japan had not taken active measures the of local taxes," Sir. Robert, it will be ob-situation would have become hopeless for Allusion has been made of late to a proserved, estimates the area of arable land at lect submitted by Sir Robert Hart to the 1,333 millions of acres. It is a question would have become hopeless for served, estimates the area of arable land at ler. A fifth newspaper considers that Japan's preliminary successes show Russia's unpretimes that amount?

ANOTHER NEWSPAPER AFFAIR.

There has been another newspaper complication. This time the corpus vile duce an aggregate revenue of only 80 million is a Chinese journal, the Chi-pao, published Chi-pao got into some trouble with the officials of the Viceroy's Yamen, and its manager seems to have declined the latter's subscriptions, which incident of the tale we decline to credit. At all events the Governor of Tientsin vetoed the circulation of the journal and it has been compelled to put up the shutters. This makes three newspapers which have come to grief since the be-ginning of the war—the *China Times*, the *Niroku Shimpo* and the *Chi-pao*. We can not pretend to sympathise with any one of them. It appears to us that if a newspaper can not say what it has to say without using violent and inflammatory language, it costs only 40 million yen in round numbers, them is not to purchase profitable notoriety

STILL THE " MANDJUR."

millions to educational purposes (the Japan-ese Treasury pays 6½ millions), and he for the simple reason that to re-arm the farther projects postal improvements costing Mandjur would involve recovery of her 10 millions, together with 5 millions for armanent from its Chinese custodians. But telegraphs. These two last outlays are of even if that tale be ruled out, the record

NOTES ON CORRENT EVENTS.

The Debats collects the views, expressed fining the range of the war is that Japan off, these imposts should be wholly remitted and China shall adopt free trade.

In this context we may quote an extract long. A third affirms that Russia is fighting from the recently published "Oriental merely for the sake of internal expansion Series" (Vol. X p. 120):—" Japan with her population of 42 millions and her arable area intilitatism, whereas Japan is fighting for her content of the sake of internal expansion internal expansion militarism, whereas Japan is fighting for her content of the sake of internal expansion in the sake of inte of only 13 millions of acres, pays without own safety. Justice indicates the side that any difficulty a sum of 140 millions of taels should be victorious. The Tribuna considers annually to the State, exclusive of local taxes, it quite plain that Russia's procrastination whereas China, with a population of 420 in the negotiations was for the purpose of the new review which C. Arthur Pearson, millions and an arable area of 400 million improving her military position, and that Ltd., of London, were to produce on the 12th

On the 24th ultimo Prince Pu Lun was received in audience by the Emperor, and lunched with His Majesty. On the afternoon of the same day His Majesty sent Prince Iwakura to the Shiba Detached Palace for the purpose of presenting the First Class Order of the Paulownia to the Chinese

The Government has introduced in the Diet a bill for increasing the pensions of and privates, and that the maximum increase proposed is 50 per cent.

The Emperor has given a hundred thousand yen to the Gunjin Yengo-Kai. We have described the organization and objects of this Society in our columns. Its great promoters are Counts Inouye and Matsukata. The Association was started only a month ago and has already collected over eight hundred thousand yen.

A cartridge-filling factory at Saseho blew up on the 27th ultimo at 7.30 p.m. Four persons were killed and several injured.

Captain Troubridge, Naval Attaché of the British Legation, left Tokyo on the morning of the 28th ultimo, after two years' service in Japan, during which time he won remarkable popularity. Quite a crowd of notables assembled at Shimbashi to bid him farewell, prominent among them being Admiral Viscount Ito, Vice-Admiral Ijuin, their Excellencies Sir Claude MacDonald and Count von Arco Valley, Mr. G. Barclay, many Japanese naval officers and the Naval Attachés of the various Legations.

The railway from Maizuru to the port admiral's offices has been commenced, and will be finished, it is said, by September next.

THE BOOKSHELF.

Gerrard Street and its Neighbourhood, by Mr. H. B. WHEATLEY, F.S.A., London; KEGAN PAUL, Trench, Trübner & Co. Ltd. THE well-known publishing house of Kegan Paul, Trench, Trübner & Co., Ltd., have lately moved to Dryden House, Gerrard Street, London, W., and they have taken advantage of the occasion to issue a most interesting brochure dealing with the literary and historical associations of the house, street and neighbourhood. They could not have chosen a more competent man than Mr. Wheatley for such a task, for he knows his London well and is even more familar with the London that has long since vanished. His little book on Gerrard Street runs to 35 pages and contains no less than seven illustrations, which include a portrait of Dryden, Dryden's house as it was and is, plans and views of Leicester square in 1658, and in 1700, and the same neighbourhood at the present day, enabling one to gather a very good idea of the great changes which three hundred years bring about in London

THE MONTH IN THE COUNTRY.

Needless to say, this new review is being extensively advertised, and we give a speci-men of the latter-day advertiser's notion of attracting and arresting attention;

Suppose yourself at a bookstall,
You would like to buy everything,
You don't want to miss anything,
You have not much money.

What ought you to do?

Buy the Rapid Review!
But why?
Because it tells you all you want to know.

All the Magazines, All the Periodicals, All the Newspapers, All newest boooks.

All the speeches.
All the lectures,
All the plays,
All the newest in science and art.

Suppose yourself in a foreign town:
You want to see everything,
You don't want to miss anything,
You have not much time.

What do you do?
You buy a guide book,
It tells you just what you ought to see,
And what not to waste time over.

The Rapid Review is a guide book,
Not to a town, but to the world.
Not to the sights of the world,
But to the doings of the world.

To the progress and thought of the world;
In literature and art,
In music and science,
In politics—in everything

THE RAPID REVIEW

WILL SAVE YOU TIME, THOUGHT AND MONEY.

Great Masters: London, WM. HEINEMANN. This notable publication has reached its eighth number and maintains the high standard set by the opening portfolio. Mr. Wm. ard set by the opening portfolio. Mr. Wm. Heinemann deserves well of all picture-lovers for placing such an opportunity of acquiring beautiful works of art within their reach. The four pictures in the present number include "A Polish Noble," by Rembrandt, from the

THE DIET.

House of Representatives.

The House met at 1 p.m. and having heard the first reading of a Government bill for increasing military pensions, handed the bill to a special

The various committees then reported upon all the measures hitherto taken as matters of urgency, including Ordinance No. 291 (relating to the special account funds, short-period loans and the Seoul-Fusan Railway), about the post-facto sanc-tion of which there had been some doubts. Sanction was given without a dissentient voice in every case

Three other measures were similarly treated one for placing certain naval expenditures in a special account; another for facilitating the hypothecation of registered public securities; and

nypotnecation of registered public securities; and the third relating to coast defence.

Mr. Fukuchi, on behalf of the Special Committee, reported that the Committee had not found anything to amend in the draft of the House's thanks and congratulations to the Imperial Navy.

Admiral Baron Yamamoto, Minister of State Admiral Baron Yamamoto, Minister of State for the Navy, ascended the rostrum amid loud applause. He said that since the outbreak of war the House had had opportunities of reading many official reports and it had also heard the statements made by the Minister of Foreign Affairs and others. He might, however, add a few words. From the time when the negotiations commenced, it had been the duty of the navy to prepare for an emergency. They had naturally good sailors and they had good ships, but there could be no question that the maritime power of Russia as a whole exceeded the maritime power of Japan, and consequently as the failure of diplomacy became sequently as the failure of diplomacy became imminent, they had not been without anxiety about the result of a conflict on the sea. I evertheless, from the time that the squadron set out on the 6th of February, it had been everywhere successful, as the reports of the admirals in comsuccessful, as the reports of the admirals in command and the captains of ships showed. He regretted that it was not permissible for him to make any statement in amplification of those reports. The enemy's ships were still in Port Arthur, and according to the news received last evening, several of them had been able to leave the harbour. It would seem, therefore, that the injured vessels had been successfully repaired. Under such circumstances, it was obvious that Under such circumstances, it was obvious that their exertions must be doubled, and he did not doubt that the message the House was now about to send to the Fleet would inspire it to fresh efforts.

Mr. Tsunematsu called on the House to rise and vote for the address, standing as a mark of respect towards the Navy. The House rose and adopted the address amid vehement acclamations.

Admiral Baron Yamamoto again ascended the

rostrum and declared that such an address would He promised to convey it at once to all the ships and to accompany it with a statement of the House's earnest demeanour. He ventured to say that the successes thus far won were due to the virtues of their Sovereign, the zeal of the nation, and the valour and loyalty of the officers and men of the Navy. In the name of the Government he begged to tender thanks.

His speech elicited vehement applause.
A bill sanctioning an issue of bonds for the

purpose of buying up Chinese proprietory rights in Formosa with a view of increasing the taxation yielded, was taken as a matter of urgency on the motion of Mr. Tsunematsu, and was passed at

The House rose at 2.10 p.m.

THE HOUSE OF PEERS

The House met at 10 a.m. on the 26th instant for the first time this session from a business point of view. Prince Pu Lun was among the spectators. The Prime Minister and Baron Komura delivered speeches in the same sense as the addresses already made by them in the Lower House.

Baron Ozaki considered that as the evacuation of Manchuria by Russia was a question which concerned all the Powers, Japan should have conferred with them before approaching Russia. He wished to know whether there had been any such conference.

The Minister of Foreign Affairs replied that there had been, within certain limits.

An answer from Admiral Togo to the vote of thanks and applause passed by the House was read and recorded.

Several Government Bills sent up from the Lower House were handed to special committees, and the House rose at 11.30 a.m.

THE HOUSE OF REPRESENTATIVES.

The House met at 1 p.m. on the 26th instant. In answer to a question Mr. Koyezuka Ryo, Chairman of the Committee appointed to examine into the Akiyama case, stated that the Committee had not yet come to any decision, but that it hoped to do so in the meeting now immediately

to be opened.

All the Government Bills for increased taxation were taken en bloc and passed with the amendments recorded elsewhere in our columns, the net result being that the revenue proposed by the Treasury was reduced to the extent of 6,171,561 yen.

Considerable discussion took place with regard to the Bill for establishing a state monopoly of tobacco manufacture. The Special Committee attempted to postpone presenting its report on the ground of the chairman's indisposition, but the House insisted on hearing the report at once. Mr. Tada Sakubei, in lieu of the chairman, then announced that the Committee recommended the passing of the Bill, but had decided to amend the method of assessing the commutation in the sense of taking the amount actually sold by each

manufacturer as the basis of calculation.
The Minister of Finance opposed this change and an animated debate ensued, with the result that the closure was ultimately applied, and the House, by an overwhelming majority, passed the

measure as amended by the Committee.

The House then proceeded to consider the Government's Bill for authorizing the issue of premium-bearing bonds of small denominations by the Savings Department of the Industries Bank. It is the Cabinet's idea that during war large expenditures have to be made which go to enrich the lower orders, and that a measure of the kind contemplated by this Bill will serve to bring these funds again within reach of the Treasury. The project has been much debated by the public and has been condemned in several quarters, but the House passed the Bill without difficulty.

House passed the Bill without difficulty.

The Bill for increasing military and naval pensions was carried unanimously through all its readings, as was also a Bill for making special reductions in the taxable assessments of lands along the Watarase River, which, having been more or less sterilized by the emanations from the Ashiwo Mine, could not justly be required to pay the increased rate of land tax.

A diversion was created by Mr. But a who

A diversion was created by Mr. Buto, who attempted to make a speech about the Ashio-Mine poison, but was interrupted by repeated cries of "uscless." Exasperated by these comments Mr. Buto cried out that his interrupters had been purchased by the owner of the mine, Mr. Furukawa. A motion was at once intro-duced for handing him over to the Disciplinary Committee, but a majority voted against it. The motion had the effect, however, of silencing Mr.

After a brief recess, Baron Sone ascended the rostrum and declared that the Government approved the decision of the House in the matter of the War-tax measures; that the deficit resulting from the reduction of the land tax by 0.2 per cent. would be made up by raising the selling price of tobacco; that as to the remaining deficit of 6 million yen, the Government proposed to meet it by advances from the special capital funds and by administrative economies, a bill in which sense lad been submitted; and that the Govern-ment promised to spare no effort to achieve such

This speech was warmly applauded.

The Akiyama affair then came up for discus-

The Chairman of the Special Committee explained the evidence adduced against Mr. Akiyama, first, that in August, 1903, the Niroku Shimpo had published an alleged copy of a convention concluded between Russia and Japan; secondly, that Mr. Akiyama was said to have met the First Secretary of the Russian Legation at the Hotel Metropole and at the Sakurada Kaikwan: thirdly on the 16th of this month the Niroku had published an article highly injurious to Japan's interests; and that Mr. Akiyama lived in a style incompatible with his visible income. The Committee had not found that any of these things constituted a proof of disloyal collusion with Russia, but they did find that Mr. Akiyama had sacrificed his country's interests to his own, and that his conduct was calculated to promote the interests of his country's enemy. As for the Chairman himself, he declared that he did not share the Committee's view, but that he reported them as a

matter of duty.

Mr. Kusume Gen called out loudly that Mr. Akiyama must now make up his mind.

Mr. Akiyama ascended the rostrum. his appearance created some uproar, but calm and confident demeanour finally secured a such a reproach. He would not lightly resign his membership of the House. As for the materials collected by the Committee by way of evidence, they were mainly a resume of the slanders uttered against him by his political enemies at the time of the general election. The Minister of Home Affairs had assured him on the preceding day that he attached no importance to the charges against him. There were the contraction of the contraction of the charges against him. There were the contraction of the contract hearing. He said that were there question of preceding day that he attached no importance to the charges against him. There was one man now on the Ministerial benches who considernow on the Ministerial benches who consider-ed him a Russian spy and had furnished the evidence against him. That man was swayed solely by sentiment and not by facts. Such persons might call him a Russian spy, but for his part he could only feel apprehensions when he saw the Government of the country in the hands of these men. He agreed with the sentiments of that nature expressed in the Niroku Shimpo's article of the 16th instant, but he fully admitted that the article contained much which ought not to have been written at this crisis, and he was prepared to accept all the responsibility attaching to such indiscretion. If, however, on the strength of that article he was to be declared a Russian spy, he would occupy his seat in the House until driven from it by the open weapon of his fellow-representatives' decision.

Mr. Ozawa spoke in support of the Committee's decision, and introduced an urgency motion calling on Mr. Akiyama to resign.

Mr. Ooka urged that the House was apparently about to commit the great cruelty of condemning
a man to death without any incriminating
evidence and in obedience to the passion of the
moment. Already they had heard from the
Chairman of the Committee that the Committee could not find any evidence in support of the accusation. The military and naval forces of the Empire were conducting a war beyond the seas in full obedience to the dictates of civilization, but here in the calm and quiet of the Imperial Diet, the House of Representatives was about to take the uncivilized step of pronouncing a man guilty of a heinous crime on the testimony of an official detective. Undoubtedly the article that appeared in the Nirotu Shimpo of the 16th was hard that the proprietor of a journal should be held responsible for everything appearing in its columns, nevertheless Mr. Akiyama himself had Petitions.

declared that he accepted the responsibility in

This speech had an excellent effect.

Mr. Akiyama again ascended the rostrum and declared that to the count preferred by Mr. Ooka, he had no hesitation in pleading guilty and that he hereby resigned his seat. But as to the allega-tion that he had met General Kuropatkin (at this point he was interrupted by numerous cries of of the great crime, I care for nothing else and I bid you farewell."

He then left the House. The President sug-gested that under the circumstances the matter might be dropped; but the House insisted on ing Mr. Ooka's motion.

Thus (says the Kokumin Shimbun) the Representatives who had just voted a war fund of 380 million yen, got rid of their stupendous business-the Russian spy

The House rose at 6.05 p.m.

House of Peers

The House met at 10 a.m on the 27th, and proceeded at once to consider 15 bills sent up from the Lower House, which were handed to special committees. Mr. Sakatani, Government

the War Tax measures, as amended by the Lower House, and having stated that the supplementary (local) taxes are not to be levied on the basis of the increased rates in the case of the land tax, the income tax and the business tax, also that the limit of time for collecting the war taxes is to be the calendar year after the termination of the war, the House passed the 12 Bills without discussion

The Tobaco Monopoly Bill was also voted as sent up from the Lower House.

The House rose at 10.40 a.m.

The House of Peers met at 10 a.m. on the 20th.

and passed the remainder of the War-tax bills.

Viscount Nagaoka reported that the Special
Committee had decided to reject the Bill empowering the issue of small-denomination savings bank bonds, the Committee considering the measure demoralizing as calculated to encourage

measure demoralizing as calculated to encourage a spirit of gambling.

The Prime Minister urged the adopting of the Bill as a war measure. After considerable discussion the Bill was passed, having been amended so as to operate during the war only, and the restriction as to the bank of issue being removed.

A recess was then taken for the purpose of

A recess was then taken for the purpose of holding a consultation with the Lower House as to these amendments. When the House re-assem-bled the Minister of State for the Navy read Admiral Togo's report about the blocking of Port Arthur, and on the motion of Viscount Soga the House passed a vote of warm appreciation of the valour displayed and commiseration with the fate of the brave men who had fallen.

The Lower House's agreement with the amendments of the above Bill having been announced,

The Minister of State for the Navy read declared that he accepted the responsibility in The Minister of State for the Navy read this case, and the speaker therefore moved that Admiral Togo's last report. He added that since the House limit its decision to that question, his Admiral Makaroff had succeeded Admiral Stalk motion being that "in consideration of the there had been a marked difference in the enemy's leading article published on the 16th instant in conduct, and the Japanese now hoped that the the Niroku Shimpo under the heading, Impeach-Russian fleet would come out to meet them in ment of the Cabinet, of which newspaper Mr. Akiyama is proprietor, this House considers that some decision must be taken by Mr. Akiyama."

This speech had an excellent effect. the open. The Russians had suffered some damage, but they had in part repaired their injuries, and it must be admitted that they had plenty of fighting strength left. The last attempt at blocking the harbour seemed to have succeeded much better than the first. The enemy's ships might be able to pass between the sunken vessels, but he believed that the fair-way had been reduced to very narrow dimensions. That result was due to the valour and resolution of the point he was interrupted by numerous cries of, was due to the valour and resolution of the "never mind that; nobody believes anything of Japanese officers and men. They knew that the such foolishness"). He therefore refrained from enemy was still very strong at sea and they further explanation and merely said:—"Then, were far from despising him. The House was the state of the such points of the such points of the such points of the such points. The House was the such points of the su been employed on both the blocking operations. That would have been avoided had not these men themselves desired to utilize their experience so as to ensure success. Nothing could be more difficult than this work of blocking. The men had to go into the midst of the enemy's fire without any weapons of their own and had to perform work demanding the greatest coolness under circumstances of deadly peril. They could only trust to the valour and ability of their officers and men to win future successes. These officers and men to win future successes. and men would be nerved to fresh exertions when they learned what warm approval their conduct had received from both Houses of the Diet, and how the country, through its represen-tatives, had shown itself a unit in voting supplies for the war.

forces had shown great valour and skill, a long time must still elapse before the desired peace could be restored. The House had felt no reluctance whatever in granting large sums and it trusted that the Ministers of the Crown would spare no efforts to bring the war to a successful

termination and restore the blessings of peace.

Speaking to this motion Mr. Hara dwelt on the advantages of a constitutional form of Government as enabling the nation to give its whole strength in support of the Government and the Two Services at a crisis like the present.

The House adopted the Resolution upanion

The House adopted the Resolution unanimously, standing up for the purpose and cheering

vehemently.

The Prime Minister then ascended the rostrum and solemnly promised that the Government would conscientiously and earnestly work to achieve the ends indicated in the Resolution just

The President delivered a short address congratulating the Honse on the loyalty and patriotism it had shown, and speaking of the advantages of a constitution which enabled the nation to act in such strong harmony.

The House rose at 3.30 p.m.

On the 30th March, at 11 a.m. the ceremony of closing the Imperial Diet took place. The Emperor did not attend in person. His Majesty's speech was read to the two Houses by the Prime Minister. It declared the Diet prorogued, and briefly expressed His Majesty's satisfaction with the manner in which the members had discharged the important functions devolving on them in this time of war, in accordance with the Imperial

VOKOHAMA LITERARY SOCIETY.

There was a very good attendance at the fortnightly meeting of the Yokohama Literary Society, held at Van Schaick Hall on Friday. The Rev. George Wallace proved to be a most entertaining lecturer, bringing to his aid a keen sense of humour which he displayed in relating many a good story of the land and people really first revealed to the world by that exceedingly clever novel, "David Harum." Mr. Wallace spent some years in New York state and thus was able to draw freely on his personal recollections of the peculiarities of these country folk. Many a time and oft during the evening he had his audience convulsed with laughter, and at the close Later in the evening he read a selection from "David Harum," affording a rare treat of dialectical humour. Miss Dodds, who is shortly leaving Japan, was thanked by the President for her contributions to the Society's programmes, and in the name of the Society he wished her bon voyage. The full programme was as follows:— PART I.

LECTURE..." Environment of an American Novel,".
REV. GEORGE WALLACE.

PART II.

- r. Piano Solo....." La Fileuse" ... Miss Mendelson.
- 2. Song (with violin obligato)......" Happy Days
- (A Tale of the Indian Mutiny)
 Miss Dodds,
- 4. Song......."Sunset"...... Dudley Buck.
 Mrs. W. T. Payne,
- 5. READING from "David Harnm" Rev. GEORGE WALLACE.

DESULTORY NOTES ON SPORT.

Training for the Spring Race Meeting is pro-Training for the Spring Race Meeting is proceeding somewhat uneventfully. Most of the new Australian subscription griffins are quiet and comparatively well-behaved, but one or two have given trouble. Most of the excitement incidental to the early stages of training has been furnished by Chiha ponies. The new subscription China pony belonging to the Clerk of the Course is troublesome, and gave his owner a nasty fall last week, getting mixed up in some way with fall last week, getting mixed up in some way with the guards protecting the grass track. He sub-sequently got rid of one of our new amateur riders, putting him down on the entrance road, but fortunately without causing damage. Another of the new lot, belonging to the Chairman of the Exe-cutive Committee, pipped his riding boy on several consecutive mornings, indulging in a wild scamper every time before he could be secured.

Some of the new Walers are showing very good promise, and are making very fair progress. It is far too early yet to speculate on their respective chances, as out of any batch of horses put into training for the first time, some come to hand much earlier than the others, and early "fancies" are usually misleading.

The course is shewing considerable improvement, and does not seem so heavy after rain as was formerly the case. Work on the new stand is being pushed forward, and it will doubtless be found a great convenience at the Meeting.

The fine weather on Saturday induced the owners of the Asagao and Nina to start the season's week-end cruising. The former, with an early start, owners of the Asagao and Nina to start the season's week-end cruising. The former, with an early start, got down to a pretty little cove just beyond Uki Shima, on the Boshu Coast, called Ichibukero. Nina had just reached Uraga when the wind failed. Both boats had a stiff beat back to Yokohama on Sunday against a north wind and bitterly cold rain. The weather, in contrast with Saturday, seemed quite a return to winter.

S. NAKAKAMI v. THE SINGER MANU-FACTURING CO.

The hearing of this case, in which plaintiff the added that the ships concerned in the rumour were regarded as being both Japanese and foreign. The trial having concluded, the Public Procursion of Messrs. Dodwell and Company, and he should be punished in accordance with Art. 358 of the Penal Code.

Mr. Yamada and three other lawyers employed in the defence argued against the Public Procursion.

LITERARY AND MUSICAL REUNION.

On Friday evening a literary and musical re-union took place at the Public Hall under the auspices of the Yokohama Committee of L'Alliance auspices of the 10 k0hama Committee of L'Aliance Française. There was a large attendance and the proceedings were completely successful. The first part of the programme was a lecture on "Le Dedale" by M. P. O. François, of the Imperial University, which was most appreciatively listened to. The second part consisted of the following numbers, all of which were warmly applauded:

- 1.- Les deux Cœurs H. de Fontenailles.
- Chante par M. L. Cherfils,
 Accompagne par Mme Lacroix,
 II.—Fireside Tales—Nos. r and 2...
 Edward MacDowall,
 Joné par Mrs. Melvor,
 III.—Sans Toi. Guy d. Hardelot,
 Chante par Mrs. Payne,
 Accompagné par Miss Mendelson,

SIR POWER PALMER.

The death is announced, from appendicitis, of The death is announced, from appendicitis, of General Sir Power Palmer, K.C.B., G.C.L.E. The South China Morning Past gives the following sketch of his career:—"The deceased retired from the position of Commander-in-Chief in India a little more than a year ago, when Lord Kitchener was able to leave South Africa. He was sixty-four years of age. He entered the Indian Army in 1857 and served during the Mutiny with Hodson's Horse. In 1863 he was in the Mohmund frontier expedition; 1867-8 in the Abyssinian war; in Acheen serving with the Dutch forces in 1876-8; in 1878-9 in the Soudan campaign; in 1892-3 in command of the Chin Hills expedition; and in 1807-8 in the Tirah campaign. In this and in 1807-8 in the Tirah campaign. In this Afghan war, he obtained his Brevet Lieutenant-Colone!cy, in the Soudan a C.B., and for the Chin Hills a K.C.B. In 1901 he was created a G.C.I.E. General Sir Power Palmer was an old Cheltonian and at the last speech day he distributed the prizes, and unveiled an Eleanor Cross and obelisk which was erected at the expense of old Cheltonians in memory of old Cheltonians fallen in South Africa."

FIRKS.

Fire broke out on the morning of March 27th at Matsuya-cho, Kyobashi, near Shimbashi, destroying eight buildings.

Early on the morning of March 28th, fire occurred at Shinmachi, Sapporo, destroying a theatre and ten dwellings. Two persons were

About the same time an outbreak of fire took place in the lactory of the Tokyo Flour Manufacturing Company, Fukagawa. As a severe northerly wind prevailed the compound, destroying five godowns, two engine houses, and two buildings, and also extended beyond the compound, burning nineteen houses. The damage to the factory is estimated at about menufed and fifty thousand yen. The cause was meandle by means thousand yen. The cause was a candle by means of which one of fifteen men who were working during the night was examining a defect in a

A report from the village of Wada, Minami-Saitama, Saitama prefecture, states that a girl was killed by a fire which broke out in her house on March 26th.

THE LAW COURTS.

Witness stated that he was employed on April 18th, 1903, by the Singer Manufacturing Com-pany and left on August 20th. He was first interpreter for two months and then became a salesman. In June, 1903, plaintiff was discharged by the manager of the firm, the latter telling witness that he was not satisfied with the work done by plaintiff. Witness did not know whether plaintiff had deposited money with the firm as personal guarantee or whether the parties had made a guarantee or whether the parties had made a promise about commission on the business done by plaintiff. Witness went to Kawagoi in June 1903 to examine the business which plaintiff carried on there. Witness made several reports and gave them to the manager but he did not reand gave them to the manager but he did not re-member now what was in the reports. Defend-ants prosecuted plaintiff in the Yokohama District Court charging him with embezzlement, but the case was settled out of Court by means of arbitra-tion and the refunding of the money by plaintiff. Witness, however, did not know the details as he

left for Niigata on office business in June 23rd.
The case was adjourned on account of the absence of defendant's counsel, though the hearing would have concluded had he been present.

A MURDERER SENTENCED.

Z. Okuđa, who was convicted of having murdered the proprietor of the Shobu-in garden, Hori-kiri, Tokyo, and then set fire to his dwelling, was sentenced to death on March 26th in the Tokyo District Court.

WADA v. BERNARD.

The hearing of this case, in which plaintiff claims yen 55, came up in the Yokohama Local Court on March 25th. Plaintiff's counsel stated that plaintiff was em-

ployed by Mr. C. B. Bernard as a cook from Oct. 1st to Dec. 6th last. During this time, plaintiff purchased daily necessaries on behalf of defendant, but the latter refused to refund the money thus spent. Counsel asked the Court for leave to examine Mrs. Bernard as a witness.

The Court decided to do so on March 30th.

Thereupon the case was adjourned.

EXAMINATION FOR PRESERVING EVIDENCE.

With regard to a case instituted by Mr. H. F. With regard to a case instituted by Mr. H. E. Reynell, Kobe, against Mr. R. Young, editor of the Kobe Chronicle, in which suit Mr. Reynell applied for the preservation of evidence, Mr. C. Carpentier, Manager, and Mr. A. Elked, sub-manager of the Russo-Chinese Bank, were examined as witnesses on March 26th in the Yokohama Local Court before Judge Kohamahi

Court before Judge Kobayashi.

The Court showed a letter to the witnesses The Court showed a letter to the witnesses which they acknowledged to be a letter sent by the Bank to Mr. Reynell. The purport of the letter was that the Bank refused a request of Mr. Reynell for a loan. The witnesses stated that they thought it would be dangerous to lend money to Mr. Reynell as they read an advertisement in the Kobe Chronicle, in March last, regarding the attachment of the property of Mr. Reynell. This advertising notice was writted over the pame of advertising notice was printed over the name of Mr. Hirata, barrister in Kobe.

The examination concluded

LIBEL CASE.

The trial of Mr. Maejima, a nominal editor of the Yokohama Shimpo, was resumed on March 28th in the Yokohama District Court before Judge Hadano, when Mr. Ishizawa, of the Harbour Police Station, was examined as a witness.

The witness stated that he did not know whether the steamers of Messrs. Dodwell & Co. carried abroad Japanese Igirls of ill-fame without passports, but there was a rumour that some ships did carry such girls. The witness could not point out which ships had carried on this business, but

to vilify the foreign firm.

The case was adjourned till March 30th when

sentence will be delivered.

concluded, sentence was given on March 30th before Judge Hadano, acquitting him. The purport of the decision was that the statements of the paper with regard to the women, who were alleged to have been carried by the steamers of Messrs. Dodwell and Company to foreign countries, were not intended to injure the reputation

The Post Office Department in Washington Paymaster Morse of the U.S.S. Wisconsin, advertisements and other printed matter. Case accused of irregularities in his commissary fund the new policy a number of papers containing questionable matters have been thrown out of the mails under the telegraphic orders to the postmails under the telegr

and tristee timer the with. After legacies of \$250,000 each to Adelaide and Bertie Randolph, stepchildren, have been deducted and provisions made for an income of \$30,000 m year for his daughter Dorothy, the bulk of the estate is left in trust, one-half of the income to go to Harry Payne Whitney, the oldest son; one-tenth to his daughter Pauline, now Mrs. Almerich A. Page; one-tenth to his son Payne, and three-tenths to his daughter Dorothy. The trusteeship is to last six years, the estate then to be divided in the same them as to its division. The authorities have interfered in the matter.

An effort is to be made by President Roosevelt to prevent the wanton destruction of elk in the United States. Congress, probably informally.

"The strangest, weirdest method of embalming ever thought of has just been patented by a Russian residing in New York State," says *Popular Mechanics.* "The corpse is to be encased in the centre of a solid block of pure glass, through which the features and outlines of the body will be perfectly visible. As no air can ever possibly enter, the remains are expected to be preserved for centuries. The inventor hopes that some day a vast mausoleum of noted and gifted men will be erected, in which it will be deemed the highest honour to be thus preserved for future generations.

nonour to be this preserved for future generations.

The mechanical process which is to make all possible, and on which the United States Government has granted a patent, is quite simple. The remains are first surrounded with a coating of sodium silicate, or water glass, which is allowed to dry. When the water has been sufficiently evaporated, the subject is placed in a mold which is to determine the size of the glass block, and molten glass poured until the mold or flask is

The Chicago Inter Ocean of Feb. 23, prints the following story: Mme. Eleonora Petrelli, once a world-renowned opera singer and widow of Prince von Petrofi of Russia, died in an

profession, until at the Russian court in St. Petersburg she became the wife of Prince von Petroff, a Boyar nobleman. Then began the series of misfortunes which eventually left her adrift as a poor teacher of music in Chicago at the age of 87 years. The singer had won fame under the name of Mme. Petrelli in three royal opera companies. The name was assumed for stage opera companies. The name was assumed for stage purposes and is Italian for Petroff, the name of her royal husband. Her father was the Countess von Schwerin. Mme. Pettrelli's name when a child was Eleahore Weigand. She was descended in a direct line from the Grand Duke of Mechlenburg and the Rev. Dr. Count von Schwerin, at one time the most noted man in Scandinavia.

An eight-hour day has been established in twenty-seven states and territories, as we learn The Post Office Department in Washington has begun a crusade against the printing of objectionable advertisements and stories in newspapers and periodicals throughout the United States. The action is based on Section 3893 of the Revised Statutes, which impose a fine of not exceeding \$5,000 or imprisonment for not over five years, or both, for any person depositing in the mails or aiding in circulating through the mails, any obscene print, pamphlet, etc. It is proposed to amend this law to include vulgar advertisements and other printed matter. Under the new policy a number of papers containing ment to the contrary. Eight hours are declared to constitute a day's work for labourers on road work in Missouri, New Mexico and Tennessee, and in mines and smelters in Arizona, Colorado, Missouri, Montana, Nevada, Utah and Wyoning. Eight hours are prescribed as the maximum day's The will of the late William C. Whitney was filed for probate in Mineola, I.I., on Feb. 24. Mr. Harry Payne Whitney is made sole executor and trustee under the will. After legacies of United States provides for an eight-hour day on United States provides for an eight-hour day on government work. .In Massachusetts nine hours constitute a day's labour for all labourers on public works, but an eight-hour day for public employees is provided for cities and towns accepting the provisions of acts passed in 1899 and 1900.

AOYAMA GAKUIN, TOKYO.

The Graduation Exercises of the School of Theology, College and Academy, which together constitute Aoyama Gakuin, were held on Monday. Although the day was unfavourable, there was present a large attendance of friends of the Institution. Three graduated in the English course of Philander Smith Biblical Institute, five from the College and sixteen from the Academy. Addresses were delivered by Bishop Moore, who has Episcopal supervision of the Methodist Epis-copal Church in China, Korea and Japan, and Baron Kikuchi, ex-Minister of State for Education. In the evening eighty-four plates were laid for the annual gathering of alumni.

At this meeting, several encouraging facts announced showed the progress of a year.

The Biblical Institute has been recognised by

the Department of Education as a Semmon Gak-ko. It is still hoping that soon it will form part of a Union Theological School for the five Metho-

of a Union I neological school for the live international sin Japan.

The privileges, for a time withheld from the Academy because of the Instruction forbidding religious teaching, have been restored and its graduates may now enter the Koto Gakko, as well as other schools of similar grade upon the same conditions as graduates of regular middle

Middle school graduates who complete the college course may obtain, without further examination, a license for the teaching of English in Middle, Normal and Girls' Higher Middle schools.

The fact that the receipts for tuition during

Episcopal Church founded in Yokohama the school to-day established on the spacious grounds at Aoyama. With generous provision for much needed buildings, with Government privileges restored and with fullest religious liberty Aoyama. Gakuin, deeply thankful for the past and full of bounding hope for the future, celebrates her quarter-centennial. - Communicated.
